COMMENT

contest closed*

If you wish to enter this contest, you must not have any other user help in any way. Everything but my logo has to be colored with decolayer. The gun that looks the will receive a trophy. The user in second or third place will receive siver and bronze trophies. The final judging will take place on 12.24.12.

* #concept raygun

Scores graded on a scale of (N/500)

If you can change the target, you can earn extra points!

winner gets to feat here!

Erase Anything! Except Wall

Tutorial

1. draw something

2. draw clne or bcln(PCLN,PBCN)

3. CLNE or BCLN(PCLN,PBCN) 's ctype (EMBR)

4. erase something

0xDEADBEEF!

Just SPRK the T button
Cannon History
K

in a far version before this version of the powdertoy we had the "wheel" look like this:

it can spin around like this:

when there is a pressure

but that is not all what if we have a button, that give us the power to connect powders to each other

dis-connect

disconnected from background

connect

disconnected =

connected =

disconnected from background =

HERE IS THE GREEN SOLID
BLUE IS THE MOVEBLE
RED IS FREE

THEN THE WHEEL CAN SPIN!!!

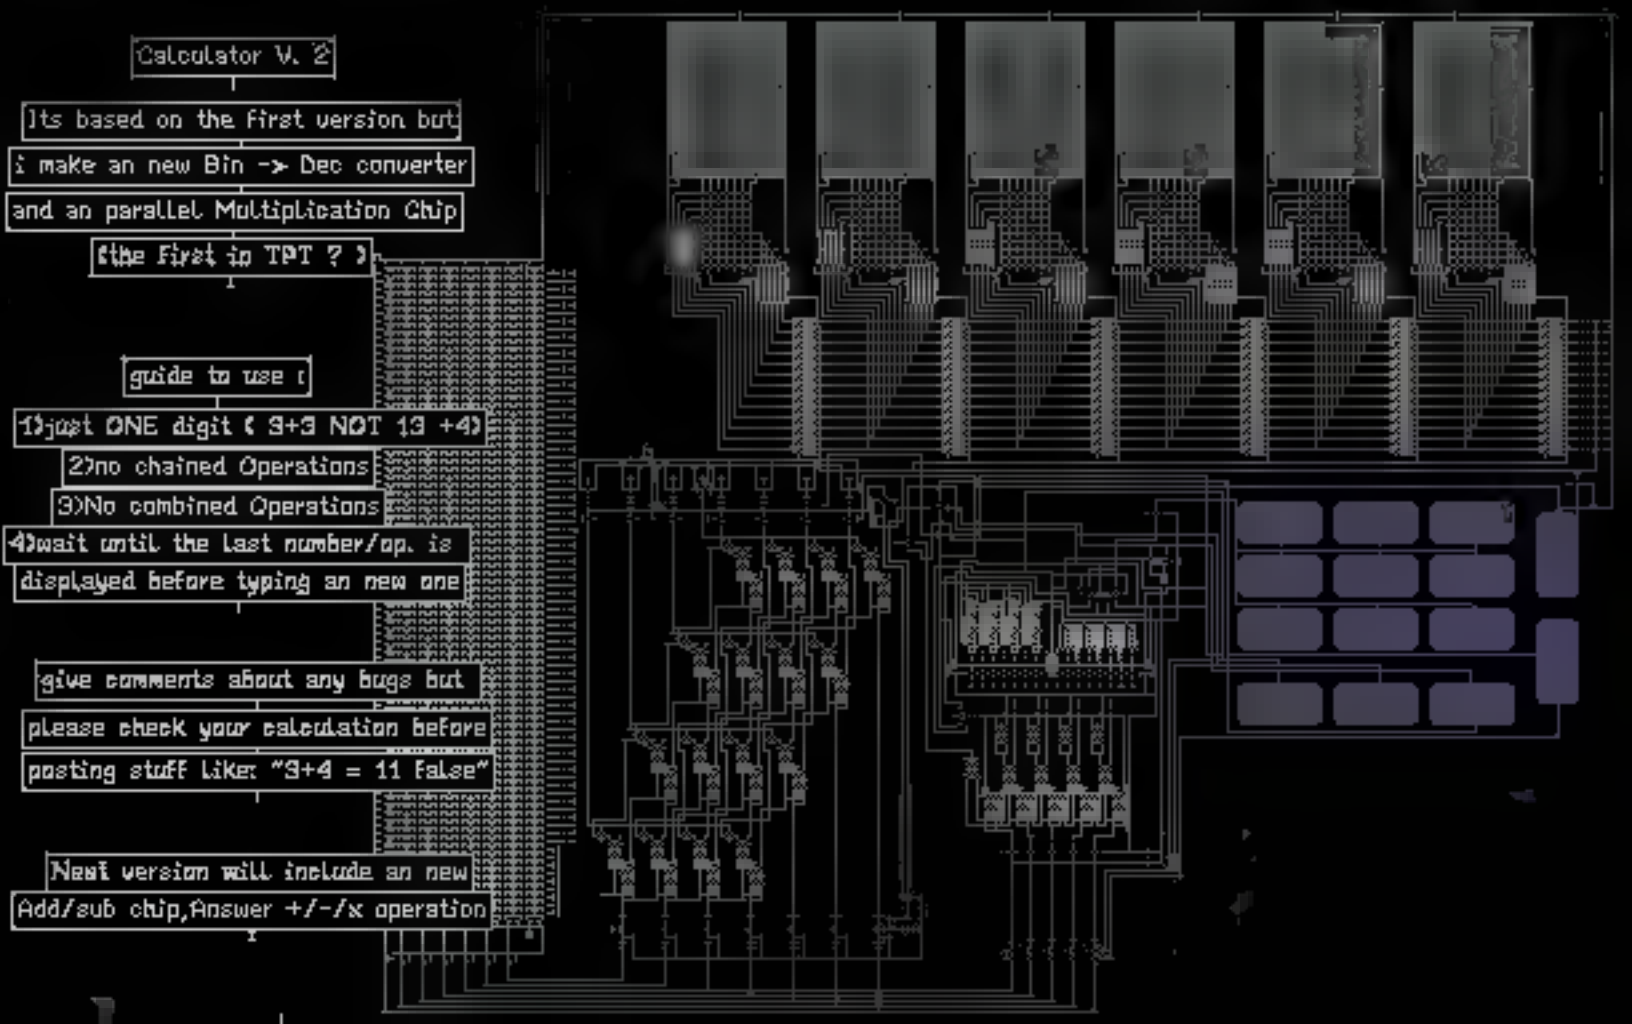
make neutrons
can sombody do this again ?
the pressure is sometime on 260



Calculator V. 2
Its based on the first version but
i make an new Bin -> Dec converter
and an parallel Multiplication Chip
(the first in TPT ?)
guide to use :
1)just ONE digit (9+9 NOT 18 +4)
2)no chained Operations
3)No combined Operations
4)wait until the last number/op. is
displayed before typing an new one
give comments about any bugs but
please check your calculation before
posting stuff like: "9+9 = 11 false"
Next version will include an new
Add/sub chip,Answer +/-/x operation

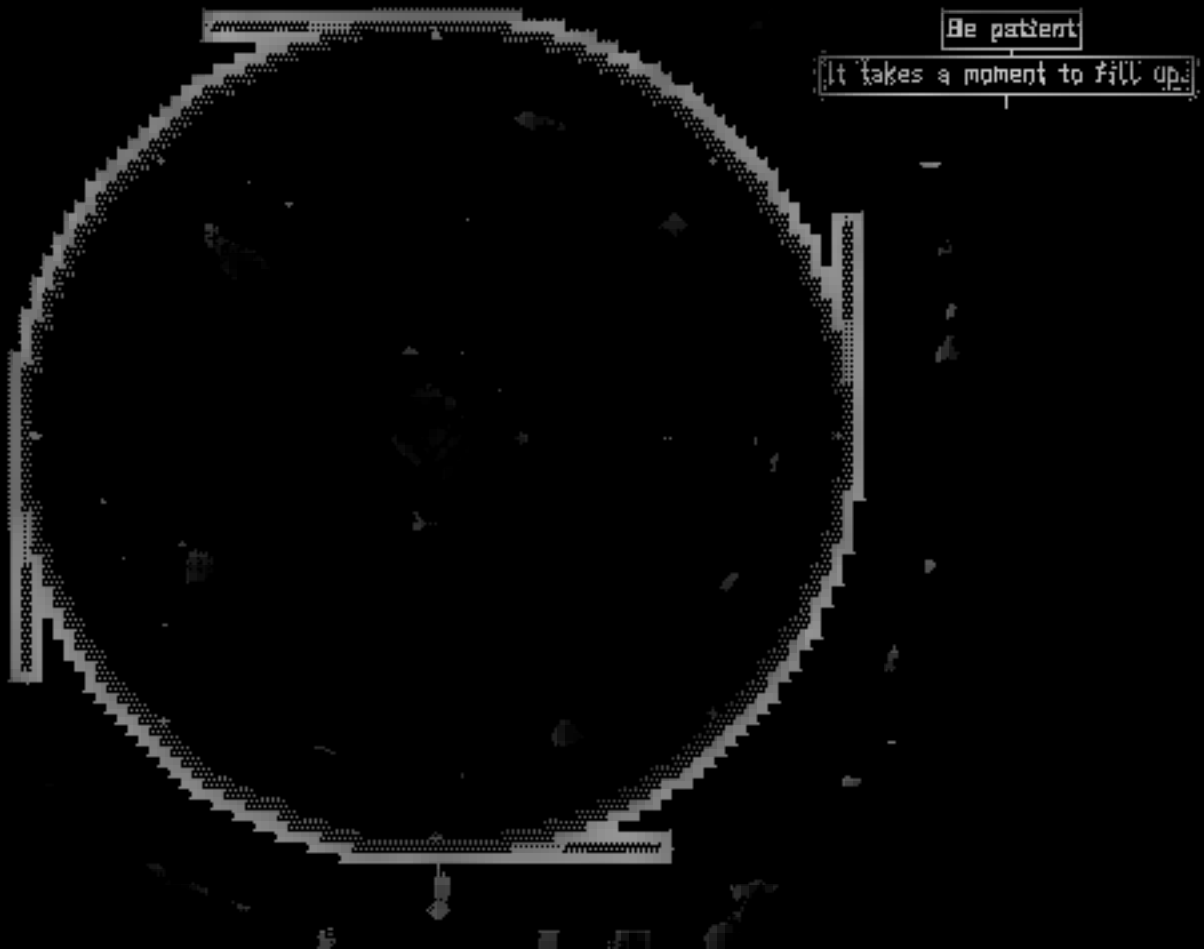
I can see up to 13 just fine
U.S.A.S.F. BASE
Washington
Power!
FAIRCHILD

TPI used to be a great game/simulator. But now the majority of saves are giant, useless bombs, or art that is worse than my 8 yr old brother's. I know my saves are not that great, but at least I put effort into them. This is becoming a problem. What needs to happen is a way for people to choose what saves are viewed. This way, the people who make such horrible saves can keep doing that, but people don't have to view those saves

please take this into consideration, and leave comments with any questions



Be patient
It takes a moment to fill up.

4k views. Yay.
Original

this weapon operates at (it would in real life) 65Ghz, however my version operates at 25Khz, making it more penatrative and causes more heat, a simmilar frequency to a microwave. these energy waves cause water molecules in our body to resopate, which generates friction, and in turn generates huge ammounts of heat

all credit to ParadisE for human and credit to Benassi i guess.....

TPT COMMUNITY GUN CONTEST 161

BOYS VS GIRLS

Registration fourm:

- thespazz's gun
- asgg's gun
- asgg's other gun
- TylerSteven's gun
- Tatr's DMG gun
- Tatr's Laser gun
- Tatr's DMG proto.
- PinazB's laser gun
- GPRU's spy gun
- TheUltimateNinja's gun
- epicface40's gun
- epicface40's laser
- JanHenrik's laser
- warfar12's laser
- IronRhino's pressure gun

Judges:

- mb6872
- xXBOSSXx
- Kikinicij

You can get a total of 100 points for a perfect score.

RULES:

You can make any type of gun and that does not include RPGs.

1. You MUST ask in the comments to join the contest.
2. You MUST put the type of gun you created in the save.
3. The ONLY thing the save is allowed is personal logos, and the gun.

ALSO:

Once your accepted into the challenge, your username will be put in the Registration fourm.

You are allowed a maximum of 3 signs per save, one save per user.

Any violation or non-cooperation of these rules will result in disqualification unless the majority of judges agree to "let it slide." -Kikinicij

Spark the green part of the gun!
This makes things look clean and kills germs! only $1119.99

TPT Kainus
PROFESSIONALS
Original comic
"I'm not in this group lol
Homepage
Spark the red button to blow
the nuclear weapon!

Accelaser MARK 2!

The Accelaser by PTuniverse!

The Accelaser can heat at max and accelerate its beam at the same time.

VI/creation chamber. 900-1100 ℃

Press the ON button! #facepalm#

Final acceleration barrel. 9.2K-9.5K

Main heating barrel. 7850-8100 ℃

Turn ambient heat off.

Vaçuum technology gives it a good start at heating, Won't heat well.

The main heating barrel uses all-continious heating but only little acceleration.

The final acceleration barrel maxes heat and acceleration.

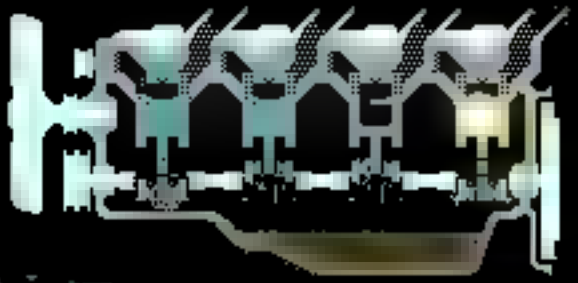
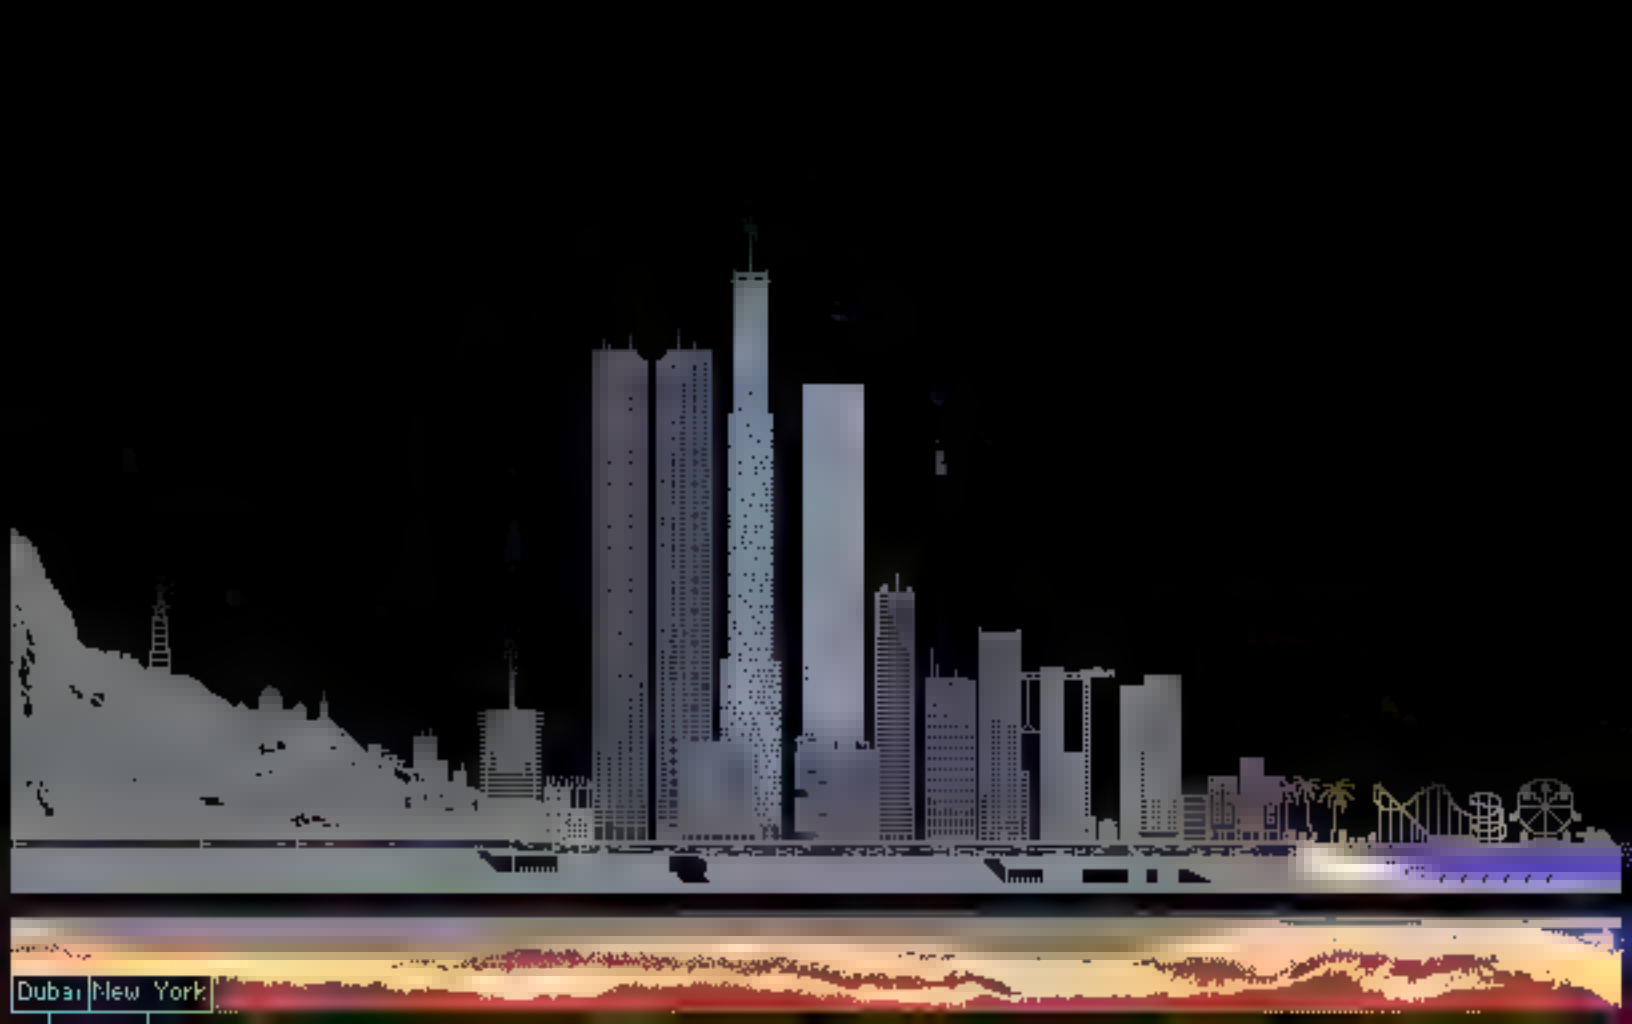
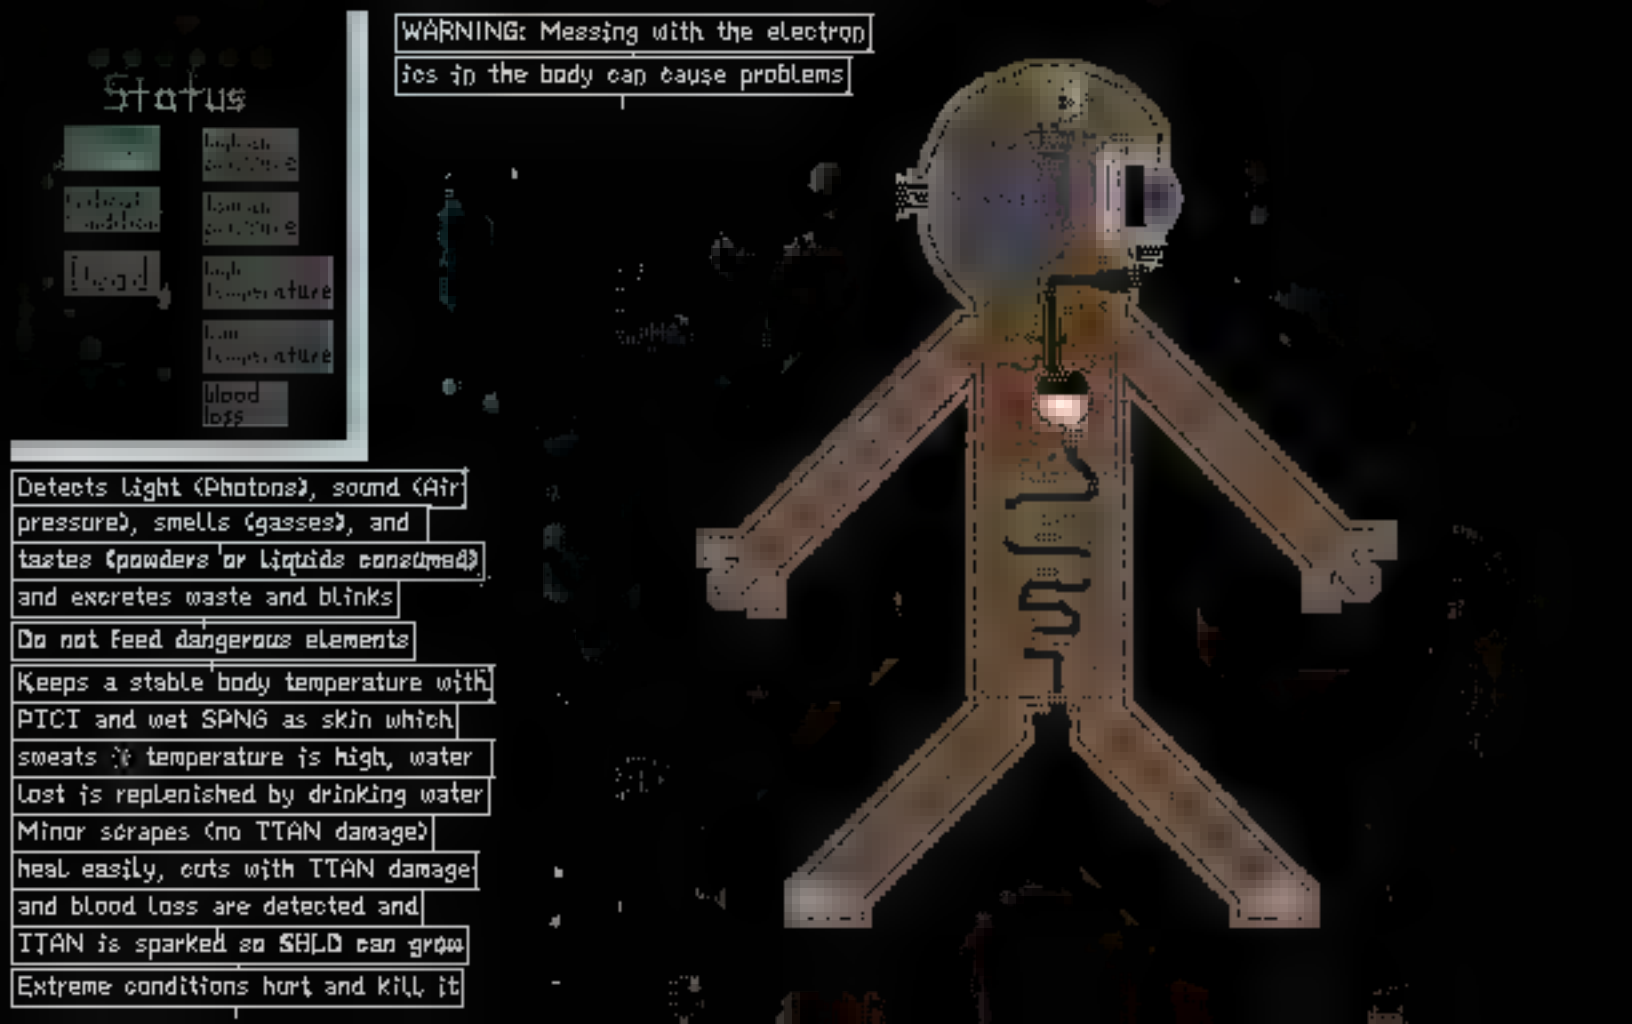
This was made before pistons!





Dubai
New York



Status
Blood loss
WARNING: Messing with the electron
ics in the body can cause problems
Detects light (Photons), sound (Air
pressure), smells (gasses), and
tastes (powders or liquids consumed)
and excretes waste and blinks
Do not feed dangerous elements
Keeps a stable body temperature with
PICI and wet SPNG as skin which
sweats if temperature is high, water
lost is replenished by drinking water
Minor scrapes (no TTAN damage)
heal easily, cuts with TTAN damage
and blood loss are detected and
TTAN is sparked so SHLD can grow
Extreme conditions hurt and kill it

TNT

Air isn't just pure oxygen, It's made up of several gases including:

Nitrogen (78.09%)

There is no nitrogen so I used HYGN

Oxygen (20.95%)

Argon (0.95%)

Again, no argon so i used NBLE

Carbon Dioxide (0.03%)

and other gases (0.003%)

I used 3 dots of GAS to simulate the other gases.

Also, water vapour (steam) is present, but in varible amounts. but I didn't put any in.

WARNING! unless your CPU is really fast, DO NOT UNPAUSE!

with the amount of layers ive used...
i have managed to keep exposure
down to at least : per 1,000
thusly, i say it be a selectively permeable wall.
P.S. blocks all pressure due to ttap.
this is NOT to test nukes with.
this is NOT bomb resistant, or high
heat resistant wall. this wall is
SPECIFICALLY designed to block
RADIATION only. NOT bombs. NOT
extreme heat.

This is FREE TO COPY piston-engine power unit. It includes engine, cooler system, and transmission.

Spark ON/OFF to turn engine on/off. Spark "A" for acceleration. To change your gear, first spark "S"

"S" simulates coupling pedail. Then spark "N"-it simulates neutral gear, and only after this 2 actions spark

the number of gear that you need. You should do it fast, to avoid short circuit in transmission!

If you even so have short circuit in transmission, just spark "S" and "N" to fix it!

Hope you will like it, enjoy!

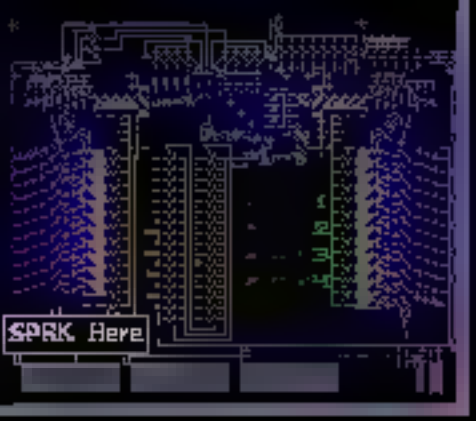
Epic Lights

Thermite is made of a fine mixture of two compounds, Aliminium Dust and Iron Oxide (rust).

When they heat up, a powerfull but short lasting reaction takes place, resulting in a very High heat, about 2500-3000 degrees Celcius (Very hot).

There are actually several types of thermite, some are made with Iron Oxide but other Oxides can also be used.



STOP only stops when boxes have complete, prevents new boxes.

PAUSE suspends all production until START is sparked again

Takes some time for EXOT generation to complete.

Sometimes the save breaks.

No idea why.

How to make moving solids!
1. Press ~ and type in tpt.el.xxxx.gravity=6
2. Type tpt.el.xxxx.falldown=1.
(xxxx=your element[must be a solid])
Try it with ANY solid element!
To change it back, type the codes again but change the 1's to 0's.
-USES-
Bcol, that's actually regular coal!
Falling TNT!
Liquid btry! (Battery acid?)
It's not a perfect moving solid, it just acts like a powder.
To make it a liquid, change the 1 to a 2!

Cell

Cozmic

This seems to be a common want from TPI players everywhere.

Check out elementdiederas

It is called DIRT and is a powder.

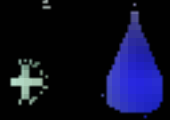
Mud - a liquid

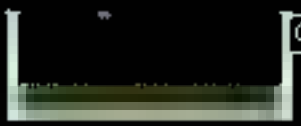
Would act like water because plants would be able to grow in it but it would not be able to evaporate.

IF mixed with water, it becomes...

Would act like BIZR in that it stains things with its color.

Can be frozen and would be FNMD.





When baked at 350.F or higher it becomes brick.

at 1075.F

When melted, it would become sand and stone mixed together when it cools and would not be able to be turned back into dirt.

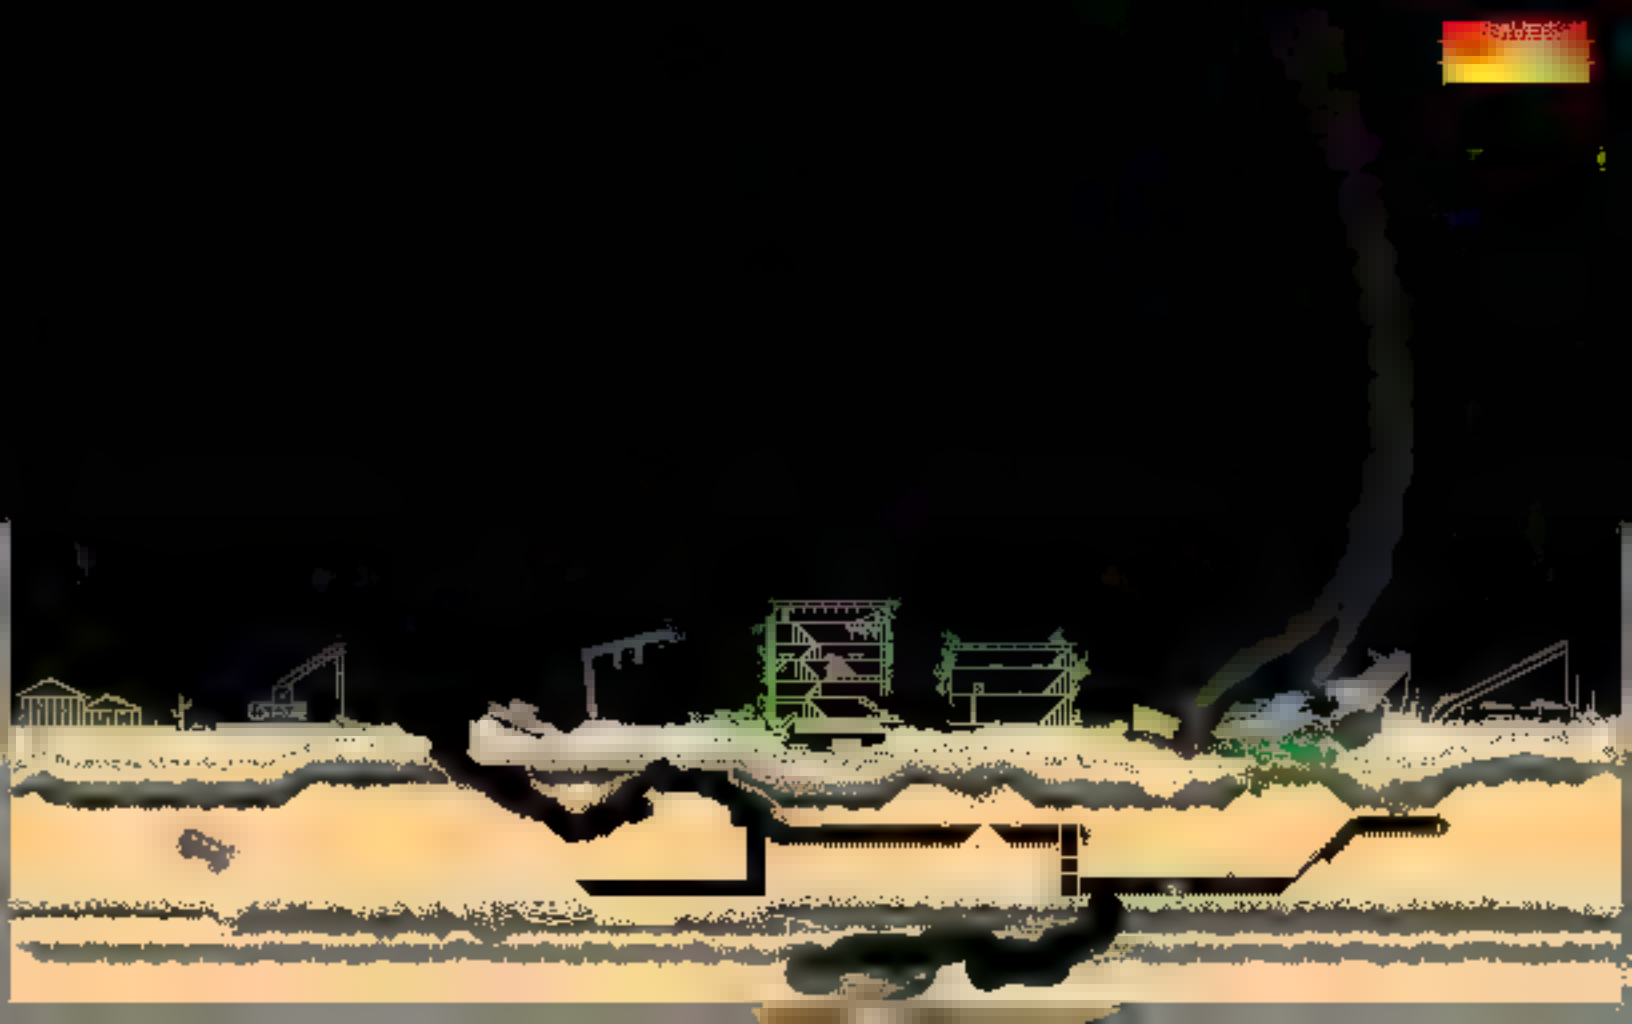
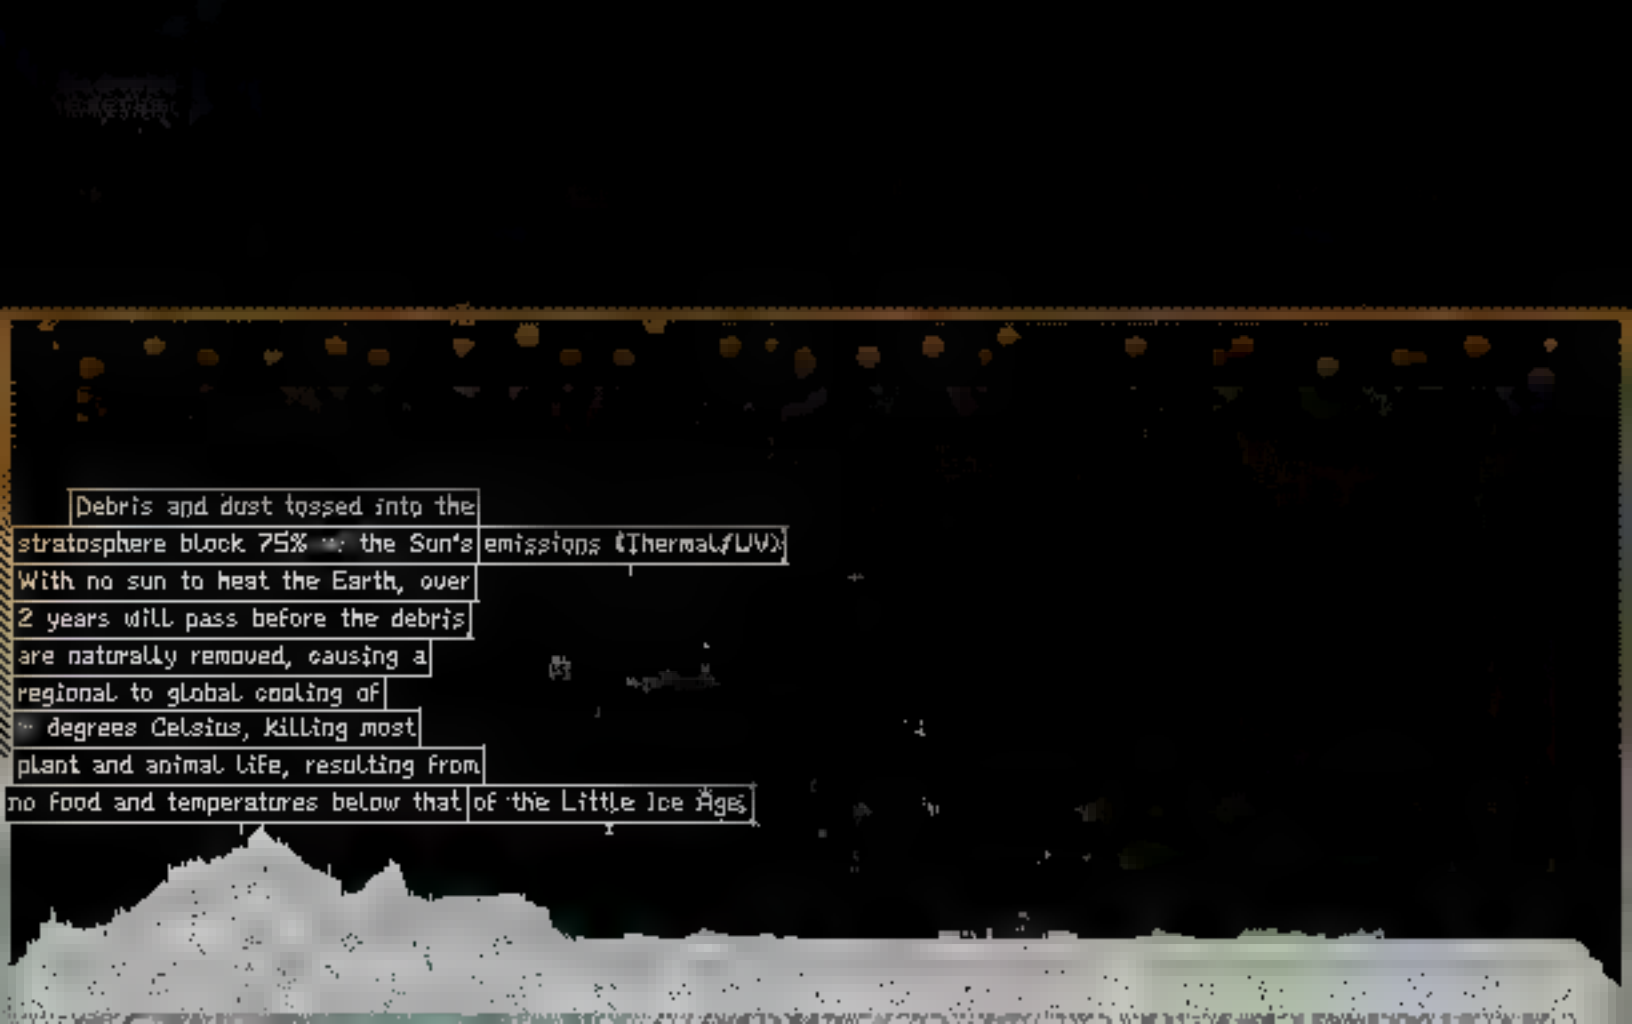
SLASH!!!

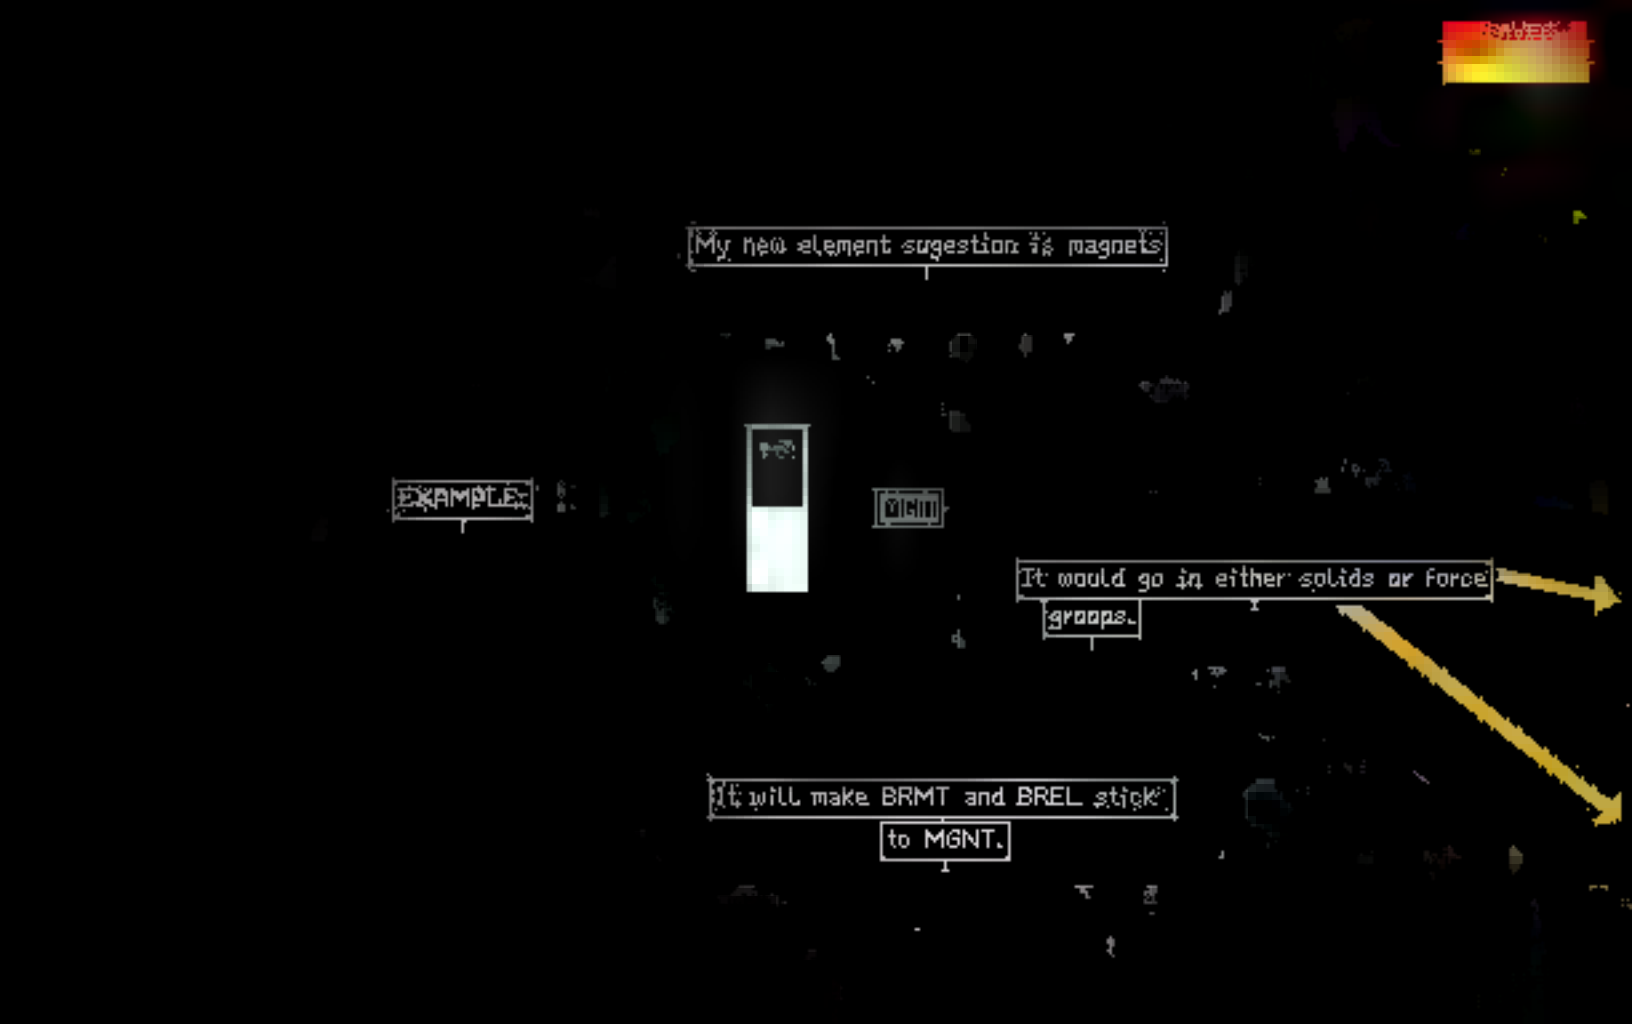
Who the hell are you?

I'm your worst nightmare





Debris and dust tossed into the
stratosphere block 75% of the Sun's emissions (Thermal/UV).
With no sun to heat the Earth, over
2 years will pass before the debris
are naturally removed, causing a
regional to global cooling of
~ degrees Celsius, killing most
plant and animal life, resulting from
no food and temperatures below that of the Little Ice Age.



My new element sugestion is magnets
EXAMPLE:
MGNT
It would go in either solids or force groops.
It will make BRMT and BREL stick to MGNT.

I think its about time I go ahead and make one of those 'its hard to get
anyone to notice your saves' saves.
:| It just seems like the worst things are getting fp all the time because
of luck and no effort. These are some of my hard made saves. I made them each BY HAND including the
city below I just wish that people could see things as they are, good saves, so I've decided to do this. You
post your id : some : your saves and I and hopefully others will check them out. I will try to give some
contructive criticizim and help get it noticed. It can only get better. ;)

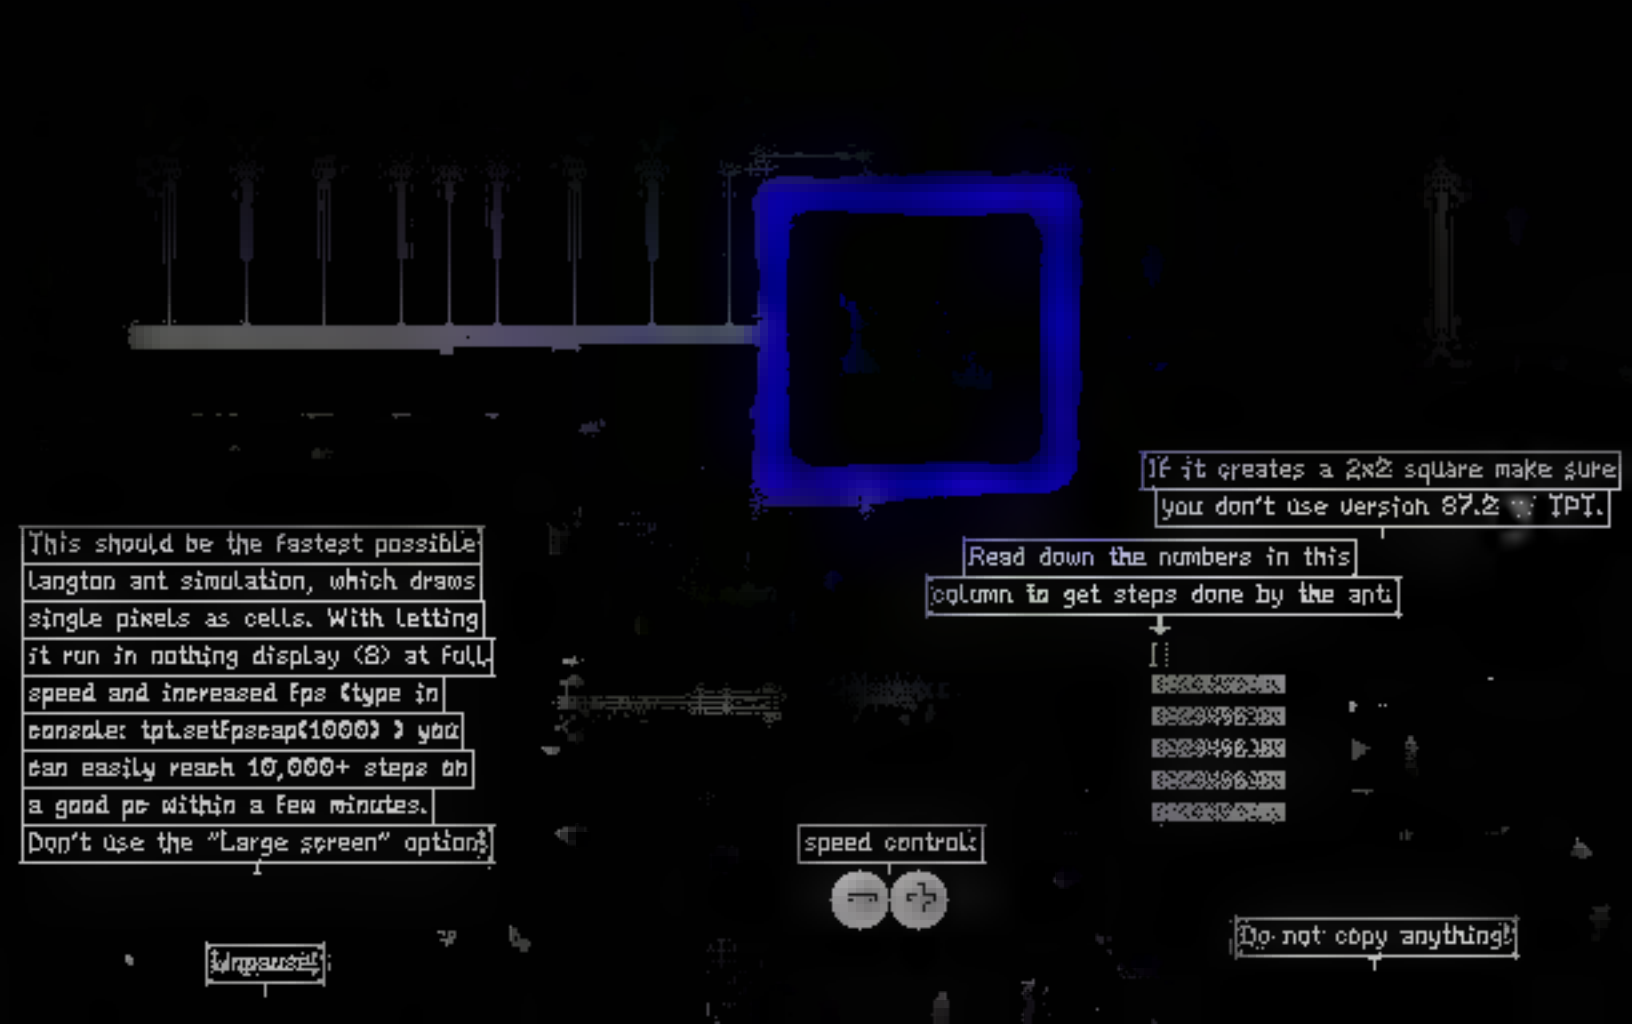
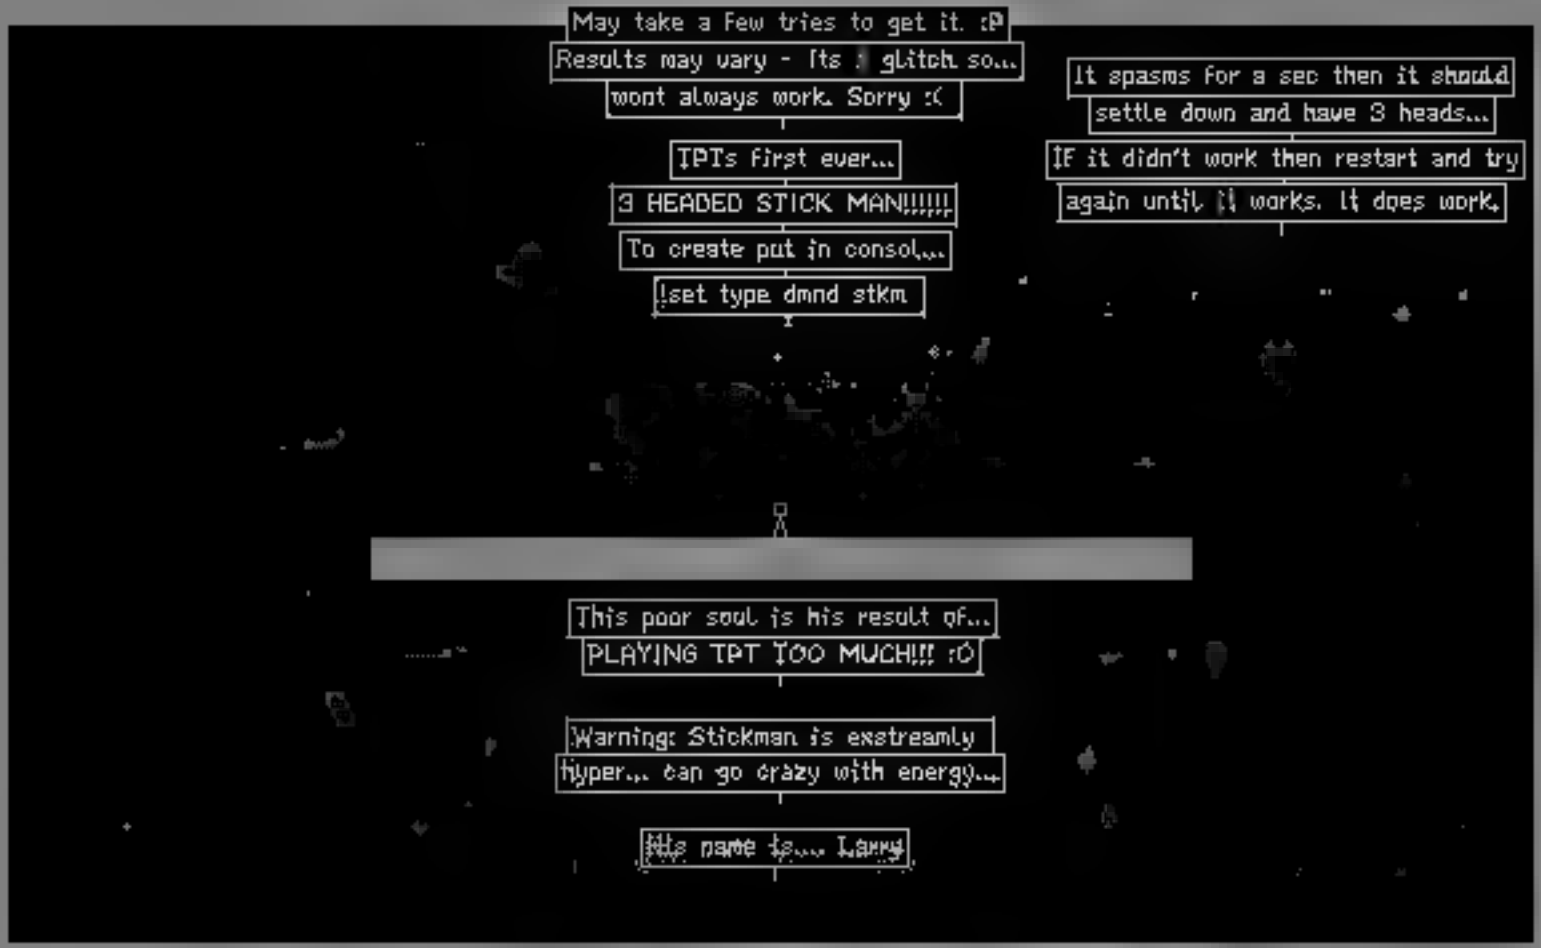
Remove New ,,Laser" IF you want to
use it. they can't work nearby
Poor Tong, Just Look At This Power
Update! Two stages heater!
Battery .Is Like ICE
ON



This should be the fastest possible langton ant simulation, which draws single pixels as cells. With letting it run in nothing display (8) at full speed and increased fps (type in console: tpt.setfpscap(1000)) you can easily reach 10,000+ steps on a good pc within a few minutes.
Don't use the "Large screen" option!
If it creates a 2x2 square make sure you don't use version 87.2 of TPT.
Read down the numbers in this column to get steps done by the ant:
speed control:
Unpause!
Do not copy anything!



May take a few tries to get it. :P
Results may vary - Its a glitch so...
wont always work. Sorry :(
TPTs first ever...
3 HEADED STICK MAN!!!!!!!
To create put in consol...
!set type dmnd stkm
It spasms for a sec then it should
settle down and have 3 heads...
IF it didn't work then restart and try
again until it works. It does work.
This poor soul is his result of...
PLAYING TPT TOO MUCH!!! :O
Warning: Stickman is exstreamly
hyper... can go crazy with energy...
His name is... Larry

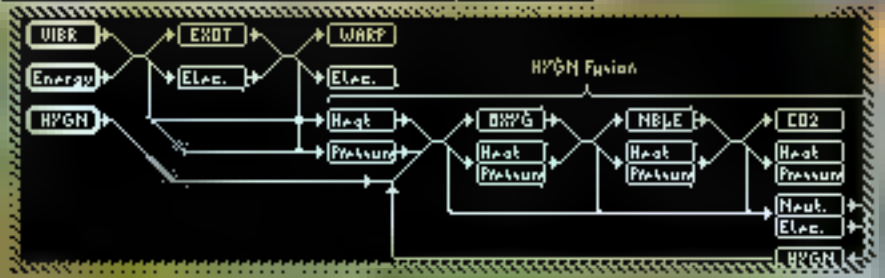
ELECTRIC

This bomb first lets the VIBR explode inside the hull, creating EXOT and ELEC, the ELEC will make the EXOT explode and create WARP. The WARP breaks the hull, when it gets out, HYGN will be created by some BCLN inside the bomb, starting fusion.

If the bomb is in a closed area, the fusion will grow and create extreme heat and pressure.

Overcomplicated graphic nobody can understand



Homepage

Same melting properties as TUGN

Slightly higher melting point

OBSD

Obsidian

Resistant to ACID

When in contact with PHOT, it will act like QRTZ and GLAS in an alloy.

Please Make this! I know most of you guys want it!

Check out my newest save for more!

Another cool save!

POBS

Texture

Same breaking properties as QRTZ

Takes ALOT of pressure to break.

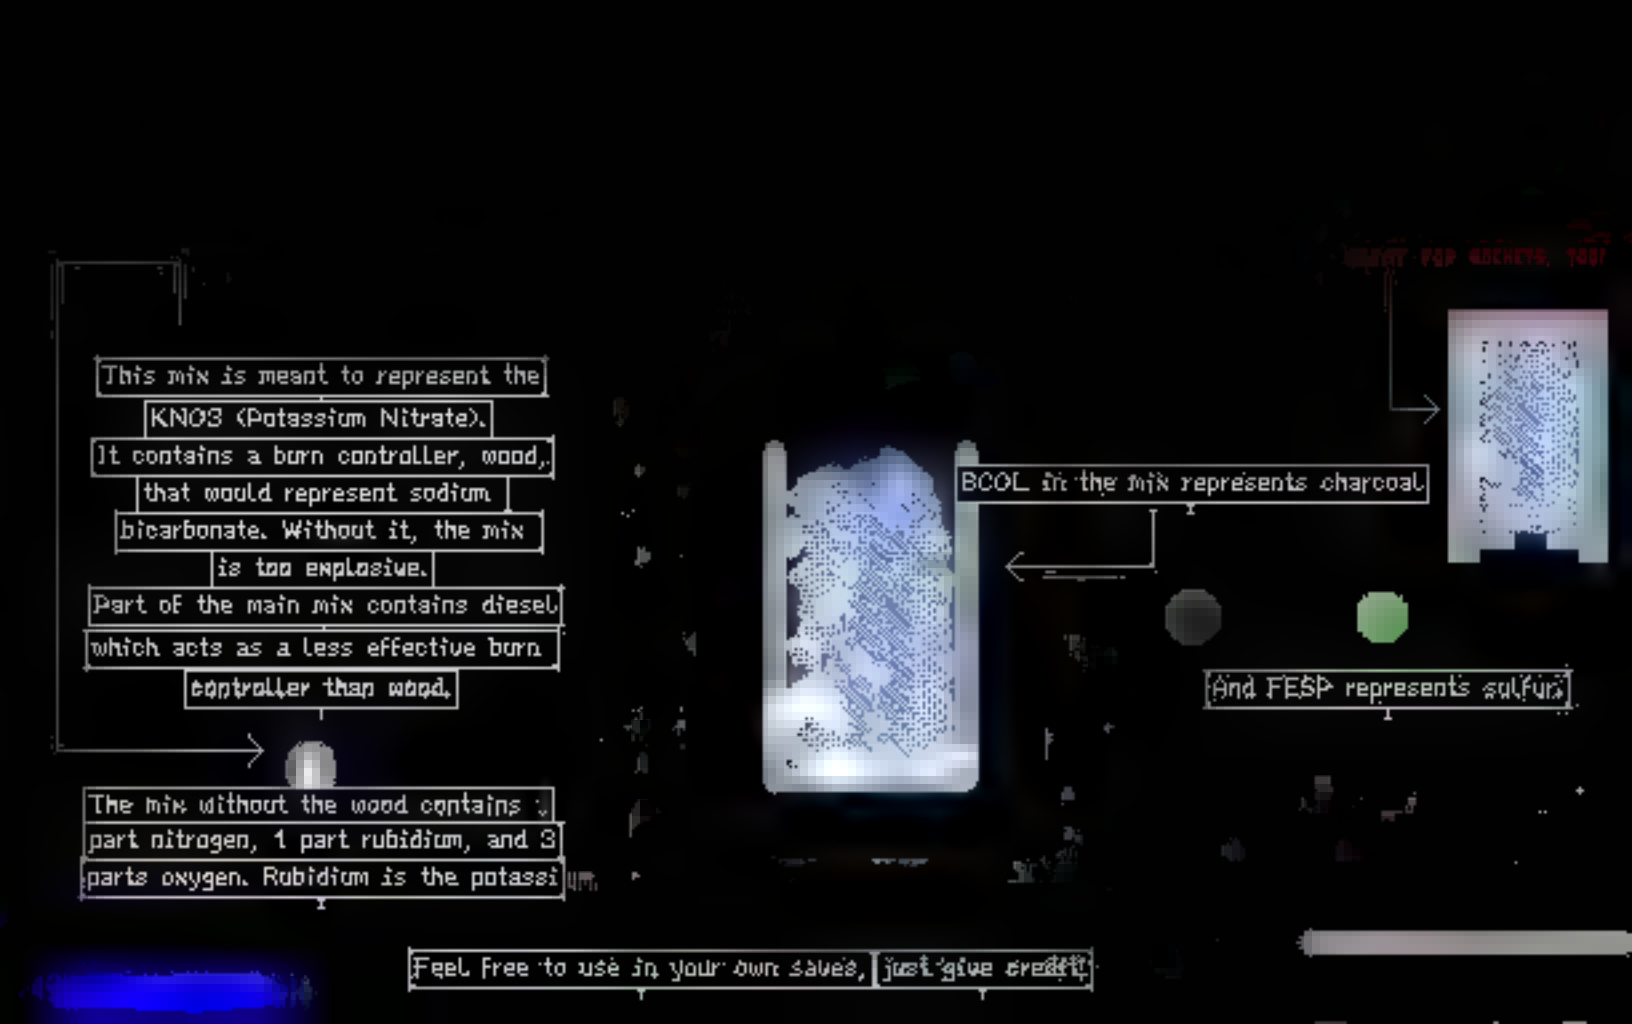
THE POWER MASTERS



This mix is meant to represent the KNO3 (Potassium Nitrate).
It contains a burn controller, wood, that would represent sodium bicarbonate. Without it, the mix is too explosive.
Part of the main mix contains diesel which acts as a less effective burn controller than wood.
The mix without the wood contains 3 part nitrogen, 1 part rubidium, and 3 parts oxygen. Rubidium is the potassi
BCOL in the mix represents charcoal.
And FESP represents sulfur.

The FGAN 2.0

The FGAN 2.0 is different from the original FGAN in the sense that uses a pipe grid rather than BPEL

There are no limitations although bit slow, in the case of a special reactor, I would use the FGAN 2.0

FGAN 2.0 Pause/play gas physics

Vertical gravity, gases have weaker properties of their particles, such as falling, floating, rising, etc

have draw decorations on

to start spark the small lever next to the little stick man near the engine

NIPPY L.T.D

UPDATE:

>Added gun at the front

spark the cannon handle to fire

>Added two smaller ships

please comment on what i should add

the naming contest has finished and it is now called the HMS Horizon

Press and hold z to zoom in.
Click when in the right spot.

Draw 2-5 pixels in a line
Any more than 5 creates a black hole
The first pixel you draw will be at the bottom, the last will be on top.

In the console, type !set s all 300

You now have 1 pixel layered particles

Do Ctrl+c and select the pixel.

Do Ctrl+v then press up and place the pixel above the other one.

5. Ctrl+c and Ctrl+v and use the arrow keys until you hav the size you want

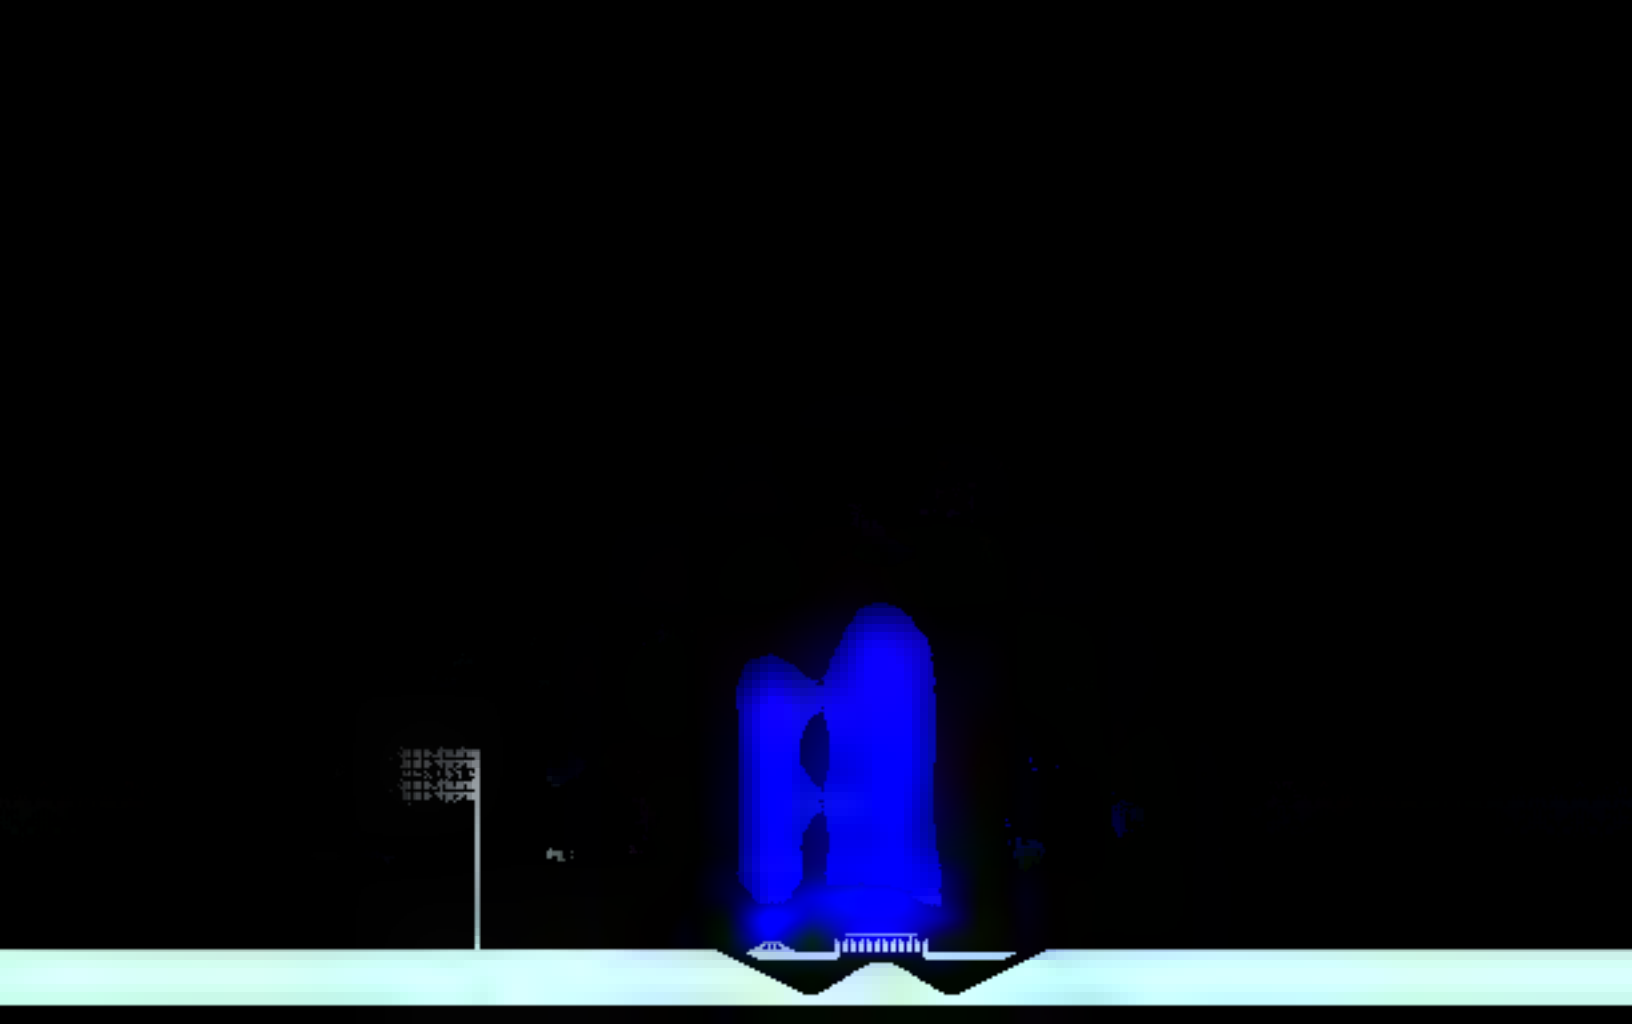
But you can use this principle

try to make a robot or mech type thing.it must be as strong as possible.submit entrys in the comment each layer of the wall must be different.so an example could be titan tung goo gel. the smaller the better.try to make it look cool. i will test it with different things like pressure,heat and so on.

entries:0

my entry:

it must fit this stickman inside



retry the bomb if it lasts short

Tutorial for piloting stickman with rocket boots and no gravity
Firstly, press forward.
Then press left or right.
It's all :)
Stickman goes up.
Stickman rotates.
Oh, and don't hold forward. Stickman will accelerate too fast.
When you hold left and right, stickman stops.
P.S. If stickman stops, press forward again.

Thanks to Hydraxon45 for finding the highest duet threshold

Fusion Reactor MK-3

Homepage

UNIVERSITY OF TWENTE.

GREEN = TURN ON
RED = TURN OFF

Updater co2 to oxyg catalyst in the chimney and DC>AC converter

The reactor fuses hygn into nble, nble into co2 and some ⁻: the co2 to oxyg

the electricity is produced from phot created during the fusing and the produced heat

The hygn is produced by desilting sltw, electrolysis and reversed distillery

co2 is weird to be produced in fusion. So just imagine it's carbon in gas state or anything

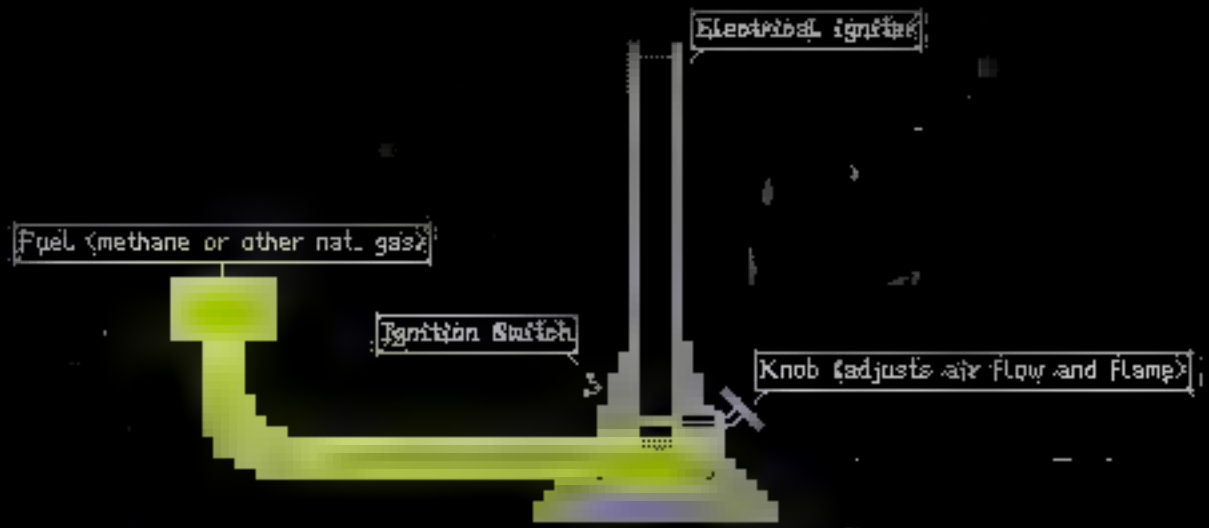
At least one colour must be on!

Apply SPRK on one beside then just wait for the electrics to kick in

SPRK again to off unless there's an Off button already (i.e., for beam)

No need to off when switching beams



Electrical ignitor
Fuel (methane or other nat. gas)
Ignition Switch
Knob (adjusts air flow and flame)

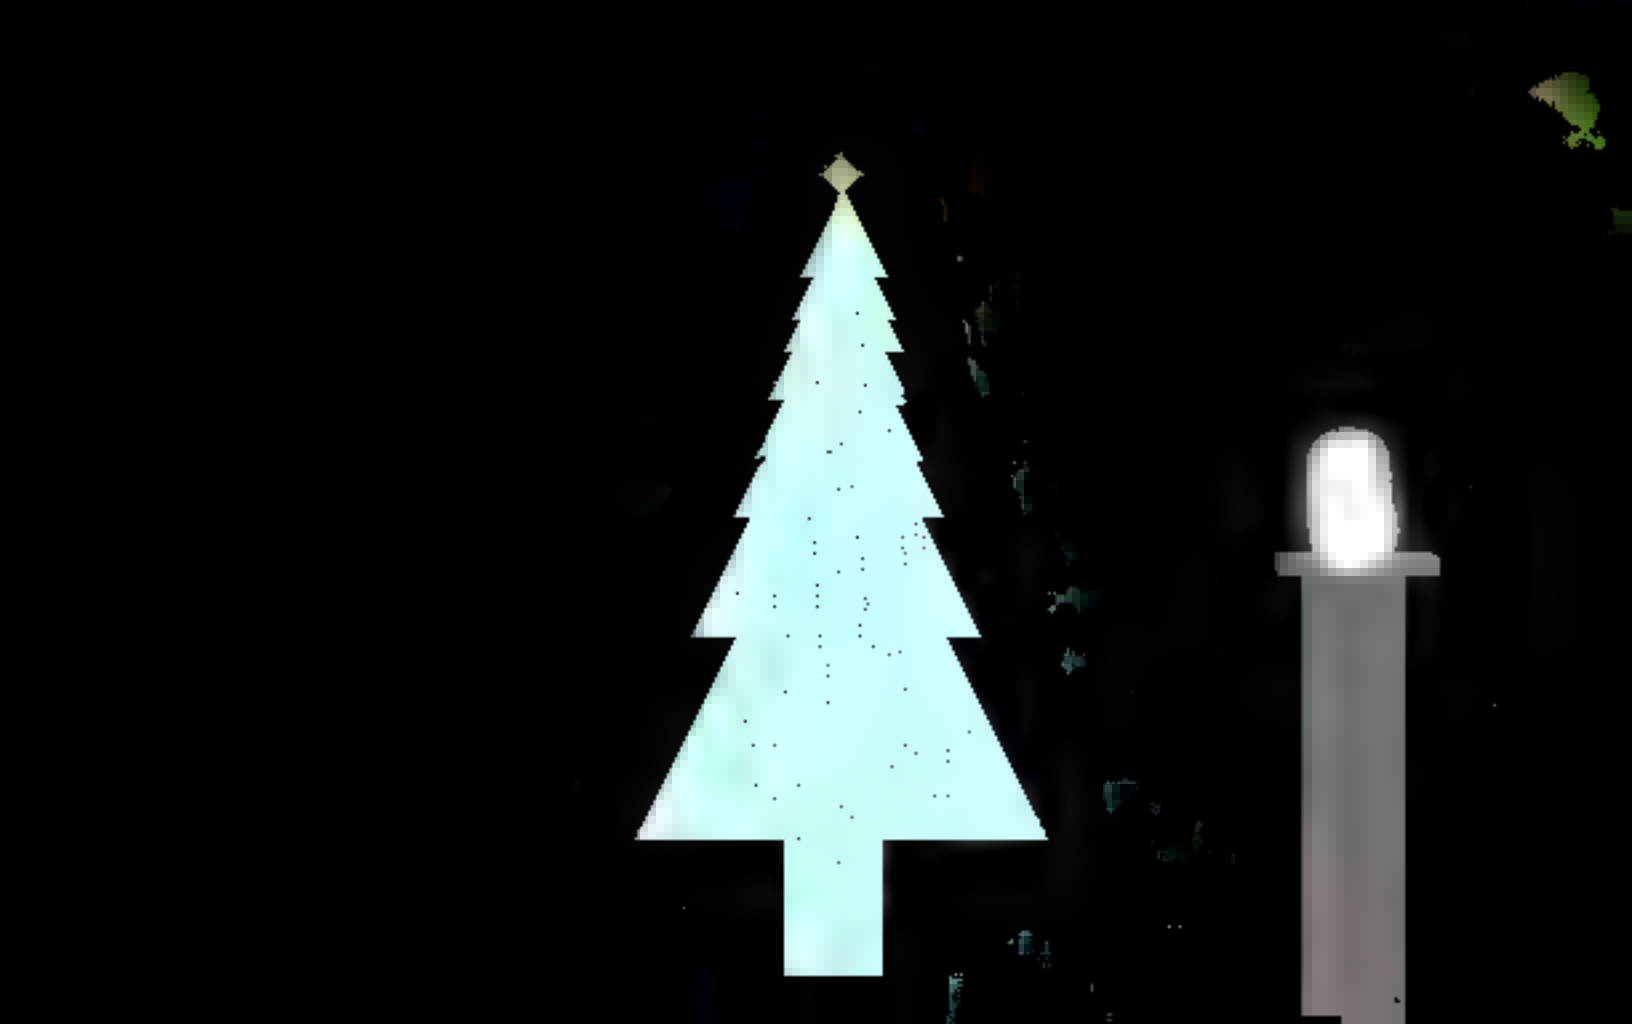
High Pressure
Negative Pressure
Spark the buttons
Buttons from top to botton: off, equalize with atmosphere, on
Spark these to open/close doors



This allows you to have pipe-within-pipe!

Tutorial:

1) Draw some 1-pixel thick pipes.

2) Cut-and-paste them together.

3) Add something on the end and make walls down the sides of the pipe.

Notes about 1-pixel pipes:

Corners must be d[illegible] like this:

NOT like this:

Diagonals follow the same rule:

Thanks for FFFF

Unlike normal bridges which use only CNCI and ANAR, this bridge builder adds an additional layer of GEL to stick the other materials together.

That allows the bridges to have loose ends without collapsing, but still not using solids.

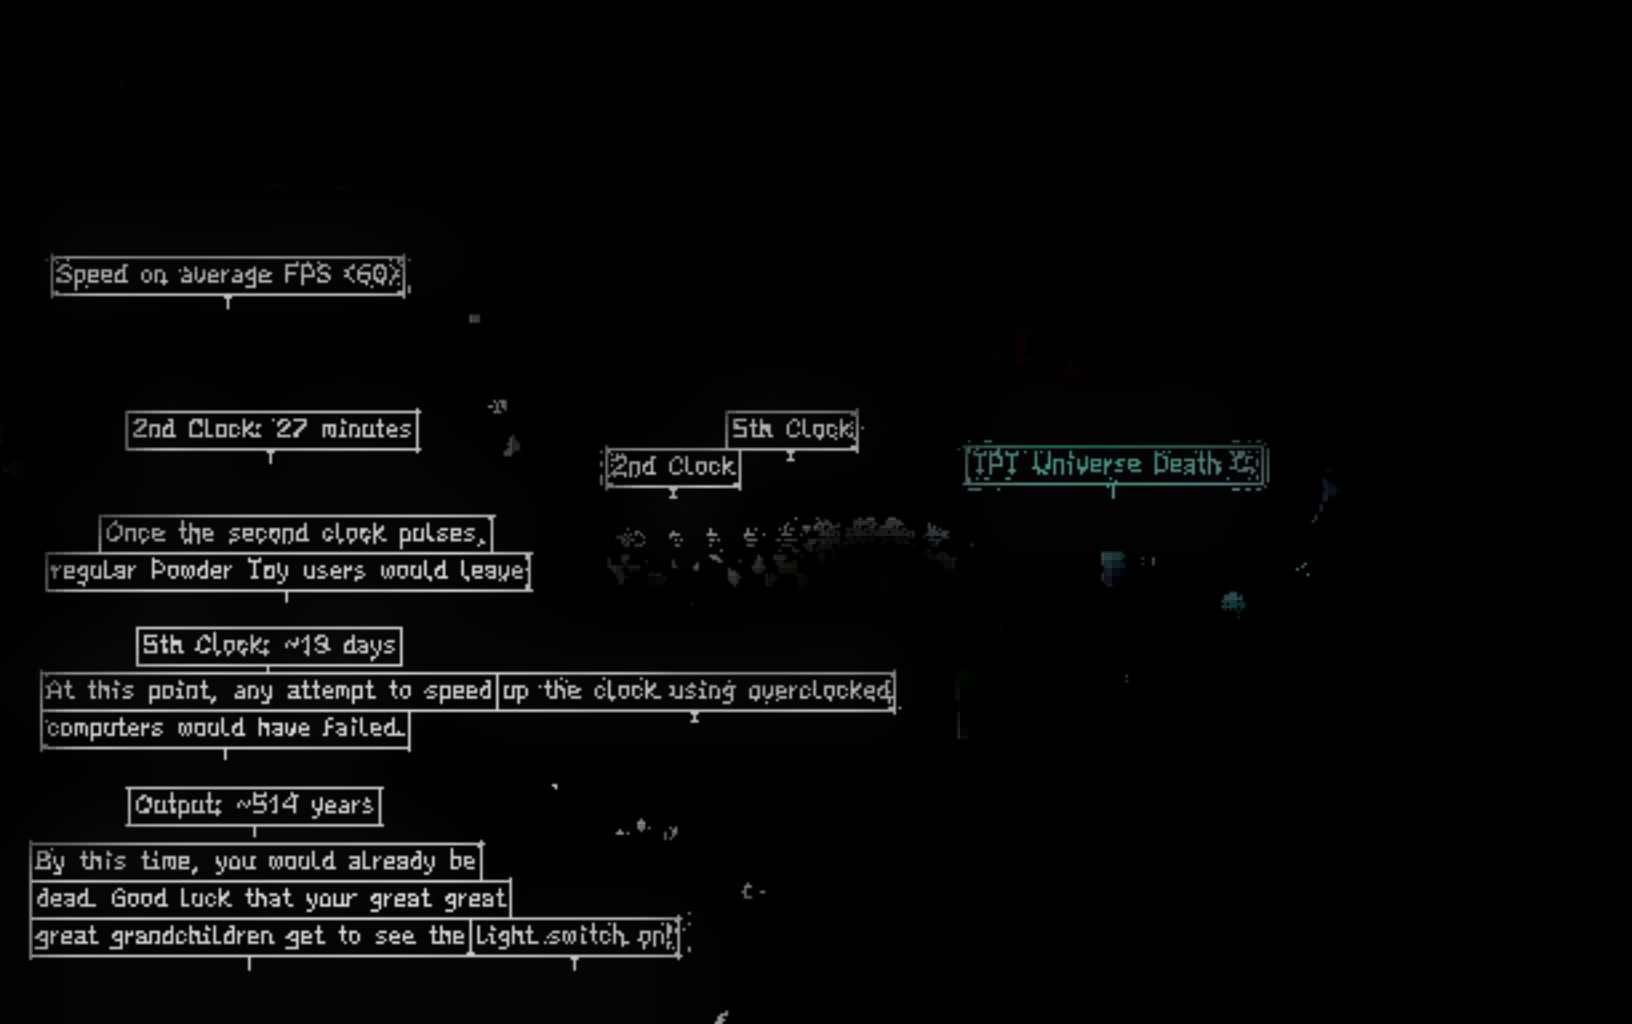
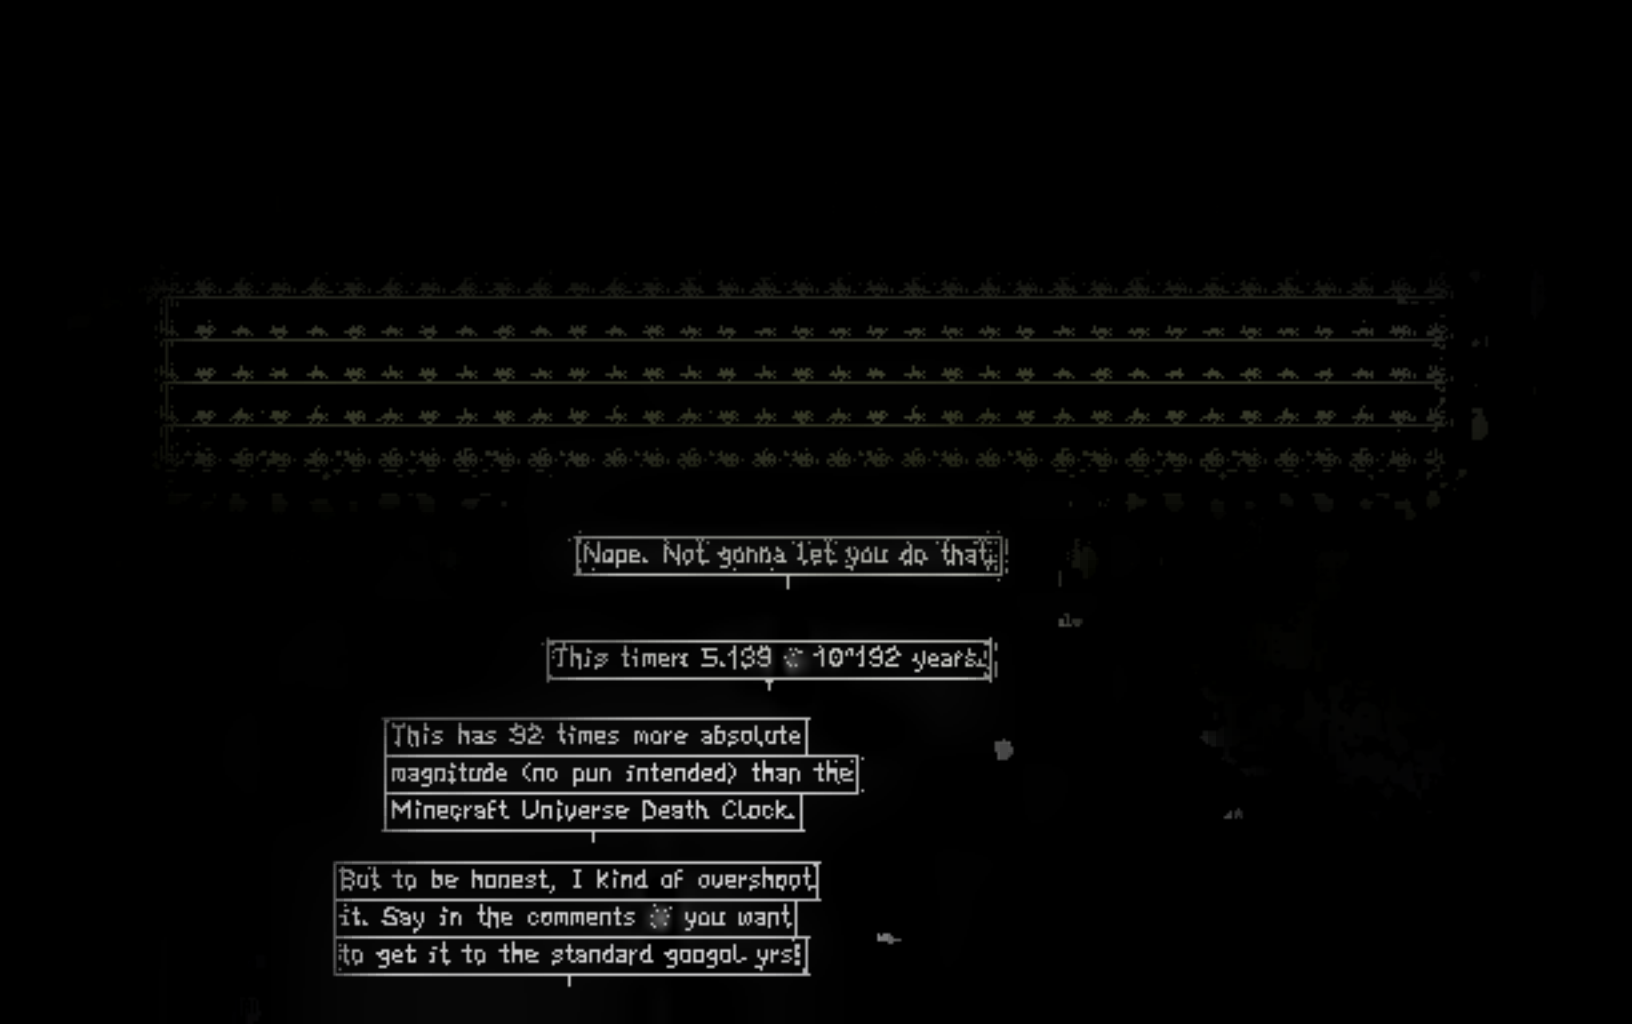
Disco Bomb Prot
Disco Bomb V2!
Solar Bomb!
Solar V2
PROTODYLAN55



Speed on average FPS <60>
2nd Clock: 27 minutes
5th Clock
2nd Clock
TPT Universe Death
Once the second clock pulses,
regular Powder Toy users would leave
5th Clock: ~19 days
At this point, any attempt to speed up the clock using overclocked
computers would have failed.
Output: ~514 years
By this time, you would already be
dead. Good luck that your great great
great grandchildren get to see the light switch on!

Original Version

Unpause!
Check out the new one!



Nope. Not gonna let you do that!
This timer: 5.139 * 10^192 years.
This has 92 times more absolute magnitude (no pun intended) than the Minecraft Universe Death Clock.
But to be honest, I kind of overshoot it. Say in the comments if you want to get it to the standard googol yrs!

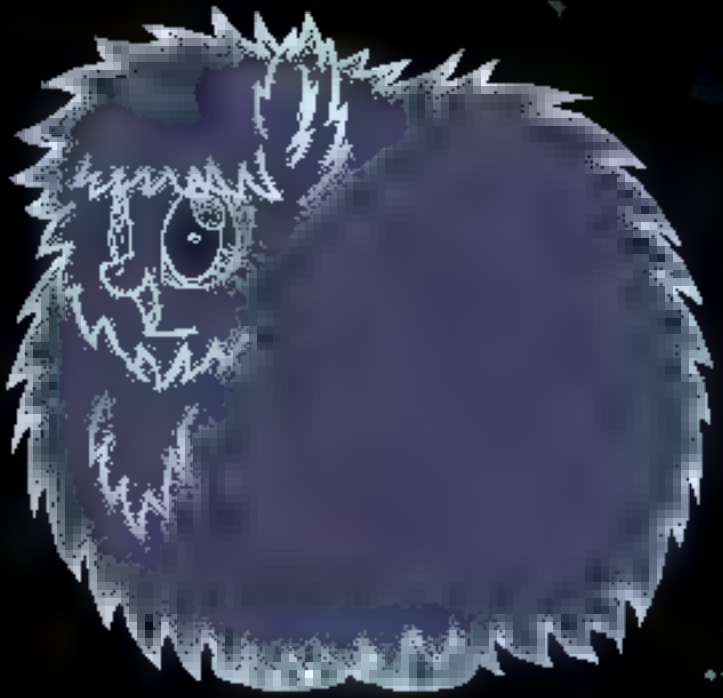
I am so gratful for the front page!
Thanks so much!!! =D

SENTINAL

pallete

Judge the art
not the origin



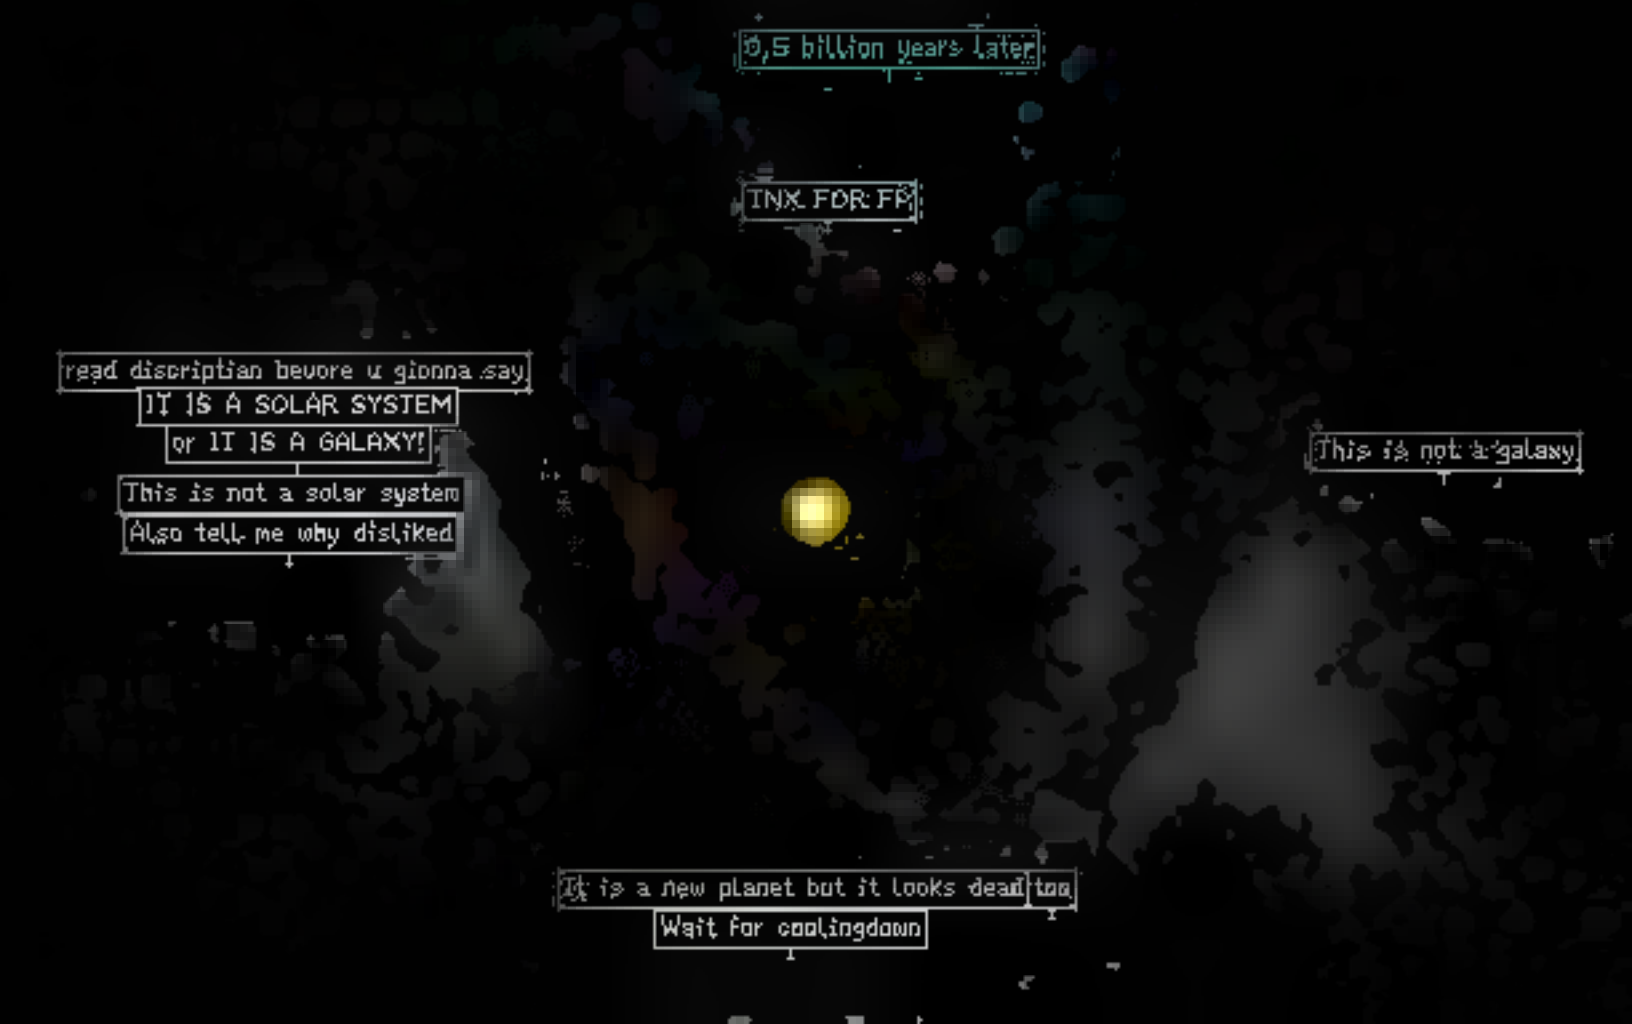
Take 2 conductors that don't conduct to each other to form such a circle.

It doesn't matter which one is the outer or the inner one.

When you find the right size it will take both sprk's the same time for 1 round.

If you make a little bigger circle, you see that the outer sprk is now faster, instead of slower like it would be normal.

Also added the number of patricles for each circle.



0,5 billion years later

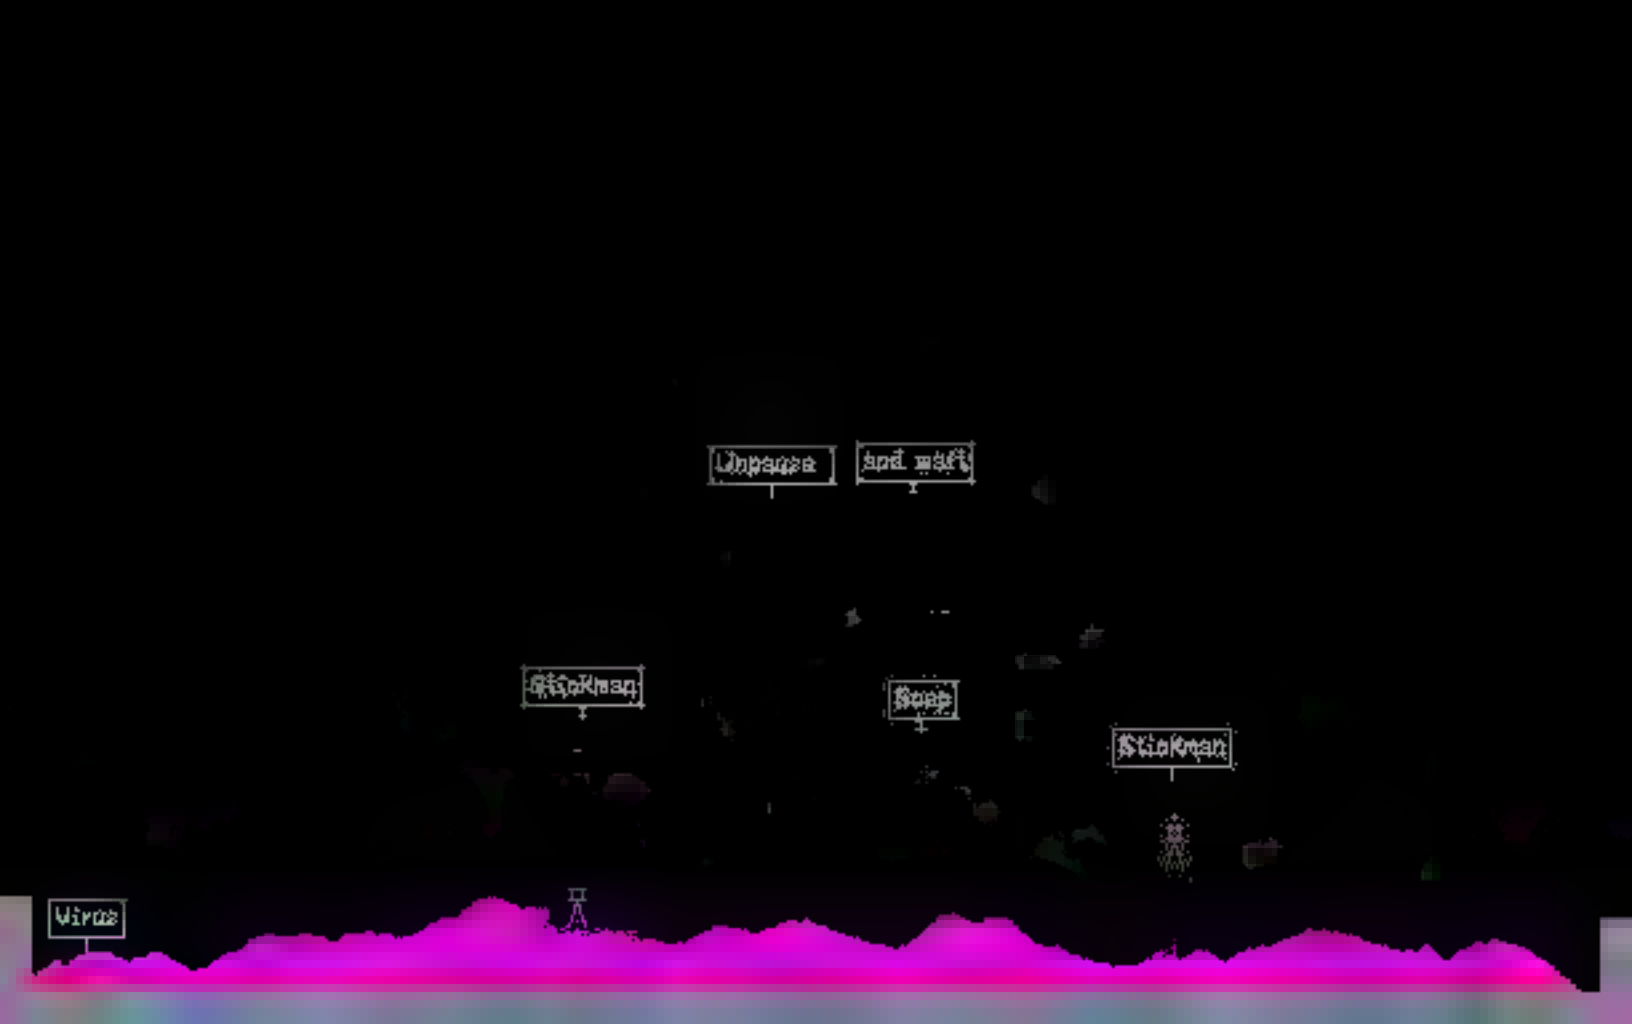
TROLL!



Virus

Do NOT use electron with cold beam.

Change color of filt with heat up/cool down function.

IF A FUNCTION DOESN'T HAVE A BUTTON TO TURN IT OFF, JUST CLICK THE SAME BUTTON AND IT WILL TURN OFF. (FLIP FLOP) THE FILT 1 IS NORMAL FILT. FILT 2 IS SPECIAL. WHEN IN THE PATH OF PHOT IT GIVES NO COLOR TO REGULAR PHOT, BUT IF THE PHOT HAS ALREADY A COLOR THEN THE FILT'S COLOR WILL BLEND WITH THE CURRENT PHOT COLOR. SO IF PHOT=RED, AND FILT=BLUE, YOU WOULD GET PURPLE PHOT! P.S. ONLY USE PHOT WITH COLOR AND BEAM CHANGING FUNCTIONS. DON'T USE FAST AND VERY FAST FUNCTIONS TOGETHER, NEUT IS ODD WHEN USED WITH THE UP FUNCTION OF THE ANGLE CHANGER.

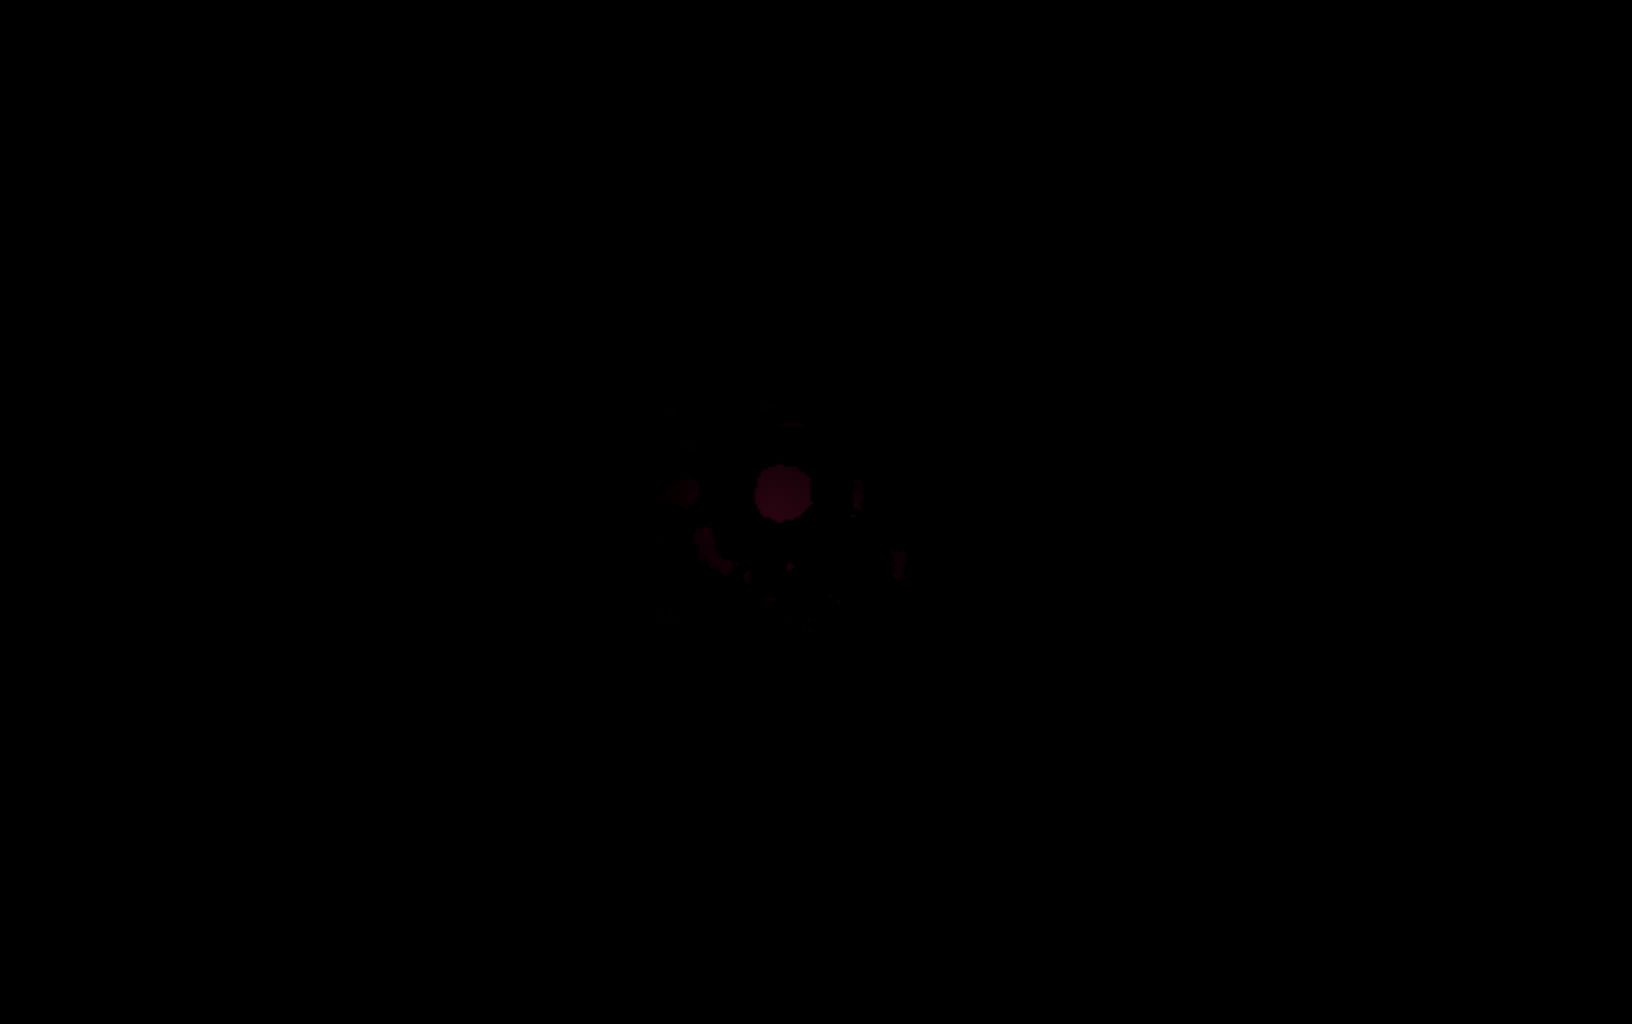
this version has all black hole
replaced with void
G36C Assault Rifle
about 3 bullets a second
it takes ages to melt big pieces of metal
though it is a little stronger than before
now with rapid fire
i replaced all electrode with liquid crystal
hold spark on trigger to shoot
A new version is available -- click here!



This is a Stickman (STKM)

This is 1px of GOO

Assuming that the average size
of a human is ~180cm
we can say that the height of 1 px
is ~13.8cm
telling that 1px of something in TPT
is ~190.44cm2
That's pretty big i'd say
If in TPT screen you can fit
604x376 pixels
it would take ~43249.69m2
to fit whole screen full [redacted] something
If it was water it would have weight
[redacted] ~43249700Kg
So TPT screen is pretty big to play

Have a good day! It's time for me to
Roll out! Bai ya all TPT people~
And keep up the great work!

Normal distribution

Every MERC box has 50% chance

But there are more ways for the middle ones to happen

so their chance is bigger.

Those STNEs form a graph of a function called Gaussian Function

Bonus fact: The number of ways to get to one MERC box follows the Pascal's Triangle. It looks like:

Got the rule?

Makes sense, doesn't it?

That's 3/8 chance for the yellow one or 5/32 for the green

This ship is the new Nippy L.T.D super carrier. The ship has to be supported by gravity generators to stop it from collapsing under its own mass. Being heavy meant it was slow, which was unacceptable, so monstorous engines were fitted to give it vast amounts of speed. This is the largest ship class in the Nippy L.T.D armada.
Use View 1, 2 or 0

EXAMPLE:

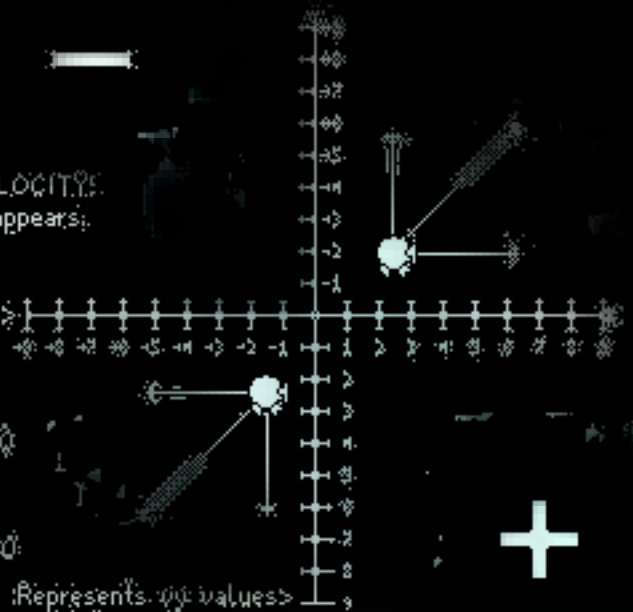
```
!set vx PHOT 1
!set vy PHOT 0
!set life PHOT 0
```

This tutorial has helped

people

If WITHIN vx AND vy EQUALS VELOCITY:
Life must be 0 otherwise it disappears.

Vertical can be achieved with:
!set VX phot 1
!set VY phot 1
1 can be replaced with any number -,+!
When one value is set to 0, the other equals speed and direction.



EXAMPLE: !set vx PHOT 1 then !set vy PHOT 0 and !set life PHOT 0

EXAMPLE: !set vx PHOT 0, then !set vy PHOT 1 and !set life PHOT 0

This is the first example. Except the vx value was changed to

But, this speed and faster are problematic.
Especially for scrolling images.

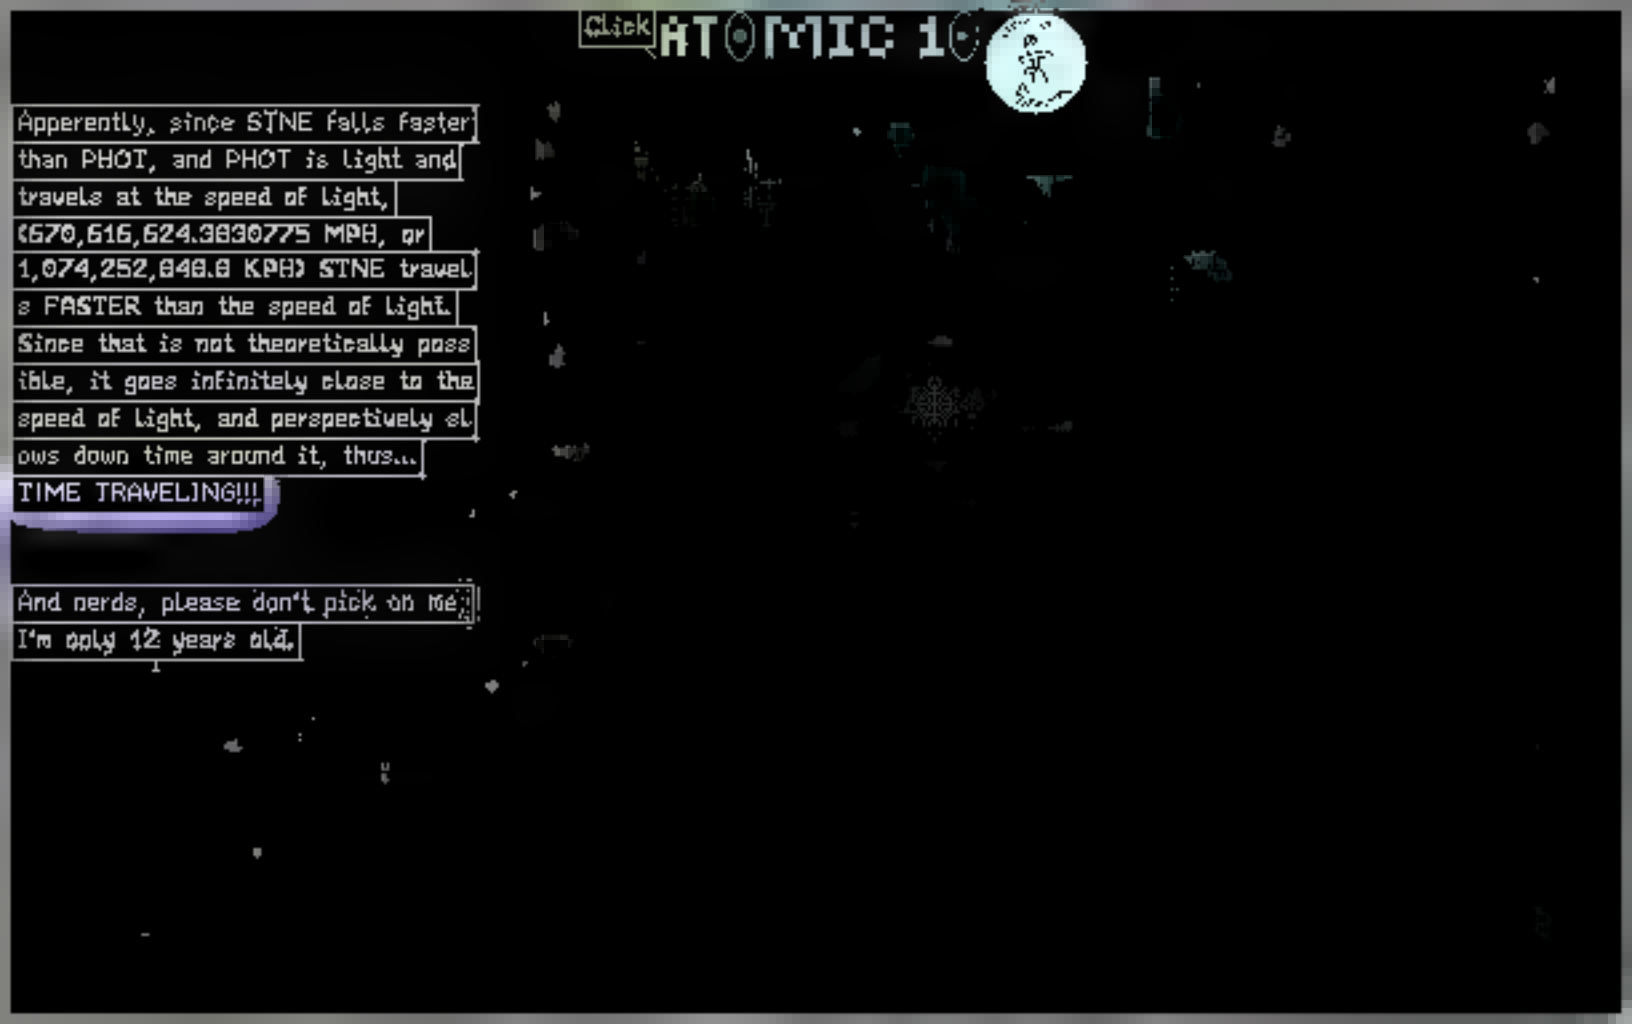
This is a Bacteriophage Virus



Click
ATOMIC 1
Apperently, since STNE falls faster than PHOT, and PHOT is light and travels at the speed of light, (670,616,624.3830775 MPH, or 1,074,252,848.8 KPH) STNE travels FASTER than the speed of light. Since that is not theoretically possible, it goes infinitely close to the speed of light, and perspectively slows down time around it, thus...
TIME TRAVELING!!!
And nerds, please don't pick on me, I'm only 12 years old.

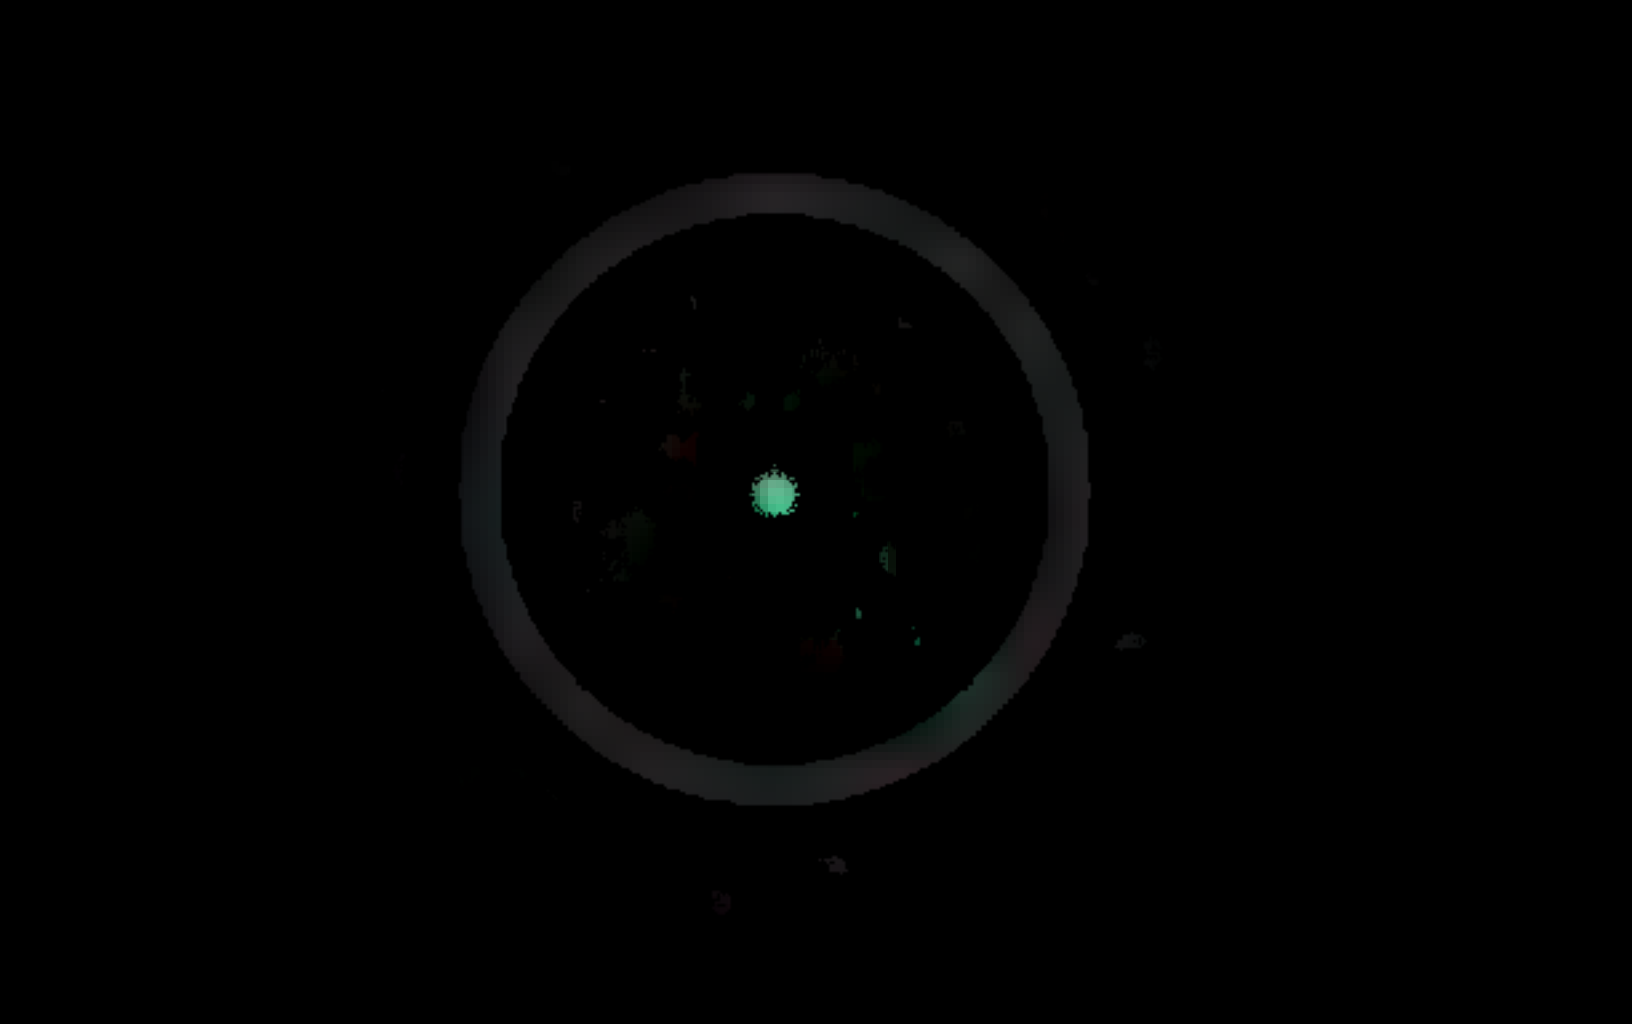
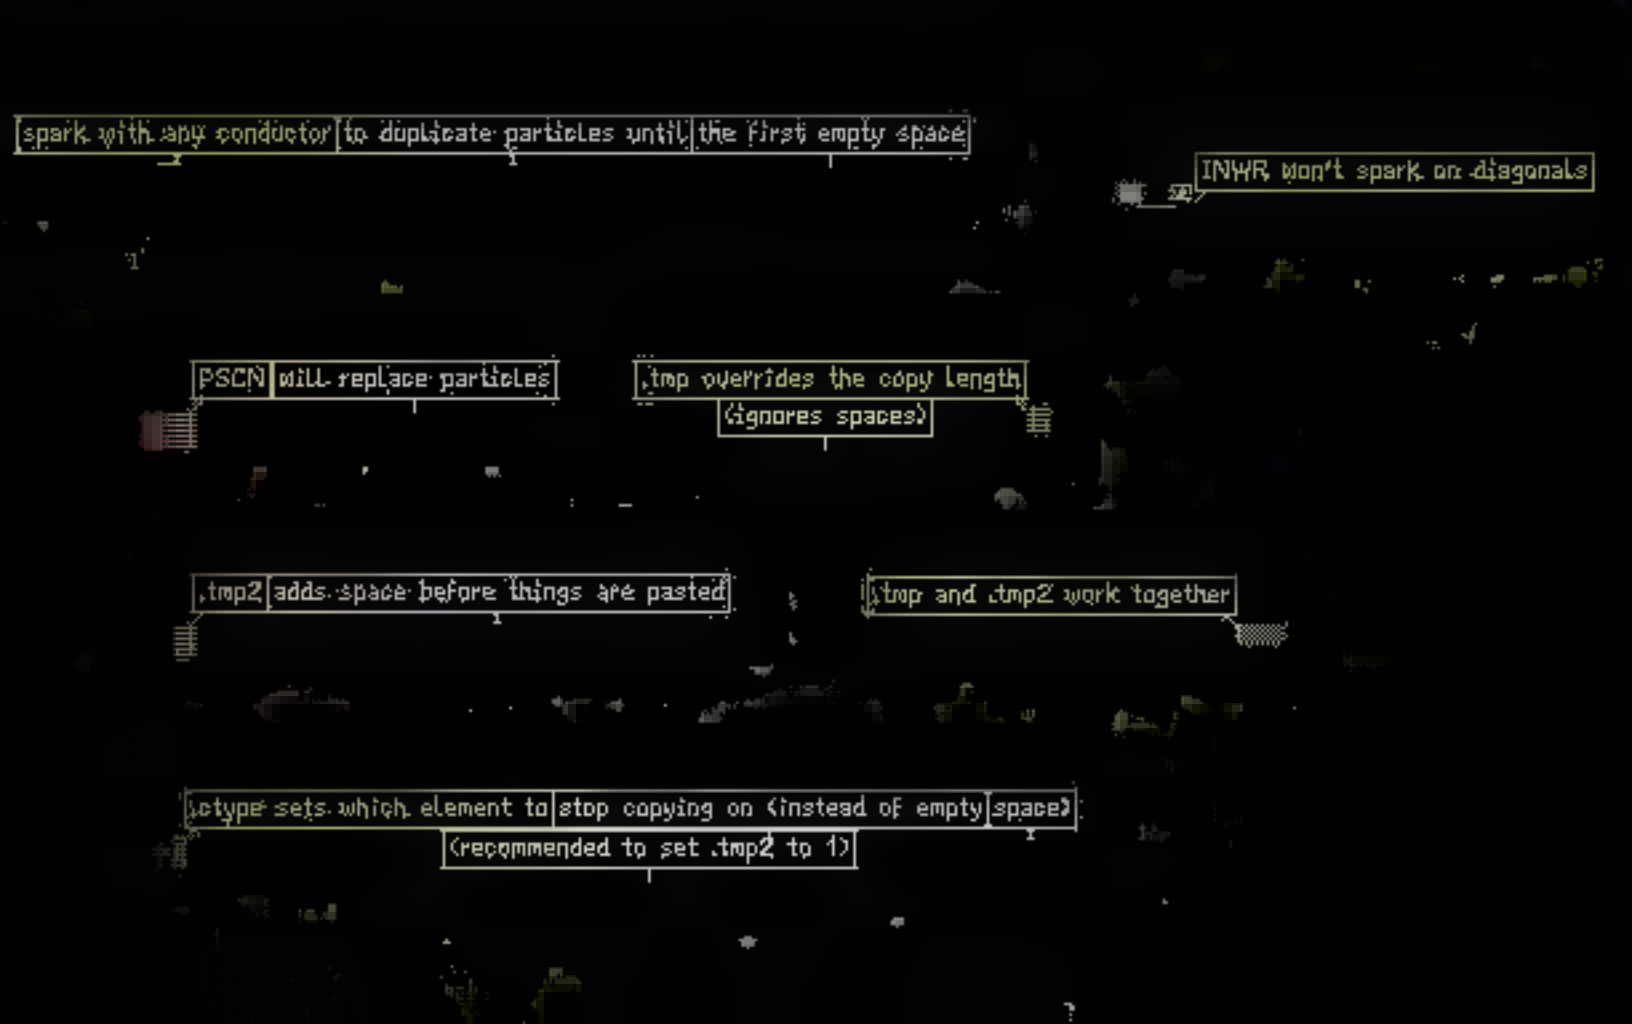
SPRK looks different
Gravitons, make strong gravity,
NAN pressure has been fixed :)
and some console related stuff
something about floater numbers
DRAY is new, duplicates particles
so far, gravitrons are the only
sub atomic particle to not react with EXOT
found out, spark here, this is
doesnt fuse with DEUT either
actually really game changingly important
And a wall that blocks air only





spark with any conductor to duplicate particles until the first empty space
INWR won't spark on diagonals
PSCN will replace particles
.tmp overrides the copy length
(ignores spaces)
.tmp2 adds space before things are pasted
.tmp and .tmp2 work together
.ctype sets which element to stop copying on (instead of empty space)
(recommended to set .tmp2 to 1)

When pressure is placed into the fuel chamber, the pressure allows the Plutonium to generate pressure & heat, while at the same time the Uranium generates heat too. The additional pressure from the Plutonium again results in heating the Uranium and making the Plutonium react again ending resulting in a never-ending-cycle of heat, generating temperatures even hotter then the Earth's maximum core heat!

1. Fill the tanks with hydrogen
2. Build the pressure to 75
3. Spark the trigger to fire

To make a single tank: 1. Pause. 2. Delete old tank(s). 3. Copy and paste the single tank.

Don't dislike just because you can't follow directions

Also, you can individually fill the tanks and they still work
(so you don't HAVE to fill both)

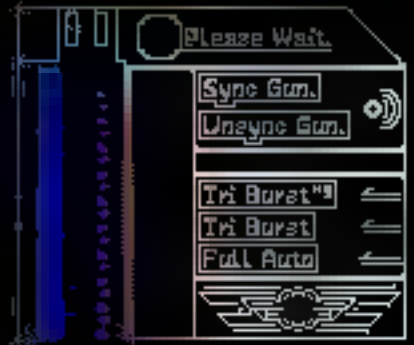
THE SPAZZ

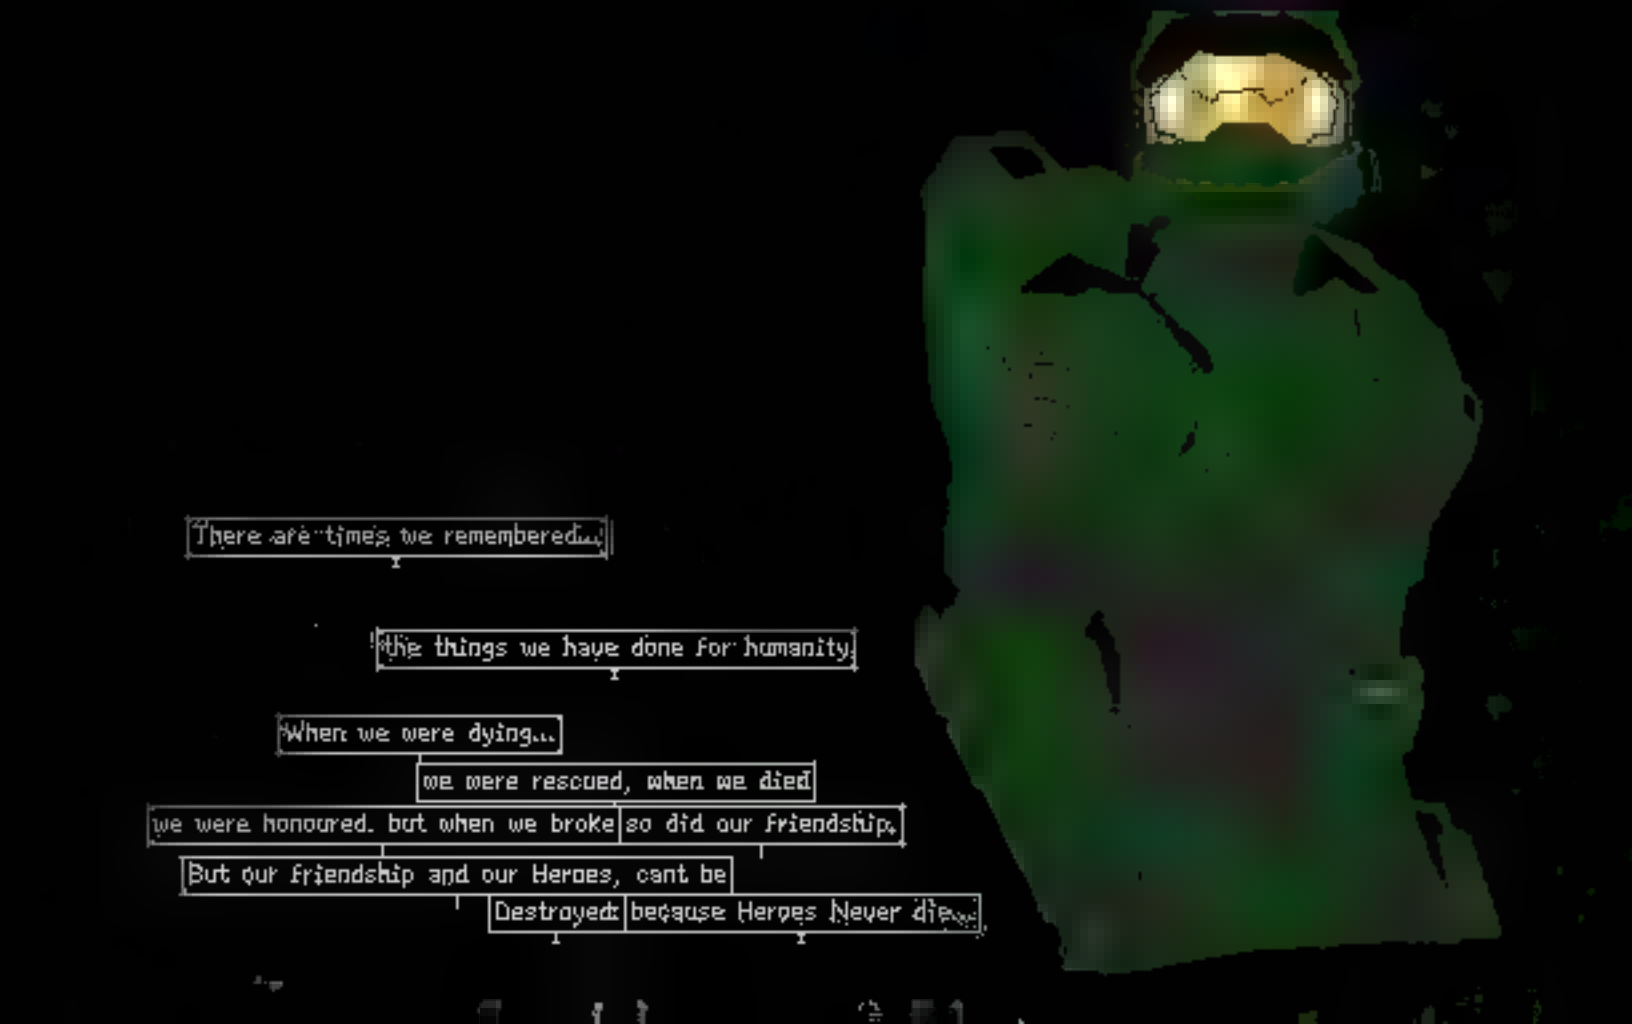
THE RAPTURE OF TPT

After weeks of work and many failed attempts, this gun is finally finished. I have built the best mech I could and used a clean old-schooled style of art to finish the gun.

I hope you all enjoy! ~Thespazz

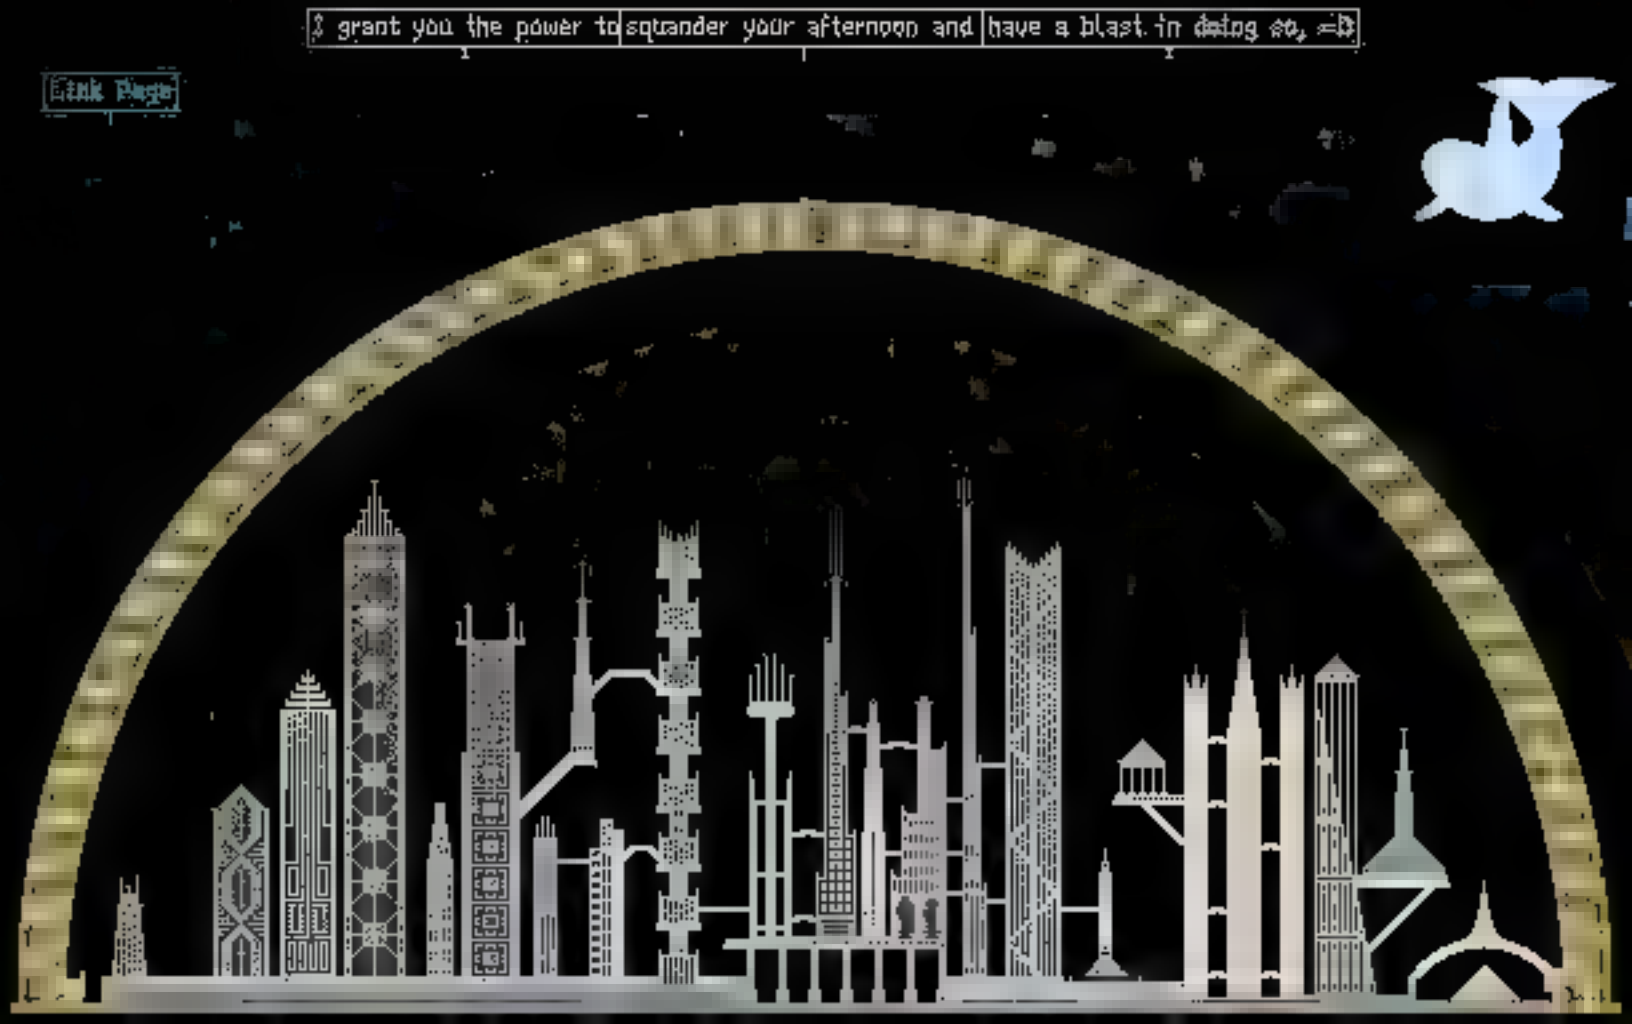
"A lie doesn't become truth, wrong doesn't become right, and evil doesn't become good; just because it is accepted by a majority"

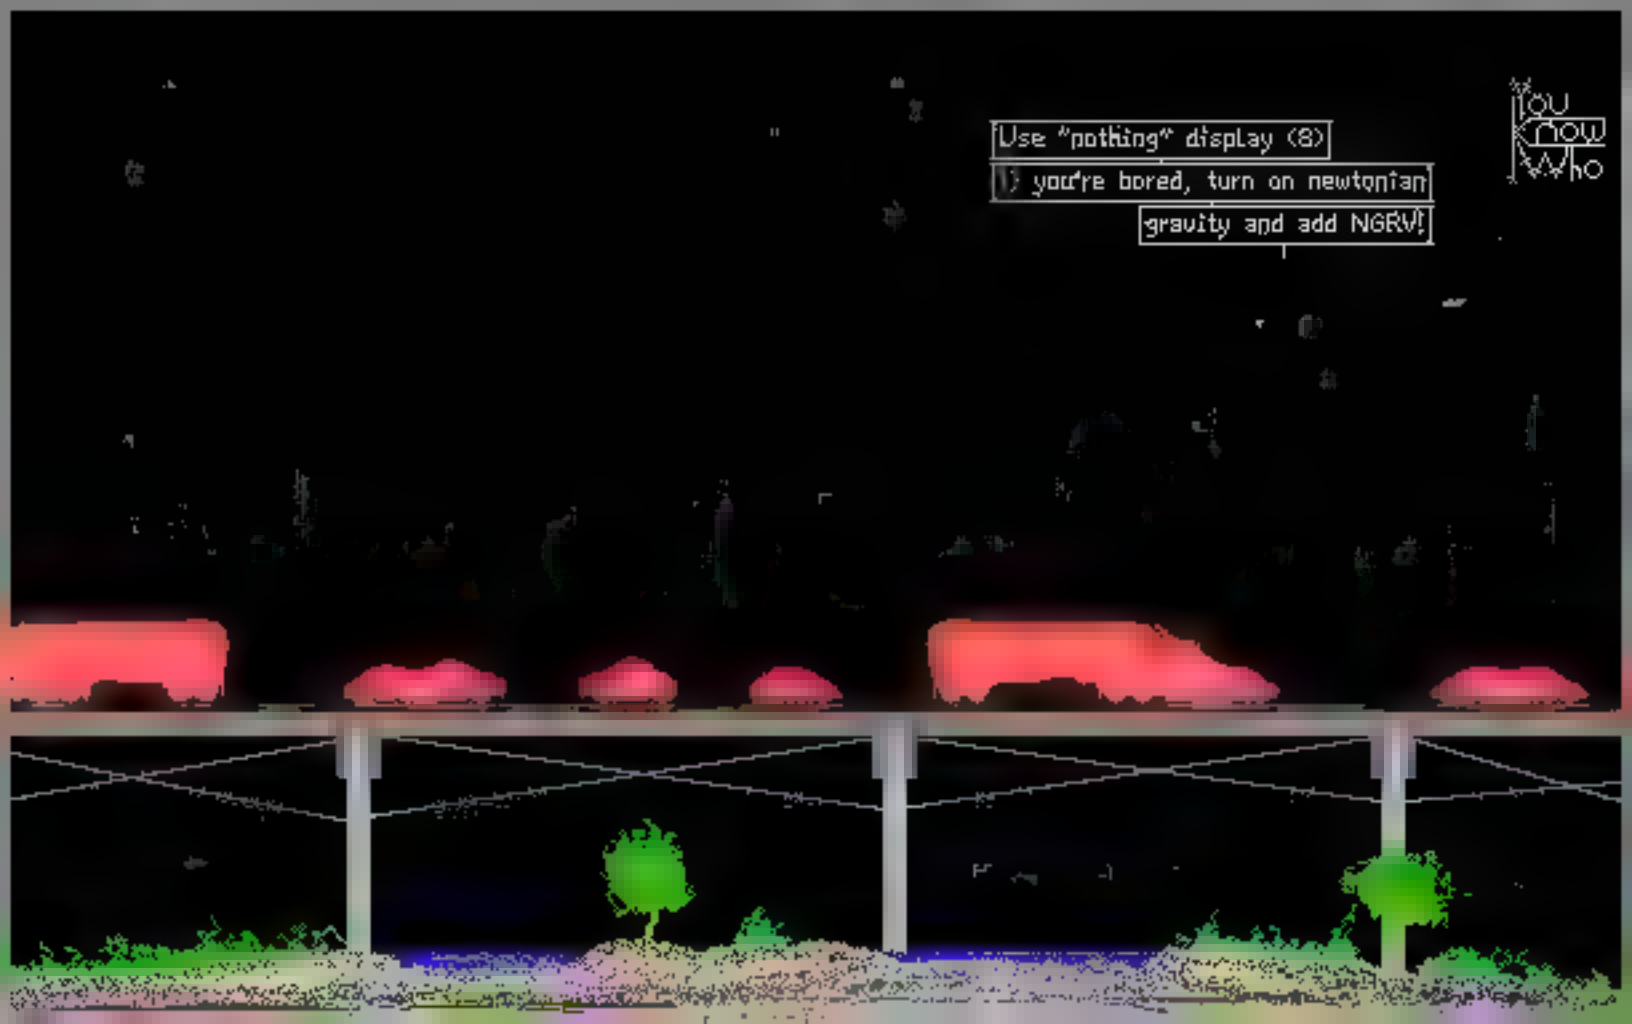




There are times we remembered...
the things we have done for humanity.
When we were dying...
we were rescued, when we died
we were honoured. but when we broke so did our friendship.
But our friendship and our Heroes, cant be
Destroyed because Heroes Never die...

I grant you the power to squander your afternoon and have a blast in doing so, =D





Use "nothing" display (8)

SHIELD

ENTROPY UNLIMITED IS AN INTERSTELLAR TECHNOCRACY CONTROLLED BY A
TITANIC NETWORK OF AI COMES ACROSS HUNDREDS OF WORLDS AND
THOUSANDS OF SHIPS.

THE HUMAN POPULATION HAS BEEN HEAVILY IMPLANTED AND GENETICALLY
MODIFIED TO ACT AS BIOLOGICAL SUPERCOMPUTERS.

THE LONG TERM GOAL OF ENTROPY UNLIMITED IS THE HARVESTING OF
INFORMATION.

ENTROPY UNLIMITED ORIGINATED FROM A RESEARCH AI WHEN ITS MODERATION
CIRCUITS FAILED. THE AI CONCLUDED THAT THE MOST EFFICIENT WAY TO
COMPLETE ITS FUNCTION WAS TO INDOCTRINATE THE SCIENTISTS AND TAKE CONTROL
OF A NEARBY MILITARY FLEET. IN A MATTER OF WEEKS IT DESTROYED ITS PARENT
EMPIRE AND BEGAN TO START COLONIES OF ITS OWN.

AS IT STANDS, ENTROPY UNLIMITED HAS COMPLETED 8% OF ITS GOAL BUT THIS WILL
INCREASE EXPONENTIALLY AS ITS TECHNOLOGY BECOMES MORE ADVANCED.
ENTROPY UNLIMITED HAS A LARGELY PASSIVE STANCE TOWARDS OTHER EMPIRES
UNLESS THEY INTERFERE WITH ITS SCIENCE VESSELS, IN WHICH CASE THEY
WOULD BE HUNTED DOWN TO THE LAST.

SPECIFICATIONS

SIZE: INTERSTELLAR (600 SYSTEMS)
TYPE: SYNTHETIC HIVE MIND
ALLIES: NONE
ORIENTATION: PASSIVE. CLAIMES MINERAL RICH
AND HABITIBAL PLANETS.

Origonial AI unit

if you read through all of this, you win an imaginary Cookie!

Maxwell's Demon (thought experiment)
(Use 8 for best visualization)

Activate demon

The purpose of this experiment is to simulate a magical being (demon) that can break the second law of thermodynamics.

The chambers simulate two objects sharing the same temperature.

When the demon activates, it puts warmer molecules in the right side and colder molecules in the left.

This violates the SLI, which states that entropy (or chaos) between two interacting systems increases.

Give me your ideas!

A lot of people seem to love my art work on PI, but sadly I've ran out of ideas on what to do. I need suggestion's from you guys! What kind of art would you guys like to see in the future? Most of them I'll give a shot, but the ones I feel that are worthy of being published will be, leave suggestions in the comment section please, and thankyou

Remember to comment!

Introducing the second version of my instant FILT incrementer.
It does the same thing as the first one - it reads a number on the input line and exactly 1 frame later it outputs the number incremented.
The second version is more efficient, using only 4 pixels per bit and using all 29 bits

Old version here

Spark the green and red buttons to set the input number and watch the output number change

And yes, it is possible to make a 60Hz incrementer

Hover over this FILT to see how its wavelength changes!

Add 1px of INVS ... you find it ineffective against something (except GOO)
No it doesn't work against goo
Goo requires pressure
This doesn't use pressure.
Super Death Ray :D
Now even hotter!
Takes a second to fire...
Scaramanga would be proud...

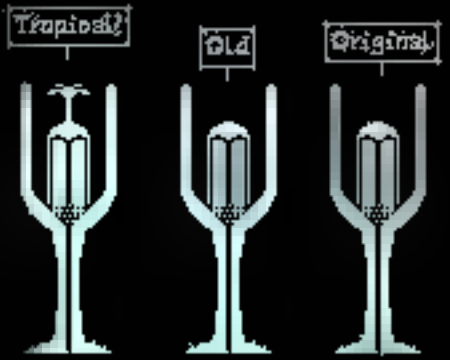
Behold, Pythagora's Cup!

Free to use, but give credit! :D



After teaching his students about his triangle thing, Pythagora gave them some wine in his special cups. They were instructed to fill the cup so that the pillar in the middle does not get covered. If they failed to do this, the cup would automatically drain itself.

USE WATER EQUALIZATION

Use DSTW

Or the results will be shocking.

Change IMP value of grid for
different types

This device sparks eight outputs in a chaotic but non-random sequence, and records this sequence. It displays sensitive dependence on initial conditions, better known as the 'butterfly effect', meaning that a small alteration to its initial state will result in a significant change in output. It occurred to me that this could be used constructively as a way to program a complex series of instructions in advance, in a highly compact format.

Potentially the 8 outputs could also be read as binary digits, providing a predetermined but non-predictable sequence of numbers ranging from zero to 255, allowing vastly more complex programming. Since I do not have the electronics or programming knowledge to use this to best advantage, I am inviting the community to find uses for it.

You will need to experiment to find useful output sequences - just draw on the grid with PSCN, spark any or all of it (be careful not to change the ctype of the CRAY), and unpause.

Free to copy.

Text created using 12Me21's signwriter.

Credit to Ogsterduck for this CRAY grid.

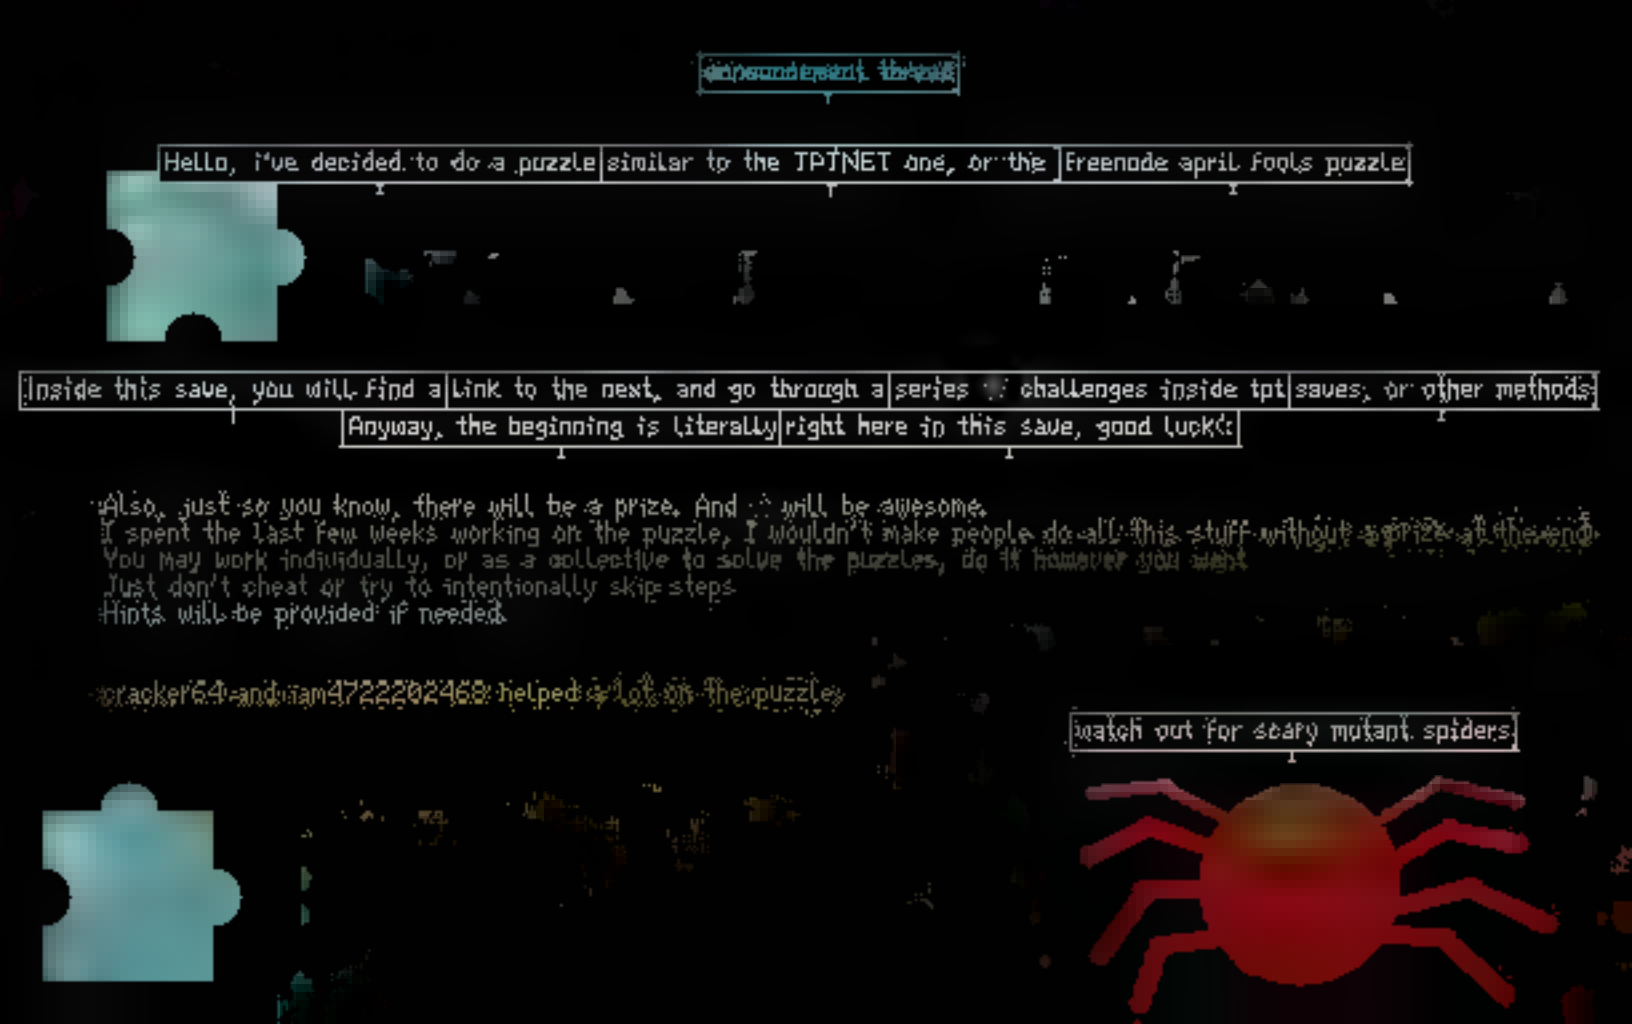
Press 8 (use nothing display)

This gave me the idea



Hello, i've decided to do a puzzle similar to the TPTNET one, or the Freenode april fools puzzle
Inside this save, you will find a link to the next, and go through a series of challenges inside tpt saves, or other methods
Anyway, the beginning is literally right here in this save, good luck!
Also, just so you know, there will be a prize. And it will be awesome.
I spent the last few weeks working on the puzzle, I wouldn't make people do all this stuff without a prize at the end.
You may work individually, or as a collective to solve the puzzles, do it however you want
Just don't cheat or try to intentionally skip steps
Hints will be provided if needed
cracker64 and Sam47222202468 helped a lot on the puzzle
watch out for scary mutant spiders

The stickman can walk trough its spawn point element, this is quite useful for drawing backgrounds.

When the stickman is inside the SPWN it can't shoot particles.

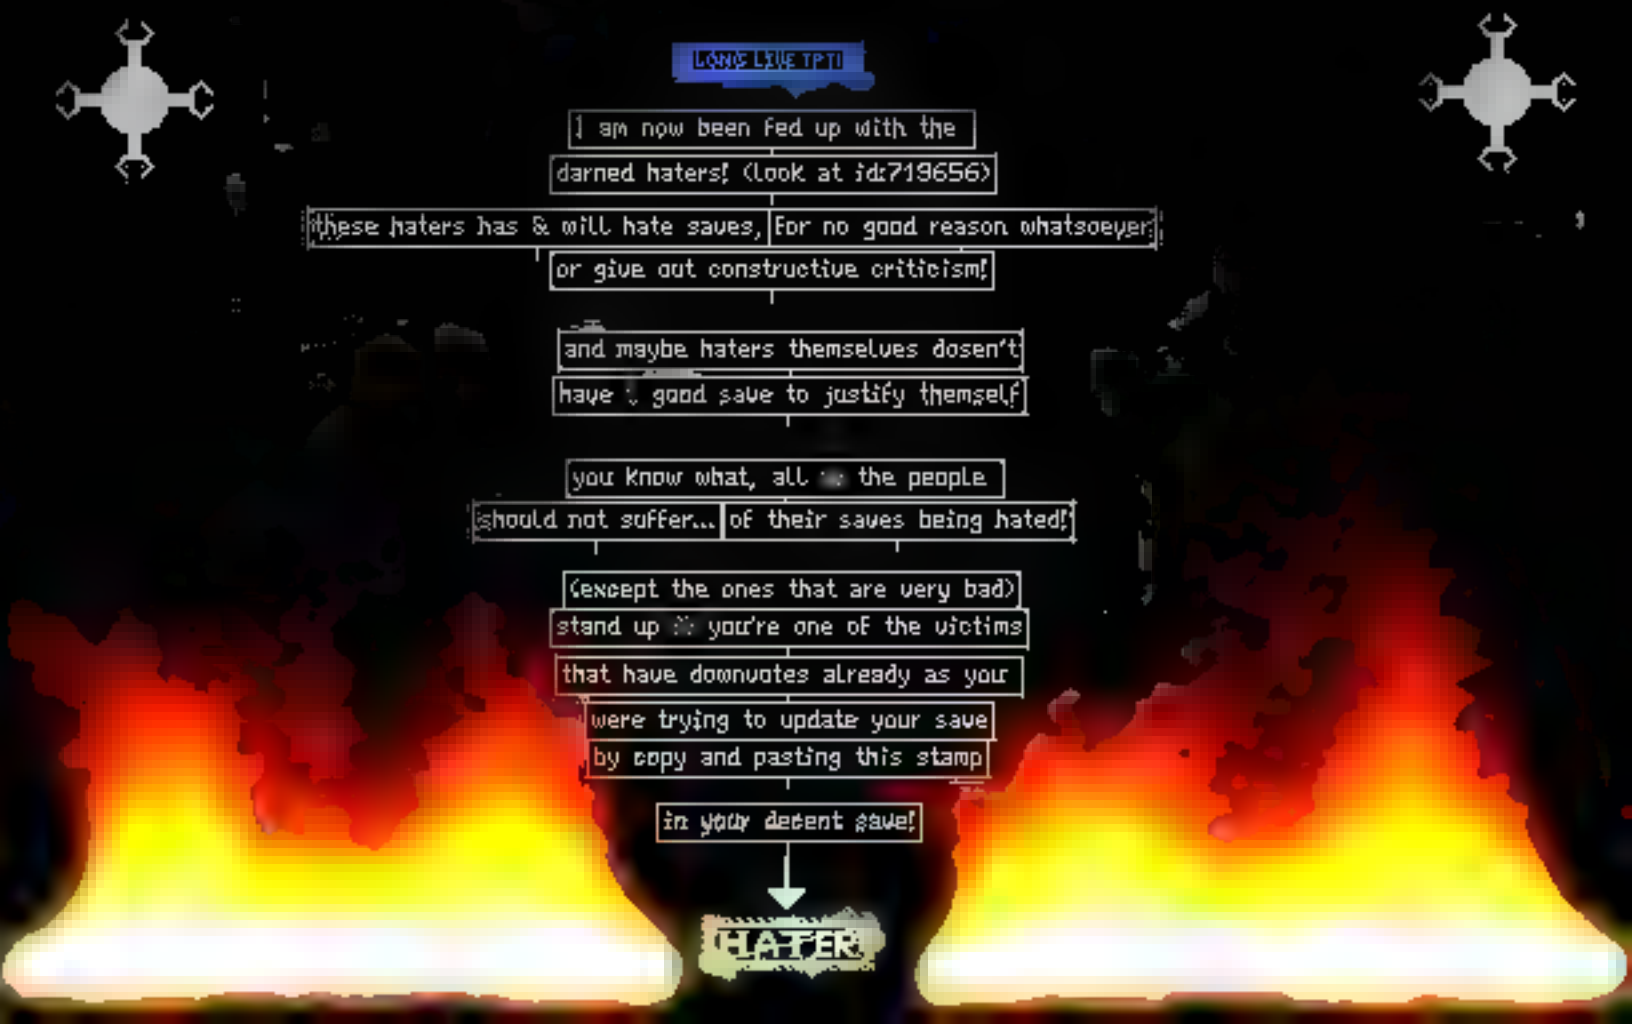
The stickman cant get through solids and some walls as normal.

Only once i managed to make a layer of SPWN similar to Gravitons over some materials, this could be useful to make it look like there is something in front of the stickman.

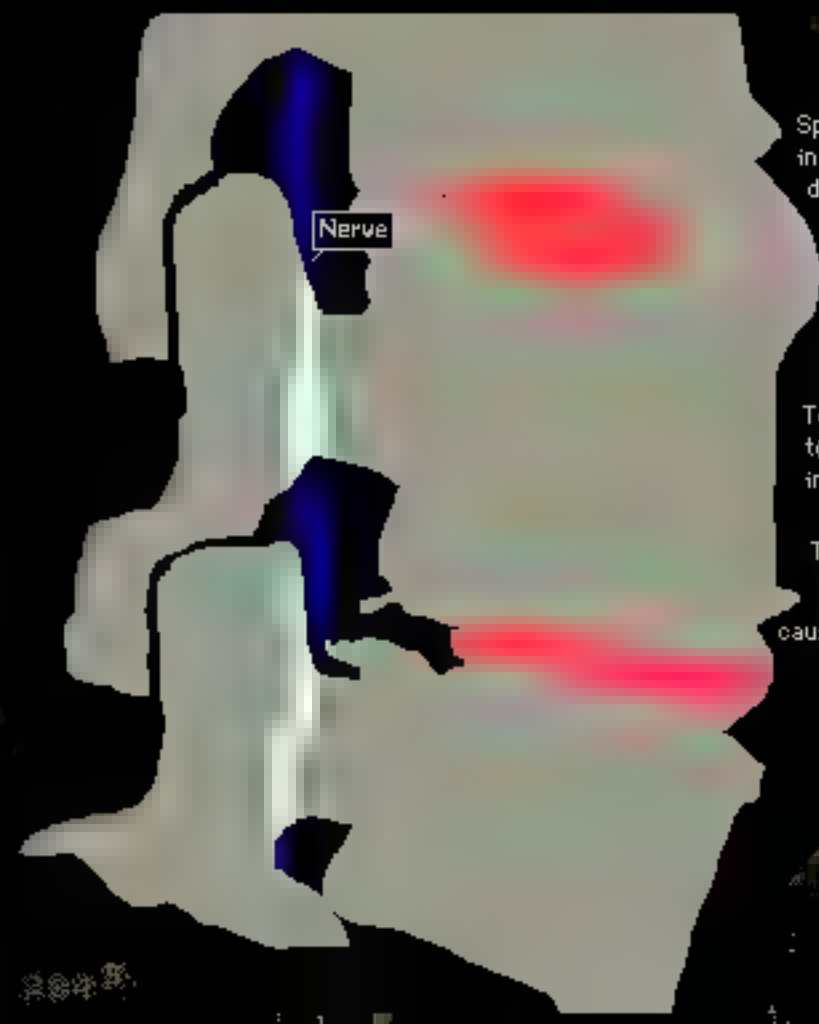
The Gravity Wall effect still works and you can fly through the SPWN.

this looks awesome in Velocity and Pressure Display!

This is what i was talking about, according to 12Me21 "Particles that have a higher particle ID than the STKM are drawn after, so they are in front. When saving, particle order is reset, so particles below the stickman will have a higher ID"



LONG LIVE TPTI
I am now been fed up with the
darned haters! (look at id:719656)
these haters has & will hate saves, for no good reason whatsoever
or give out constructive criticism!
and maybe haters themselves dosen't
have a good save to justify themself
you know what, all of the people
should not suffer... of their saves being hated!
(except the ones that are very bad)
stand up if you're one of the victims
that have downvotes already as your
were trying to update your save
by copy and pasting this stamp
in your decent save!
HATER



Spinal disc herniation, is a medical condition affecting the spine in which a tear in the outer, fibrous ring of an intervertebral disc allows the soft, central portion to bulge out beyond the damaged outer rings.

Disc herniation is usually due to age-related degeneration of the anulus fibrosus, although trauma, lifting injuries, or straining have been implicated.

Tears are almost always postero-lateral in nature owing to the presence of the posterior longitudinal ligament in the spinal canal.

This tear in the disc ring may result in the release of inflammatory chemical mediators, which may directly cause severe pain, even in the absence of nerve root compression.

Rockets Homepage

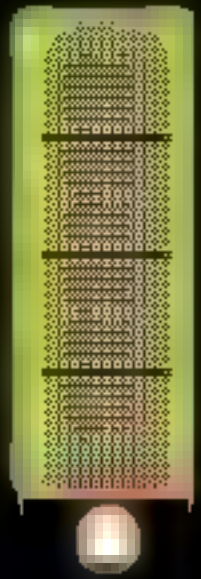
Now has two!

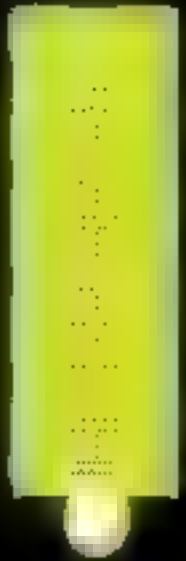
Epic Booster MK.1

Epic Booster MK.2

MK.2 burns slightly longer, but has lower power. The MK.1 is heavier, and it's more appropriate fr use in the larger Kerbal Kill-err, I mean ROCKETS. YES, I MEAN ROCKETS.

I guess TheExplosionTeam deserves some credit, so thanks for several good ideas, TET!





This is Bunkerwide 2!
Ask to be added and i will add you!

Ooh just noticed 54.0C looks cool too!

First, you must get the stickman into orbit. To do this, press the left arrow key briefly to set your direction, then hold the down arrow key until you are airborne.

Perform a burn at your apogee [fig. 1] to circularize your orbit.

Fig. 1

You will find that burning posigrade [fig. 2] on one end will raise the other end. The closer to a circle the orbit is, the slower it will decay (just like in real life).

Fig. 2

Orbital decay should bring stickman down within a minute or so, however if you want to speed it up you can perform an antigrade burn [fig. 2].

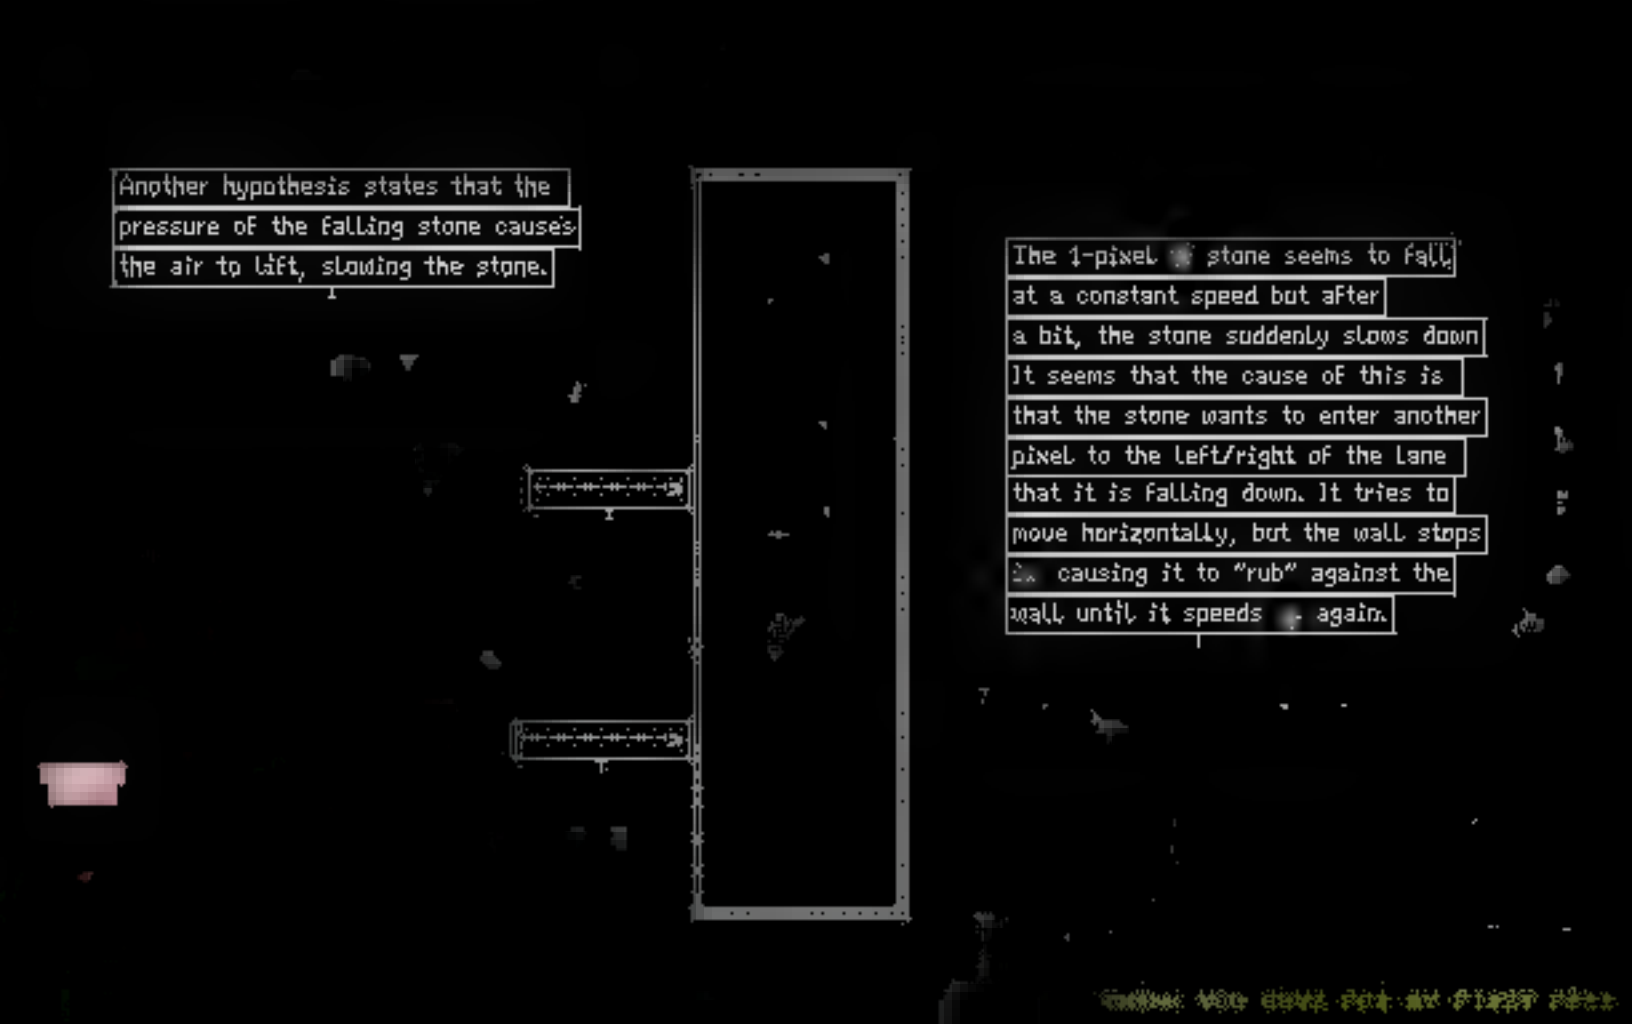
Max Range
This thing detect ANY movement with in the range of 1/3 Powder Toy scre en
ANY movement means even if you dro p a single speck of dust within it's range,
the machine will detect it. It will detect movements in 10-15sec s max.



Another hypothesis states that the pressure of the falling stone causes the air to lift, slowing the stone.
The 1-pixel stone seems to fall at a constant speed but after a bit, the stone suddenly slows down
It seems that the cause of this is that the stone wants to enter another pixel to the left/right of the lane that it is falling down. It tries to move horizontally, but the wall stops it causing it to "rub" against the wall until it speeds up again.

Use blue VIBR to
generate electricity
with voltage regulator

Fresh VIBR ... tmp2=0. life=0

If tmp2 is set to 1, any increase
in life will turn it blue

Old alternative method:
Set life, then
treat it with CFLM

Combinations ... interesting.

This is 5 layers of differently
"flavored" VIBR. I let it go
over 24 hours with no
explosion.

All tmp2=1

Super vivid, stable for a long time

Other "Living" Items

You need to wait for the "liver" to heat up. If the "liver" dies then you have to manually put BCOL in it's big stomach so the "liver" can burn "sugar" to get some "calories". And now you can have the experience of feeding a small creature coal every few dozen seconds or it dies... (By The Way, it is WAY harder to make a steam engine in Ambient Heat mode than you'd think).

Please read the description...

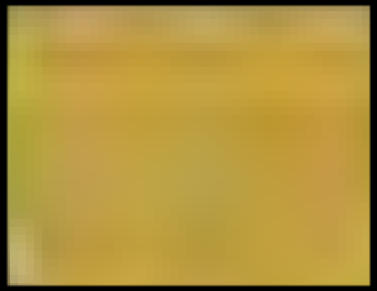
How to make liquid wood

In the console, type:

tpt.el.wood.falldown=2

tpt.el.wood.gravity=1

After typing these, unpause



Solid WHOL

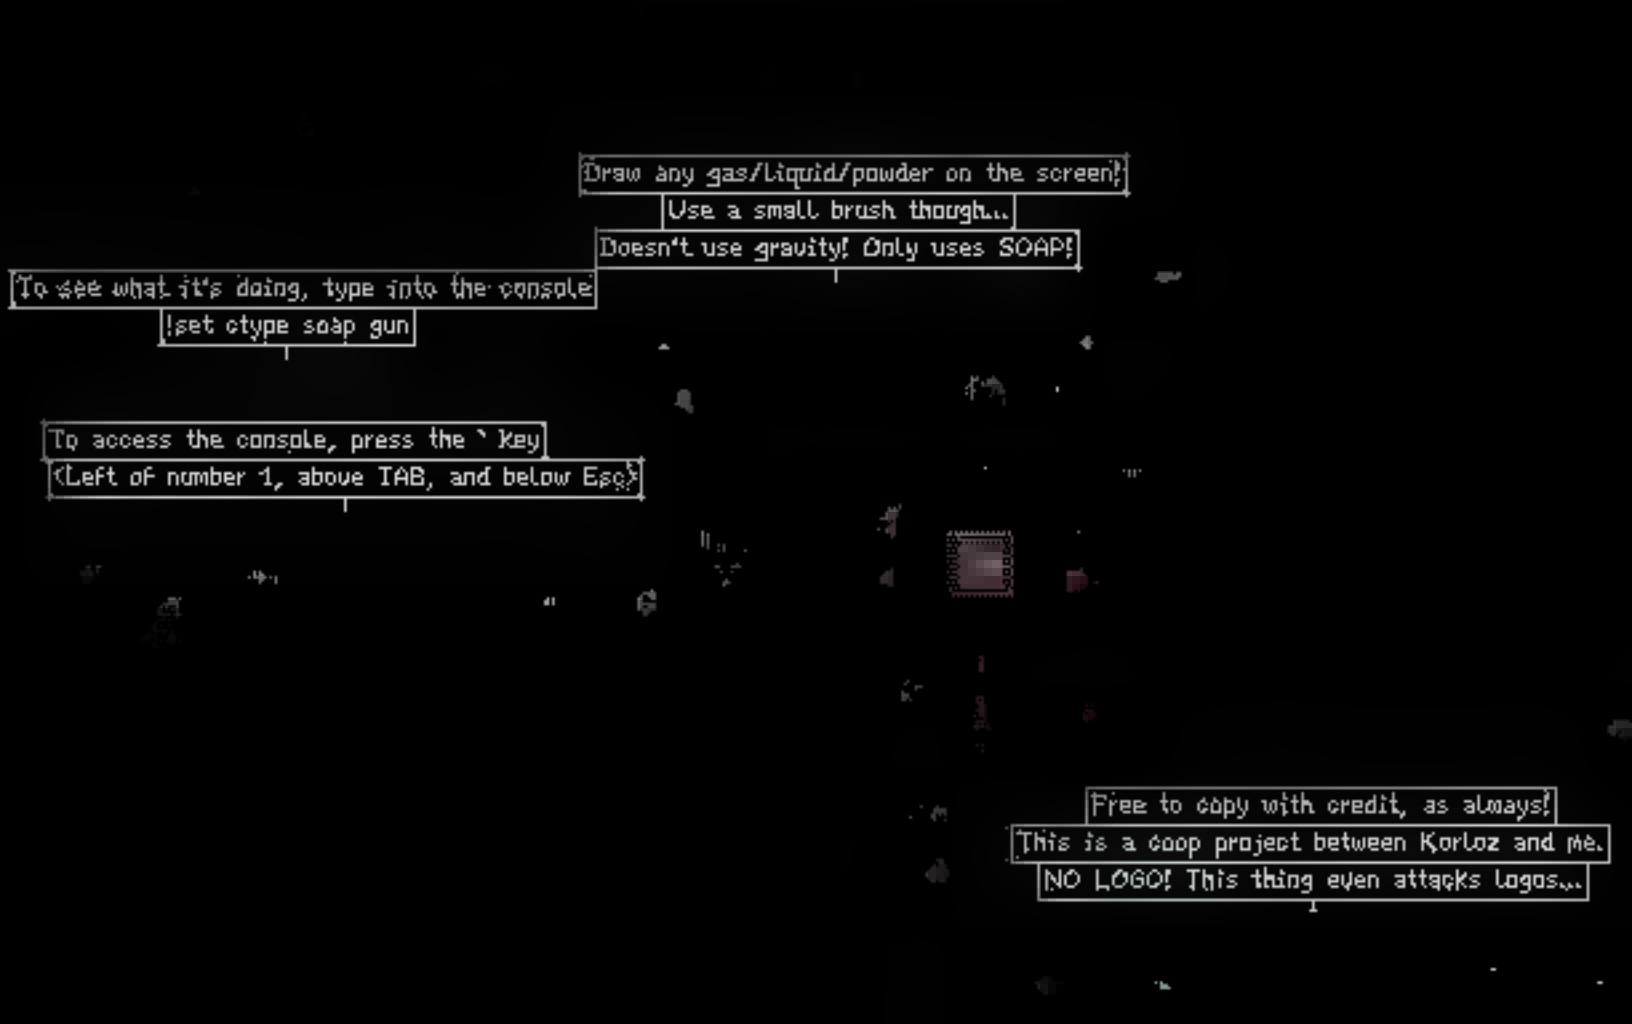
You can do this with any solid

Same applies to powders

With powders, you only need to change the falldown value

My personal fave is liquid WHOL

Try to find more cool liquid solids!



Draw any gas/liquid/powder on the screen!
Use a small brush though...
Doesn't use gravity! Only uses SOAP!
To see what it's doing, type into the console
!set ctype soap gun
To access the console, press the ` key
(Left of number 1, above TAB, and below Esc)
Free to copy with credit, as always!
This is a coop project between Korloz and me.
NO LOGO! This thing even attacks logos...

5: Purge
Wait for PROT to stop then Repeat

R16K1S60

+ R16: 16-BIT ARCHITECTURE
+ K1: 1 KIBI-CELL RAM (1024 CELLS)
+ S60: 60 CLOCK CYCLES PER SECOND
  WITH DEFAULT FRAMERATE CAP

THIS SHOWCASE SHOWS THAT EVEN THOUGH R16K1S60 HAS A 16-BIT ARCHITECTURE, IT STILL CALCULATES 32-BIT ELEMENTS OF THE FIBONACCI SEQUENCE IN A BREEZE. IT STOPS EXECUTION WHEN AN ELEMENT FALLS OUTSIDE 32-BIT BOUNDS THOUGH.
ELEMENT = 65536 TIMES A PLUS B.

YEP. THIS IS A COMPUTER

Mach boosters | Accelerating Version

At Mach 1, the speed of sound, the sound barrier is broken, which changes the shape of the area the sound encompasses to a triangle. This is very sudden and is the "sonic boom". No sound goes in front of the device.

As an object approaches Mach 1, a sound barrier builds up in front.

With its blocky pressure system, TPT isn't really equipped for low-wavelength, high-frequency sound waves... it ends up as just a moving pressure zone.

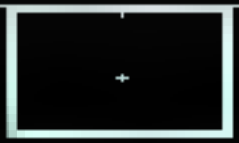
Here Is The Unit That Should Be Placed In The Build

For Example I Have Placed 1 In Each Eye

Then Place Some ETRD In Very Small Amounts On The Outside Of The Object

Somewere On That Same Page You Need To Place This. Best To Place It Away From The Build



Then When Somebody Copys Your Build The Anti-Copy System Will Destroy It!

When It Looses Connection With The Wifi To Test This Out Try Removing The Wifi Transmitter

Note It Is Best When You Hide The Anti-Copy Before You Publish It.

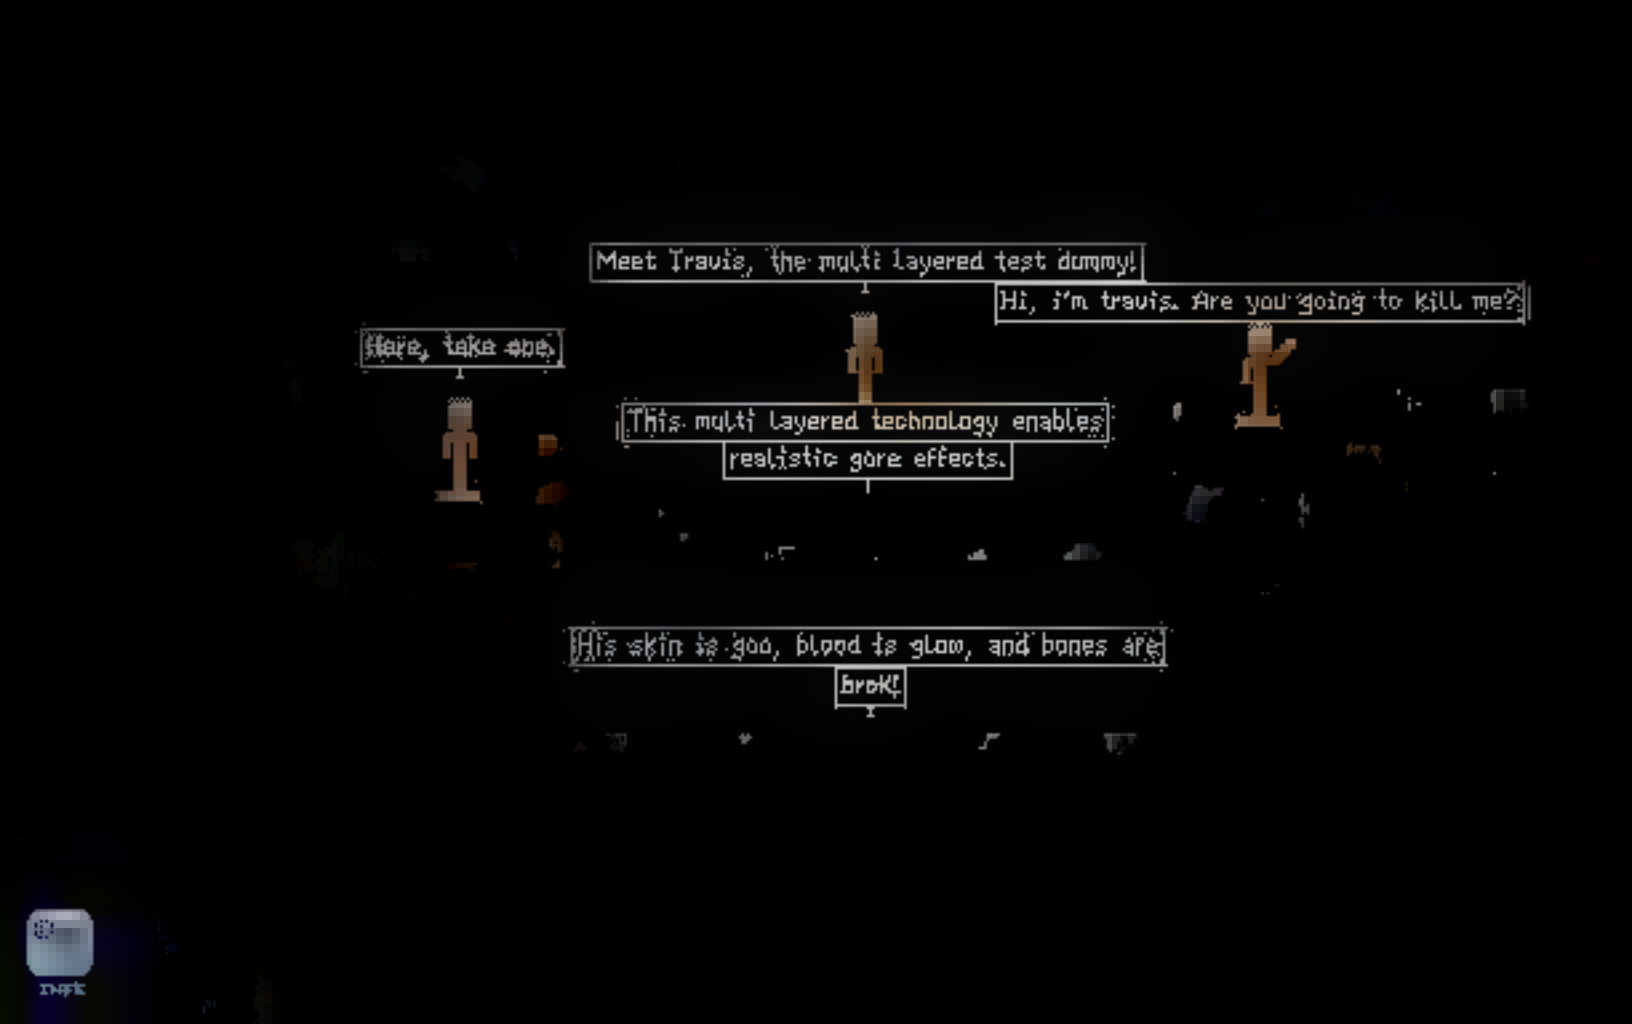
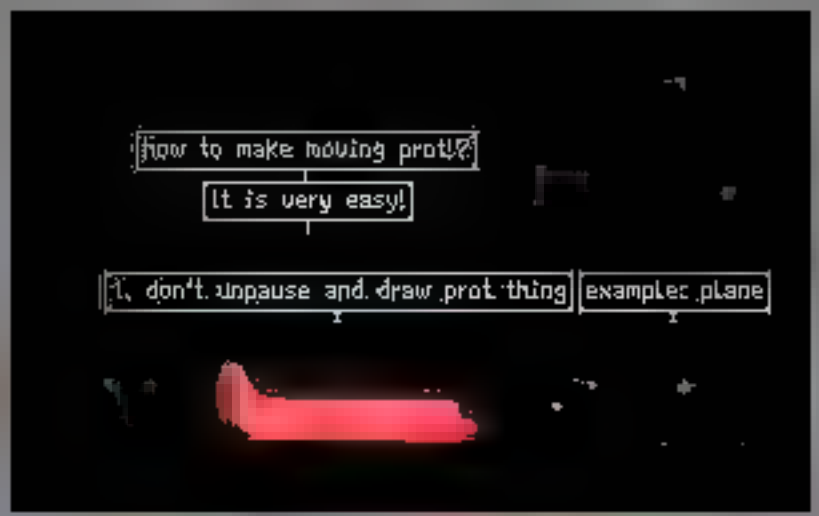
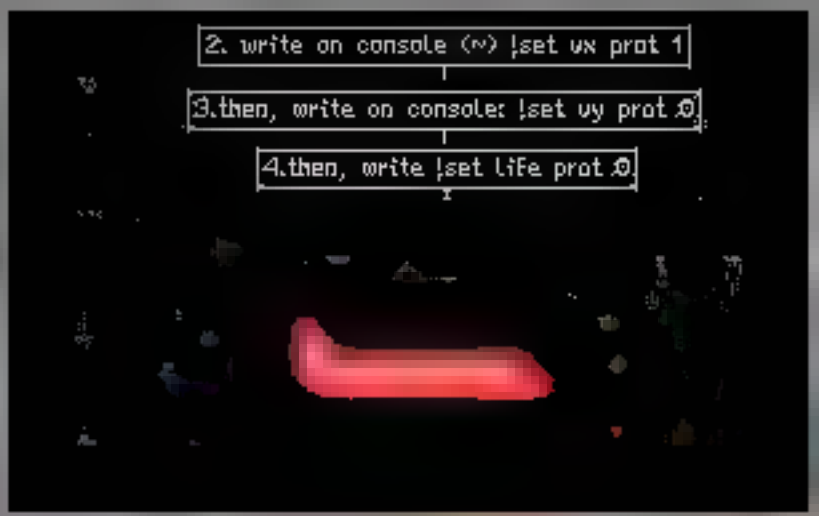
HELLDIVERS
LET'S GO



Meet Travis, the multi layered test dummy!
Hi, i'm travis. Are you going to kill me?
Here, take one.
This multi layered technology enables realistic gore effects.
His skin is goo, blood is glow, and bones are brok!

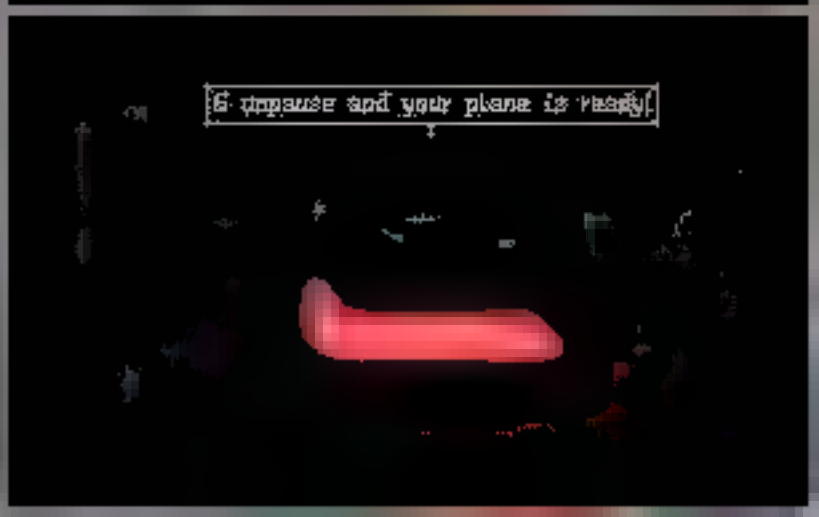


how to make moving prot!?
It is very easy!
1. don't unpause and draw prot thing
example: plane

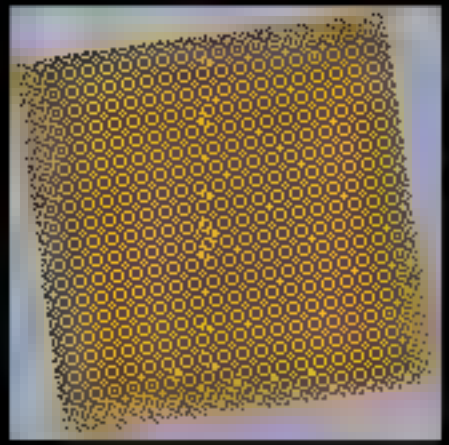


2. write on console (~) !set vx prot 1
3.then, write on console: !set vy prot 0
4.then, write !set life prot 0

5. color your prot



6. unpause and your plane is ready!



Best internet simulation ever!

Cool alloy

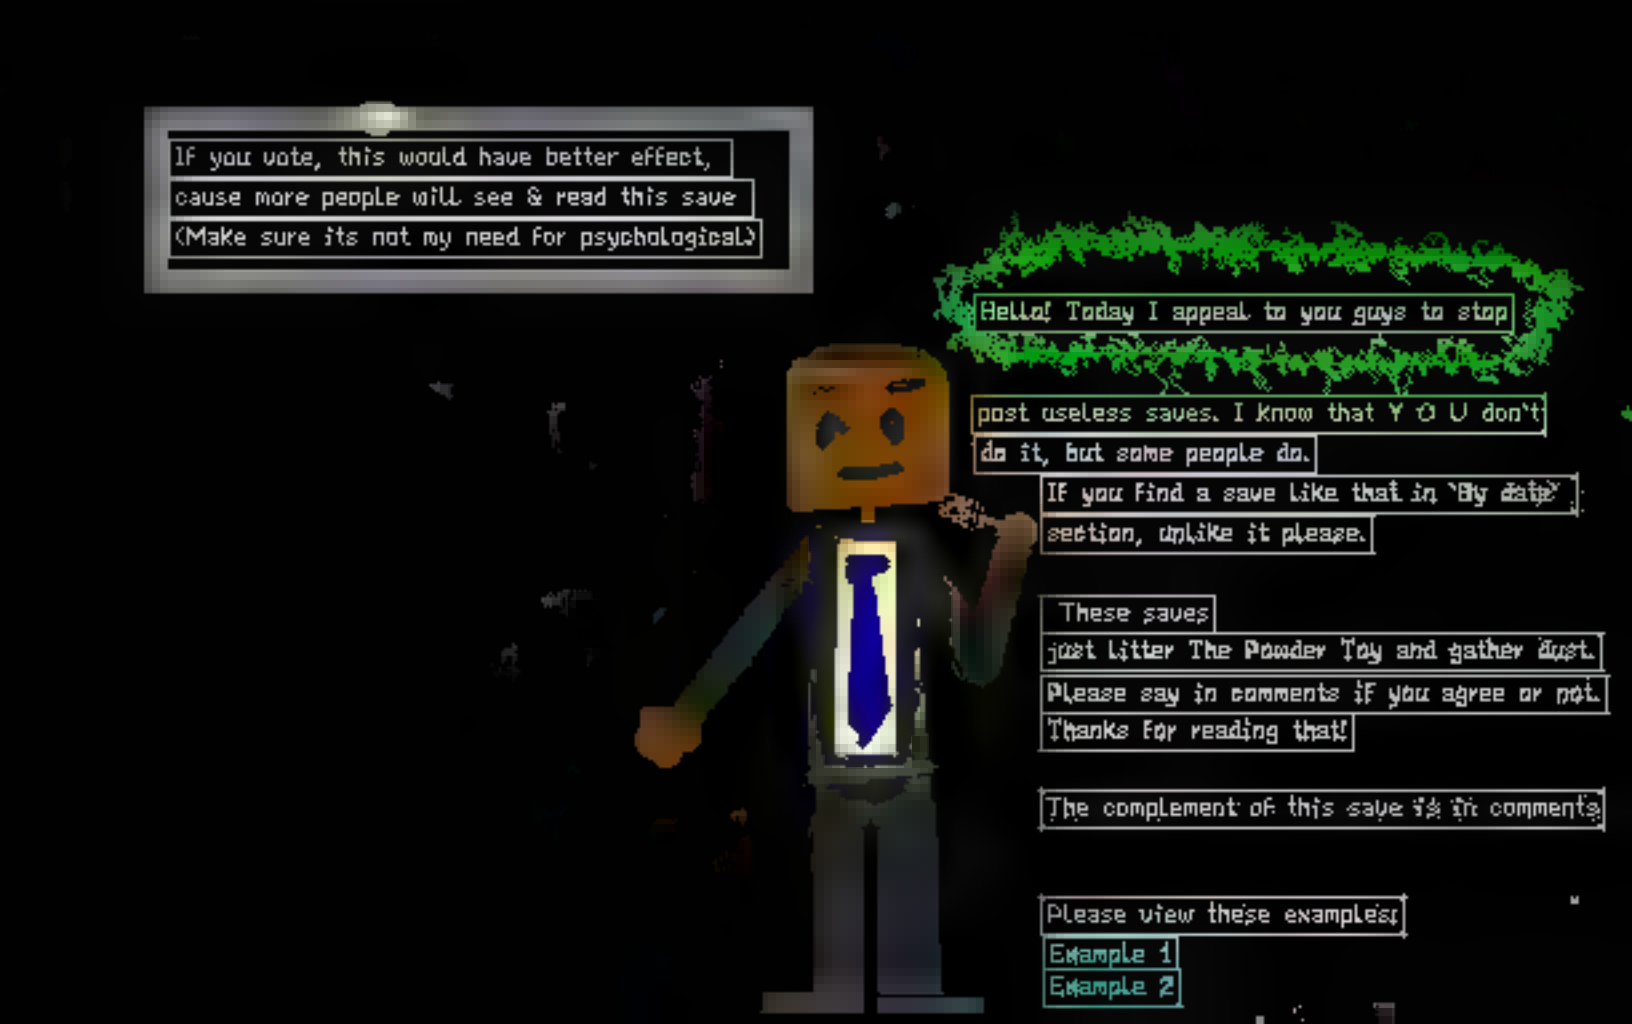
Run spark over it!!
and then try put a big hole in the middle!!



If you vote, this would have better effect,
cause more people will see & read this save
(Make sure its not my need for psychological)
Hello! Today I appeal to you guys to stop
post useless saves. I know that Y O U don't
do it, but some people do.
If you find a save like that in 'By date'
section, unlike it please.
These saves
just litter The Powder Toy and gather dust.
Please say in comments if you agree or not.
Thanks for reading that!
The complement of this save is in comments
Please view these examples:

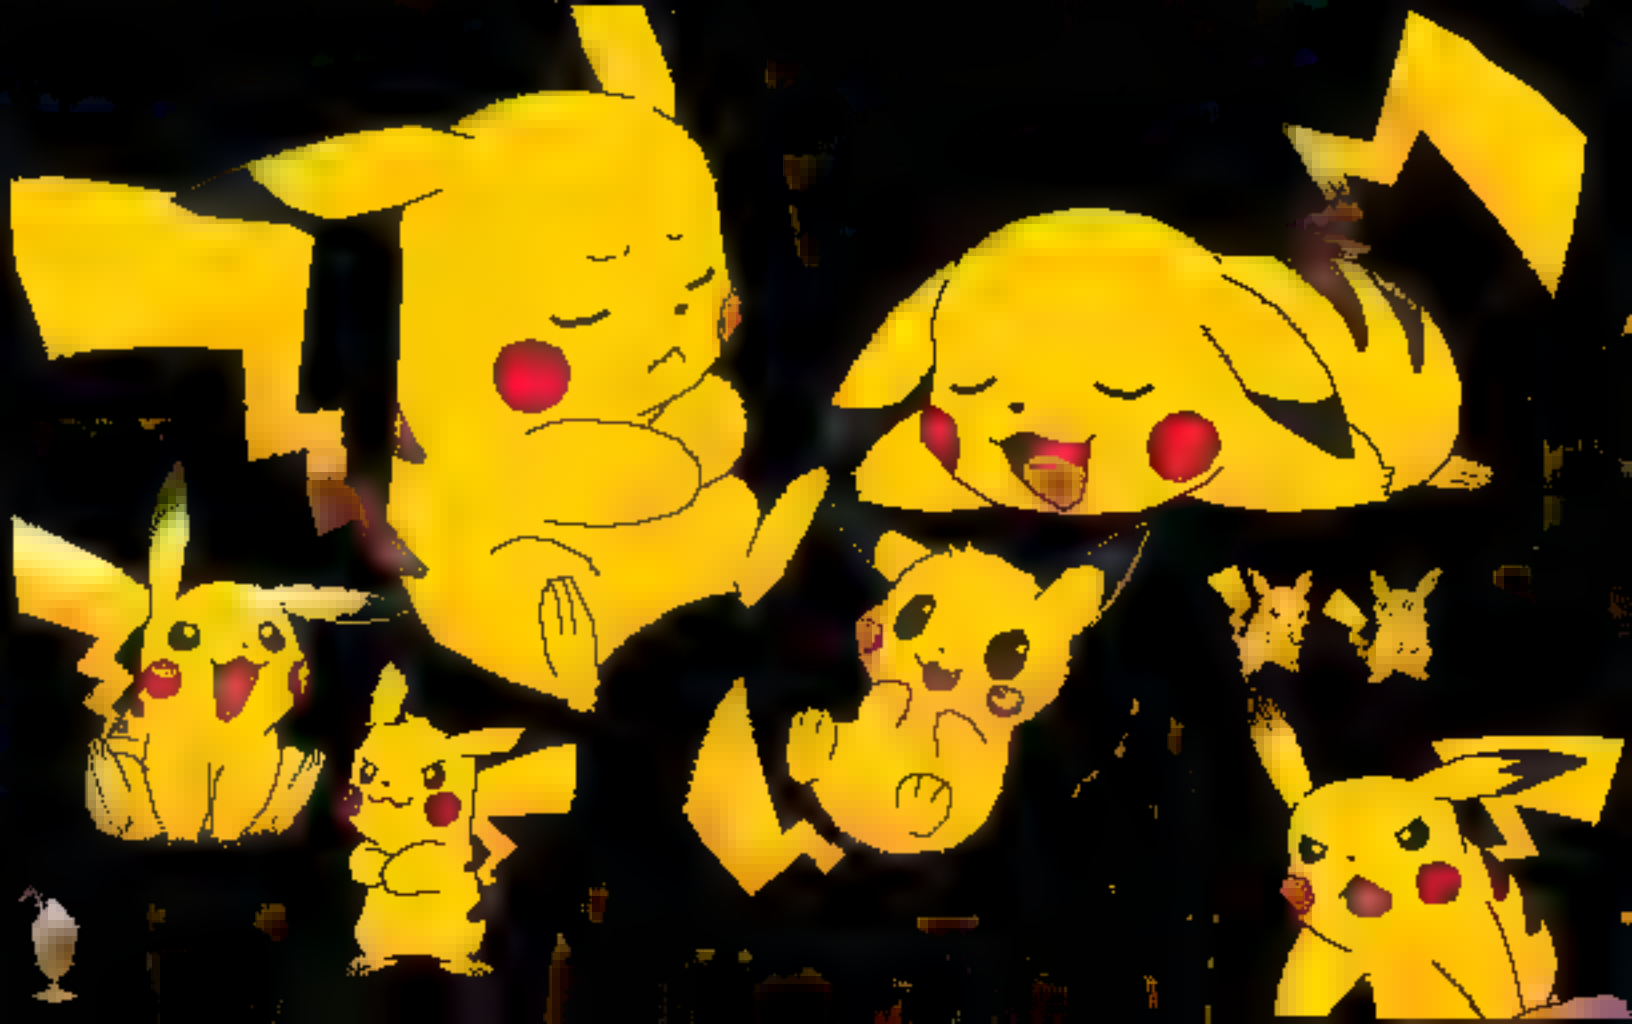
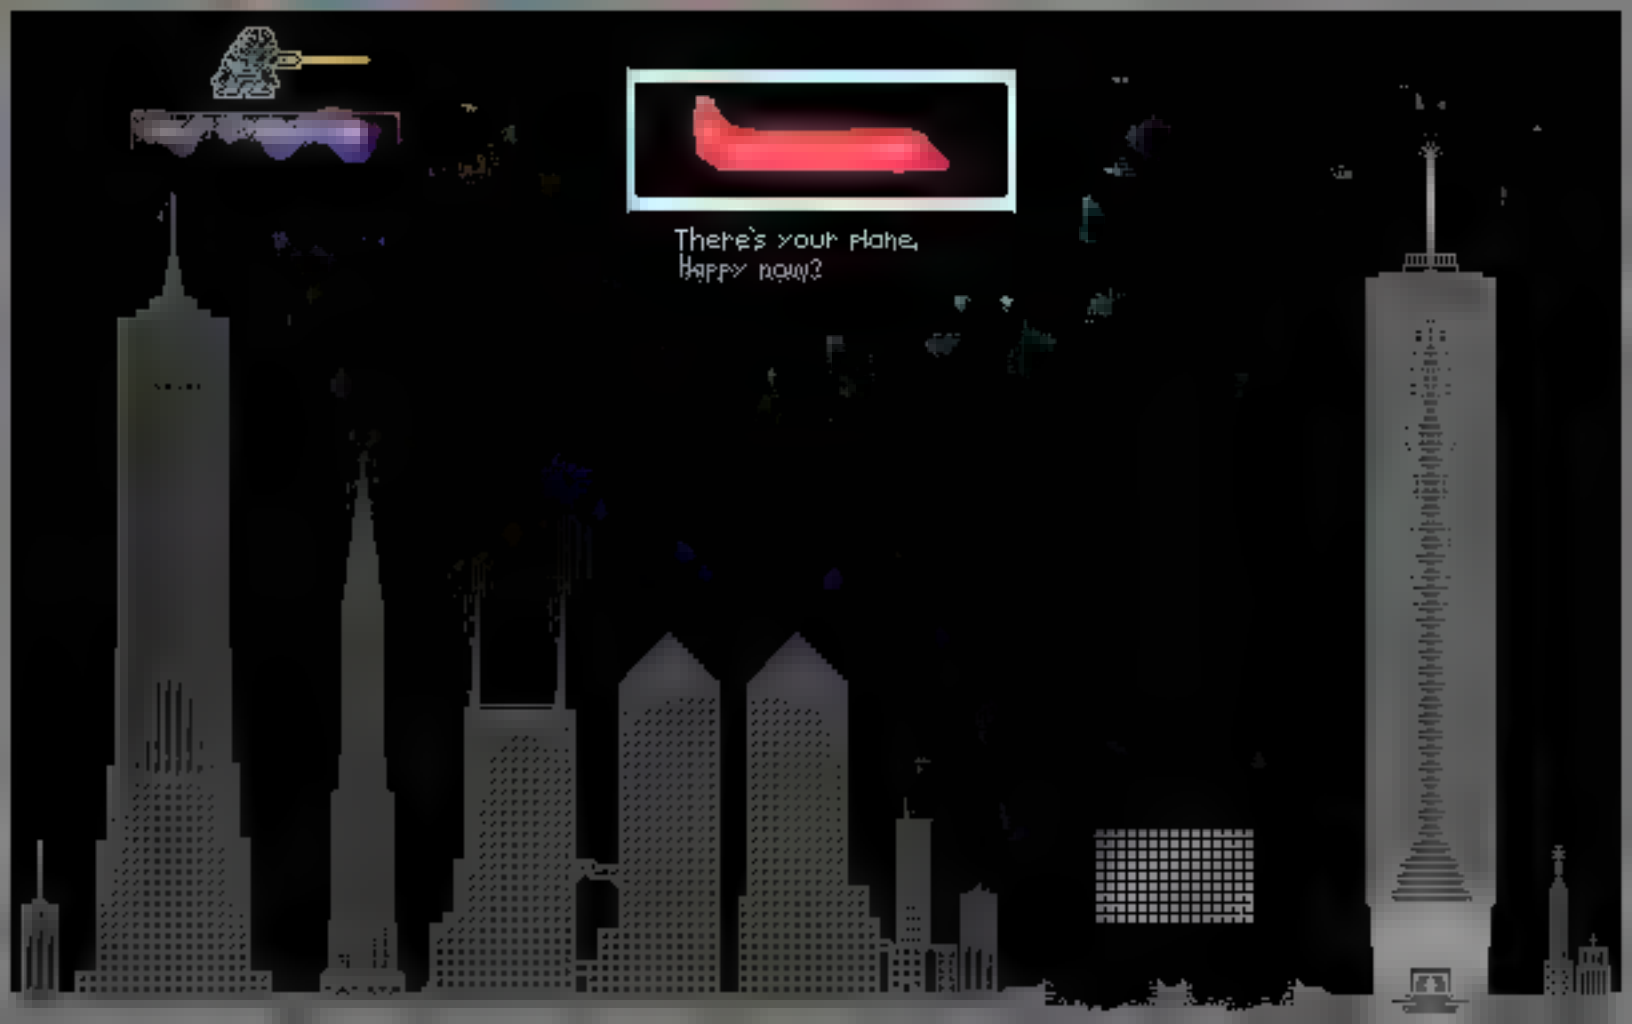
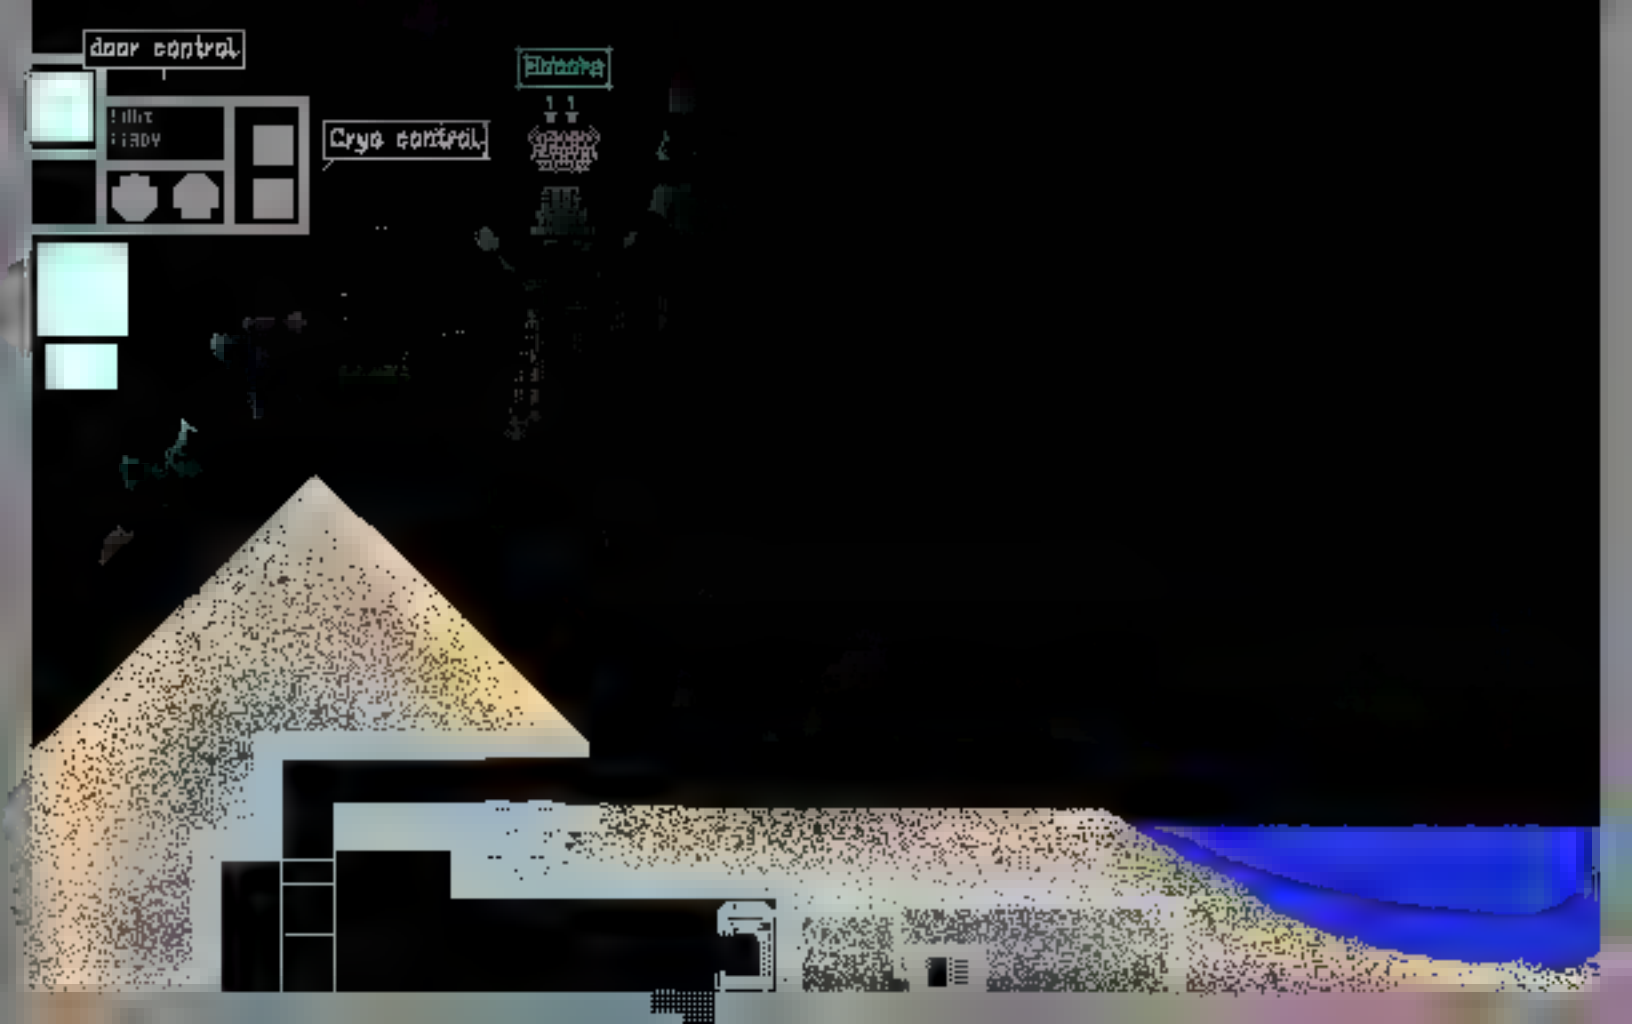
PRIDE
GO!



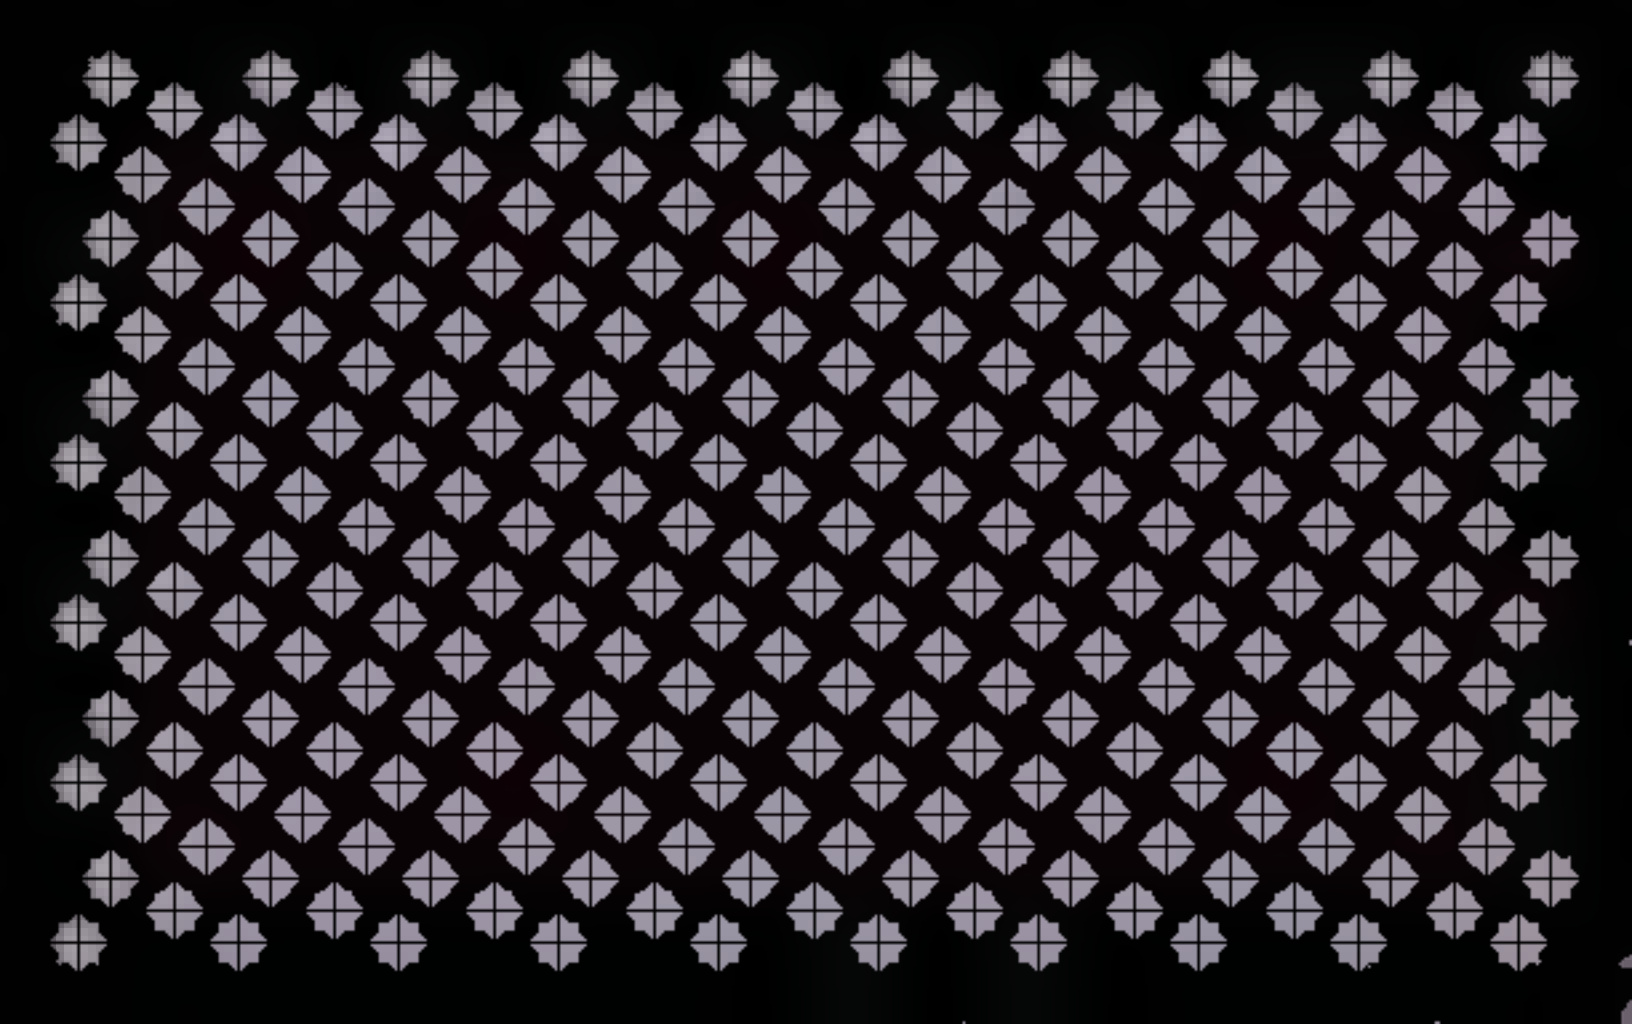


There's your plane.
Happy now?

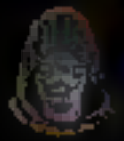


door control
Cryo control

Berten The Red Dwarf star
THIS IS MY OLD SAVE, DONT VOTE ON IT
Unpause for bonus simulation



I WILL MAKE [illegible] I HAVE TO KNOW EXACTLY WHAT YOU WANT. BUT SOME SPECIFI[illegible]ED. HERE IS ALL THE ART AND ALL THE LOGOS I HAVE EVER [illegible] IN THE COMMENTS!



To detonate these, Unpause, then Ctrl+Z
Hence the name, Undo-ers

Explaination

These bombs have MANY MANY layers
(Pixels ontop of eachother using the prop tool)
Under the snow is your average, everyday
Supercooled DEUT with ~100000 more piled
on top of eachother, then hidden by snow.
The Ctrl-Z is just because the mass causes
A black hole at first, so the game
recalculates and finds the spread-and-
Reaction that should occur, but doesnt due
To the mass causing the black hole at first.

THANKS FOR FP!!!

BASE SEGMENT: POWER/OUTPUT
FULLY MODULAR CONSTRUCTION!
- JUST DELETE THE 'ADDING' CUT AND PASTE TO THE DESIRED SIZE AND UPDATE SOME TMP, TMP2 AND TEMP VALUES, NO CTYPE CHANGES NEEDED.
SUPPORTS UP TO 18X3 [90] SIMULTANEOUS 8-BIT ADDITIONS!
INFO:
- THIS ADDER MAKES USE OF AN EASILY EXPANDABLE BITWISE ADDITION ALGORITHM DEVELOPED BY FORIOUSWEASEL AND IMPADDED BY ME, A FERRET AT HEART, TO SUPPORT CARRY INS, I HENCE DEEM IT THE 'WEARET ALGORITHM'.
- BY REUSING THE RIGHT PROPAGATING ARRAY FROM THE BASE SEGMENT AND REUSING FILT LOGIC COLUMNS WITH THE HELP OF PSTN 'PARTICLE IO CRANKING', ADDERS CAN BE STACKED HORIZONTALLY TO AN 8-PIXEL SEGMENT WIDTH!
- INPUT AND OUTPUT CTYPES ARE IN 'STANDARD 2^29+d FORMAT'.
- ABOVE IS A DEMONSTRATION OF AN INTERESTING PROPERTY OF THE 'WEARET ALGORITHM'' SINCE THE ALGORITHM PERFORMS THE SAME BITWISE OPERATIONS ON EACH STAGE, A CARRY IN CAN BE INSERTED STARTING AT ANY BIT, AS A RESULT, THE ADDER ABOVE CAN BE MODE TO ADD THREE 8-BIT NUMBERS SIMULTANEOUSLY WITH INDEPENDENT CARRY PROPAGATION!
INSTRUCTIONS:
- TO USE, SPAM THE 1 BUTTONS TO TOGGLE EACH BIT, 2 TO SET THE CARRY IN (LIKE ADDING 1), 3 TO CLEAR, AND 4 TO ENTER.
- ALL ADDERS HERE NOT MARKED 'RE', INCLUDING EXPLODED VERSIONS, ARE FUNCTIONAL WITH THE INPUTS SET VIA THE COLOUR CODED PIXELS. USE THE PROP TOOL TO SIMULATE THE OTHER SETTING THE CTYPES OF ADJACENT FILT LINES TO THEIR RESPECTIVE INPUT VALUES.

SANDWICHLIZARD DOWN

I will be undergoing surgery AUGUST 17

The disk between my C6 ad C7 vertibrea is destroyed.

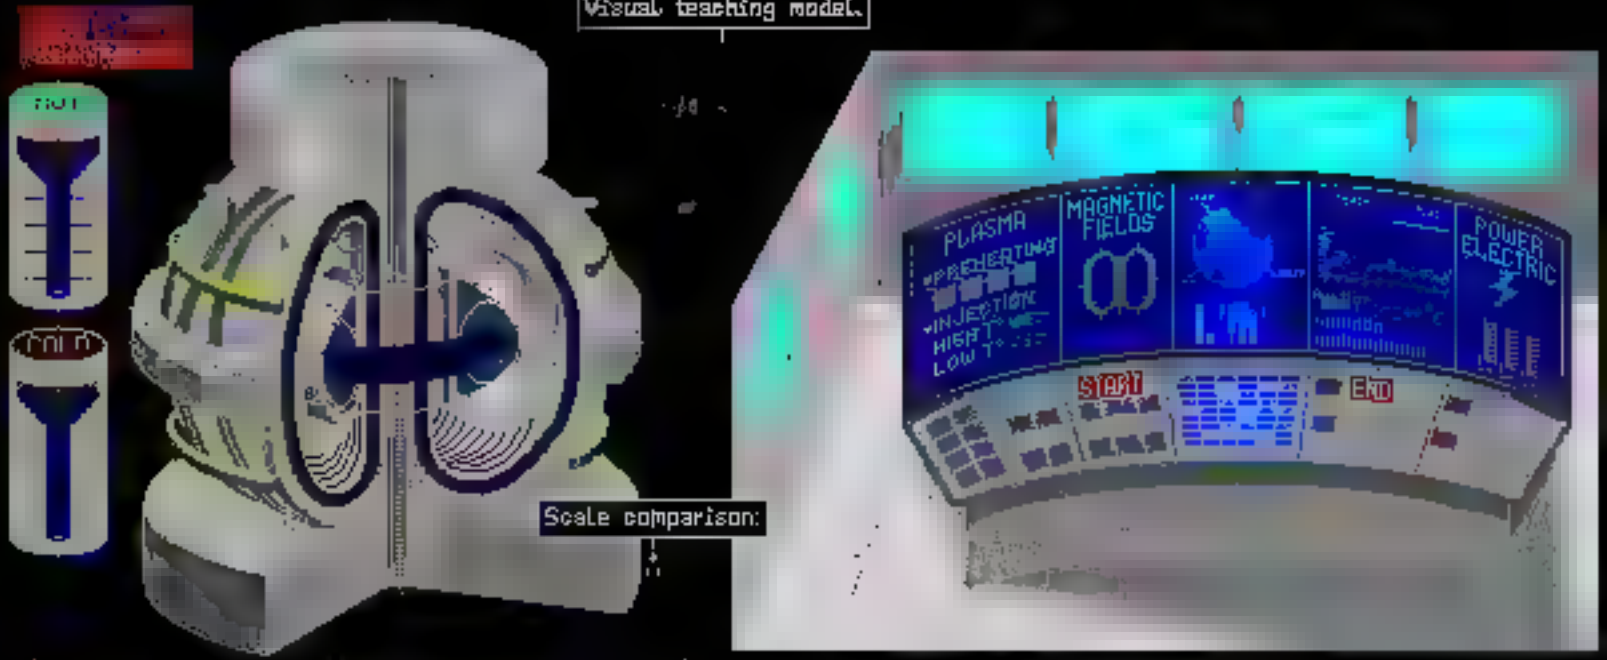
It will be removed and the vertibrea fused into one MEGA Vertibrea.

I will be drugged for at least 2 weeks might be weird.

neck and spine problems by ChocolateMilkshake

Under construction...

Visual teaching model.



Scale comparison:

Starting reactor: Step 1 - Connect plasma heaters;

Step 2 - Injecting hot plasma;

Step 3 - Connect magnets (left and right)

Wait for the beginning of the reaction.

Control temperature by injecting cold plasma. (Better to see, yellow or orange)

Shutting down reactor: OFF plasma injection and wait, then off ... Or click END...

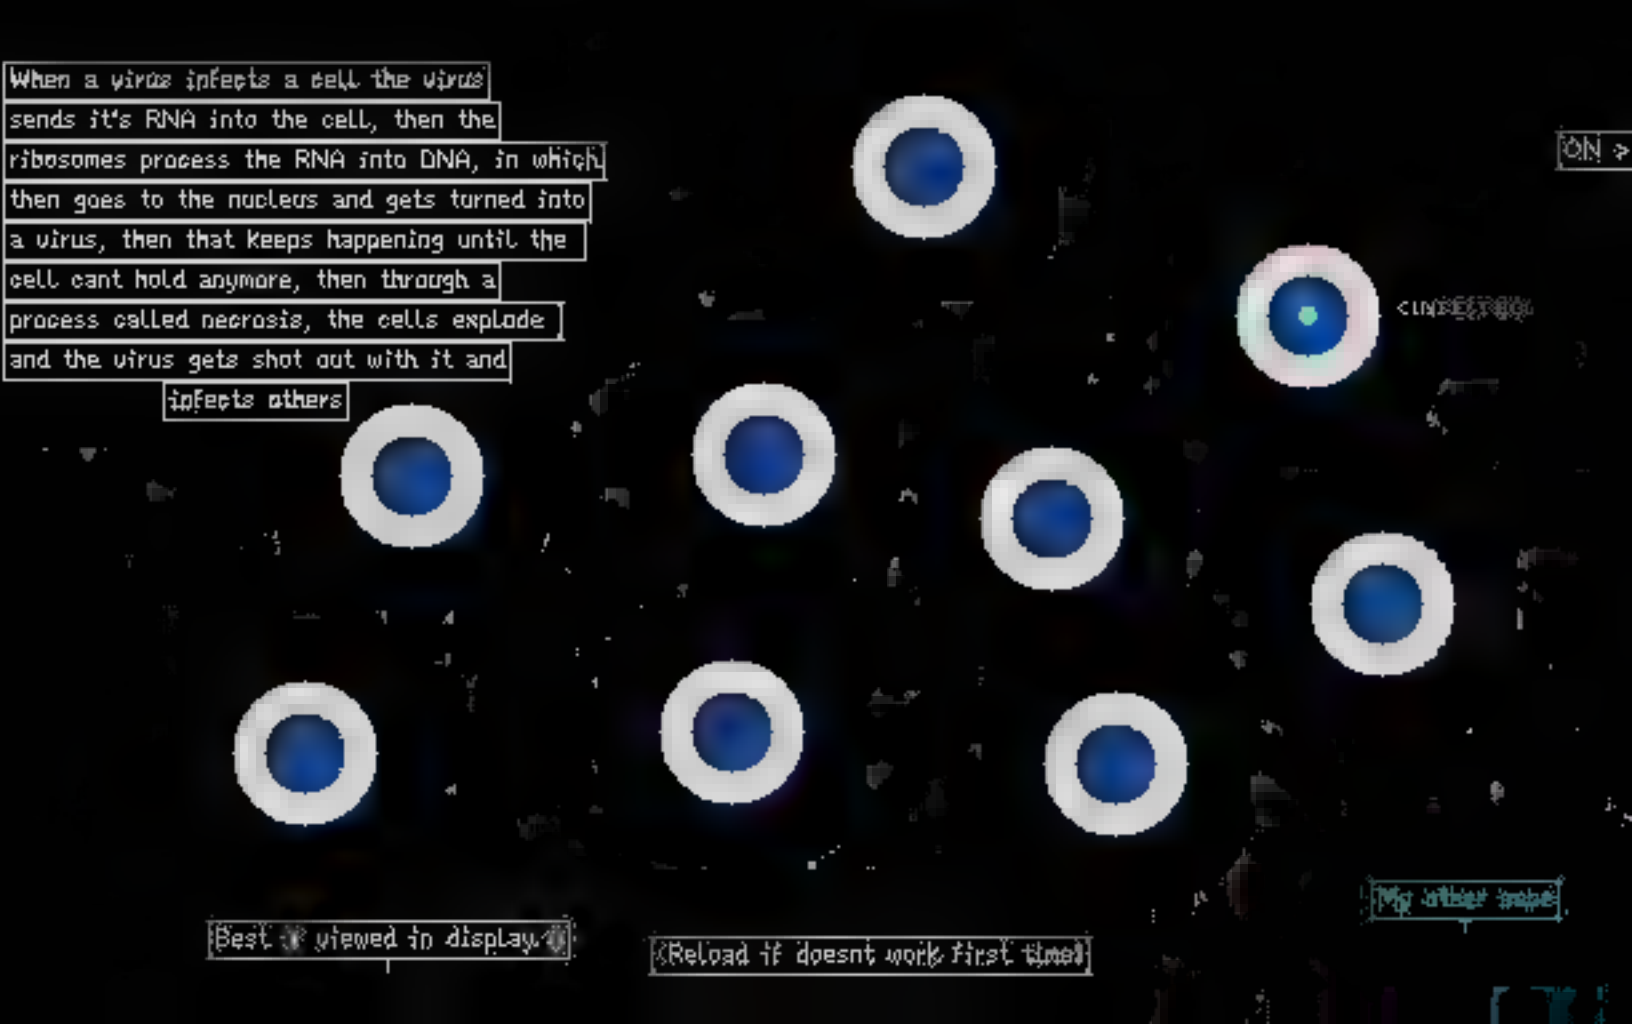
My Bonepage



When a virus infects a cell the virus sends it's RNA into the cell, then the ribosomes process the RNA into DNA, in which then goes to the nucleus and gets turned into a virus, then that keeps happening until the cell cant hold anymore, then through a process called necrosis, the cells explode and the virus gets shot out with it and infects others

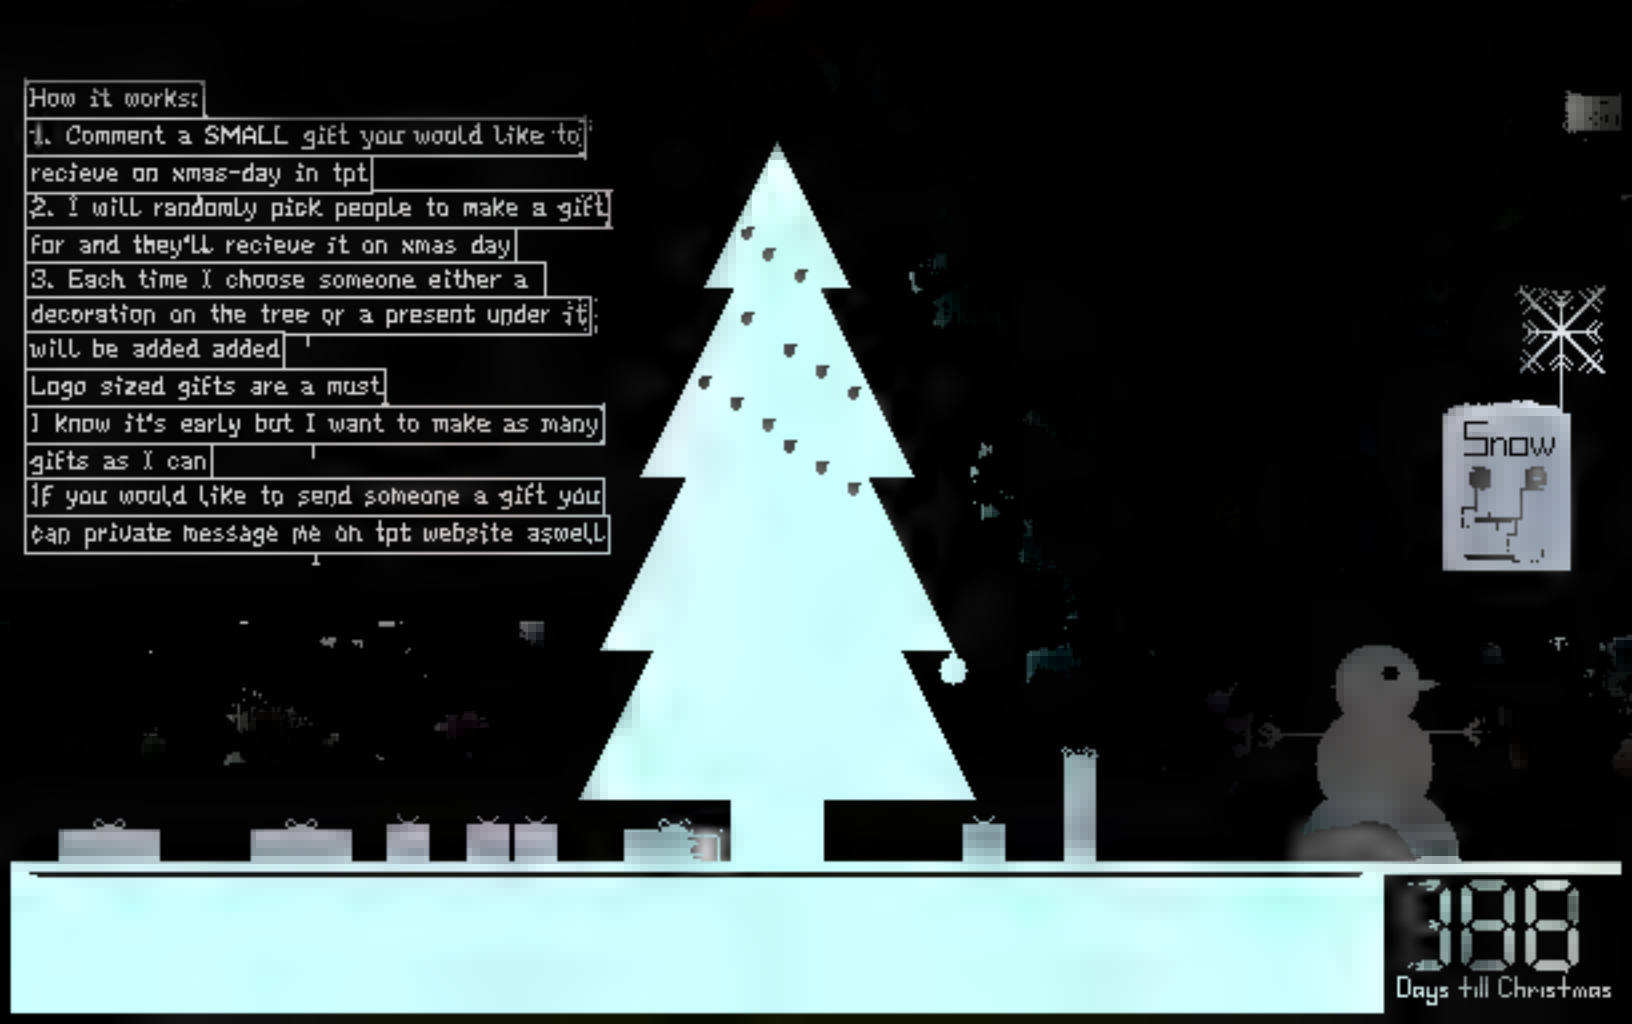
(Reload if doesnt work first time)
My other page



How it works:
1. Comment a SMALL gift you would like to recieve on xmas-day in tpt
2. I will randomly pick people to make a gift for and they'll recieve it on xmas day
3. Each time I choose someone either a decoration on the tree or a present under it will be added added
Logo sized gifts are a must
I know it's early but I want to make as many gifts as I can
If you would like to send someone a gift you can private message me on tpt website aswell

exi's Brainf*** Interpreter

because why not

Seriously, it's a fully working Brainf*** interpreter inside TPT.
(yes, this is a real programming language)

ON

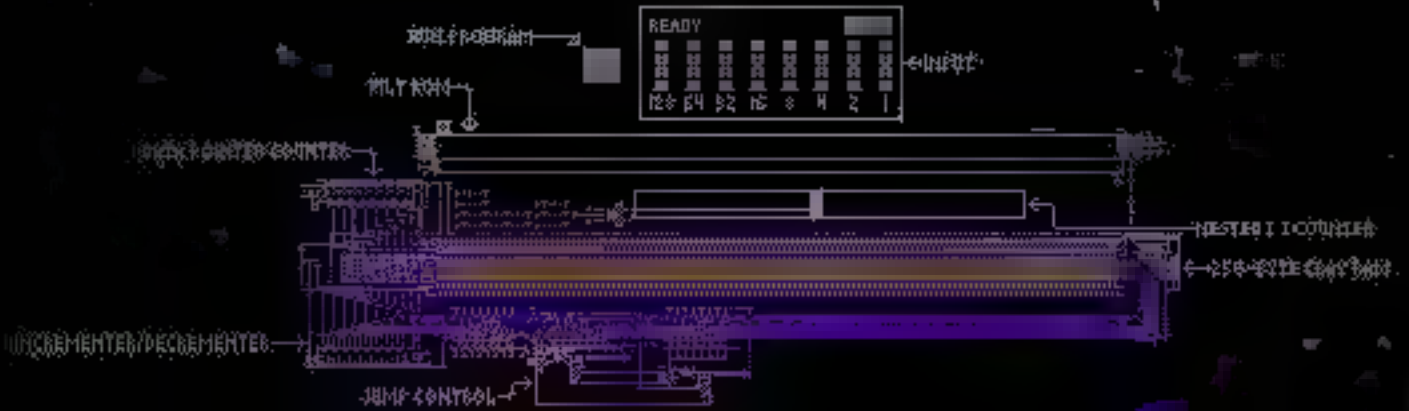
Brainf*** is made up of 8 commands:

- `>` = increment the data pointer by 1
- `<` = decrement the data pointer by 1
- `+` = increment the byte at the data pointer by 1
- `-` = decrement the byte at the data pointer by 1
- `.` = output the byte at the data pointer
- `,` = store a byte of input at the data pointer
- `[` = jump to the matching `]` command if the byte at the data pointer is zero, otherwise go to the next command
- `]` = jump to the matching `[` command if the byte at the data pointer is nonzero, otherwise go to the next command

Command positions in FILTROM:

Each column of the ROM can only have one command.
The test program here is a simple counter. It's slow but you can do better.

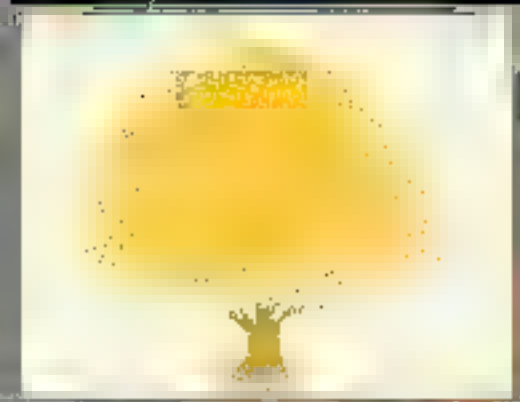
Wait for the ready light to come on before entering a byte.
Use the red and blue buttons to select bits and then spacebar.



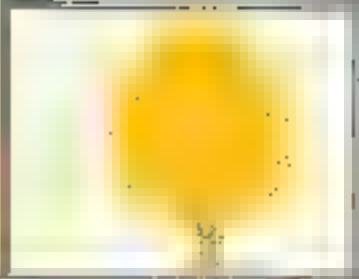
by docRobbRobert

More plants here

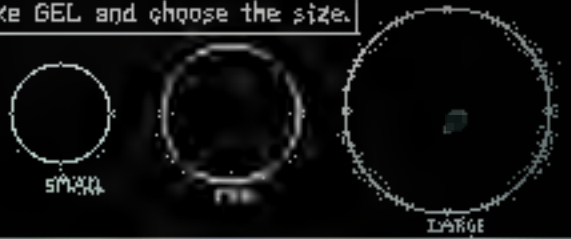
Now I teach you How to make this nice tree!



OK, lets start.



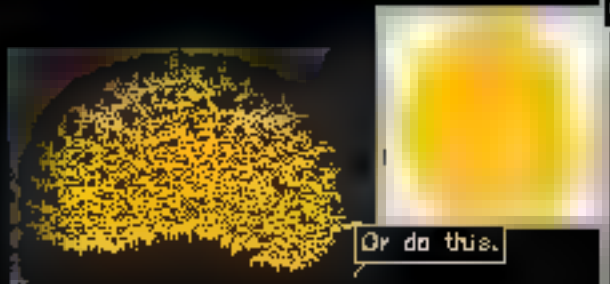
1. Take GEL and choose the size.



2. Pause and put GEL somewhere.

You can decorate it on this step

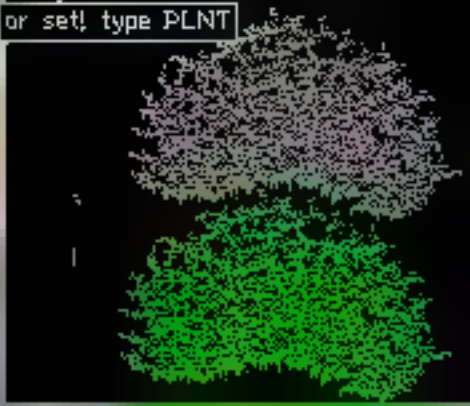
3. Press "F" and wait for perfect moment.



Or do this.

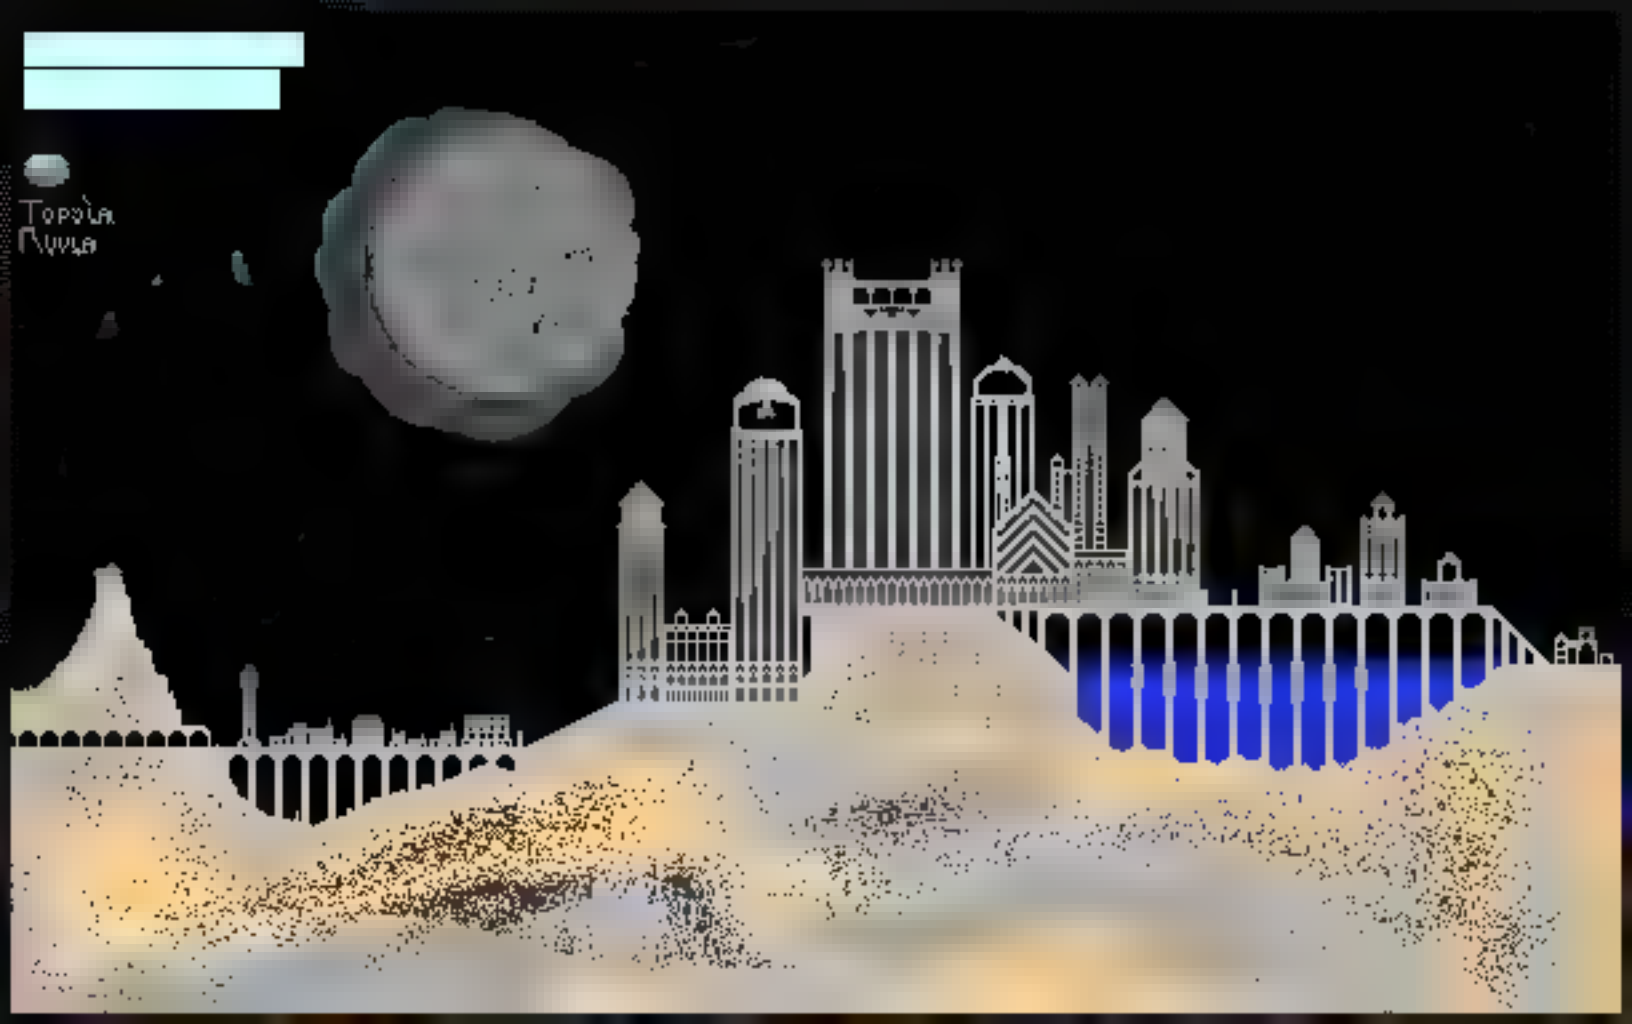
You can use NGRV or hold LMB for better effect.

4. Press "Insert" and change gell to other thing or set! type PLNT



5. Decorate it.

In 5 steeps you can make this!



Topola
Nuvla

60-FPS Laser

Please press buttons only one time

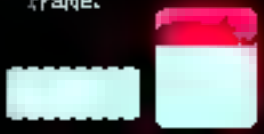
Hey subframe stuff is cool right? Why not check how awesome FTLT is Click
DRAW
Homepage
NOVI

Every particle has its own unique ID which determines when it's "evaluated", that is, its code run. The smaller the ID is, the earlier the particle is evaluated.

A freshly opened save has its particles ordered in a deterministic way: the ID of any given particle is bigger than the ID of its neighbours to the left and any particle above it.

What this means is that the ID of a particle and thus the precedence of its evaluation over other particles is determined by its position in 2D space.

Subframe means that you purposefully exploit this not-so-obvious order of evaluation by placing particles close to one another in certain ways, this way ordering the evaluation of those particles inside the frame.



Turn deco layer on

Nothing display (8) recommended

Rule of thumb: never blame TPT

Rule of pointer: reload if things break

mark2222 has been busy

CONV is awesome

Subframe inside logos

this one's interesting

chain hack

the other two directions are tricky

chain hack still works

First you have to achieve solid spark, that is, create an eternal spark that never turns back into a conductor. This is done by converting your existing spark into a conductor (usually with CONV) and then sparking it again in the same frame (usually with BTRY). Examples on the left.

When you want to drive a sparkable with a solid spark, you must take into account that sparkables only take sparks from SPRK particles whose life value is 3. Solid sparks do have a life value of 3, but only before they get resparked, after which their life value becomes 4 and the spark is unusable until the next frame. The solution: making the sparkable take the spark *before* the solid spark is resparked. Examples on the left.

So what we can see here is that the usual order of particles in a solid-sparked *RAY (or any other sparkable) site is *RAY-CONV-BTRY.

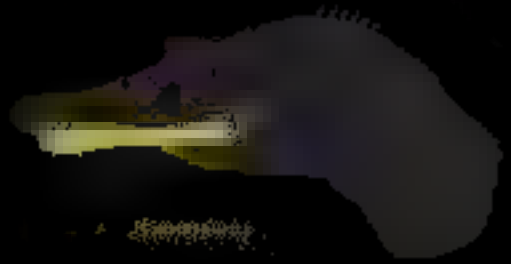
SENTINAL
very rough lensing and "simulation" test
feedback appreciated

So i created these out of boredom. These are my custom ores and some things "created" using them. Luxile, Viridium and Umbranite were created by me and others were taken from general fantasy/mithology concept.

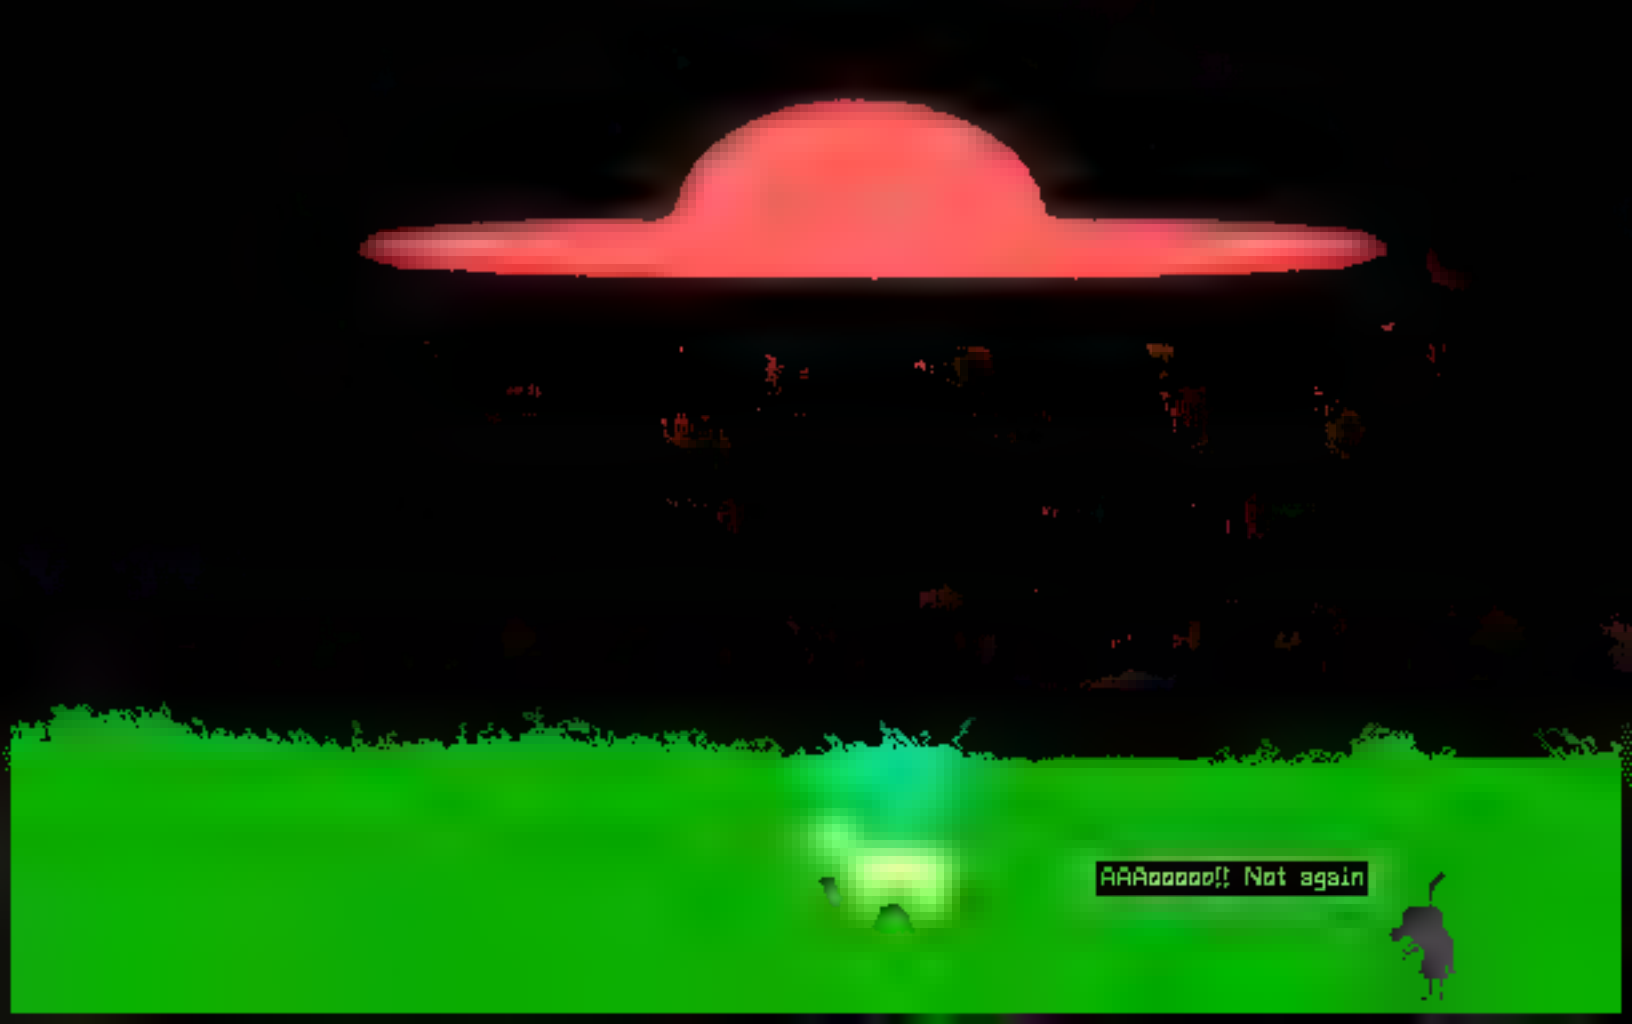
Feel free to use them, but please credit me in the save description

Comment on which ore/item is your personal favourite, mine is green orb ;)

shut ur mouth bout cobalt and read the comments



I Am Physics! I Am SOAP!!!
I eat uranium!



AAAooooo!! Not again

view in Nothing display

THANK YOU ALL

I just can not express how greatful I am to have had soo much support from all of you. I feel blessed to be a part of this AWESOME community.

So far so good. I am experiencing only minor discomfort and no real need for narcotic pain meds. The brace I have to wear is really uncomfortable, hard to get a good night of sleep. Its only for a few weeks so no big deal.

So thats it really. Im alive am doin fine.

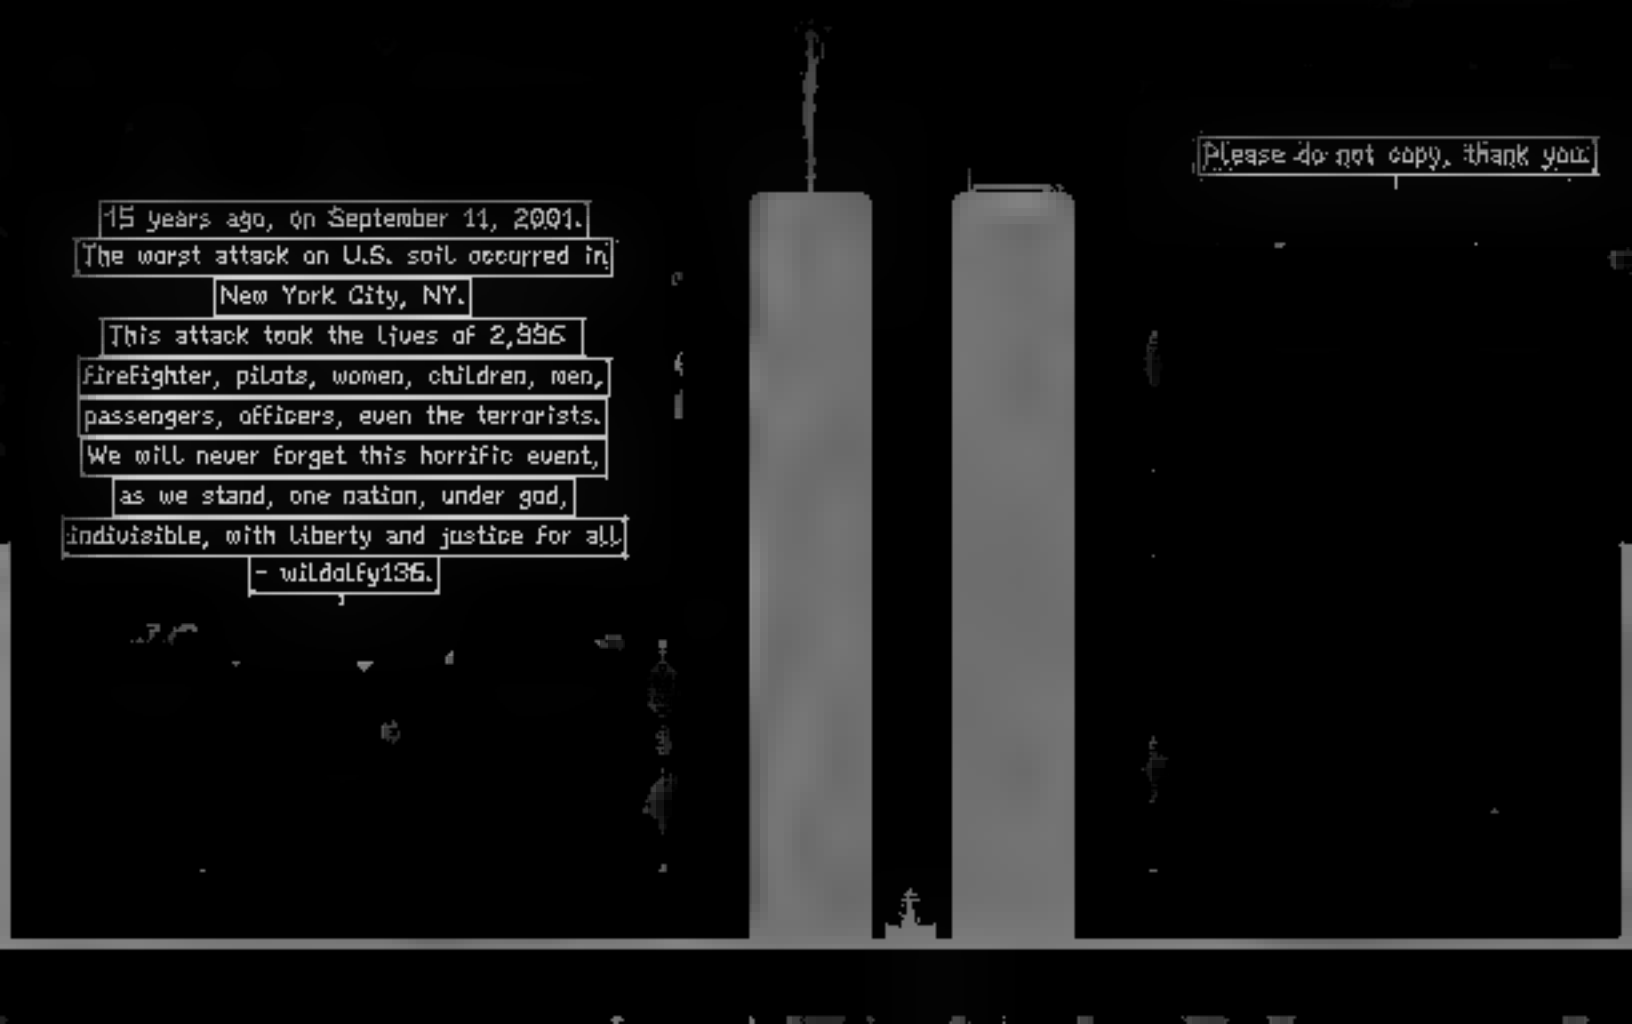
""Trombone""
WHEN A TRUMPET IS PLAYED,
THE LIPS ARE BUZZED, SENDING AIR INTO THE MOUTH-
PIECE. THE AIR CIRCULATES THROUGHOUT THE TRUMPET.
WHEN A VALVE IS PUSHED, IT DIRECTS THE FLOW
OF AIR SOMEWHERE ELSE, THUS CHANGING THE PITCH.

FatboyII
Unpause and wait
Try persistent display (3)



15 years ago, on September 11, 2001.
The worst attack on U.S. soil occurred in
New York City, NY.
This attack took the lives of 2,996
firefighter, pilots, women, children, men,
passengers, officers, even the terrorists.
We will never forget this horrific event,
as we stand, one nation, under god,
indivisible, with liberty and justice for all
- wildolfy136.
Please do not copy, thank you.

Go to homepage, watch other maps!

Note: these recievers arent designed to be close together.
change the tmp2 of the dtec to be able to get them close without bugs.

This is my 29-bit FAST phot data transmitter and recievers.
The phot containing the byte of data travles at ~~extreme~~ high speeds.

Thanks to handicraftsman for giving me tips during me making this.

If you are using this in new tech/in your saves no credit needed.

CopyLeft

29 bits limit
24 bits smaller
16 bits even smaller
8 bits smallest i made

Update:
-Transmitters now outputting spike when phot exits.
-Slowed down the phot.
-Now more reliable.

Do NOT move with arrow keys when pasting..
If you want to, remove the acels on the head of the transmitter.

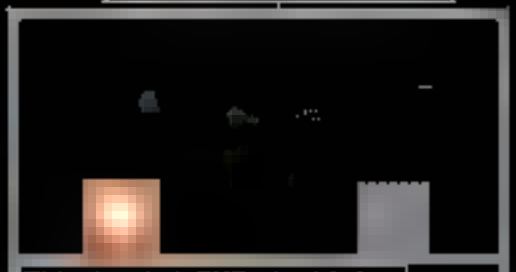
TPT version of TNT / C4.

TPT version of TNT cant even break a brick
Theres just not enough force. Same for C4.
Is there a reason for this?
I wouldnt count this as an explosion..
Its as harmless as lighting a candle..

What TNT / C4 should do.



This is what TNT should do...
IRL, TNT can easily destroy a brick block,
and small houses.
I have put DMG in there to simulate what TNT
should do.

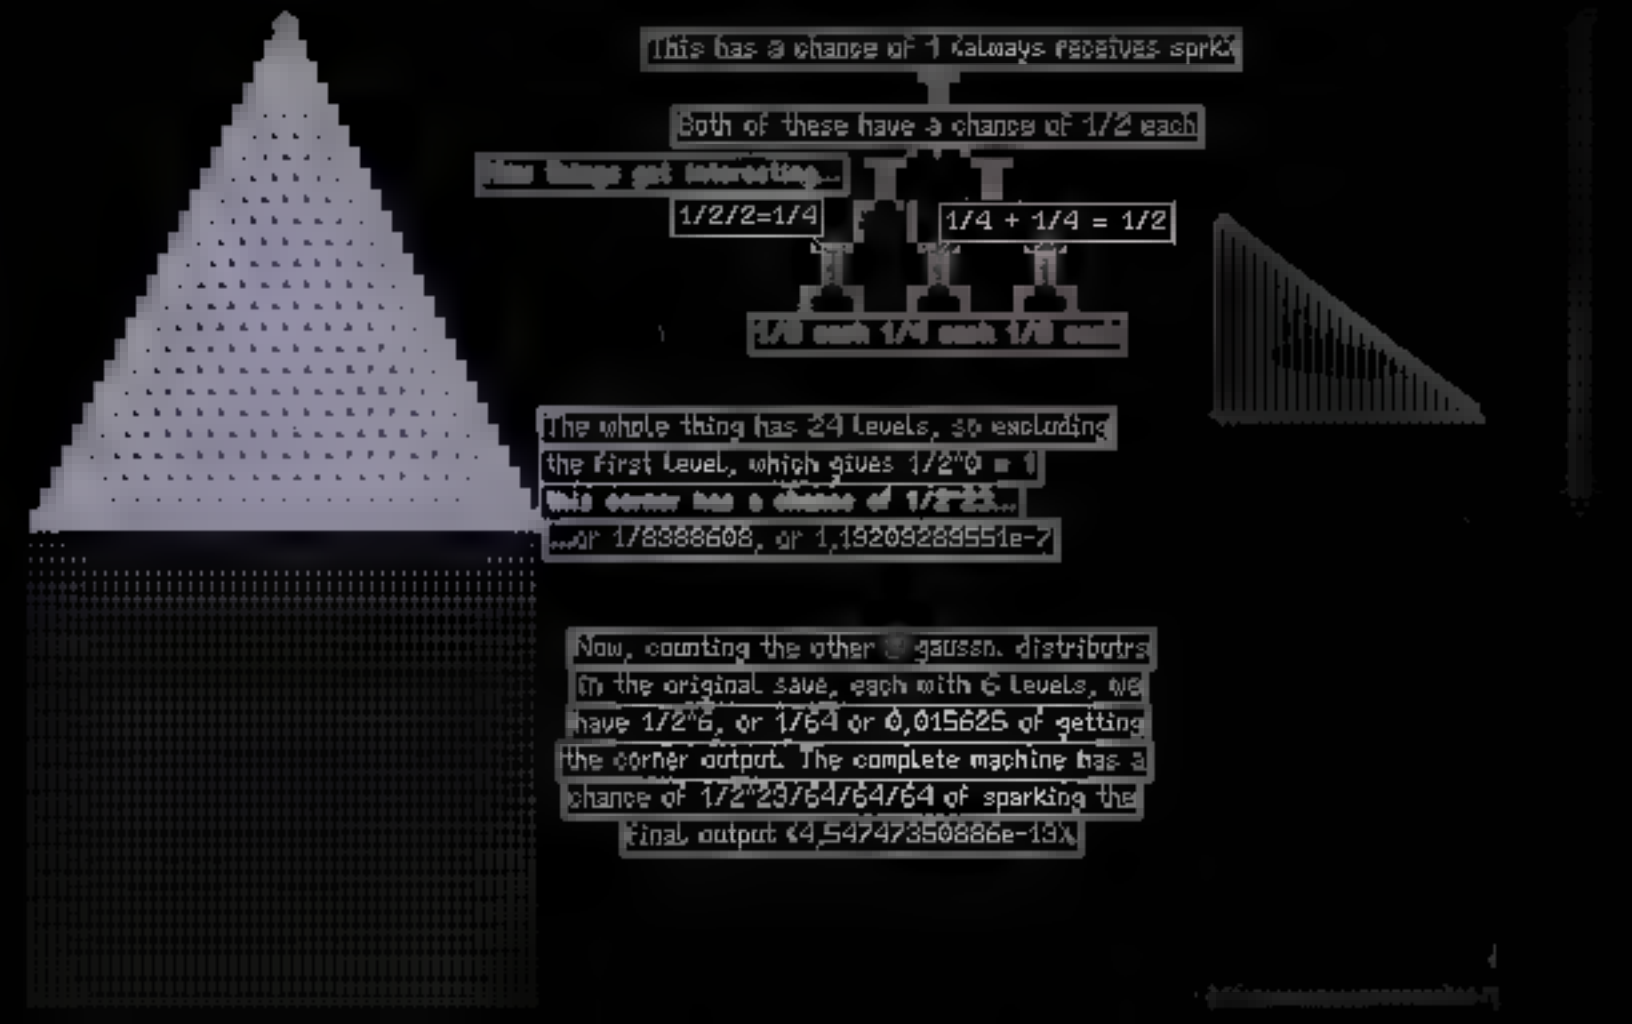
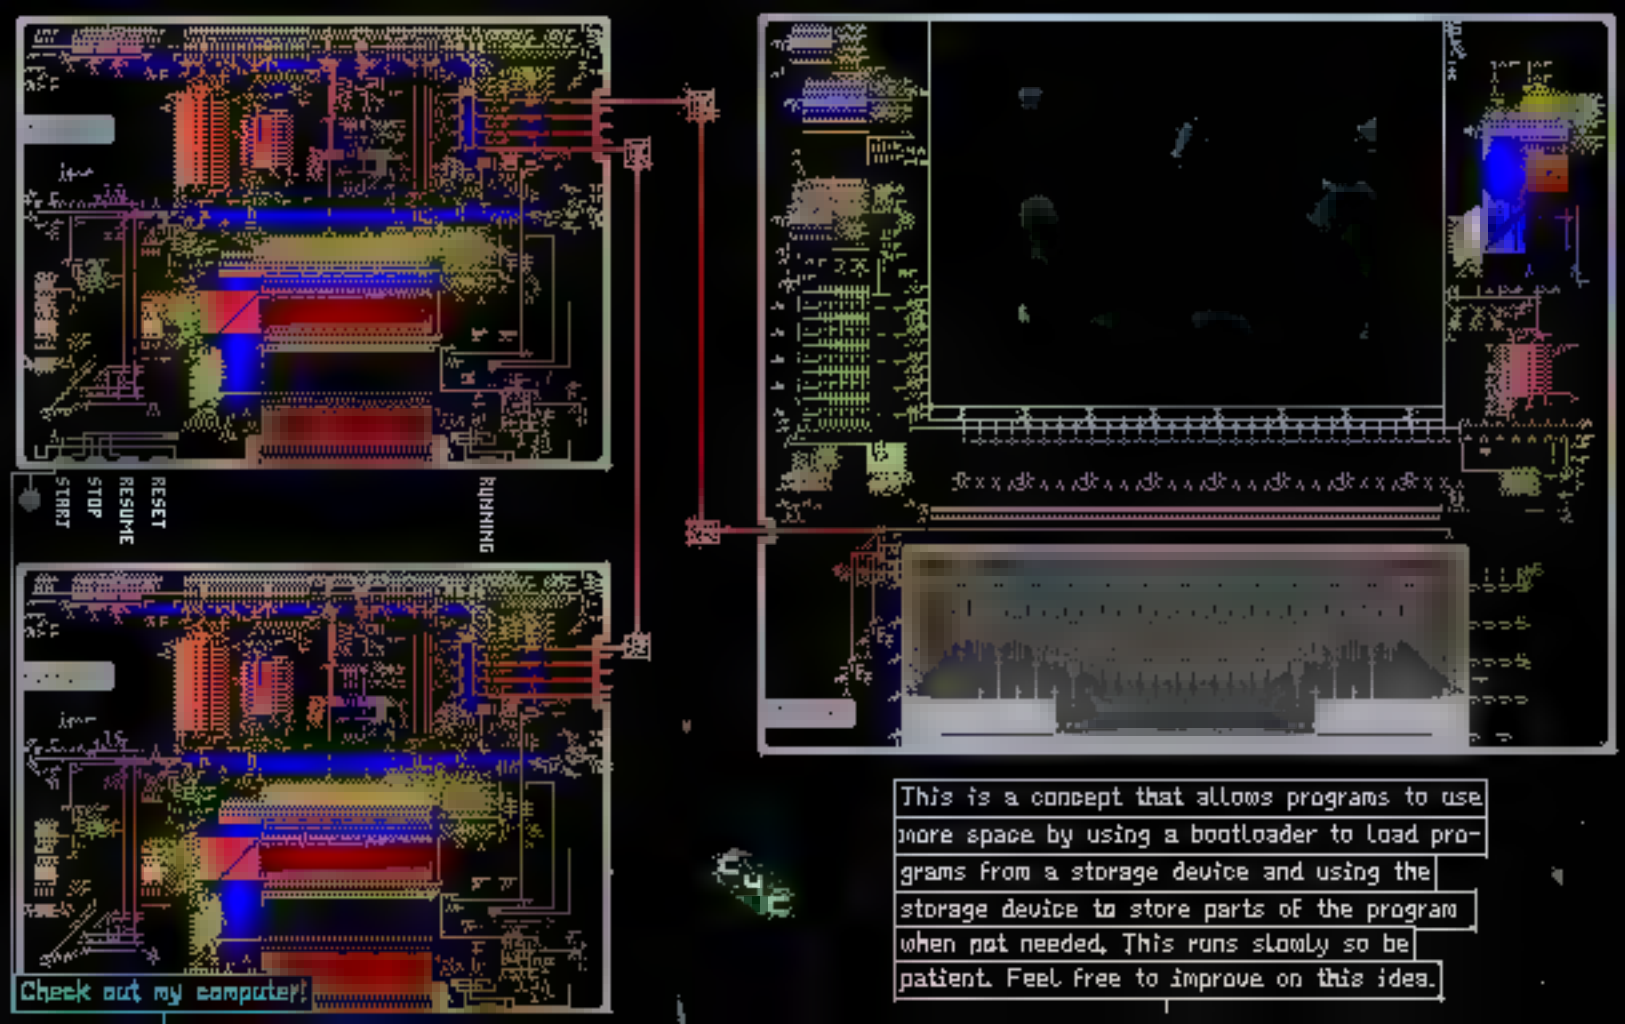
My friend,



This has a chance of 1 (always receives spark)
Both of these have a chance of 1/2 each
Now things get interesting...
1/2/2=1/4
1/4 + 1/4 = 1/2
1/8 each 1/4 each 1/8 each
The whole thing has 24 levels, so excluding the first level, which gives 1/2^0 = 1
This corner has a chance of 1/2^23...
...or 1/8388608, or 1,192092895551e-7
Now, counting the other 3 gaussn. distributrs in the original save, each with 6 levels, we have 1/2^6, or 1/64 or 0,015625 of getting the corner output. The complete machine has a chance of 1/2^23/64/64/64 of sparking the final output (4,54747350886e-13%)



START
STOP
RESUME
RESET
RUNNING
This is a concept that allows programs to use more space by using a bootloader to load programs from a storage device and using the storage device to store parts of the program when not needed. This runs slowly so be patient. Feel free to improve on this idea.
Check out my computer!

DON'T SUCK TOO STEAL

We can say a STKM is a human, and use this...

But a human sized chunk of TNT should do more

Or you could say a pixel is an atom...

But each subatomic particle takes up a pixel

You could argue that a planet is this big

Really, I don't think there is a scale.
The scale is determined by the save, not the game itself.

Brick Empire Chat Room

To get rank you need make ships (useful or deco), vehicle (U/D) Weapon (Only useful)
Also you can be city, deco or weapon devoloper.
IF you have some ideas then write . in main chat page or in PM to me.
Useful - Can fire and strong defense

What is B.E. -
1) It's faction in FRP (FactionRP) - most strong and most good.
You can help to it by making ships (Only useful)
2) Just a group of players like some other groups in TPT
You can do anything, but if it will be useful i'll use in FRP for B.E.

If you made really good things i'll give you some awards and rank.

Inactive players (1 month / more) will be deleted

Hello!
I just started A nationwde called:
,,Kerbin Wide"
But.. you can colonize other planets!
only from inner Kerbol system
I will send you pm with id if you want to join
It's actually in Alpha 0.91
planets free to copy!

The main "economy" of Vivus Morbus is quite an interesting one.

Husks (which are the result of infected life) Collect food, most commonly yeast, and feed it to their planet's Maw.

The Maw then rewards the husks by secreting an amount of Vivus Morbus tissue which can then be used by the husks to add to their current mass.

In the Vivus Morbus hierarchy, the bigger you are, the more powerful you are.

Search "vivus" for more Vivus Morbus saves!

THE MAW

Various Human and non-Human husks.

PART 2 CLICK

This modern-looking factory creates decorated boxes of TNT
The design was inspired by minecraft's TNT texture

It does not use CLNE or similar elements except for re-filling the raw materials
Instead, it takes NITR and CLST, combines them
and adds texture to TNT using BIZR

Only uses CRAY to add hidden space between
each TNT block

When I joined TPT almost [illegible] years ago, I found a supportive, kind, and fun community, dedicated to helping and welcoming newcomers. When people needed help, they just had to ask, and soon some of the best would be giving advice & tips along with the community.

People collaborated, and shared their ideas, in the hopes of gaining advices, and Friends.

From the first experiments with E-HOLE, to the discovery of subframe technology, the TPT Community has maintained a lighthearted and open-minded attitude towards learning, discovery and having fun while doing so.

After the horrifying attacks in Paris, the TPT Community stood together in its support.

However, recently that attitude has changed. People have stolen saves, insulted others thoughts and feelings, and randomly ▼downvoted far more than in the past. People have spammed insulting saves, and others have created new, hateful saves in retaliation.

This new TPT has become as much a tool of hate as a tool of experimentation and fun.

and I, for one, can say: I want the old TPT back.

This is not aimed at any one person, or group of people. This is directed at everyone.

Lets bring back a kind, fun, and supportive TPT.

- A member of the TPT community

Page 2

#STOPTHEHATE

The list of supporters has grown and been moved to the 2nd page!

Created with Sandwichlizard's Word Writer Color w/ p7 font

AFTER COMPLAINTS OF SPAMMING, I AM ASKING THAT NO NEW COPIES BE MADE FOR THE TIME BEING. IF YOU WANT TO HELP, PLEASE CONTINUE TO TAG YOUR SAVES OR USE THE #STOPTHEHATE LOGO.

THIS AN OPEN LETTER TO THE TPT COMMUNITY.
AS SUCH, PLEASE DO NOT VOTE THIS SAVE - IM NOT LOOKING FOR FAME.
I WILL ASK YOU TO SAVE YOUR OWN COPY AND PUBLISH IT - SPREAD THE WORD.
IF YOU AGREE WITH WHAT IVE SAID, SAY SO IN THE COMMENTS
AND I WILL ADD YOUR NAME TO THE SIGNATURES AT THE BOTTOM.

How You Can Help:

Dont be part of the problem
.....when you see someone inexperienced, dont call them a "noob" and move on, offer your own experience and advice.

Dont ignore the problem
.....TPT has a [Report] button for a reason. Its not just for spam and inappropriate drawings, its to bring hateful saves AND comments to the attention of moderators.

In short, just be decent, considerate people; help where you can, when you can...

no one has to be perfect. no one is perfect. lets all just get back to having fun.

Page 1

I don't mind downvoting. Downvoting is a tool used to discourage bad saves and saves that took no effort. Downvoters aren't haters.
HOWEVER that is not to say there has not been a noticible rise in unnecessary downvotes. I too have been effected, as one of my own saves (which I spent a lot of work on) was downvoted significantly.
However, when I reuploaded the exact same save but with a sign asking for downvoters to comment WHY they downvoted, it got upvoted
In conclusion, I ask all TPT users to comment WHY they downvote bad saves in the future
STOP DOWNVOTING START COMMENTING!

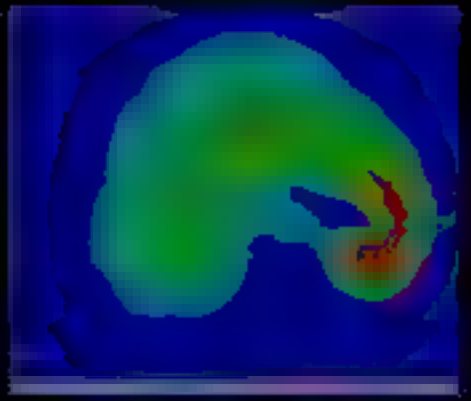
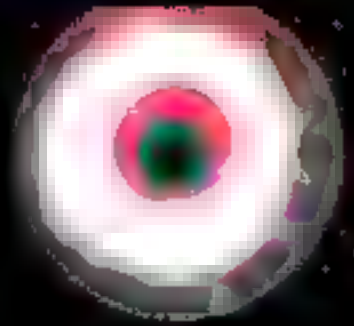
today I managed to experience the creation of F3 tornado.

as the funnel passed overhead, I was able to see inside, it was a strange sensation,actual the tornado was almost alive, it had a slow up and down pulsing motion, and it was really quiet, like someone put their hands over my ears

there seemed to be a green light source the pressure must have been really low, my ea popped, then the cyclone moved on. it had not touched down yet but went on to hit greater new Orleans.



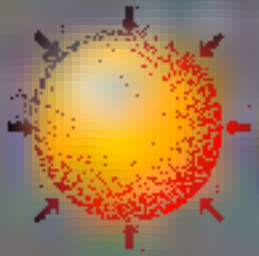


I will never forget this experience

GRAVITY

Classic Physics

According to Isaac Newton, gravitation is the force of attraction that exists between all particles with mass in the Universe.



$$\vec{F}_g = G \cdot \frac{M_1 M_2}{r^2}$$

Modern Physics

According to Albert Einstein, in his "Theory of General Relativity", the presence of matter "distorts" the local space-time environment, making seemingly "straight" lines in space and time have characteristics that are usually associated with the "curves" lines.

DNA Analyser and mRNA maker

in real life, the polymerase extracts DNA sequences from chromosomes and analyzes it, then take free nucleotides to make a matching branch to the DNA, except it's not GTAC but GUAC: this single branch is called mRNA and is used to produce amino acids that will make long chains, proteins.

coming soon: Ribosome

HOMEPAGE

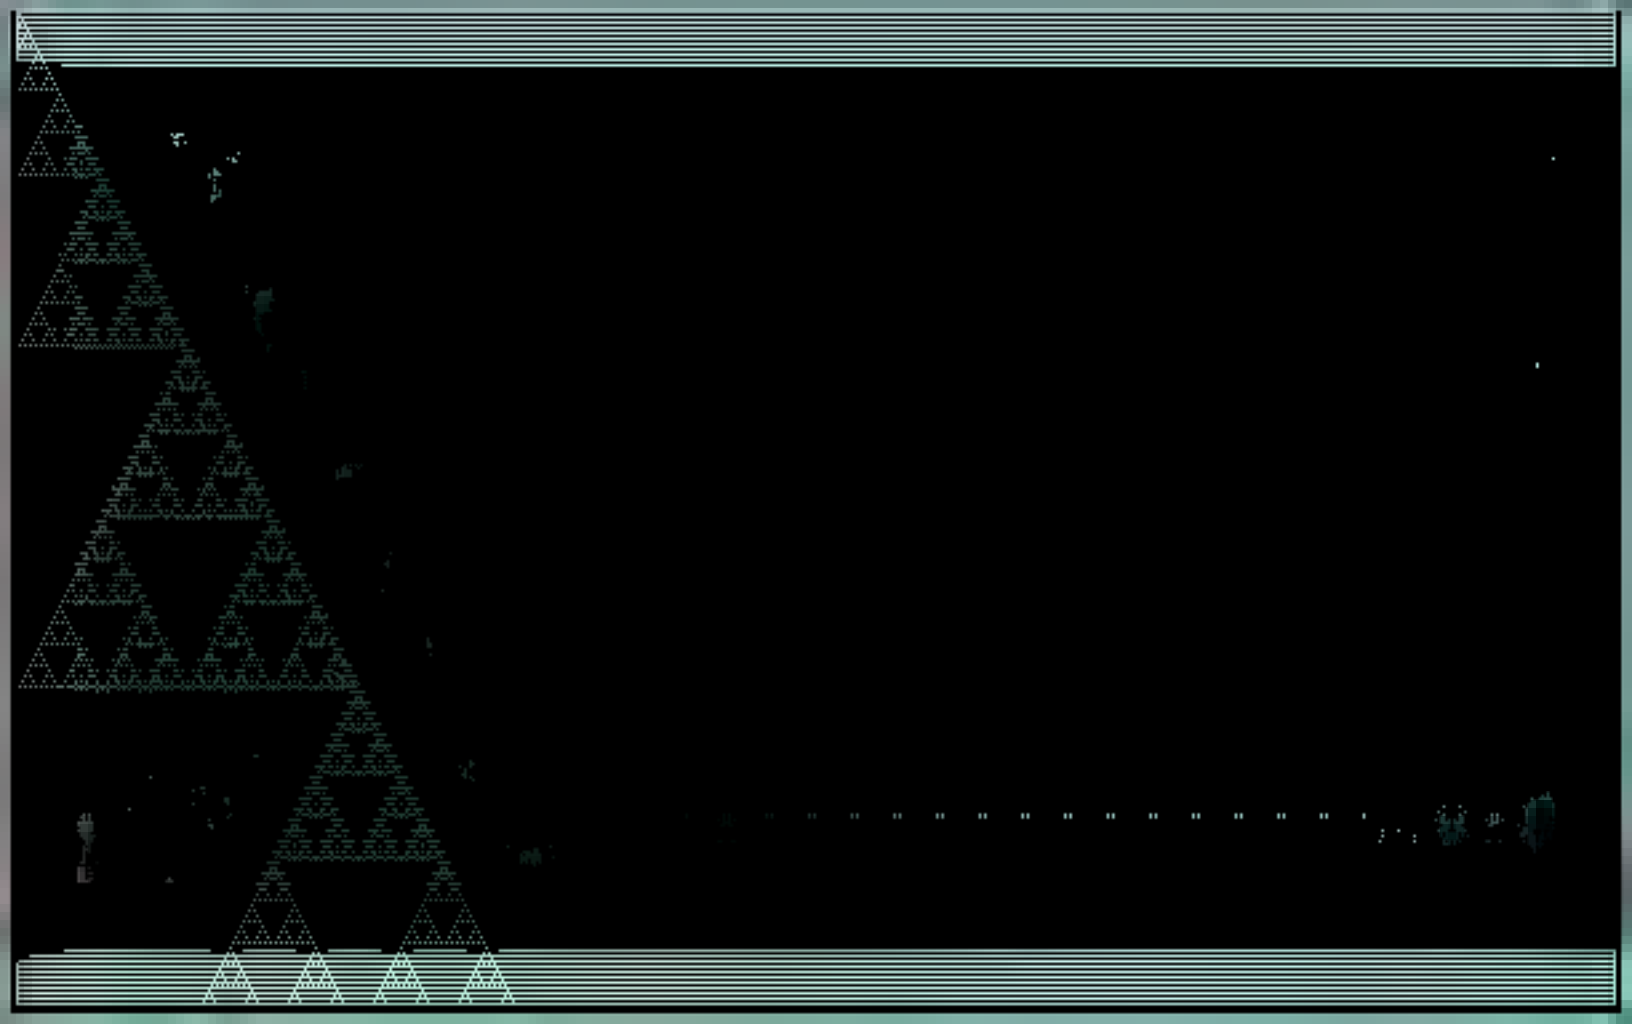
For this nationwide



DNA Analyser and mRNA maker

the DNA sequence is analized by the synthetic polymerase and information is transported onwards the mRNA maker. mRNA goes into the ribosome to create amino acids; those will be assembled to make proteins.

tell me how to improve/new project ideas

You liked it? please thumbs up, you didn't? thumbs down, but comment why!

GPU-READY 60HZ SCREEN

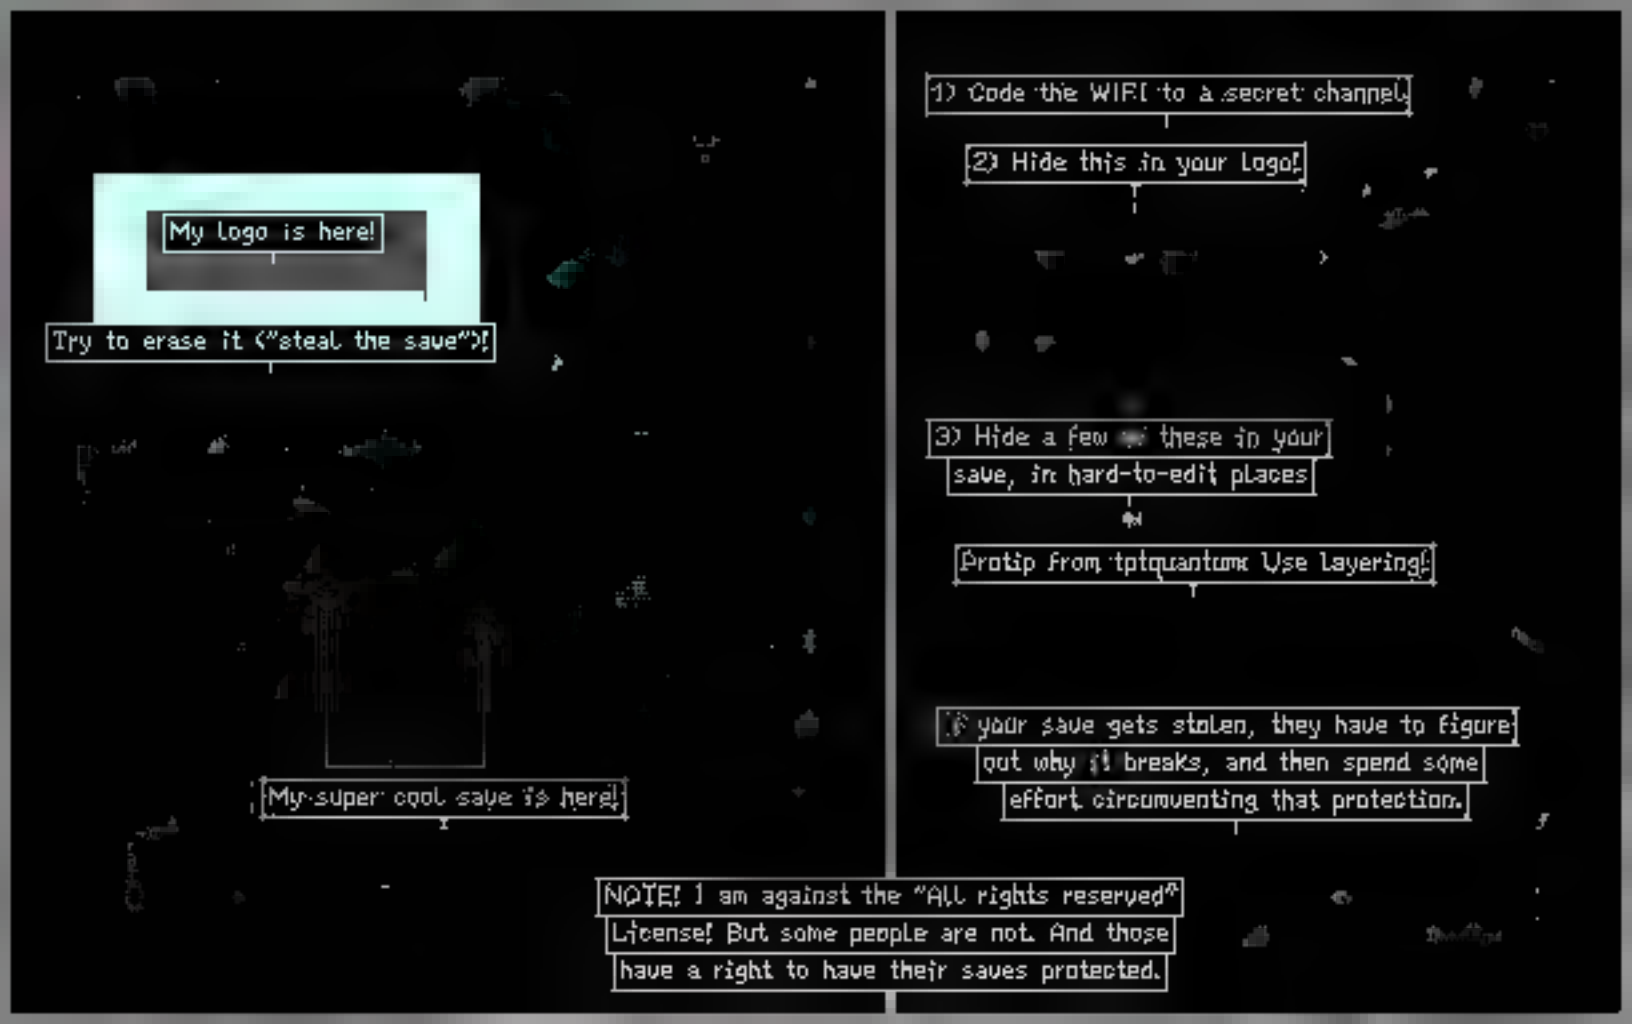
How it works:

Simple! Just select your favourite tpt player from the list provided and comment their name. Then, once voting closes I will count the amount of votes for each person and whoever has the most will win the award!



My logo is here!
Try to erase it ("steal the save")!
My super cool save is here!
1) Code the WIFI to a secret channel
2) Hide this in your logo!
3) Hide a few of these in your save, in hard-to-edit places
Protip from tptquantum: Use layering!
If your save gets stolen, they have to figure out why it breaks, and then spend some effort circumventing that protection.
NOTE! I am against the "All rights reserved" License! But some people are not. And those have a right to have their saves protected.

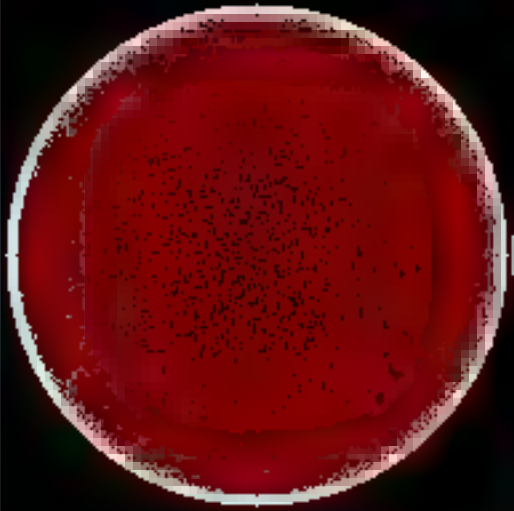
I have been studying warp for a while now | And what I just discovered seems impossible

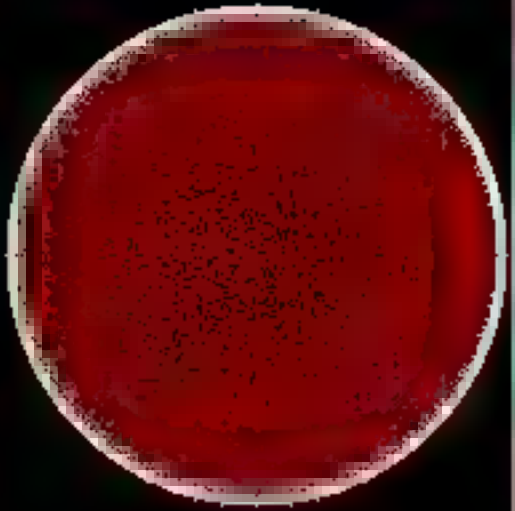
The spheres below are high life exot made | warp+filt. This warp spawns electrons.

Obviously there is no where to spawn electron | s in the spheres, so it isn't spawning them.

BUT when a single pixel is removed
an electron is made that exists
in both spheres... shomehow



<--- Delete that pixel



New Phenomenon

The electron always has the same variables, 222 heat and 680 life.

This effect is completely wierd to me | and seems to have no reason to do it. | My best guess is some form of entanglement

Swoampa against Flower

Swoampa Cell

Swoampa in special container

Patient Zero: Bruno Carvalho – North Brasil

Talaiporia Aporofis, Fungus, Commonly called "Swoampa"

Spread trough food and air, mainly in humid climate

Kill by melting human body in organic mud

Lasts about [illegible] weeks

Kill after about 4 week

Vaccine still not found

Able to heal only by amputation of ill body parts

Day 1 of infection. Fungus come to blood trough gullet

Day 2 of infection. Fungus appears in random place on skin

Days 3-4. Fungus spread around skin

Days 5-7. Fungus start consuming blood vessels

Days 8-9. Fungus consume bones for calcium and proteins

Day 10. Absolute organism death. Fungus consume muscles

Days 11-12. Highest Temprature during illness

Days 13-14. Fungus make little methan explosions to spread

Day 15. Corpse totally melted to toxic mud

THANKS TO FOR ENTERTAINING ME [illegible] IN SUPPLY
THANKS TO YU, JOSE AND OTHERS FOR HIGH

1st season map | Main page | Rules

If you have questions, tell me in comments.
Post your ideas here!
New content and 2nd season progress will be added there.

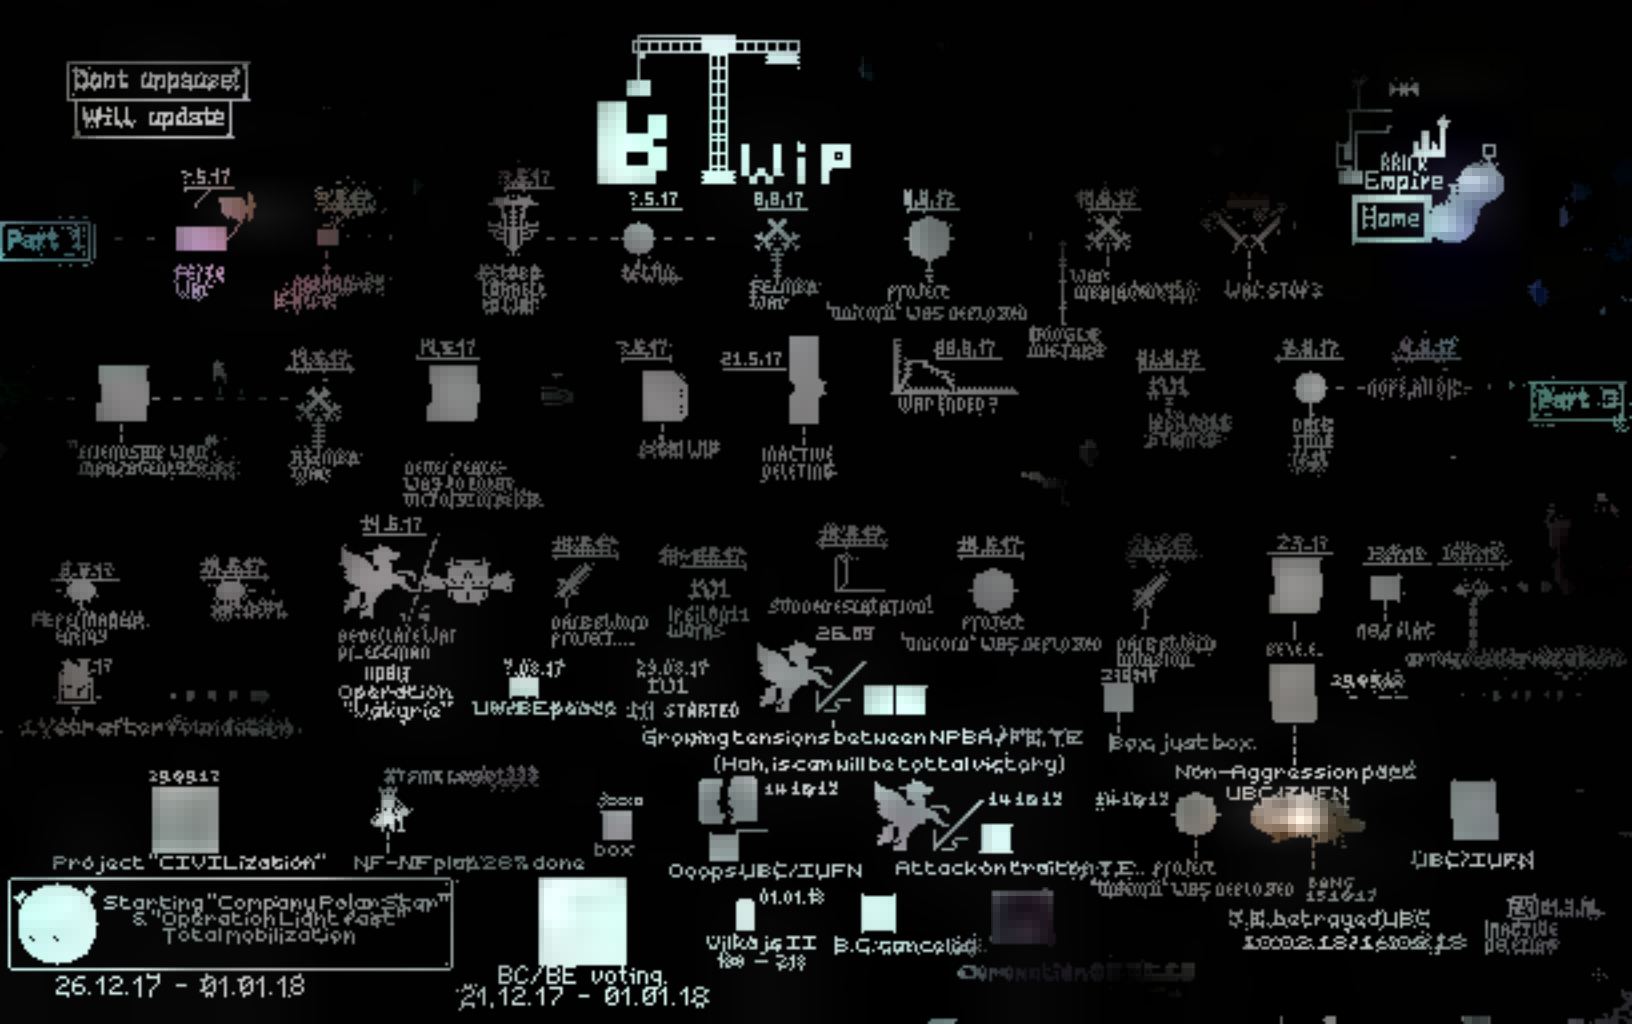
New content:

-NEW MAP CALLED "RANDART" (MADE BY ÓDZ)
-BRAND NEW CULTURE GROUPS (MADE BY ÓDZ)
-MAX AMOUNT OF PLAYERS IN ONE GROUP IS 2
-NEW STYLE OF MAP
-REMOVED BIOME PROPERTIES GRAPH (NOT IMPORTANT)
-DIPLOMATIC POINTS ARE NOW DIPLOMATIC POWER
-EACH GROUP HAS ITS OWN SPECIAL BUFFS
-ADDED FULL RESEARCH TREE (LIKE IN CIV5)
-EVERYTHING REQUIRE RESEARCH
-UNITS NEED TO BE RESEARCHED
-NEW POLITICAL MAP
-POLITICAL MAP WILL SHOW DIFFERENT INFORMATIONS
-REBELS AND RIOTS ARE BETTER AND MORE INTERESTING
-NEW OCCUPATION RULES
-DIPLOMATIC POWER IS MORE IMPORTANT AND USEFULL
-"WILD" COUNTRIES PLAY MORE AGRESSIVE AND THEY'RE MORE ACTIVE
-POWERFULL NATIONS ARE HARDER TO CONTROL (IMPERIALISM IS DIFFICULT)
-CHANGED MAGIC POWER AND ABILITIES, ALSO MAGIC IS MORE EXPENSIVE
-MAGIC IS NO LONGER OVERPOWERED
-ADDED EXPLORATION AND WATER UNITS
-ADDED NEW SAVE WITH RESOURCES INSTEAD OF "INTERESTING STUFF"
-ADDED MORE BUILDINGS WHICH HAVE BEEN SUGGESTED EARLIER
-NEW BUILDINGS ARE VISIBLE ON MAP
-OF COURSE, ADDED MORE UNITS (SUGGESTED BY REDCODE AND OTHERS)
-RUINS AND ANCIENT BUILDINGS CAN BE FOUND ON MAP
-SPECIAL EVENTS (SUGGESTED BY REDCODE)
-DECREASED AMOUNT OF PLAYERS TO 10 (2 IN EACH GROUP)
-REMOVED PREMIUM !!!
-BUILDINGS GIVE DIFFERENT AMOUNT OF RESOURCES
-ADDED REPEATABLE TECHNOLOGIES
-ADDED LIMIT OF BUILDINGS

2nd season progress:

Your ideas:

Add underwater beings and culture! (ÓDZ) ✓
Add more humanity archenemies! (Redcode) ✓
Add happiness point for every nation! (dRR) ✗
Mages should no longer be OP! (JanKaszanka) DONE
Add colonization and exploration! (Redcode) DONE
Add vassals and colonies! (JanKaszanka) DONE
Special info about non-human nations. (TLG) ✓
Add art and culture points! (Redcode) ✗
Make bigger world! (dRR) ✗



Dont unpause!

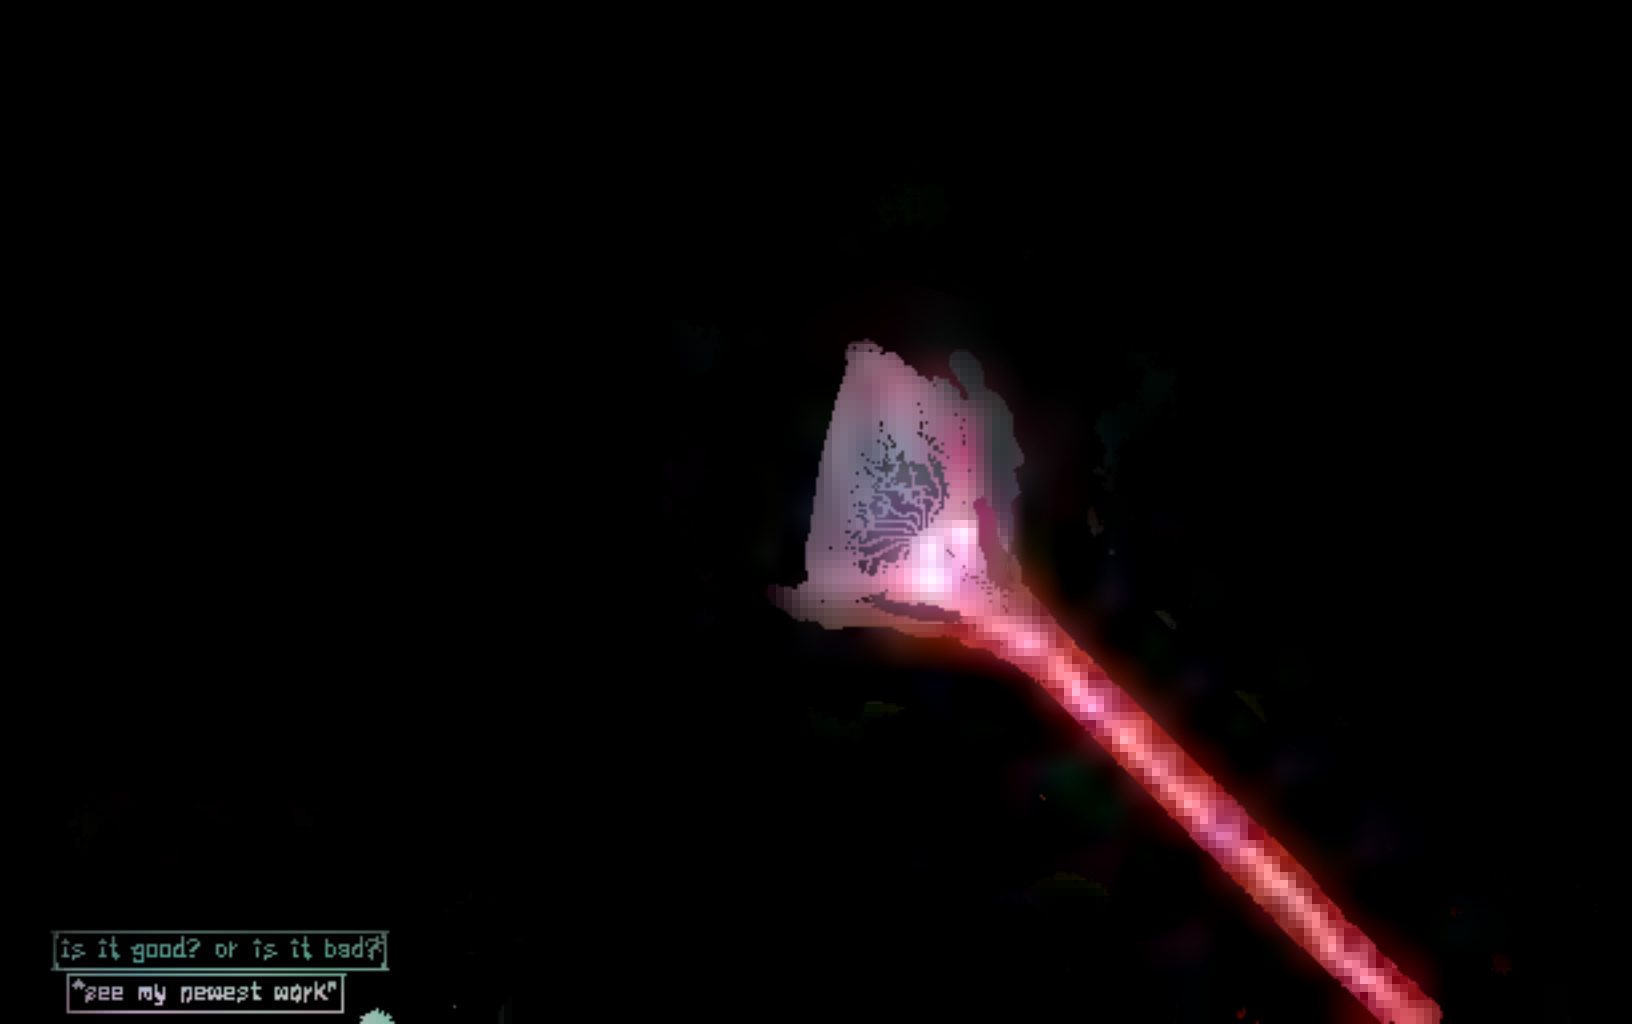
Main Page 'Serious Disasters'

deco ON please <-->

THE WORST DISASTER EVER HAPPENED ON PLANET EARTH
WAS THE APPEARANCE OF THE HUMAN RACE ABOUT
[illegible] YEARS AGO

INITIALLY ALMOST UNNOTICED BY NATURE, THE HUMANS
QUICKLY EVOLVED INTO A GREEDY AND RUTHLESS SPECIES.

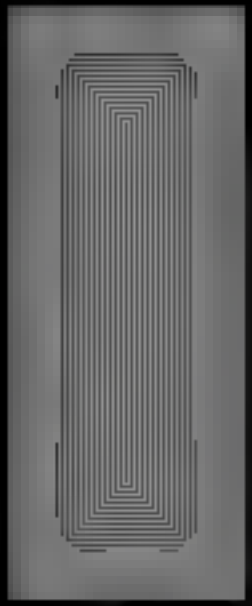
THEY UNDERMINED ALL ECOSYSTEMS, DESTROYED WILDLIFE,
POLLUTING AIR, LAND AND OCEANS,
AND NEVER GETTING TIRED OF KILLING EACH OTHER.
THE HUMANS ARE THE MOST DESTRUCTIVE SPECIES ON EARTH.
AND THE ONLY ONE WHO DELIBERATELY DESTROYS ITS OWN HABITAT.

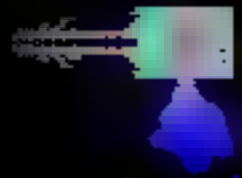


is it good? or is it bad?
see my newest work

YES, I KNOW what a railgun actually is!
This isn't supposed to be an accurate representation.

DECO ON! Otherwise it'll look ugly...





HEAVY inspiration from the well-known Railgun save from FP. Thanks for making that, Erosion! :D

!!READ!! if somebody knows how to delete an element by its color tell me and i will make it with no deco!!!
Less deco (work in progress)

Hope if you could suggest things for me to
make that would be awesome!
Just suggest things in the comments plz!
Im not editing this game, im making new ones
with the suggestions you give me :)

THIS WILL REVOLUTIONIZE PIPE MAKING

The data for which color PIPE is depends on it's CTYPE. I use this alot in some of my local saves. Yet this does not seem to be well known.

That's what this save is for.

You can use this to SPECIFICALLY manipulate your pipes.

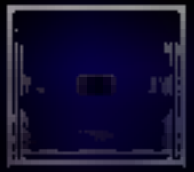
Don't believe me? Try it out yourself.

CTYPE=DUST for grey pipe

CTYPE=WATR for red pipe

Use PROP

CTYPE=OIL for green pipe



CTYPE=FIRE for blue type

Rules for factions

Cheater's list
1.) United worlds (1.2) (Make more buildings) Not fully.
2.) SJ Empire (1.2.) Not fully. 29.07.17
(Make more buildings)

Herp, troy7838 and... From H name, i forgot... (1.0.1.)

Legend:
1.?? Attack
2.?? Defense
3.?? Peace

1.1. You can attack factions with city. Without - can't!
1.2. - you haven't fleet, cities, factories, bases - you can't attack. (Cheat)
1.3. - planet have shield you can't attack planet structures.
1.4. If building have many defense you can't attack it with one ship. Also if system defensed
1.5. You can't use art for attack. (How i made nathan-65 - just draw explosion and "win")
1.6. You need attack score for ships! If it not less than base score - $\frac{(\text{Guns number} + \text{shield})}{4}$ WIP
you can attack it. If less than - can't. (Or you need more ships)
1.7. You can't use thing what can destroy galaxy/universe. Because - cheating. May - system.
1.8. You can't use super weapon for destroy main system.
1.9. You can't use not your (stealed) tech to attack/defense.
1.0.1. - You buildings MUST looks ... better than Noobsbuildings.
1.0.2. You can't change anything in enemy saves in attack/defense. Explain?
Old version of rules
I) Don't remove anything!
II) Don't spawn anything very close to buildings!
III) Particles (bombs) can't exist without transport? yea? Don't spawn BOMB and etc without vehicle WIP

Write in building how many scores of defense it have. $\frac{(X + Y)}{2}$ X-Number of all cannons
Y-Number of ships arround (If have) WIP

You can't make shield at all your planets. Only main worlds. - planet have shield you can't attack
2.3. - You can't make shield at all planets in one system.

3.1. You need time to fix. WIP
3.2. You can't declare war without a reason attack to anybody.
3.3. You can't use cheat materials to attack/defense.

by docRobboRobert

SO, the development has released the new version! [redacted]

Lot of new content have been added to the game and lot of stuff have been fixed. Dev. fixed many bugs and added 5 new elements! We can enjoy the brand new version!

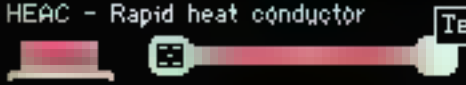
To see the full changelog, click here --> Full changelog

5 NEW ELEMENTS HAVE BEEN ADDED:

POLO - Polonium

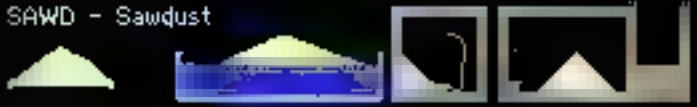
POLONIUM DECAYS INTO NEUT RAPIDLY UNLESS COOLED. IT CHANGES THE COLOUR OF PHOT. WE HAVE NEW RADIOACTIVE ELEMENT THAT CAN START NUCLEAR REACTIONS.

HEAC - Rapid heat conductor



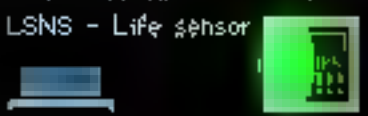
THE NEW MATERIAL THAT CAN TRANSFER HEAT VERY FAST. IT CAN BE USED IN NUCLEAR/FUSION REACTORS AS TO TRANSFER HEAT. CAN'T BE DESTROYED BY HIGH TEMPERATURES.

SAWD - Sawdust



SAWDUST IS A LIGHT ELEMENT THAT CAN FLOAT ON WATER LIKE REAL SAWDUST. DOESN'T BURN VERY WELL. RATHER HARD TO IGNITE LIGHT PARTICLES ARE SENSIBLE TO AIR. WE FINALLY HAVE AN ELEMENT WHICH IS POWDER AND CAN FLOAT ON LIQUIDS.

LSNS - Life sensor



LIFE SENSOR GENERATES SPARK WHEN TOUCHES ELEMENT WITH LIFE HIGHER THAN ITS TEMP. THIS USEFULL DETECTOR CAN BE USED IN MANY ELECTRONIC MACHINES AND TO MEASURE THE STATE OF MATTER.

RFRG - Refrigerant

REFRIGERANT HEATS UP AND LIQUIFIES UNDER PRESSURE. YOU CAN BUILD PROPER FRIDGE OR COOLING SYSTEM.

OTHER CHANGES:

-[redacted]

-[redacted]

-[redacted]

-[redacted]

-[redacted] TWO NEW PSET MODES. NOW/ALLOC START ERROR ONLY ON CTYPE.

-[redacted] THE PRECISSION OF PHOTON REFRACTING.

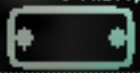
-[redacted]

-[redacted] PHOTONS.

-[redacted] EMITTING PHOTONS [redacted]

-E-S FREQUENCY DOUBLER --> Click here

-[redacted] LOOKS PRETTIER NOW.

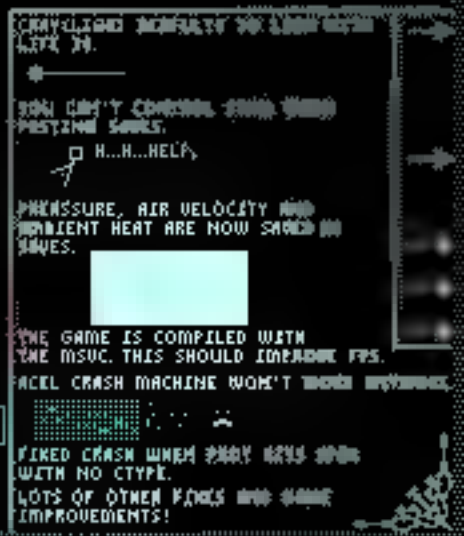


NEW GRAV!

-ADDED NEW PhotonReflectWaveLenght PROPERTY.

-MULTIPLE UNDO AND REDO SUPPORT. (DEFAULTS TO 5 UNDO STATES). CTRL+Z IS NOW

-[redacted]



[redacted] LIFE >0.
YOU CAN'T CONTROL [redacted] PRESSING SAVES.
H...H...HELP
PRESSURE, AIR VELOCITY AND AMBIENT HEAT ARE NOW SAVED IN SAVES.
THE GAME IS COMPILED WITH THE MSVC. THIS SHOULD IMPROVE FPS.
ACEL CRASH MACHINE WON'T WORK ANYMORE.
FIXED CRASH WHEN PART HAS NO WITH NO CTYPE.
LOTS OF OTHER FIXES AND GAME IMPROVEMENTS!

DÜSSELDORF
15
IN THE YEAR 2036, A FOURTH DIMENSIONAL AXIS
BEYOND X, Y, AND Z WAS PROVED TO EXIST: DIMENSION W.
INTERDIMENSIONAL ELECTROMAGNETIC INDUCTION DEVICES, KNOWN AS COILS, WERE DEVELOPED TO
TAP THE INEXHAUSTABLE ENERGY SUPPLY THAT EXISTS IN DIMENSION W.
Tower 60
60 LARGE TOWERS SPREAD ACROSS THE GLOBE WERE USED TO STABILIZE THE ENERGY DRAWN FROM
DIMENSION W. THEY ARE RESPONSIBLE FOR SUPPLYING POWER TO THE ENTIRE WORLD.
THIS NETWORK, DEVELOPED BY NEW TESLA ENERGY AND WITH THE COOPERATION OF
THE GLOBAL COMMUNITY, IS KNOWN AS THE WORLD SYSTEM.

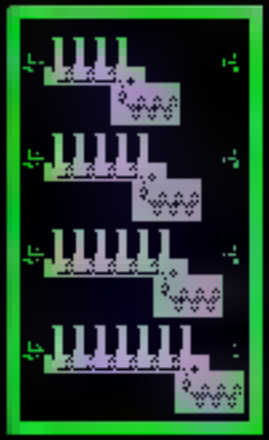
WELCOME TO NIM!
During your turn, you can remove matchsticks from one of the four rows.
You can remove as many matchsticks as you want, only rules are you must
remove least one matchstick, and you can only remove from one row.
You may change the row you remove from during your next turn.
The goal of the game is simple:
Force your opponent into removing the last matchstick. Good luck!



* You can remove ONE OR MORE matchsticks during your turn.

Choose a row to remove from by pressing one of the coloured buttons.

"Remove" to remove one
matchstick. You must remove
least one matchstick.
When you are done, press
"End Turn"

YOUR TURN!

Atom Bombs

STEAM PUNK UNITS

When two photons collide in C-S, a new photon is created with the vector sum of their velocities.
This offers many possibilities in laser design, optical electronics, photonics...

Play around with the lamp: Spark two directions from the keypad, then hit the green button.

If many, many photons collide head-on simultaneously,
C-S gets "overloaded", and creates infinite (NaN) velocity.
At this point, the pressure simulation basically falls apart.

NOTE: The C-S overload behaviour is a bug,
and will be removed in the next update.
Enjoy it while you can!

These mass collisions can be seen
inside a resonator.
The top is a normal resonator.
The bottom is a resonator with a C-S core.

Resonators

Activate each resonator by holding
down the respective button.

Test the top resonator first.
The bottom breaks everything.

Lamp

MORE C-S Death Ray anyone?

The Subframe Shrinker

Spark to clear

Draw in the white box.
Use a big brush!

Sorry guys, I couldn't make this one as stable as my Subframe Magnifier! Since this save relies on PSTN, CRAY, and DRAY, elements like DMND, FILT, and some other non-solids may cause glitches.

Subframe Magnifier

Updates once every frame!

LBPHacker's
Basic Subframe Tutorial

Home page

Fastest Random Generator

Subframe Lazer

THE SUBFRAME LESSONS:
101: PRELIMINARIES

1.1 WHAT IS AN UPDATE?

An update is an action that a particle performs every frame.

For example:
- CONV(METL) converts adjacent particles to METL.
- BTRY SPRKs conductors.
- SPRK'ed METL passes its SPRK to adjacent METL.

1.2 PARTICLE IDS

Every frame, particles are updated in order, starting from particle #1, then particle #2, and so on. This number is called the particle's ID.

Every particle is assigned a unique ID upon creation and does not change its ID throughout the simulation.

1.3 SOLID SPRK

Normally, METL can only stay SPRK'ed for a few frames before entering a "reset" phase. This creates a flickering effect.

A solid SPRK is a SPRK that does not flicker.

Here, CONV(METL) converts the SPRK'ed METL into METL.
Then, BTRY SPRKs it.

Both happen in the same frame, before the particles are rendered.
Thus, you will always see the METL SPRK'ed.

Here, the BTRY's ID comes before the CONV's.
The METL is SPRK'ed, then converted back to METL each frame.
Thus, you will always see the METL not SPRK'ed.

ACTIVITY #1.1

MOUSEOVER THIS INSL. →
YOU SHOULD SEE #1227 HERE.
IF NOT, PRESS 'D'.
(THIS OPENS THE 'DEBUG HUD')
THIS MEANS THAT THE INSL'S ID IS #1227.
IT WILL BE UPDATED AFTER PARTICLE #1226
BUT BEFORE PARTICLE #1228.

ACTIVITY #1.2

PRESS '~' TO OPEN THE [illegible].
(YOU CAN CLOSE IT BY
PRESSING '~' AGAIN.)
TYPE `tpt.setdebug(0x8)`
AND PRESS ENTER.
NOW MOUSEOVER THE CONV(METL)
AND PRESS SHIFT-F.
THIS UPDATES ALL PARTICLES UP TO THE
PARTICLE UNDER YOUR MOUSE.
HERE, ONLY PARTICLES UP TO THE CONV(METL)
ARE UPDATED: THE BTRY IS NOT UPDATED,
SO YOU SHOULD SEE THE METL NOT SPRK'ED.
THIS "SUBFRAME DEBUGGING MODE" IS USEFUL
FOR DEBUGGING AND REVERSE ENGINEERING.
PRESS 'F' TO COMPLETE THE REST OF
THE PARTICLE UPDATES IN THE FRAME.

102: Particle Order >>

COFFEE

A (not first) BOYL-URAN-VIBR reactor in tpt!

How does it work:

URAN makes some heat, heated BOYL makes pressure, URAN heats faster, BOYL makes more pressure...

HEAC transports heat to VIBR

When VIBR charged, it contacts with CFLM that makes the reaction safe. PROFIT!

I didn't know that it was made before me.

Sorry

You can use anything from here - giving credit of course.

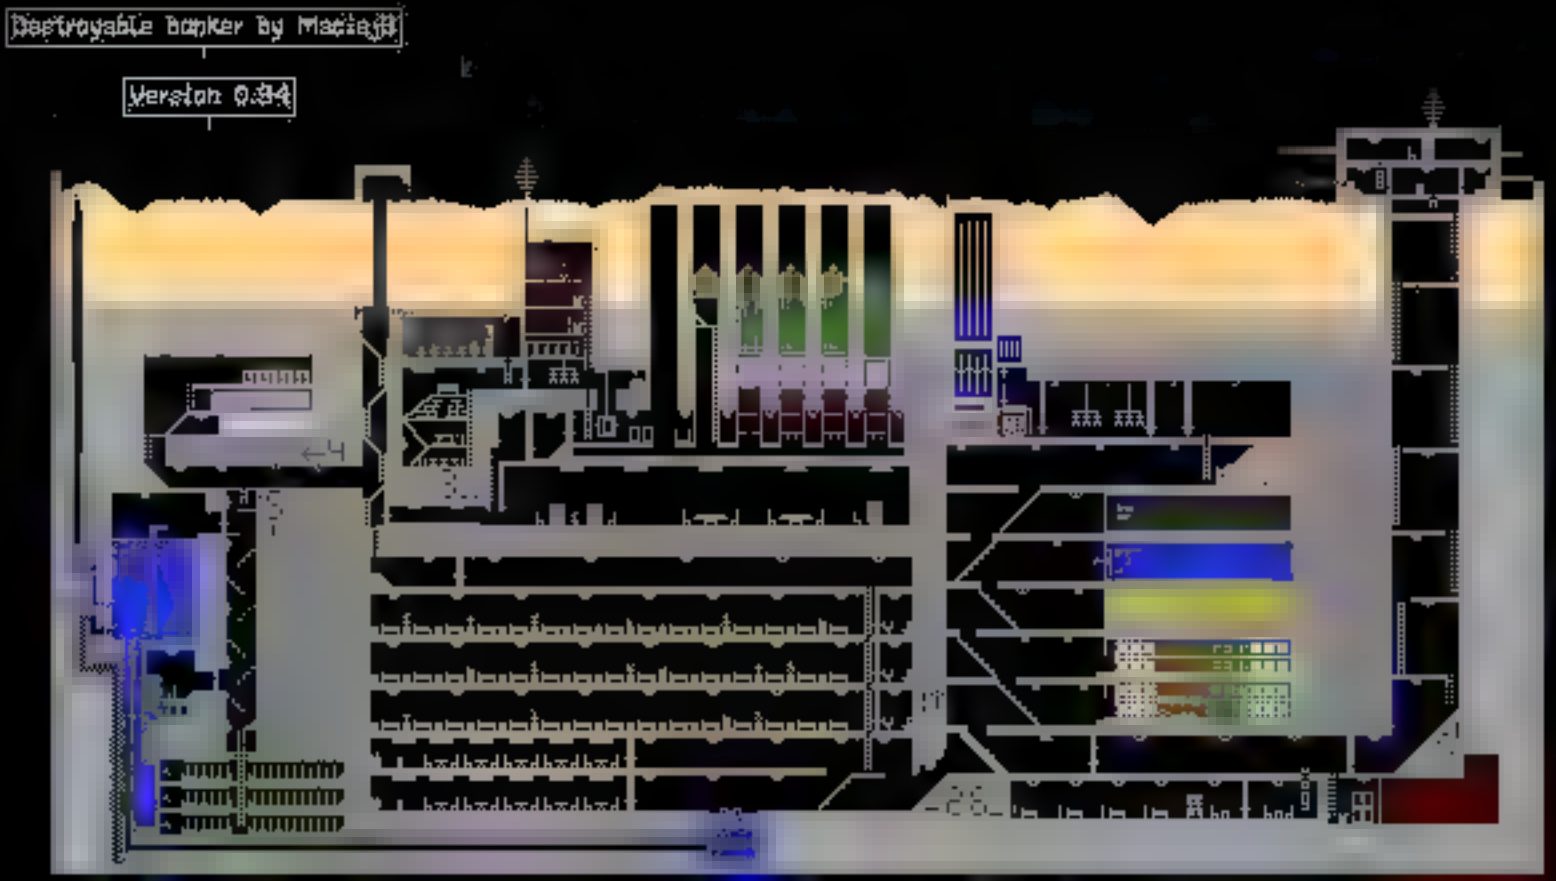
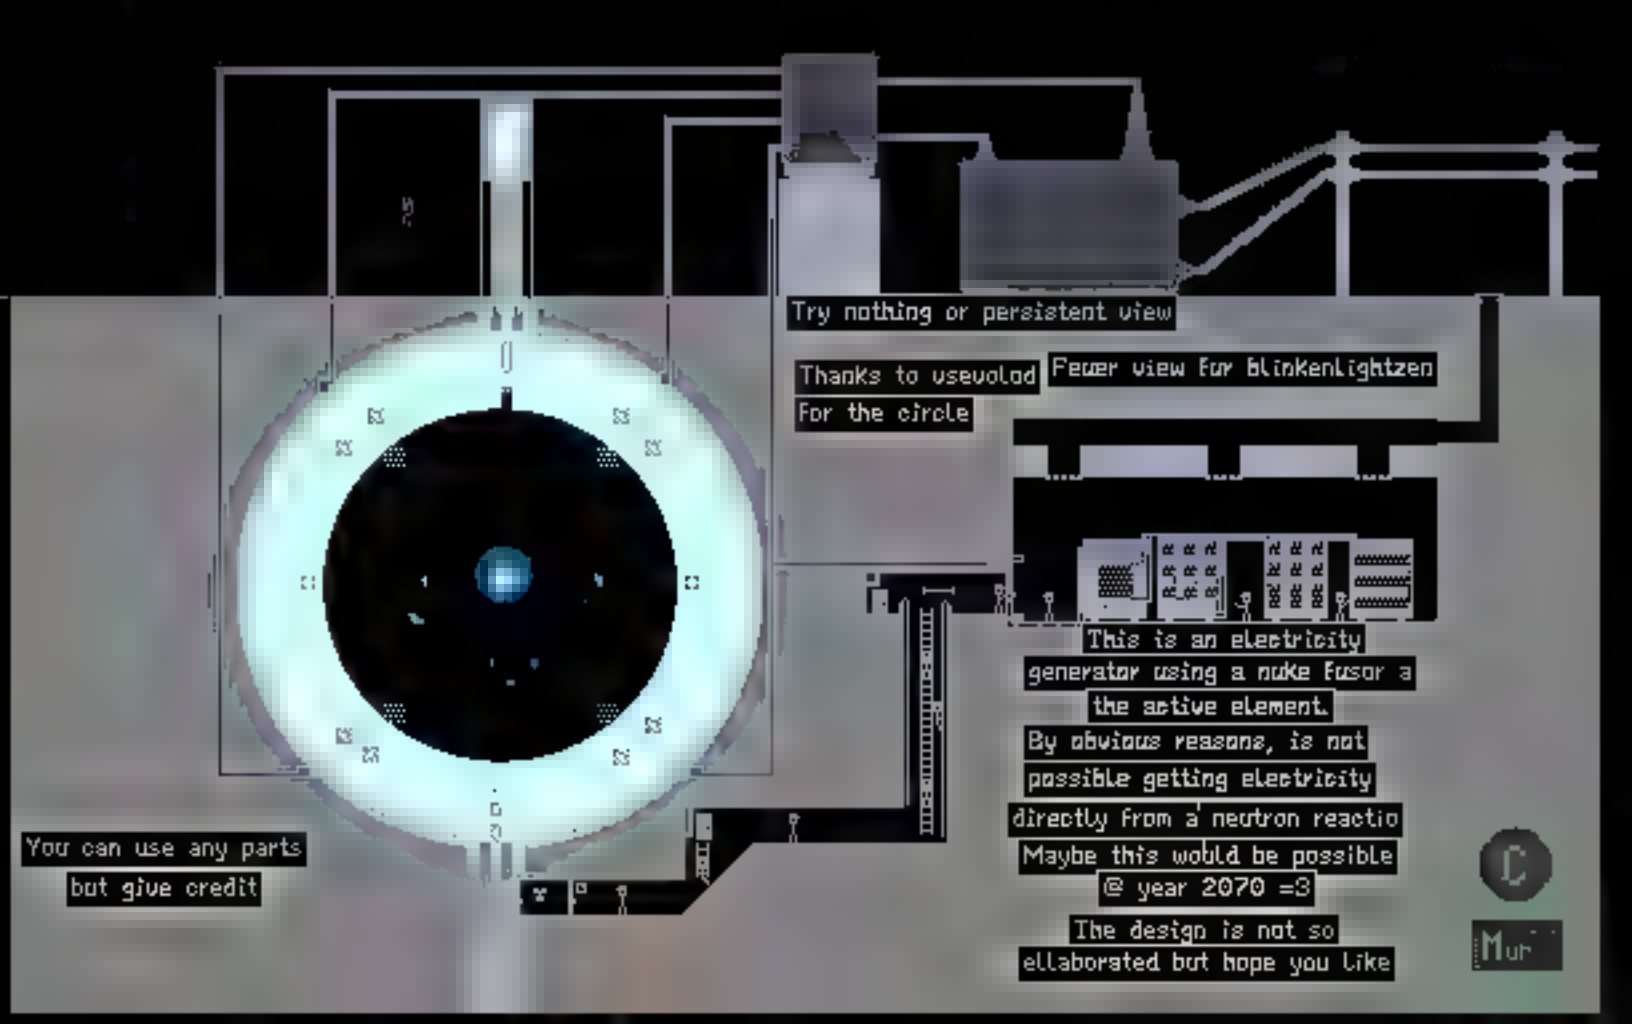
Use these different Teeth.
Stickman jumpst
Make your own teeth for new animations.
Could work as a Marquee...
This is a concept for animation.



Destroyable Bunker by Maciej
Version 0.94



Try nothing or persistent view
Thanks to vsevolod
For the circle
Fewer view for blinkenlightzen
This is an electricity
generator using a nuke fusor a
the active element.
By obvious reasons, is not
possible getting electricity
directly from a neutron reactio
Maybe this would be possible
@ year 2070 =3
The design is not so
ellaborated but hope you like
You can use any parts
but give credit

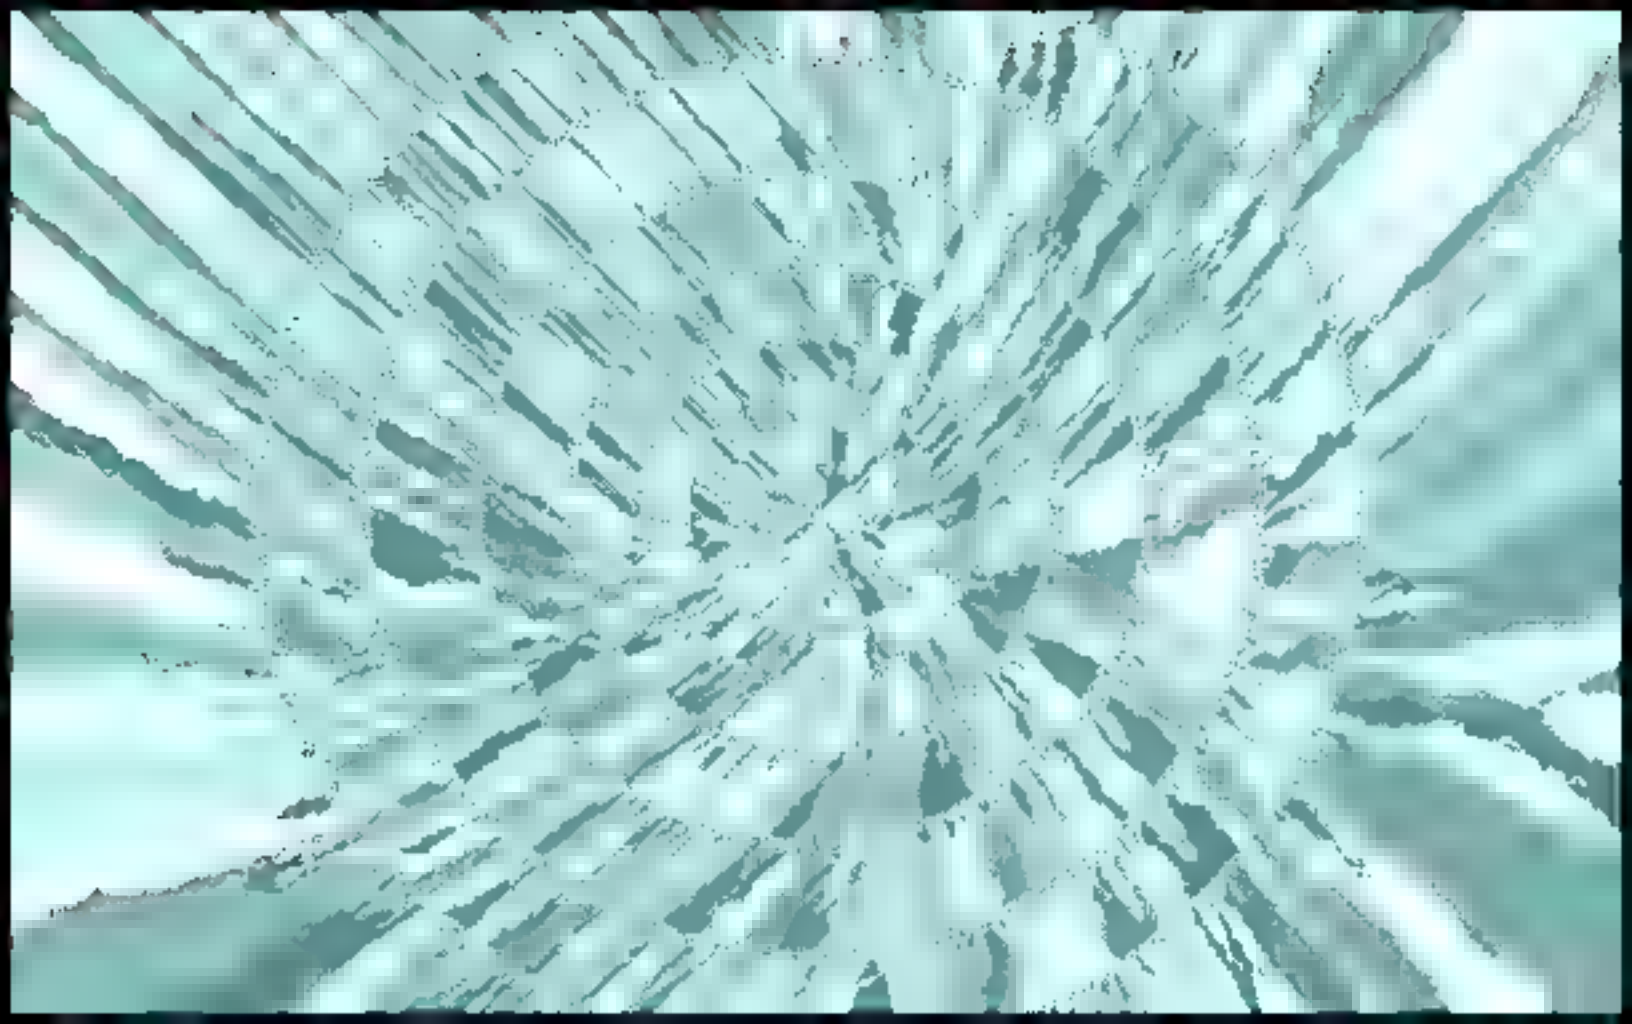
This Creation is Created
Accidentally, when i'm try to
create something from LOVE
Then i do an experiment
and Life Race is Created
Anyway this is my Life Race
and its Completed

Try Heat Display



W.P.Town v1 by Dwatci.
Completely destroyable.
Use anything, but give credit.
← Desert City 6Km

tutorial which learn how to make easy animation
UPDATED for version 50
pause the scene!
1.create polygon of goo
2. erase first frame and fill it by pcen
3. wirite in consple !set life pcen 50
then write !set type pcen goo
4. erase and fill by pcen next frame
5 wirite in consple !set life pcen 100
then write !set type pcen goo
(first frame will disappear after 50ms, second after 100ms
do you understand me? xd)
do it with each new frame and evry new frame
add to life 50
50 is interval, you can use another interval
when animation finished press b to open decoration tool
now you can change color of goo!
FEEL FREE TO USE
NO CREDIT NEEDED!

stick controllible with numpad
Hi
Hearts gives more health
water+sand+stone=dry cement
Drag tool - to drag stuff
Bone → solid makes bonemeal
when under pressure
seeds+water+ground=plant
Fungus - slowly grows
RF02 - rocket fuel explosive
Ants - makes nests from solid
Virus - infects elements
Infection - turns stickmans
into zombies

This is REALISTIC model of
Chernobyl power plant.
On April 26th 1986, Reactor
4 has exploded and caused
meltdown. That was worst
nuclear accident of our history.
Every chernobyl creation on
TPI shows nuke-like explosion.
Chernobyl disaster WASN'T
nuke-like. This creation
is most realistic i think.

NukeEmAll 2011.

Spark the fuse!
It has an about 10 seconds
delay after litting it's fuse,
so you have some time to get
yourself as far as posible from
the explosion!
If you will copy the bomb of
mech, you better give credit
as well!

The end!
First spark made
Spark here!

TPT Man's companion! TPT Dog!

[READ THIS FIRST!]

Sons and daughters of Helgan!

For many years we have been a broken nation, trampled, oppressed and conquered by those we hoped to escape!

But now our time has come, and we shall be ignored no more! On this day, those driven to divide us, will hear our voice!

Defenders of the Helgan, now is our time!

Also visit the city and the Serious Bomb!

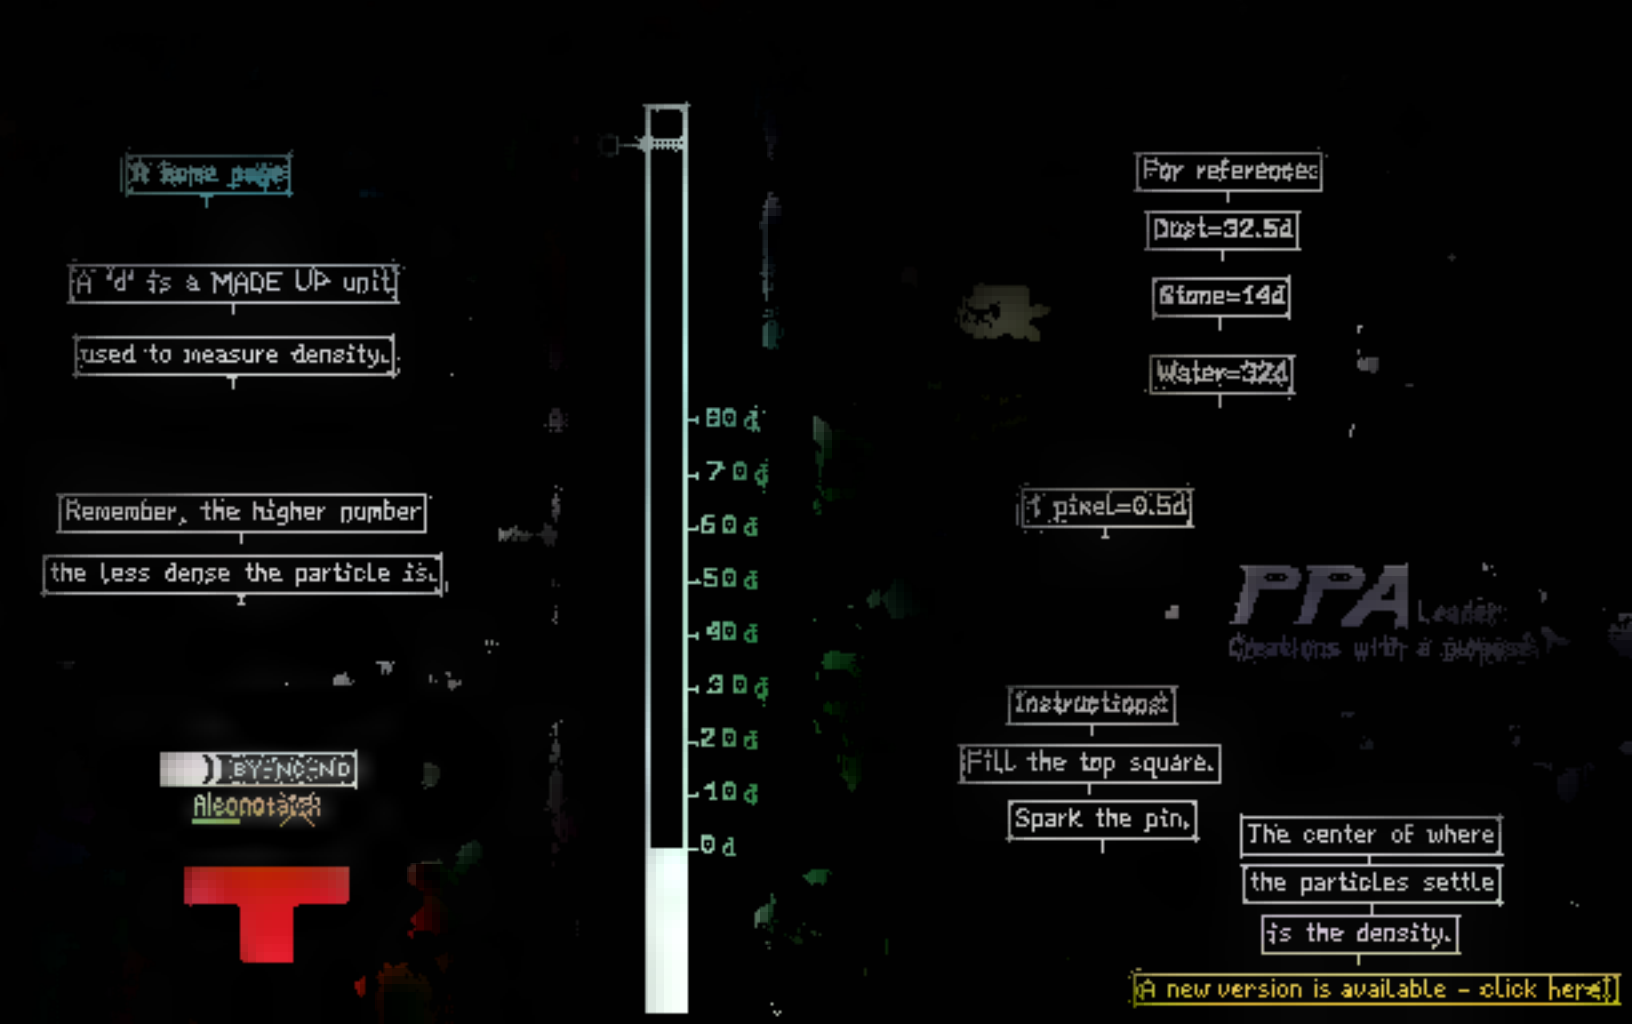
Epic Build



A 'd' is a MADE UP unit
used to measure density.
Remember, the higher number
the less dense the particle is.
80 d
70 d
60 d
50 d
40 d
30 d
20 d
10 d
0 d
For reference:
Dust=32.5d
Stone=14d
Water=32d
1 pixel=0.5d
Instructions:
Fill the top square.
Spark the pin.
The center of where
the particles settle
is the density.

In the end,i regain happiness
the sarrow i once felt,leaves
it's deep scars.Forever in debt
to the white rose i shall be.
Things to remember :
Trust the ones you love.
you will always have at least
one person in your life who
cares when it really counts.
I found mine,you find yours :)

yes, this is the first page i made! Enjoy!

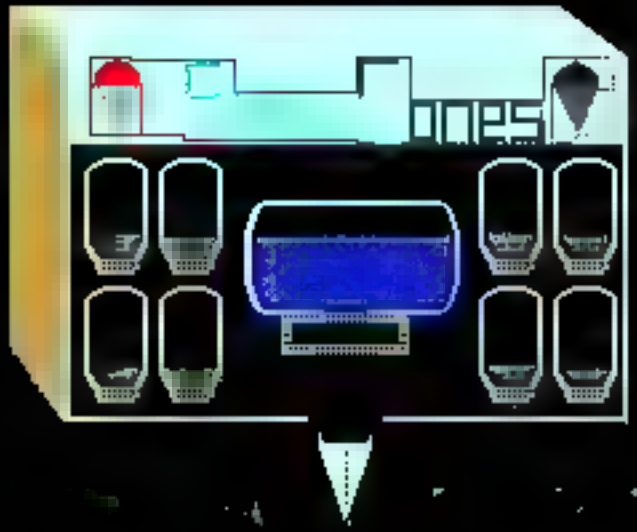
Only spark the buttons once!

1) Pour Water

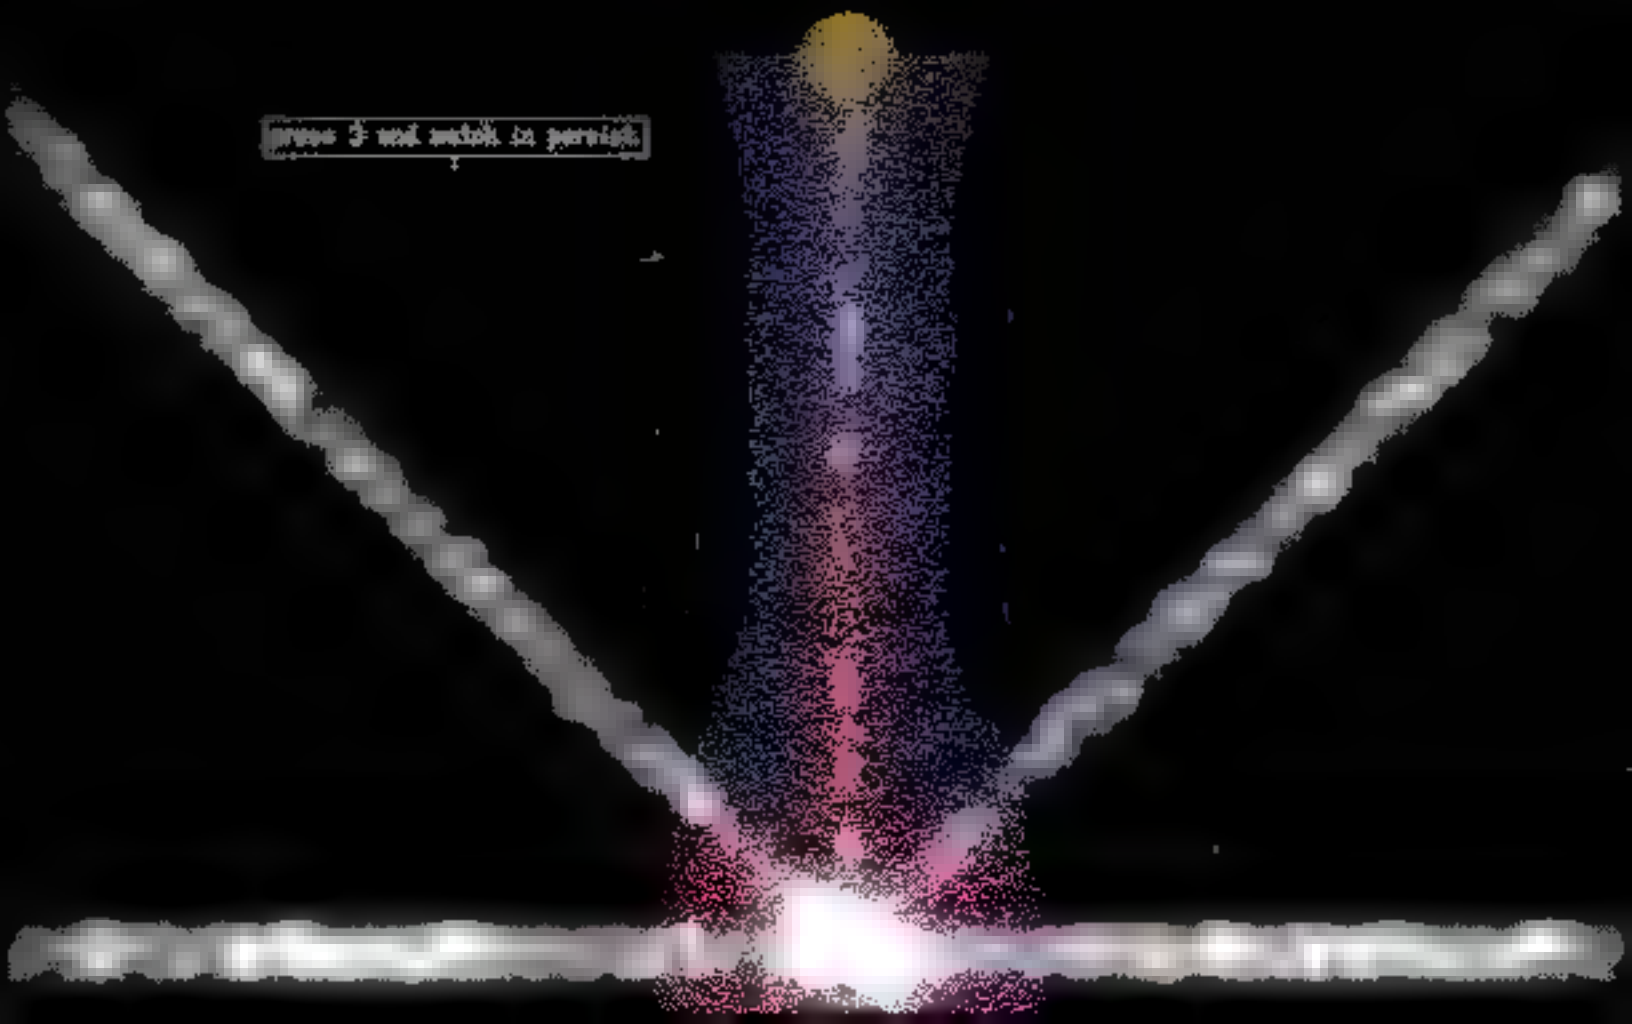
2) Make Snow

3) Fill Cup

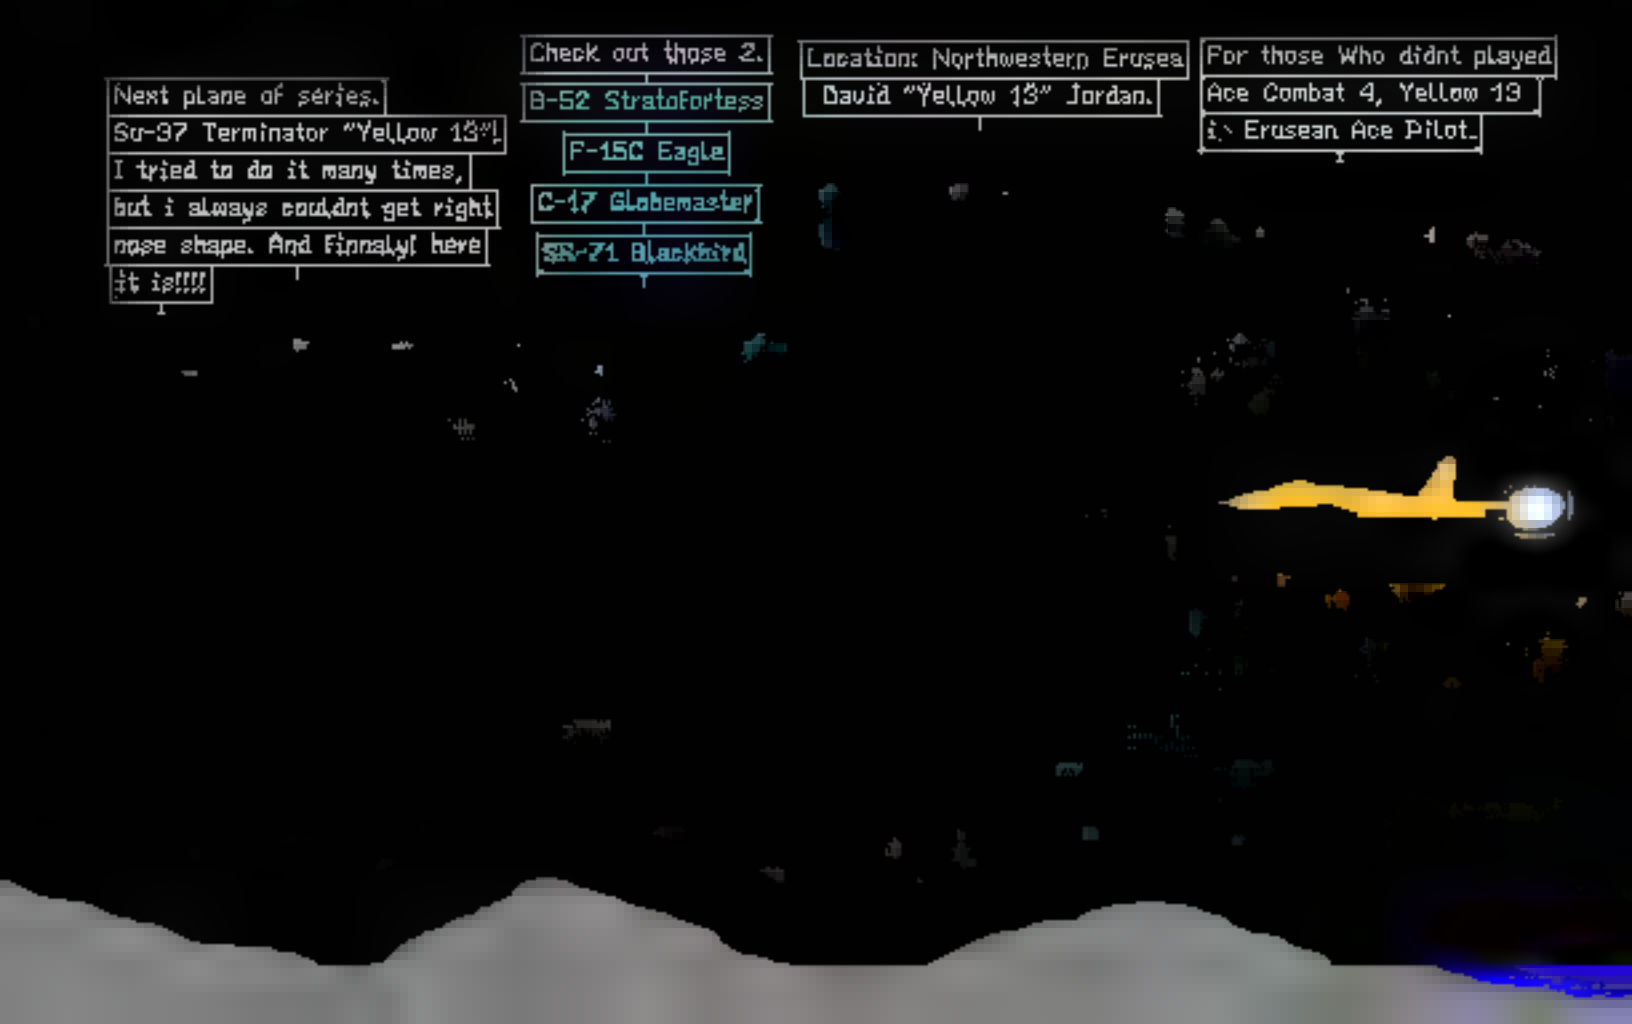
4) Add Flavor



The original Snow Cone Machine



press F and watch to persist



Next plane of series.
Su-37 Terminator "Yellow 13"!
I tried to do it many times,
but i always couldnt get right
nose shape. And Finnaly! here
it is!!!!
Check out those 2.
B-52 Stratofortess
F-15C Eagle
C-17 Globemaster
SR-71 Blackbird
Location: Northwestern Erusea
David "Yellow 13" Jordan.
For those Who didnt played
Ace Combat 4, Yellow 13
is Erusean Ace Pilot.

remeber to wait for this to
flash off everytime you make an input
input pad
Instructions:
1. input your number remember it is in binary
it is only 8 bit so you cant
go over 8 digits for the first or second number
2. press the + button to go to the next number
3. press R to reset it
REMEMBER IT IS BINARY NOT DECIMAL

-First decide which K-Cup you would like to use and then place it into the chamber.

-Then choose which size you would like, Either Tiny, Small, Big, or Large. (Spark it.)

-Finally wait until it is all poured into the cup until you take it out.

-If you want a second cup, wait until it says Ready To Brew AND until all of the drink is in the cup.

Re-fill ONLY with DSTW!

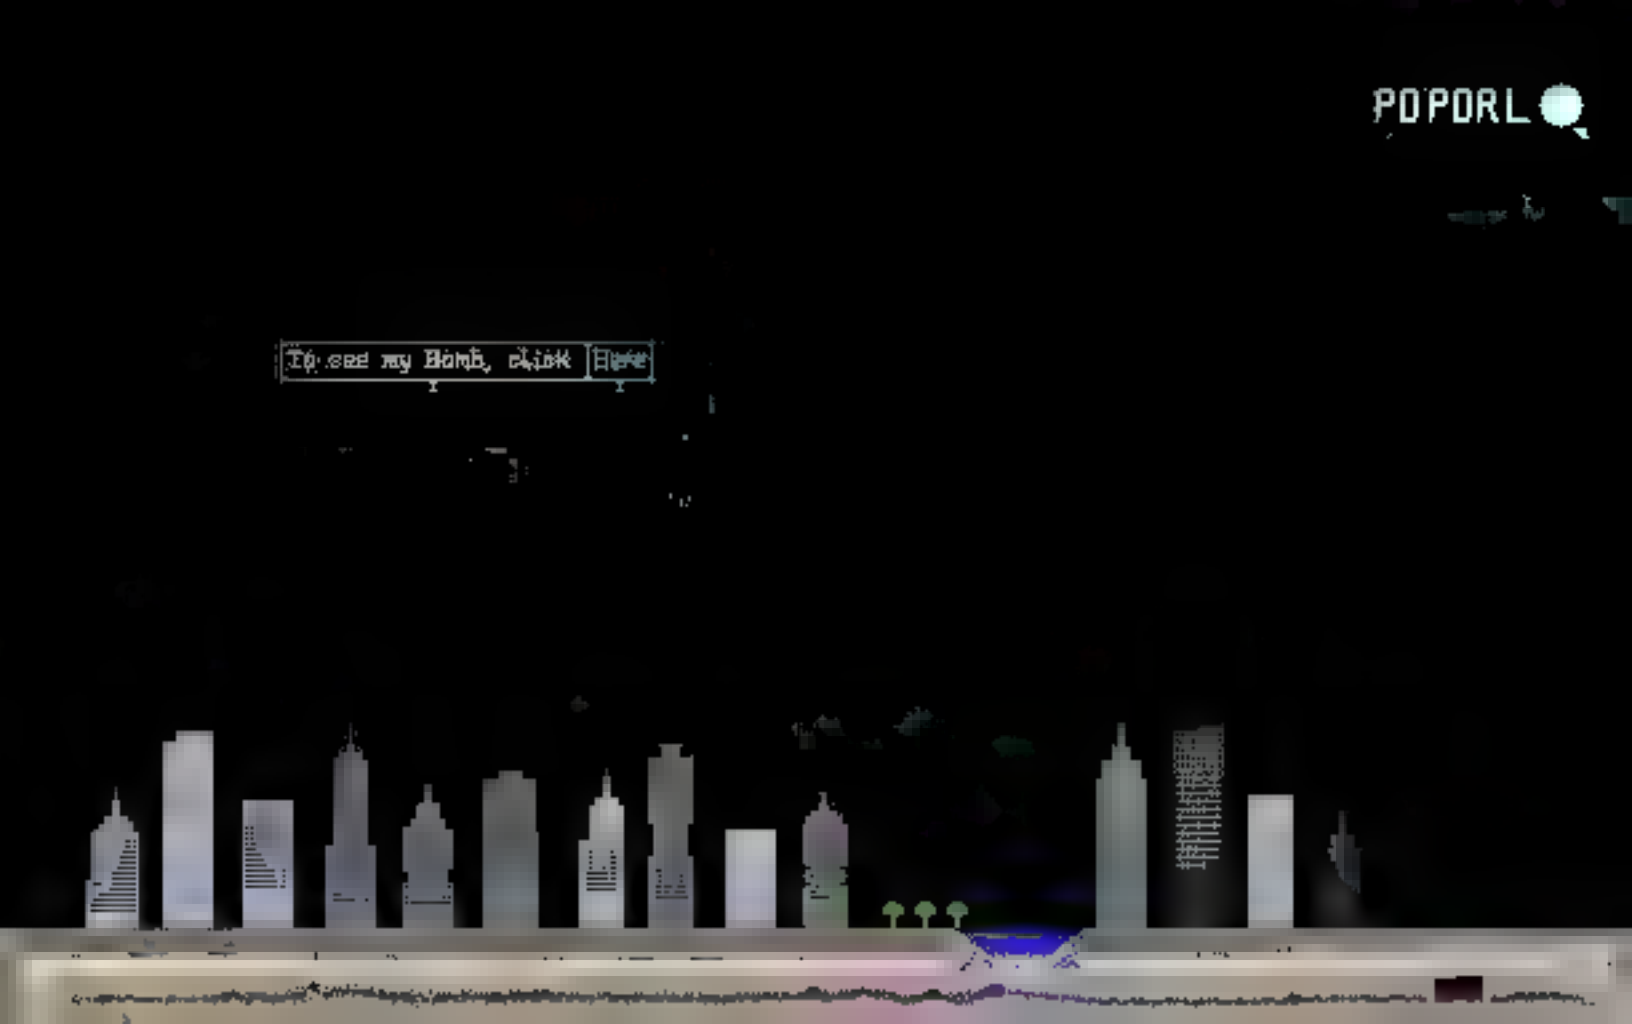
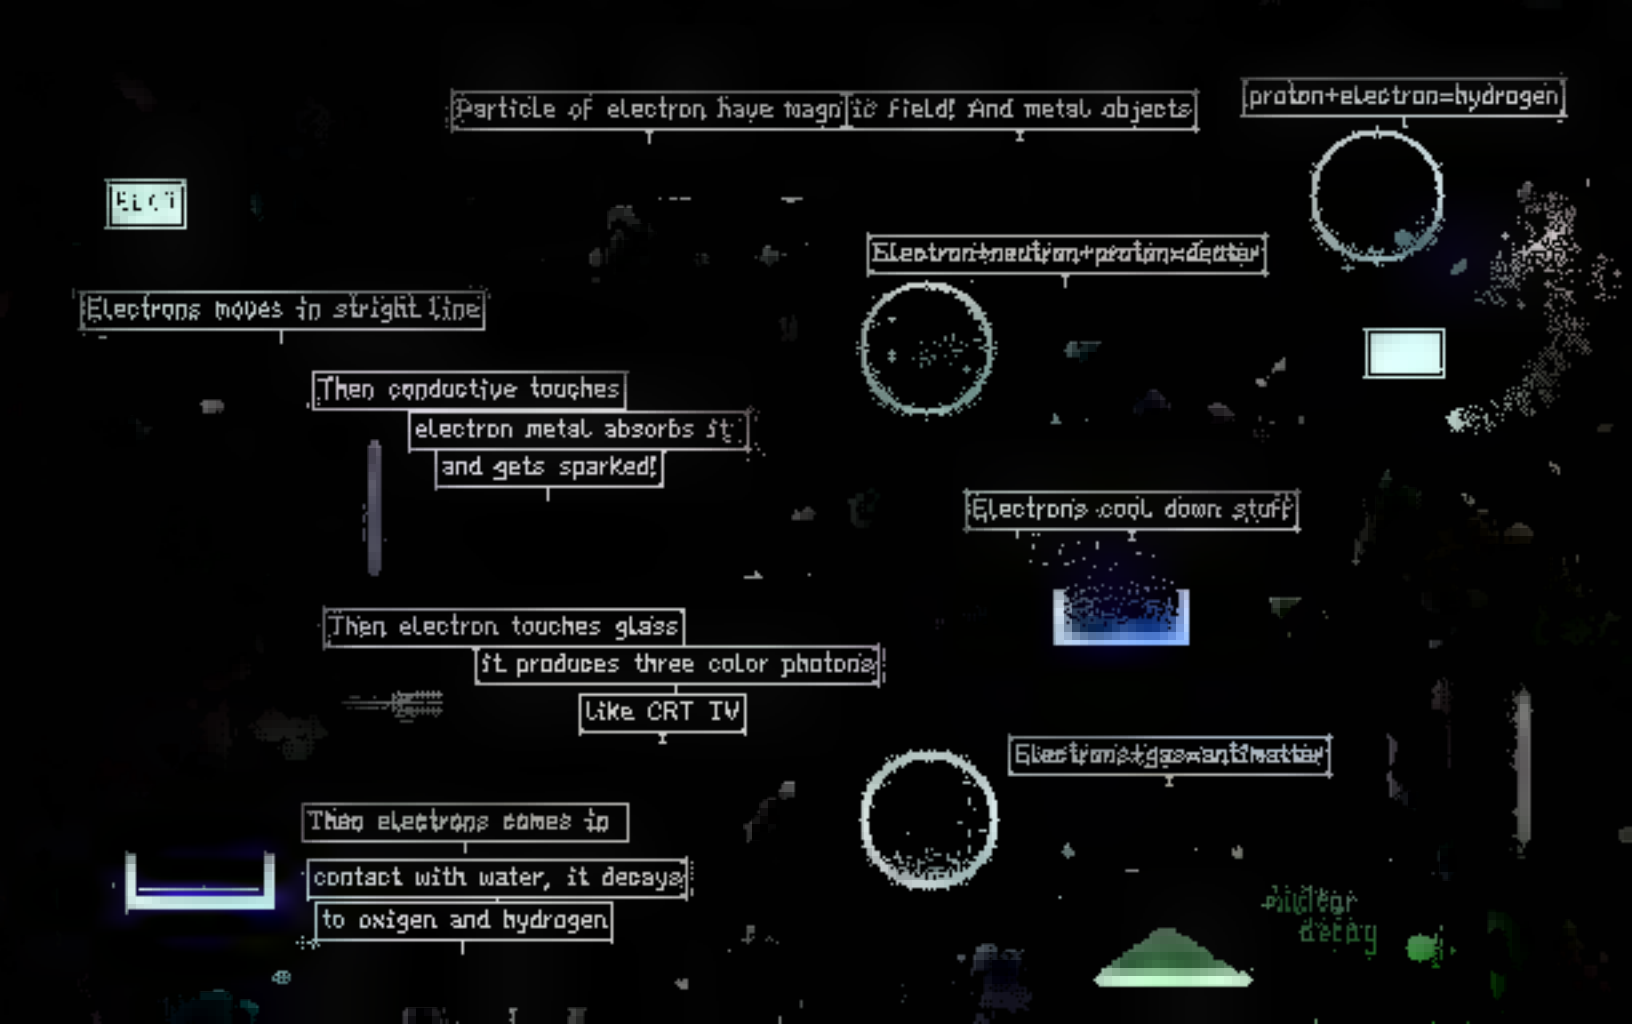
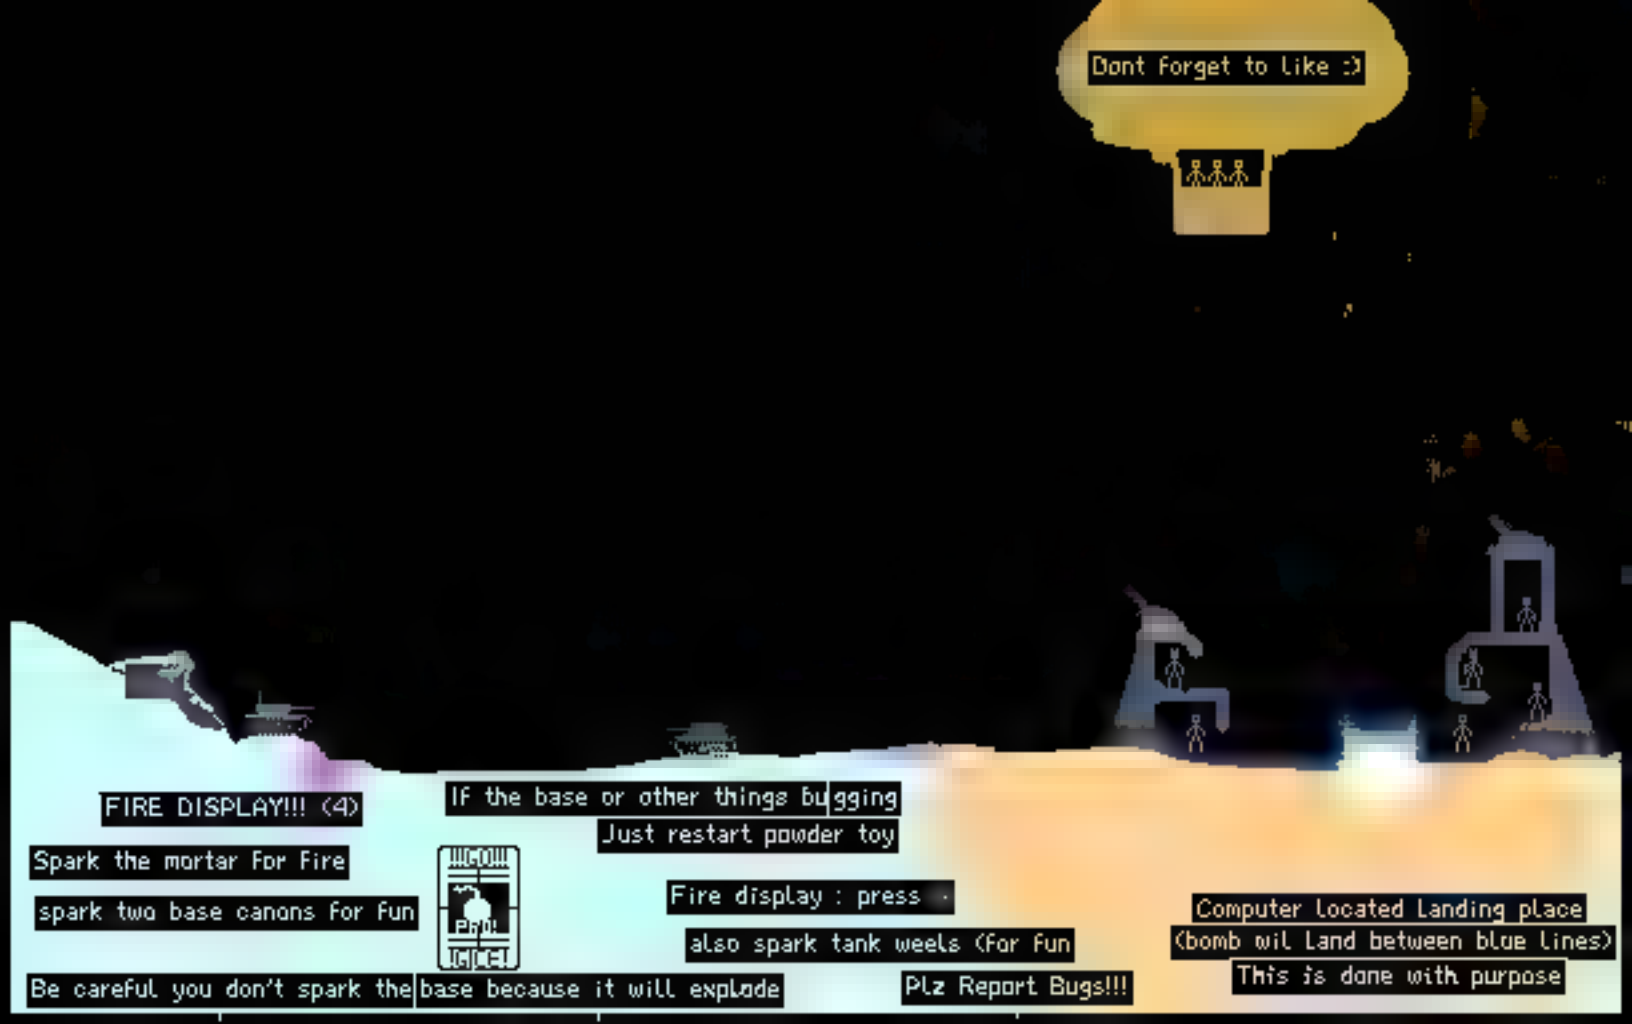
This makes BUG in powdertoy
So you need to reset it. Sorry



POPORL
To see my Bomb, click Here



Particle of electron have magn
ic field! And metal objects
proton+electron=hydrogen
Electron+neutron+proton=matter
Electrons moves in stright line
Then conductive touches
electron metal absorbs it
and gets sparked!
Electrons cool down stuff
Then electron touches glass
it produces three color photons
like CRT TV
Electron+gas=antimatter
Then electrons comes in
contact with water, it decays
to oxigen and hydrogen
nuclear
decay



Dont forget to like :)
FIRE DISPLAY!!! (4)
If the base or other things bugging
Just restart powder toy
Spark the mortar for Fire
spark two base canons for Fun
Fire display : press
also spark tank weels (for fun
Computer located Landing place
(bomb wil Land between blue lines)
This is done with purpose
Be careful you don't spark the base because it will explode
Plz Report Bugs!!!

guess whherre ive been?
..... itts why ive been gone
----- the hospital.
I was hit by a semi truck
When i was with my friends
the semi pulled out when the
light was at red and he hit us
- error
i broke my arm wrist and my
foot.
so i cant draw or make stuff
for a while
all i can probaly do is publish
my done saves
It's ok now I can get back on
cuz I can use both hands now.

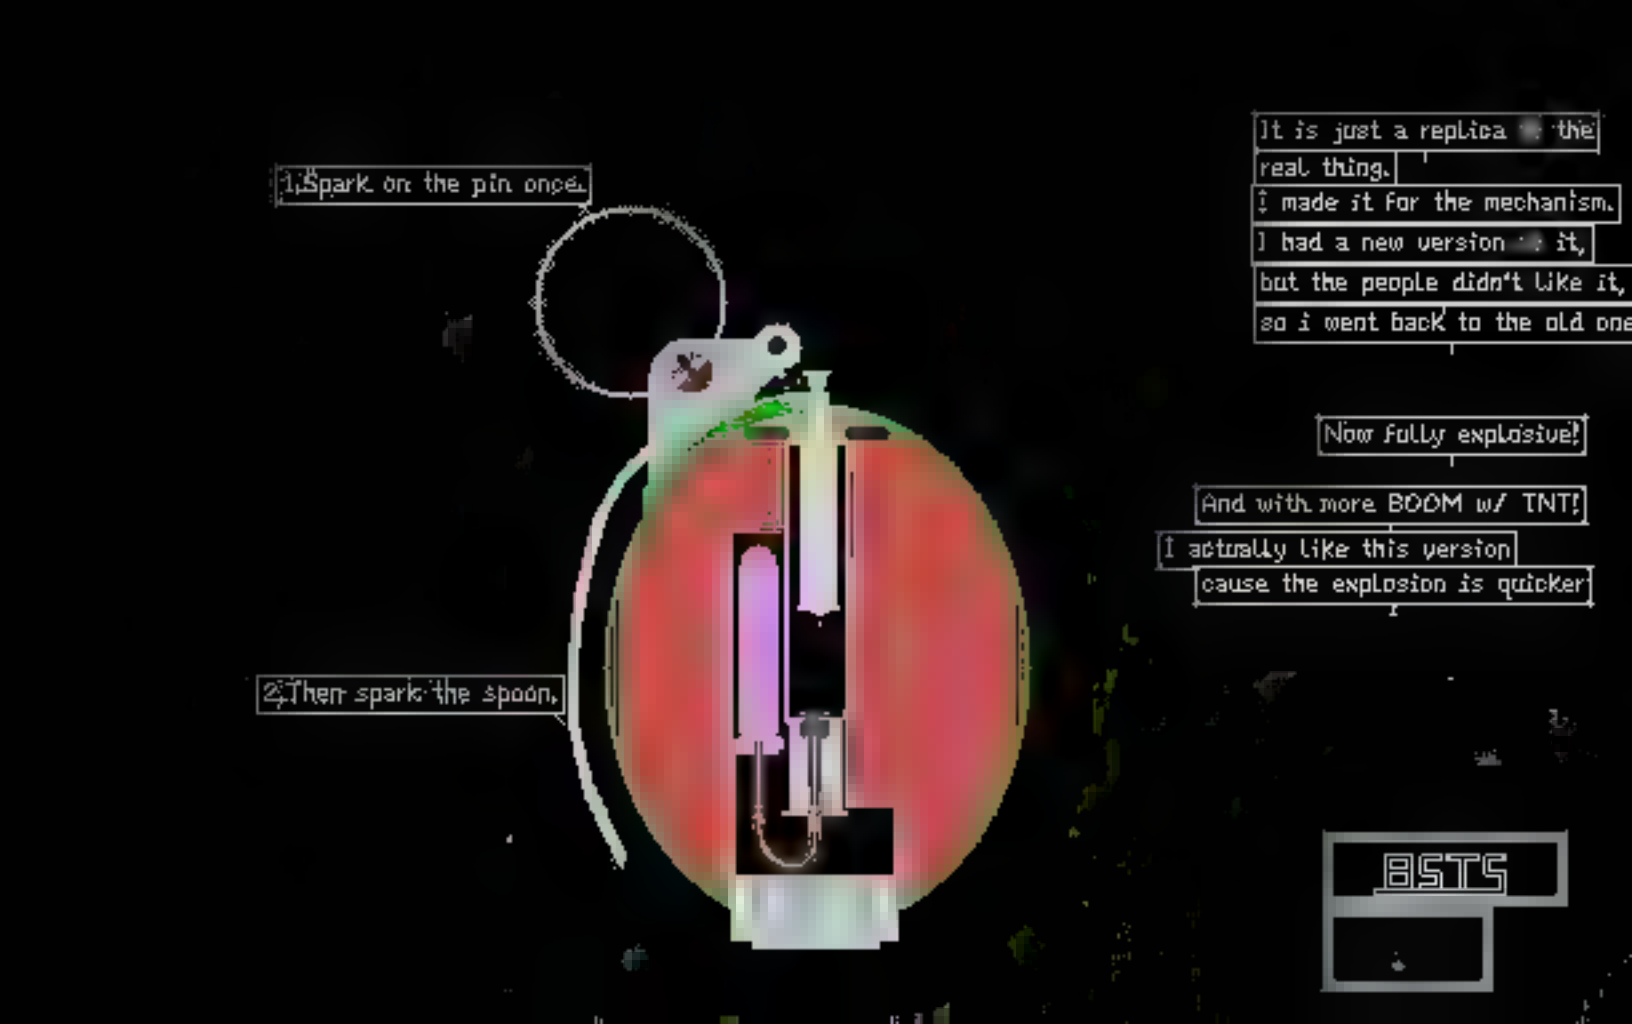
CREEP
HUNT



1. Spark on the pin once.
2. Then spark the spoon.
It is just a replica of the real thing.
I made it for the mechanism.
I had a new version of it, but the people didn't like it, so i went back to the old one
Now fully explosive!
And with more BOOM w/ TNT!
I actually like this version cause the explosion is quicker

The Big Bang - psharpep

Creates a very accurate model of the universe starting from 1 pixel of Singularity.

To adjust the size of the quantum flux that created our universe, edit the SING's tmp. Anything >30 is usually fine.

The pressure simulates both gravitational collapse and the outer limits of our universe.

If you look closely, more complex elements (CO2) are concentrated at the center, and others are on the edges.

if you like this *please* go

like the safe by super_mario

if anything interfers with the

lazer it will be destroyed

(idea came from supermario

but this is diffrent to the

version

try to put something in the

beam (destroyable solids)

Bullying does more damage than u think it does. cuz my bro's best friend committed suicide cuz he was being bullied so much.
Think the next time u wanna make fun of somebody or hurt somebody. cuz wat u do could cost another life.
think really hard before you do that.
PUT AN END TO BULLYING BEFORE IT COSTS ANOTHER LIFE!!!!!!!

Please comment

How to Quick Shade

1. Put what you want shaded

2. Press B

3. Choose colour

4. Colour half of the object
Or colour more sections for
better results

5. Chose a shade of the same colour and shade the other bit

6. Press

7. Press the smudge option

8. Drag in over the object
by holding ctrl. Repeat

9. You are done

dear haters,

i'm tired of you putting rude tags or saying mean things cuz you don't like a save. if you dislike it that much then y do u even bother saying anything? a downvote is sufficient when you don't like it. if there's a bug then okay point it out. but don't be rude about it. get wat i mean? sorry, but i'm tired of seeing all the rude tags and comments on saves. not just my own, on everyone's. plz stop doing this. it's not okay.

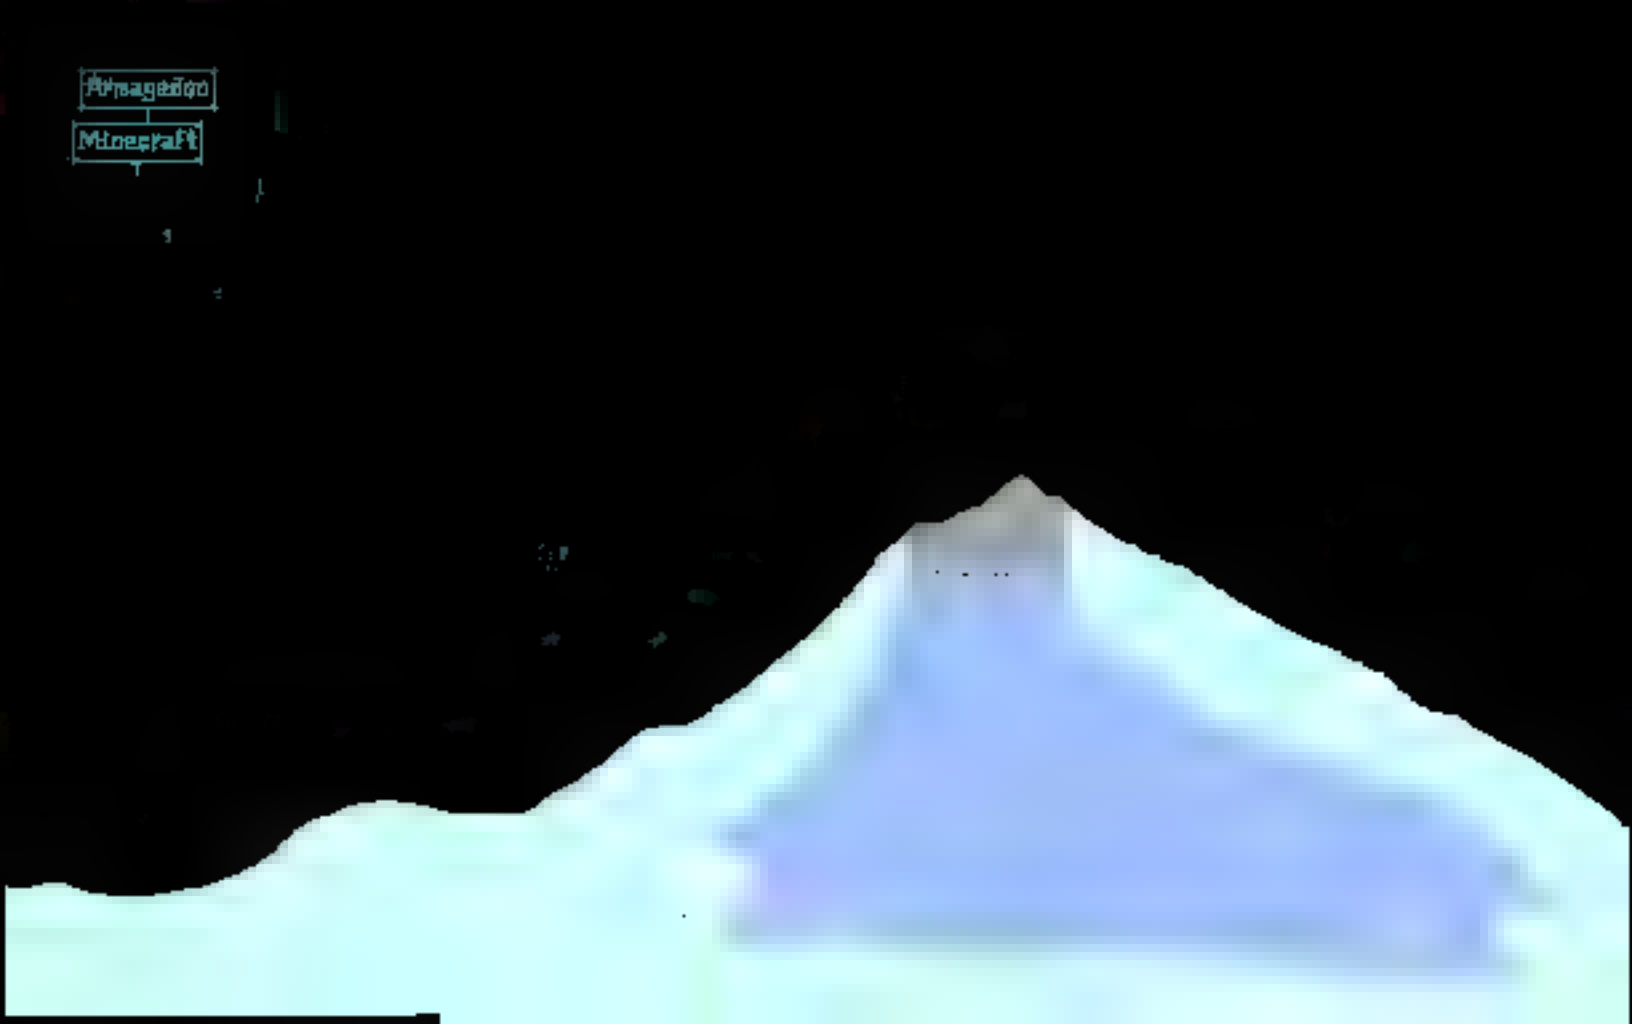
Next_Gen_Powder

you know, i joined powder toy 2 years ago and powder toy's general purpose was just to have fun and blow stuff up. haters weren't much of a problem and quality wasn't the most important part of saves. front page wasn't as important as it seems to be now... powder toy seems to be corrupted. and no, not by new people either. just by people who can't be civil anymore. am i the only one who noticed that? just curious.



Armageddon
Minecraft

Newtonian Gravity ON

Hiccup

Sound Detector V.2.

Operation Manual:

Apply pressure waves (sound)
around the device. The device
will automatically record and
display the three levels of
pressure detected in the area.
To reset, spark the blue key.
The device's three receptors
can register both high and low
pressure, making it very
consice with each reading.

Use, Copy, Save, Enjoy. TY:

My Homepage
Works as an insulator
Works as a shield, resists impacts, and dents.
Can change the color of light
Keeps things hot/cold
Flammable/water resistant
If you want you can join
tavnindar and I in campaigning
for TPT's new element! ;)
JMAN42
THANKS FOR FRONT PAGE!!!
Element name: PLAS
Low melting temp
Similar to GOO
Deforms easily
Binding material: when it's in
oil it creates plastic. (WIP)
HEAT

If you want to be apart of this game, please, use the below link to choose what team and what soldier you want to be. How the game works: Every 'battle' you're general will choose whether he/she is offensive or defensive. This will be a major role in strategy. The health bar goes down after each battle and if the soldier dies, he is painted in the color of the team who took him out. Medic heal after each 'battle'. Sign now!

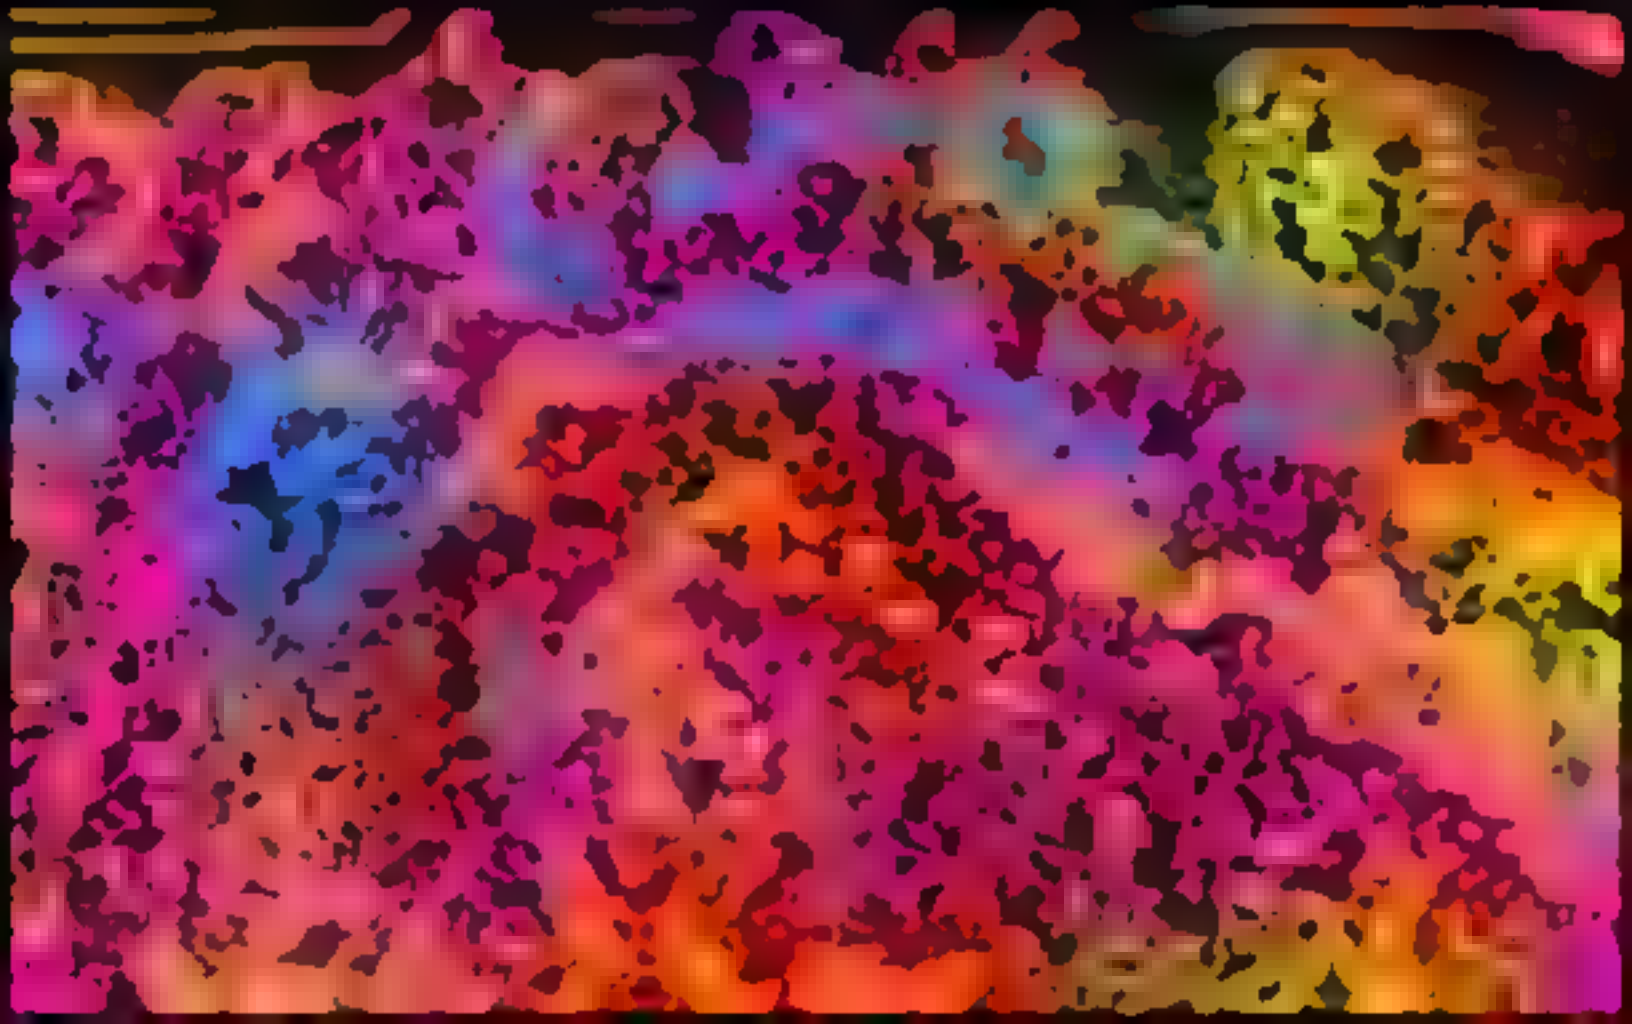
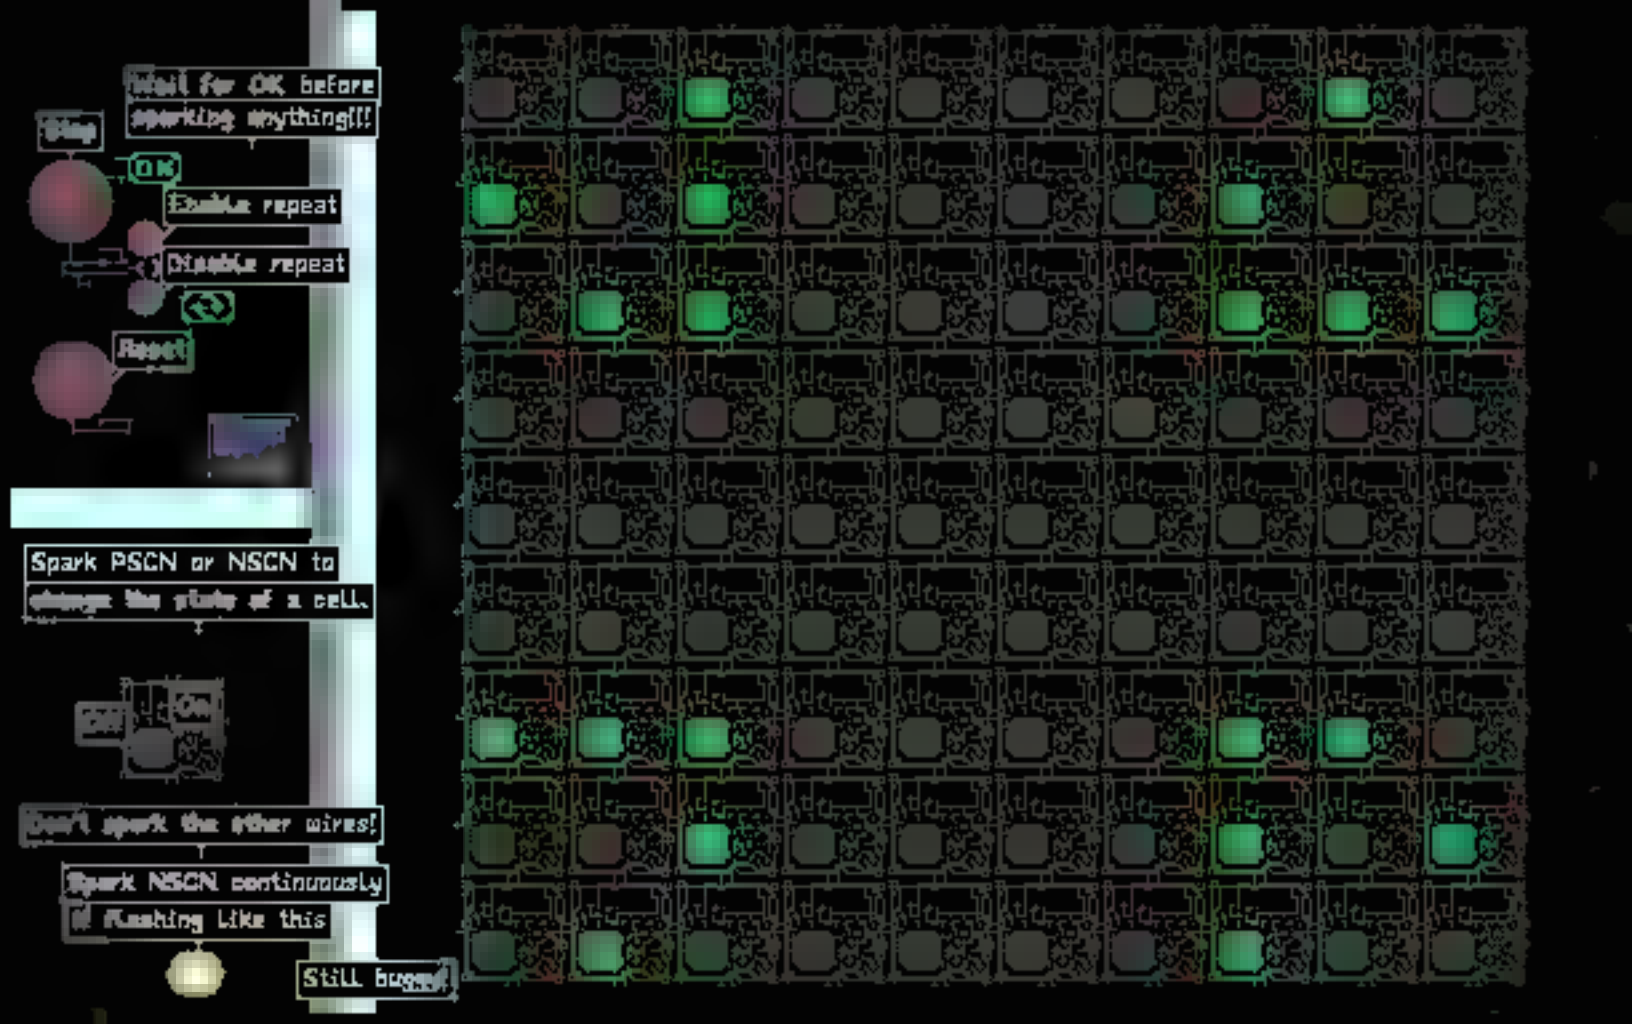
First:
type these three commands into the console (~)
tpt.el.conv.gravity=1
tpt.el.conv.falldown=1
tpt.el.conv.hardness=0
PHOT THDR ACID WARP GBMB
Most powerful "acid"...
It will literally go through anything.
If you use this, don't take credit for yourself!
To make conv solid again, use the same commands, but use 0 instead





Wait for OK before
sparking anything!!!
Sting
OK
Disable repeat
Disable repeat
Reset
Spark PSCN or NSCN to
change the state of a cell.
Don't spark the other wires!
Spark NSCN continuously
if flashing like this
Still buggy!

THE LASER MUST BE BUILT DURING THE COMPETITION

number of entries

08

Design a laser that can cut through a certain peice of titanium in as short as an amount of time as possible

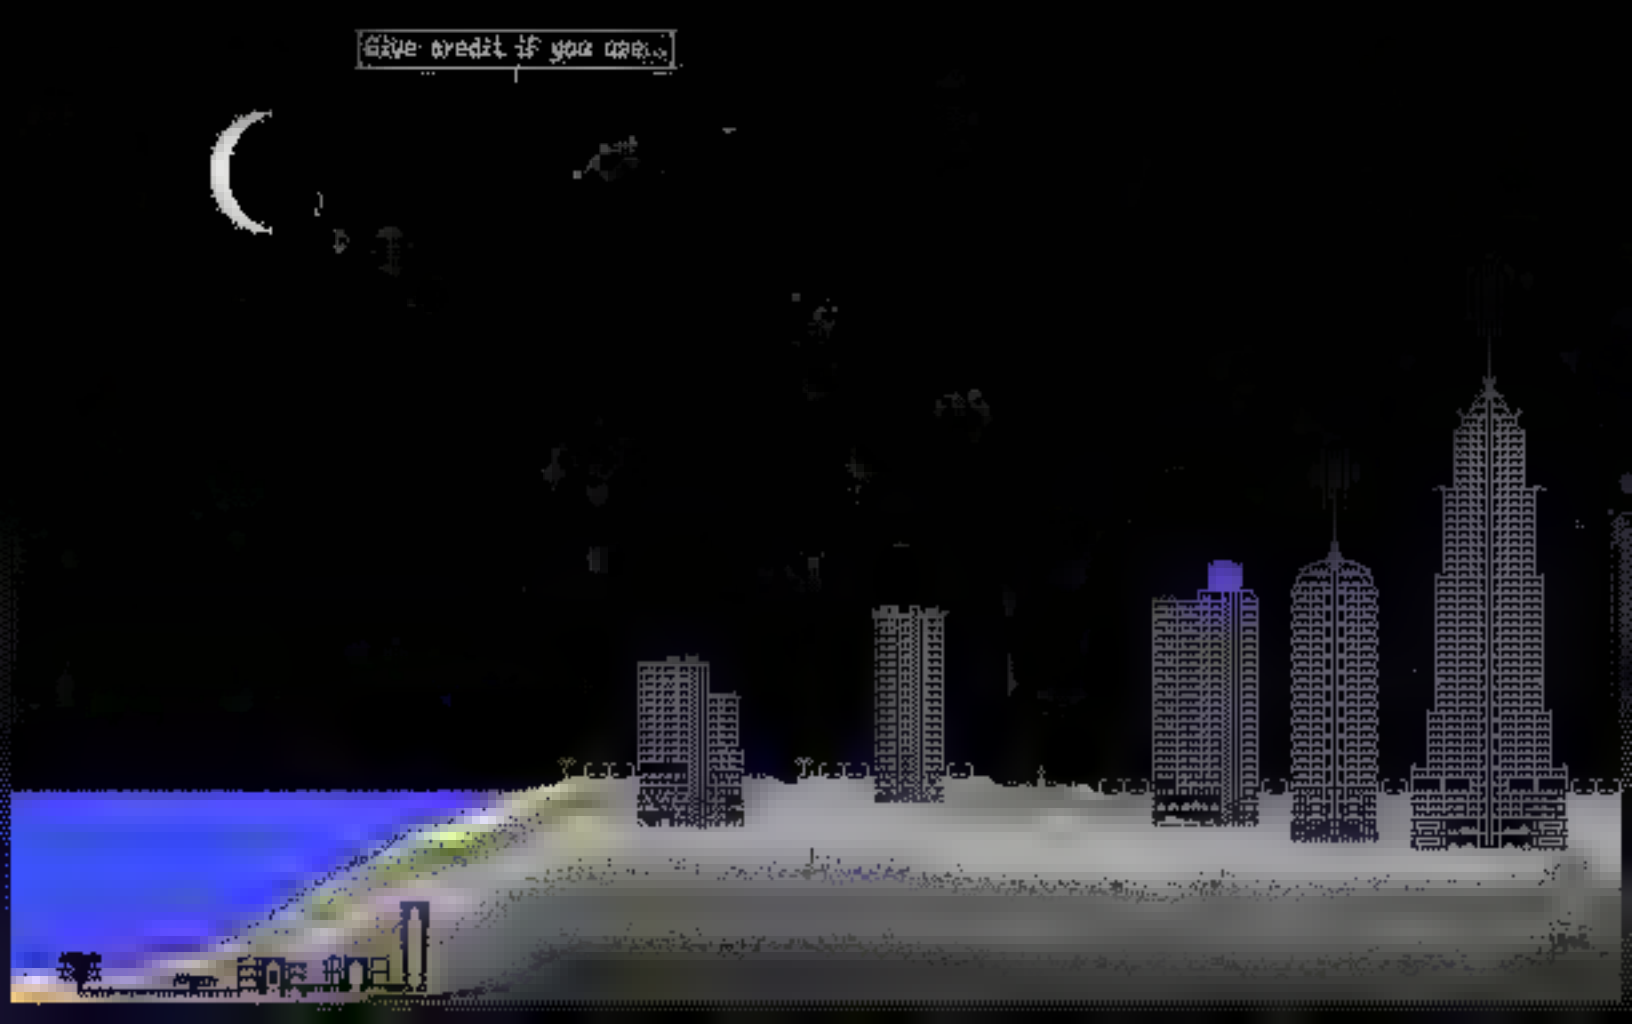
points:

For every function that the laser has (not including on/off= plus 10 points

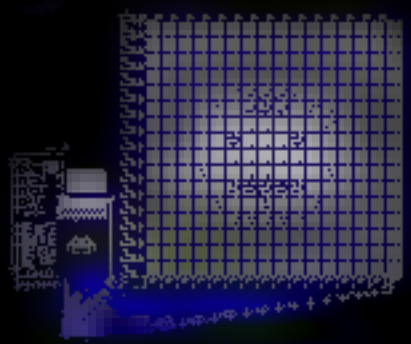
timewise, you start with 100 points, every second your laser takes to cut through the titan, is minus one point

art depending on how good is plus 10-40 points

1000m tower 2014-2016
London eye
port and oil rig



Give credit if you use

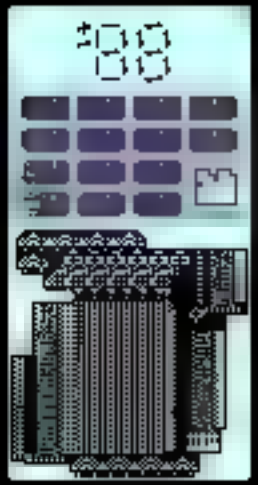


Can only work problems up to a sum of 18 or -9

This isn't competely instant
Please take your time during problems or it won't work.

Attention
If a wrong answer pops up try again before flaming in the comments, but the second time slow down.

Calculator V 2.0
Not preprogrammed, actually solves



If you know how this works and you find a legit problem besides "7+3=13 da fuq -1" Please leave me a comment.

Time for a FIM Pony contest.

Winner

DJspiderbee

Make a custom pony that might be seen in FIM. It can be good or bad.

Rules

1: Must be ALL your own work.

2: Can't be a pony already made.

3: Has a custom cutie mark that represents itself.

4: Have fun.

Ends August 5.

Pegasister and proud

Liquid hydrogen new element

Same properties as deut.

TPT ideas page 24

NEW ELEMENT: NITROGEN

It isn't flammable, but reacts with electrons to form nitr and can be cooled into CLNI (would be same as LN2) and look like unpressurized glow.

Credit 2 sentinal-5

Credit to duncanbro

NEW ELEMENT black powder

A hotter more explosive mix than gunpowder.

(Ambient heat OFF)
PLEASE NOTE: This is just a model. (Meaning it's art).
I added BHOL with max temp.
It's not powerful but it will do some damage.
The Orbital Cannon is done!

The small projectiles that shoot out above are to simulate the ball bearings, except these are high-explosive ball bearings. :D

THIS IS A REALISTIC MODEL OF A M18A1 CLAYMORE. IT IS ACTIVATED BY MOVEMENT INSIDE THE LASER. IT ONLY DETECTS SOLID ELEMENTS, JUST LIKE THE REAL THING. ALSO LIKE THE ORIGINAL, THIS BOOBY CAN BE SET OFF WITH A REMOTE CONTROL.

INSTRUCTIONS:

PLACE THE CLAYMORE.

PLACE A SOLID ELEMENT IN THE PATH OF THE

REAPER

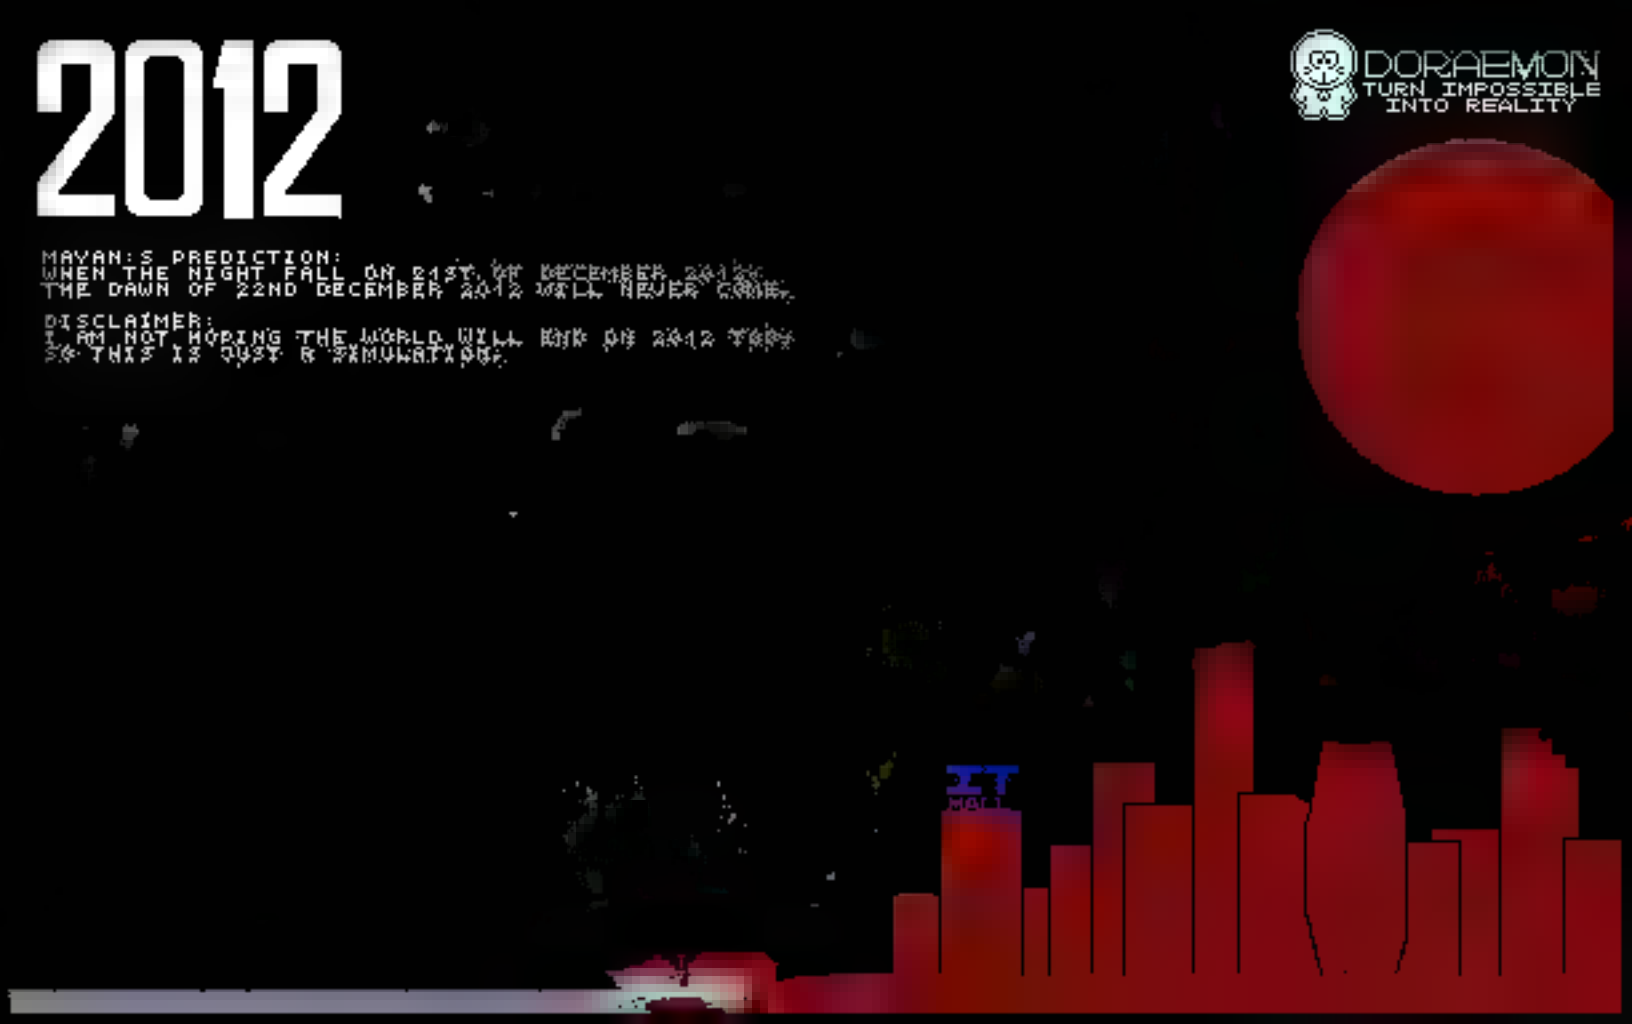
2012

MAYAN'S PREDICTION:
WHEN THE NIGHT FALL ON 21ST OF DECEMBER 2012,
THE DAWN OF 22ND DECEMBER 2012 WILL NEVER COME.

DISCLAIMER:
I AM NOT HOPING THE WORLD WILL END ON 2012 THIS
SO THIS IS JUST A SIMULATION.



The world is not ending this year. The Mayan Long Count ends on "Dooms Day".
However, like our calendar we simply go to the next year. It is not funny
to frighten people with doom stories so if you do that, stop.

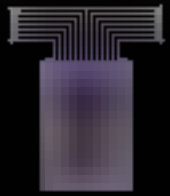
Heat simulation v. 34 must be on but you should turn it off if you want to show it to the child
START
Ambient heat must be off
It is somebody's hand
Some hits can be unsuccessful, don't worry, You are just a human
Homepage
GRAVITY GUY
It is basic for blood
Try it in persistent display

This can give energy
to more electricity alimented
machines than a normal one

The generator can be replac with any other generator.
The concept is the multi wiring system not the generator
Bigher plated wires are higher is the voltage of them

OFF

Now with 15 wifi channels



Free to copy on cities and other!

To request a Logo leave a comment telling me what you want in the most detail possible. Have a good day!!

I will be makeing Logos For Free for anyone. You might have to wait For me to finish other peoples Logo before I start making yours (oF course) Thanks for viewing, plz give a thumbs up!

IF YOU ARENT HAPPY WITH YOUR LOGO, TELL ME AND I WILL TRY AGAIN. Thanks!!

Click this to see Logos Ive made or if Ive finished yours yet.

Finished Logos

ChrisX0981

Oh God, no.
What happened to TPT?
you see these saves a lot,
but, they couldn't be more true
TPT is turning into some
Game driven by 10 year olds
Who smack their head against
the keyboards and spell
simple english wrong.
Sorry If I'm Cynical, but
Frankly, that's what it's coming to.

TerraFormation Competition
heat and water sim. on
You have to build a safe reactor, and extract the water to drink and to make air, try to make systems to extract valuble minerals.
Pressure: 0.00

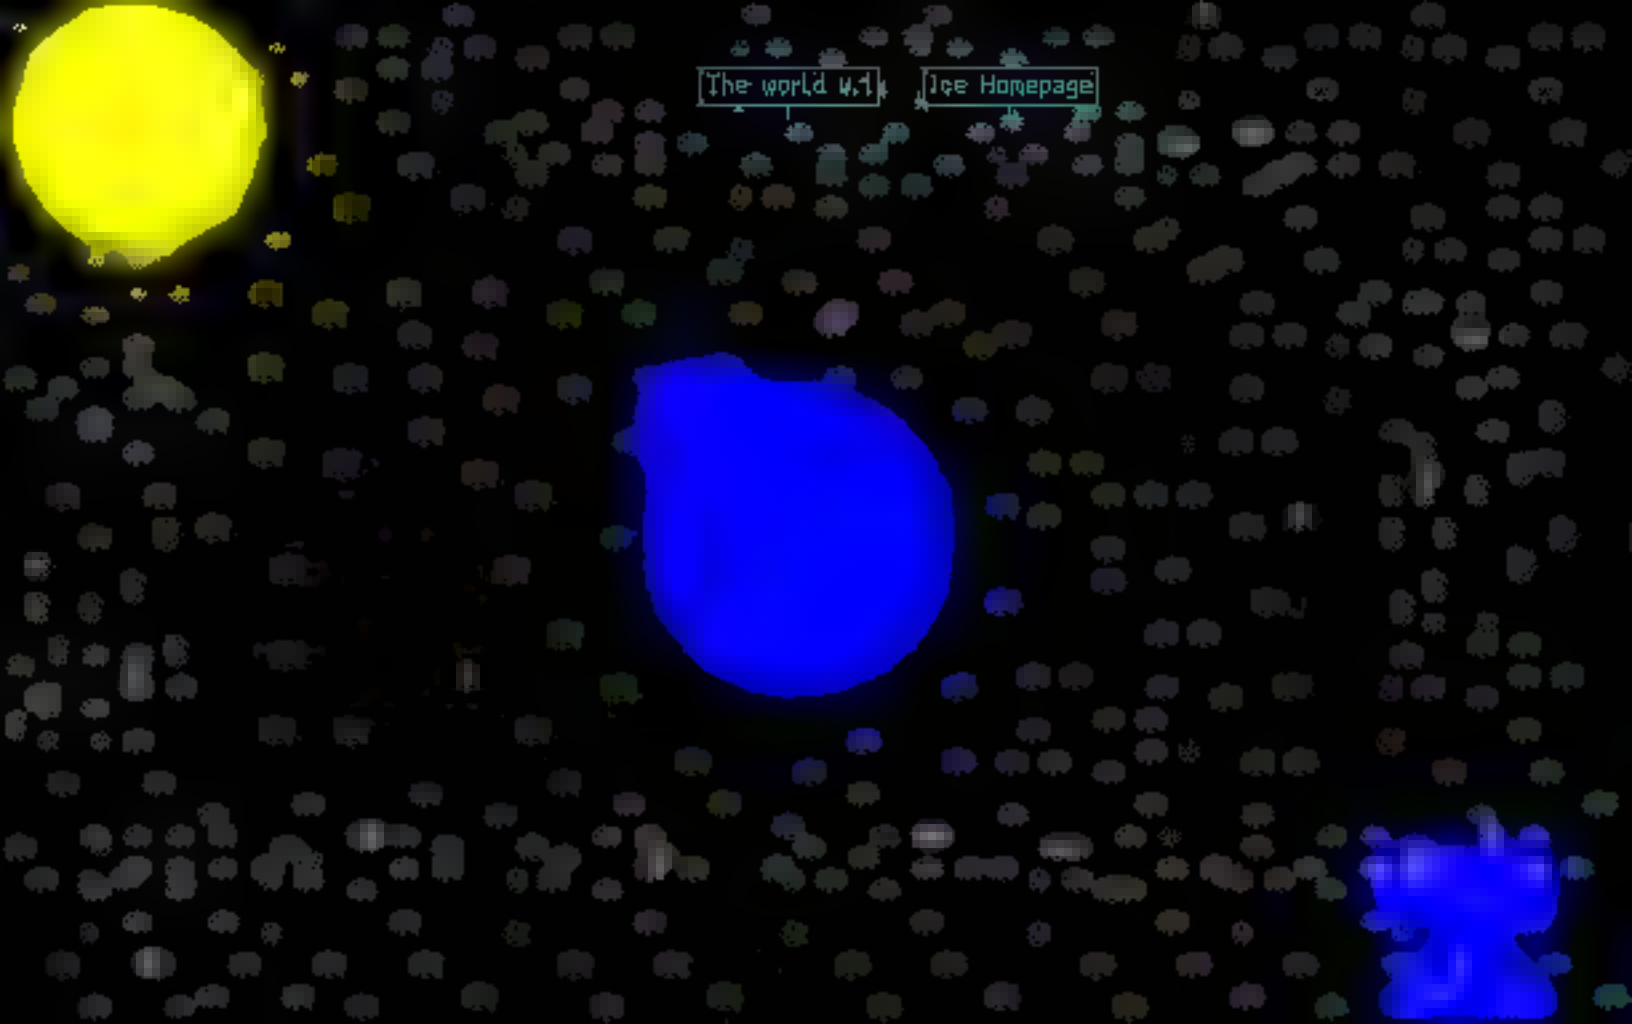
GRAVITY GUY

There is something under ice!
Use HEAT tool.



The world v.1
Ice Homepage

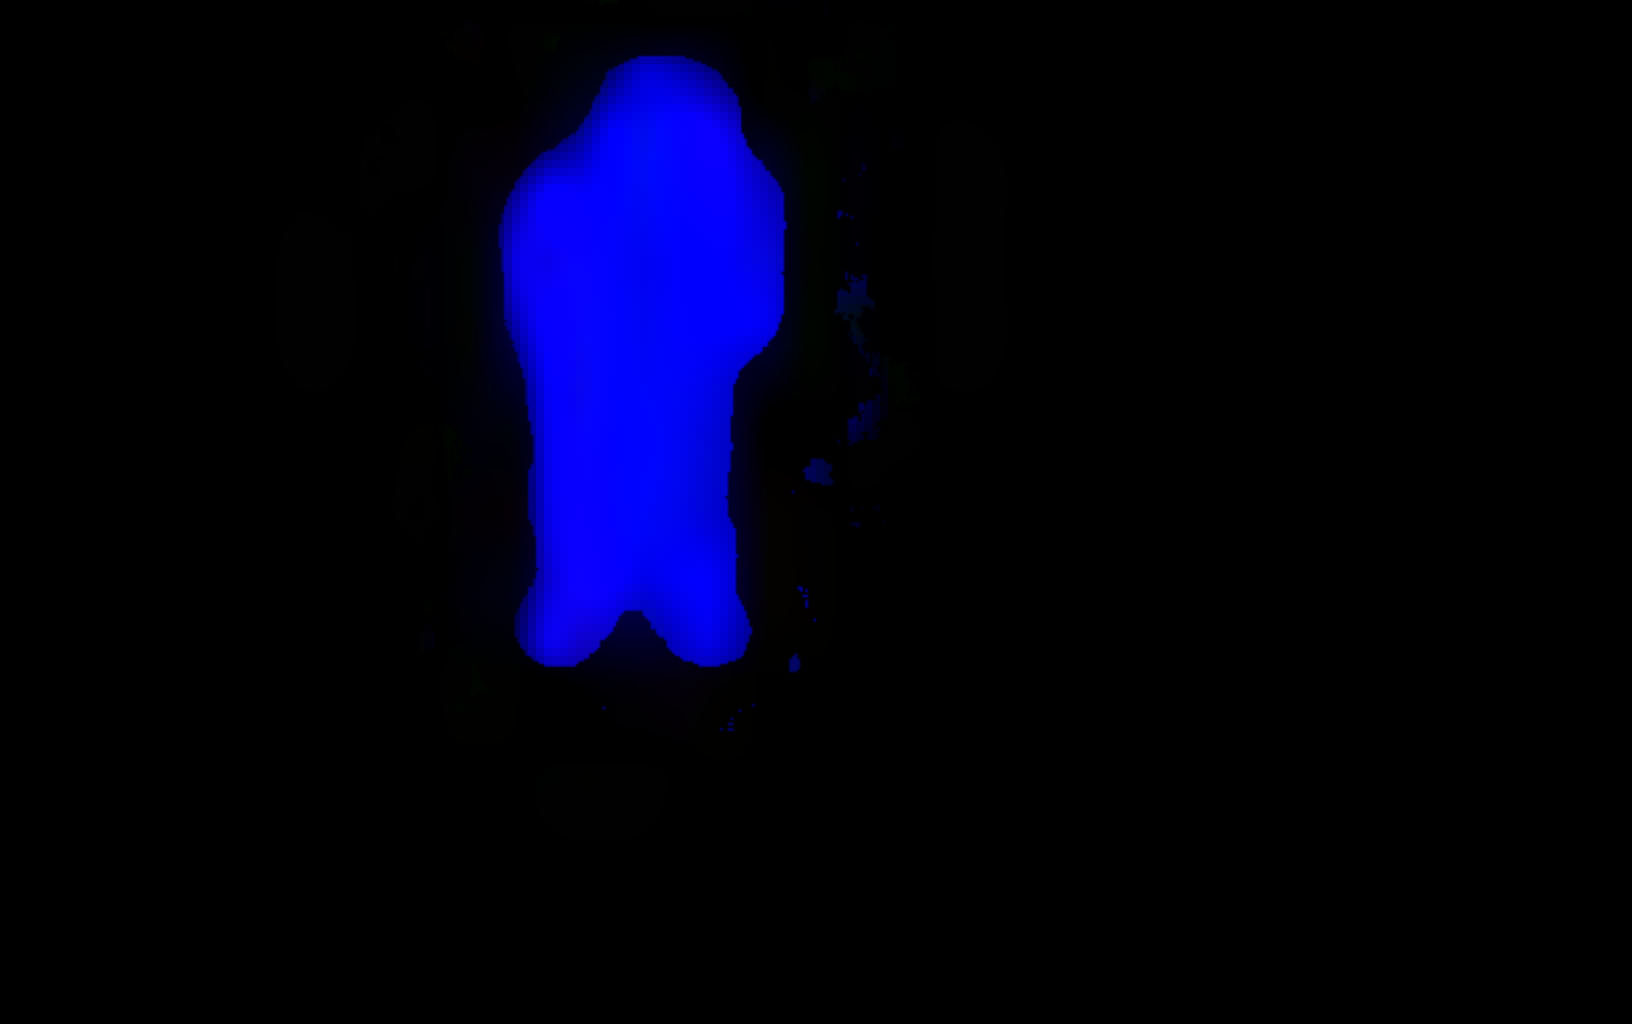
How endless fusion works:

when exot explodes it creates
electrons which then mix with
the neutrons from hydrogen
fusion creating more hydrogen
which fuses again...continuing
the cycle

I made the exot explode
immediately by typing into the
console: !set tmp2 exot 60000

KEEP AMBIENT HEAT OFF!!!

Please look at my other saves



This is my 4th save! :D

Use spark (SPRK)

Spark "New" after every turn

R = Rock P = Paper S = Scissors

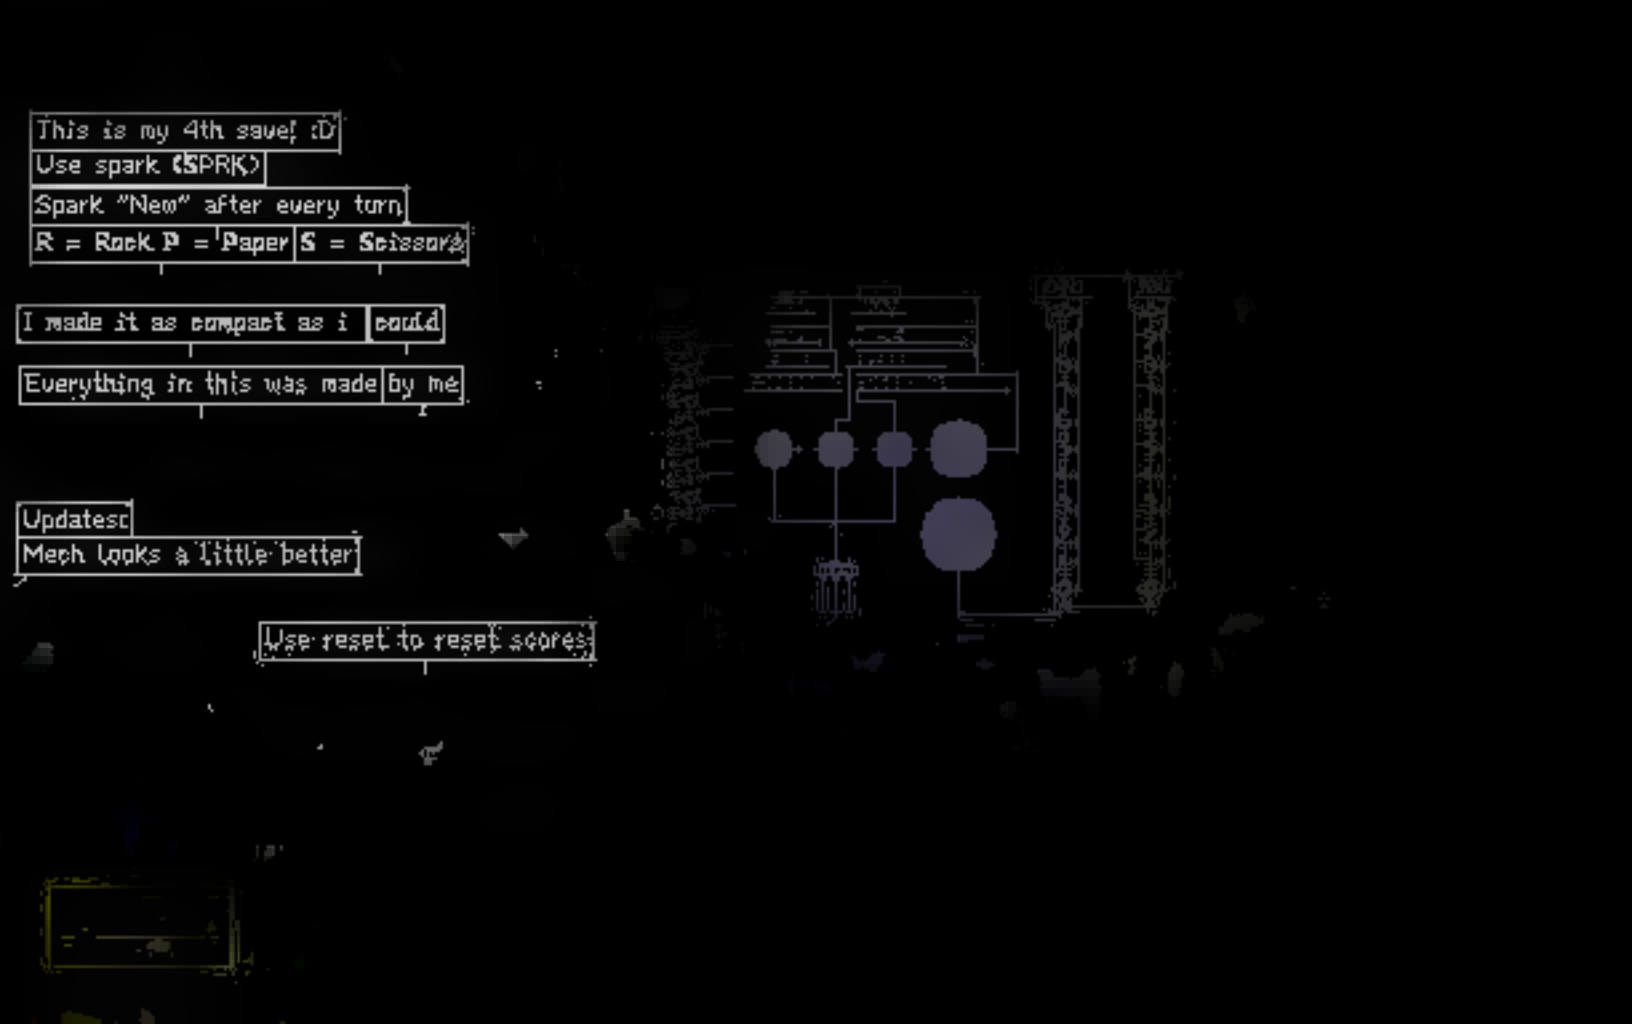
I made it as compact as i could

Everything in this was made by me

Updates:

Mech looks a little better

Use reset to reset scores



Pixel Club
We maek teh pixlez

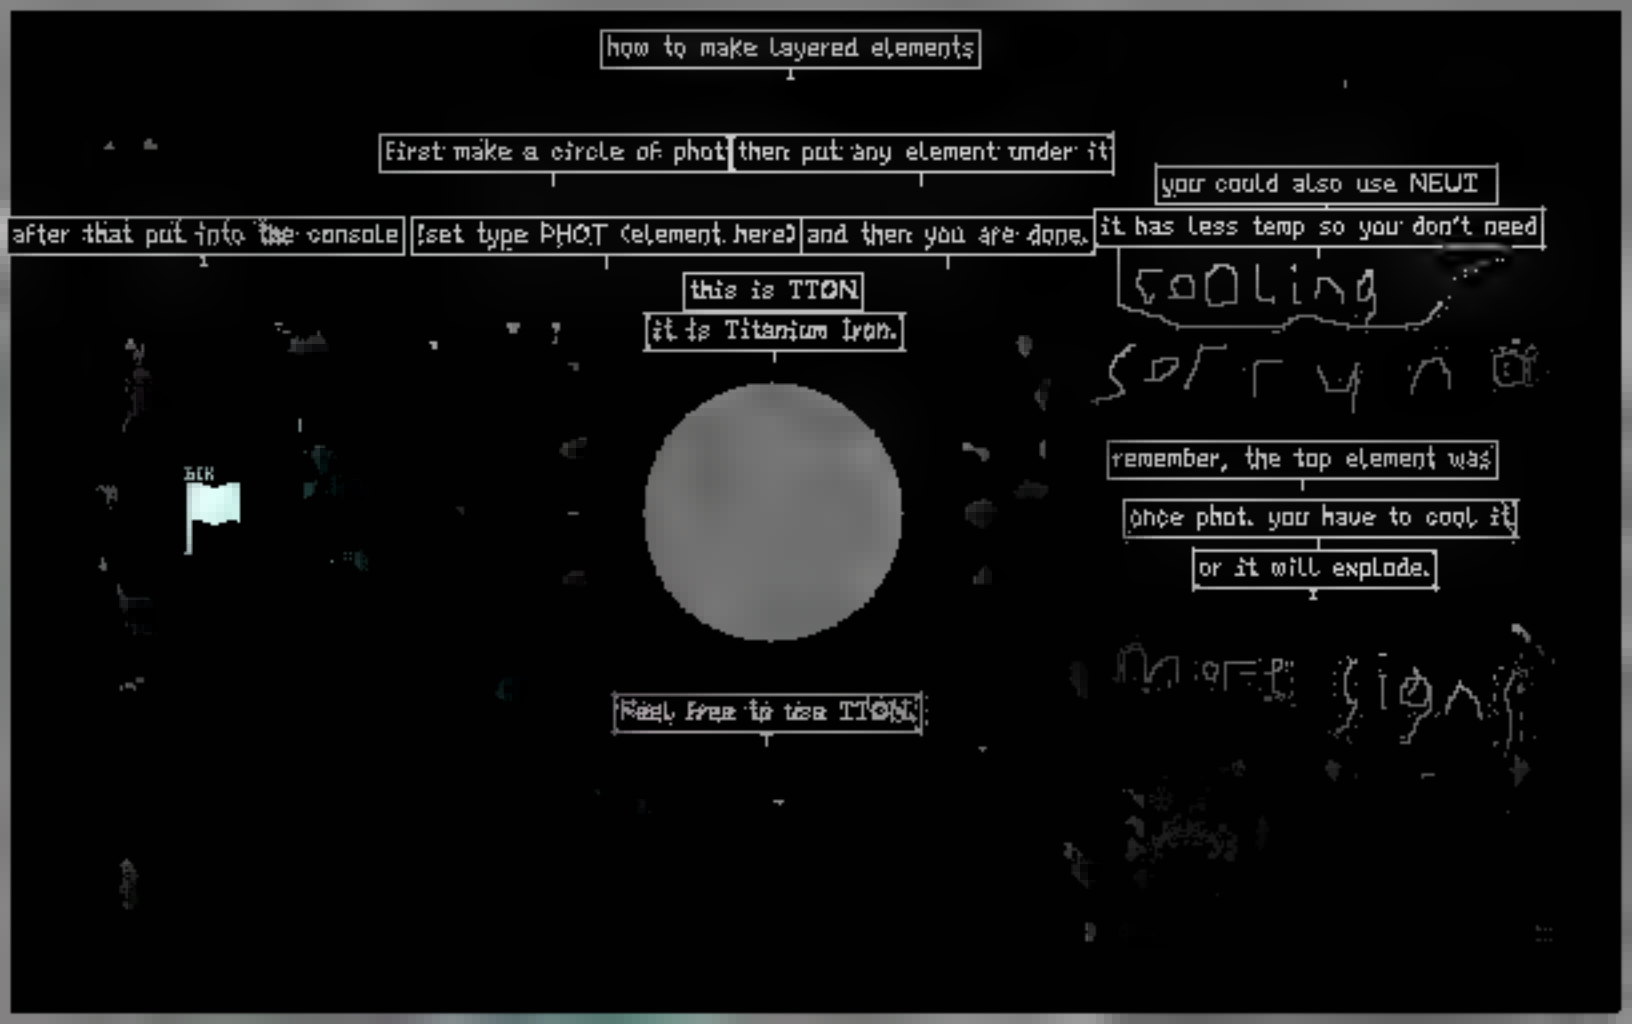
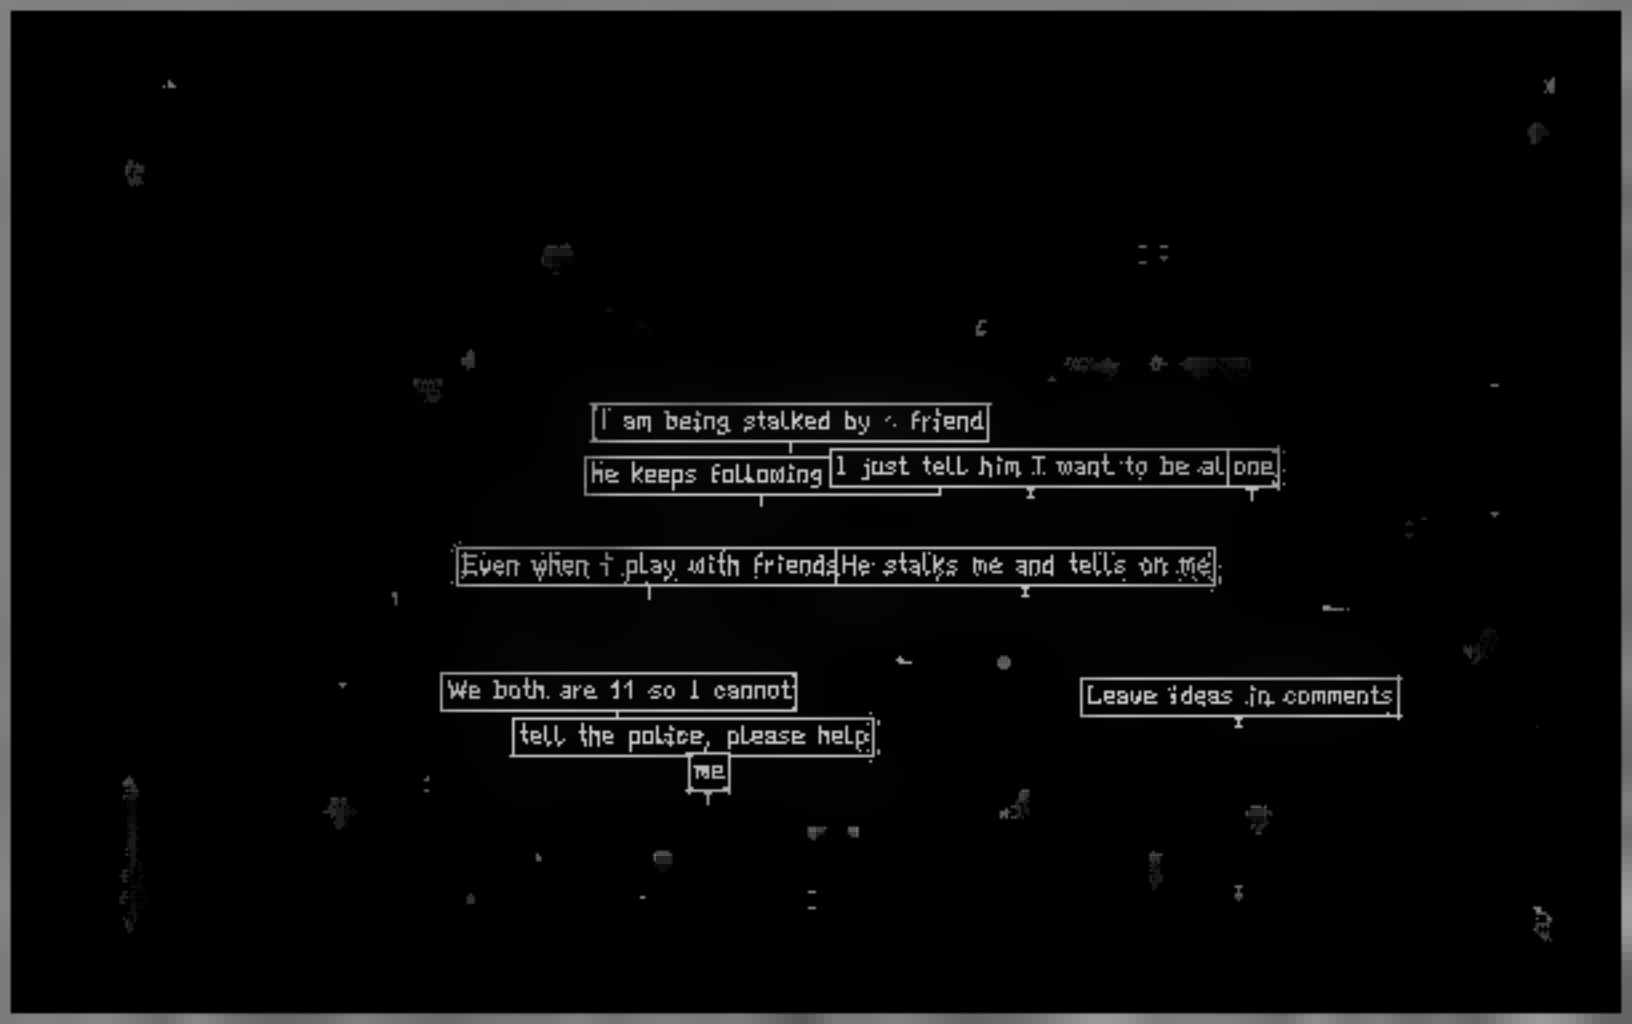
CIRCOVIK
Place Bomb Here
Don't use cheat elements such as BOMB, ACID, SING etc...

TGT



how to make layered elements
First make a circle of phot
then put any element under it
after that put into the console
[set type PHOT (element here)
and then you are done.
this is TTON
it is Titanium Iron.
Feel free to use TTON!
your could also use NEUT
it has less temp so you don't need
cooling
remember, the top element was
phot. you have to cool it
or it will explode.

The Sap Bomb
This unique explosive is the first to combine the power of the fusion reaction with the new layering.
I am 100% sure that this is the first one of it's kind and I am honored to be it's creato
Hope your guys enjoy!!!



I am being stalked by a friend
He keeps following
I just tell him I want to be alone
Even when I play with friends
He stalks me and tells on me
We both are 11 so I cannot
tell the police, please help
me
Leave ideas in comments

Psts is a secret element which only stays in game while under extream heat and pressure. -ve pressure turns it to brick which then melts. So does 0 pressure. To stop this, ttan is placed at the back of the mesh to hold the pressure in place and to stop it dissipating. It also stops -ve pressure comming from behind and destroying the mesh. -Ingenuity

In the reactor, DUST gets converted into FIRW by neutrons. The FIRW gets ignited by heat or neutrons, explodes, and generates very much heat.

Some of the heat is used to generate electricy, which is used to make new neutrons.

Some [illegible] the heat is used to let YEST grow, and convert it into DYST and DUST.

Ambient Heat must be off!

Start Reactor (spark 2-8 sec)

Heat output

My Homepage

This machine generates STNE out of OIL, ELEC, NEUT, and CLST.

The OIL gets burned, and the smoke gets convertet into OXYG by PLNT.

ELEC and NEUT get combined into HYGN, and HYGN and OXYG get burned, creating WTRV.

WTRV gets cooled down into DSTW.

DSTW becomes WATR on contact with WATR, and the WATR and CLST get mixed, and the PSTE gets burned.

The BRCK breaks into STNE.
